TRADE MARK
LACQUERET
HOUSEHOLD LACQUER

VARNISH STAIN

It Sells, Satisfies and Pays The Dealer a Handsome Profit

Lacqueret is a household lacquer designed to beautify and preserve old, marred or scratched furniture, dingy wood work, dirt stained floors and the hundred and one odds and ends around the home.

Composed of soluble, permanent colors, combined with a special elastic, hard drying floor varnish Lacqueret will not cloud or disfigure the natural grain of the wood. It possesses exquisite color richness and retains its beauty for an exceedingly long time.

Lacqueret is put up in cans with an eye-catching label that gets attention quickly and makes displays resultful. It is one of our most powerful sale producers.

In addition to Lacqueret, International Varnish specialties include a varnish, paint, stain or enamel for any and every requirement.

May we send you price list and full particulars on our complete line of Elastica products.

"Save the surface and you save all" *Paint & Varnish*

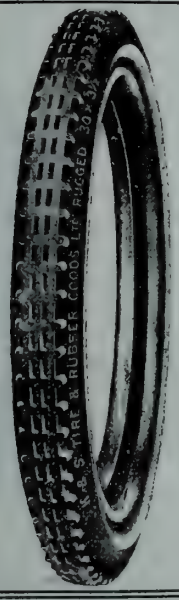
The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada



Highest Guaranteed Mileage in the World

K & S

The Heavy Ribbed Tread is similar to the highest priced imported Cord Tires. It acts like a Cord Tire and looks like one. Costs the same as any plain tire, but gives miles more service.

The Rugged Tread is a sturdy, non-skid of remarkable wearing qualities for truck and commercial purposes.

The Cross Country Tread is designed to give the motorist hitherto unsuspected service, and to add to the beauty of his car.

The Supreme Cord is the final achievement of tire supremacy. "Made of mileage."

"Ashdown's" offers you every convenience possible toward successful merchandising. Our chain of warehouses from Winnipeg to the Rocky Mountains is close to your hand. You have this swift, sure service available without need to wait for slow, uncertain service from distant points.

We carry complete stocks of the most reliable and salable hardware made. Our organization has set the pace in efficiency and service for over half a century; it is especially equipped to serve you effectively.

Look for the Diamond "A" trade mark. It's your guarantee of better quality, service, and sales.

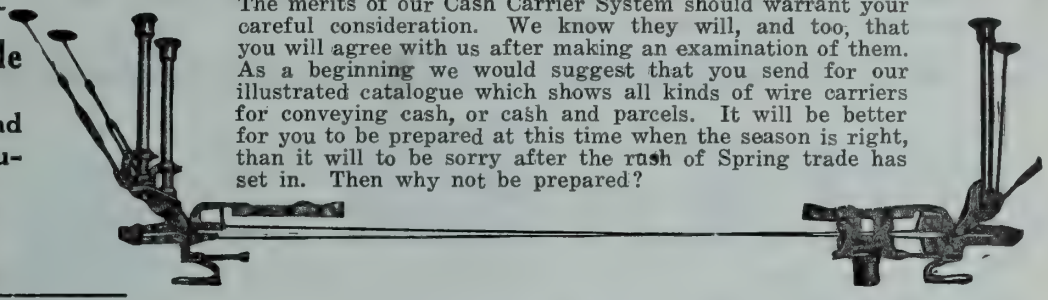
We Can Supply You--Quick, with *NORTHLAND SKIS*

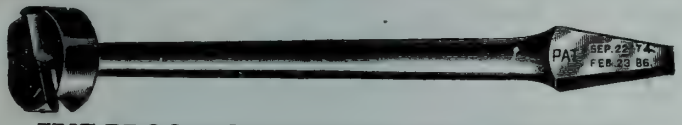
Don't lose a single sale through depleted stock. Clinch the trade your competitors will get if you cannot supply NORTHLAND SKIS. Wire us your order at once, collect if necessary.

Northland Ski Manufacturing Co.
23 Merriam Park St. Paul, Minn.

Why Not Have a Double Check on all Sales?
All kinds of Wire Cash and Parcel Carriers and Pneumatic Tubes.
Gipe-Hazard Store Service Co., Limited
113 SUMACH ST., TORONTO, ONT.



The merits of our Cash Carrier System should warrant your careful consideration. We know they will, and too, that you will agree with us after making an examination of them. As a beginning we would suggest that you send for our illustrated catalogue which shows all kinds of wire carriers for conveying cash, or cash and parcels. It will be better for you to be prepared at this time when the season is right, than it will to be sorry after the rush of Spring trade has set in. Then why not be prepared?



THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U. S. A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Before Placing your Order for

POULTRY NETTING

unique circulation as proven by the A.B.C. Audit is due to 33 years of honest effort to give the retail trade the best possible service.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

An Old Friend in a New Attractive Box

With Stand

Auto Cleaning Brush
Meakins Catalogue Page 77

Flexible Auto Spoke Brush
Meakins Catalogue Page 77

We are showing a few suggestions here, just to remind our friends in the trade of the wide scope covered by Meakins Brushes.

Remember such items as card and sign writers', artists' and decorators' fine brushes; brushes for stippling and striping; the various brushes for household use, sanitary, bottle and goblet, furnace brushes and many others.

It is time well invested to look over the Meakin's new 1922 Catalogue — it is a guide to increased sales. Suppose you write today.

Viko Aluminum Is Now Nationally Advertised

The tremendous selling influence of national advertising has been placed behind VIKO, The Popular Aluminum.

Starting with the January and February issues of national magazines reaching city, town and farm, millions of sales messages on Viko cooking utensils will be directed at the big market for this popular-priced, high-grade aluminum ware.

This advertising blankets the homes of America. It reaches the worthwhile families of your community and the surrounding territory from which you draw your trade. It will help increase the profits of every Viko dealer.

These are the publications being used in this big advertising and sales drive:

The Saturday Evening Post	2,250,000
Good Housekeeping	600,000
McCall's Magazine	1,500,000
Christian Herald	264,000
People's Home Journal	800,000
Woman's World	1,000,000
Farmer's Wife	700,000
Farm & Fireside	800,000
Farm Journal	1,000,000
Successful Farming	850,000
Iowa Homestead	150,000
Total Circulation	9,914,000 Families

A complete line of advertising helps will be furnished to every Viko dealer to enable him to connect his store directly with this powerful sales campaign. Send for yours now.

VIKO, The Popular Aluminum, is sturdily constructed from thick sheet aluminum, 99% pure. It is durable, finely designed and is beautifully finished. The Viko line is complete—it comprises utensils for every cooking requirement. Viko prices are unusually low.

Put the Viko line in your store. Profit from its big appeal of quality at low price. Connect your store with the national advertising campaign. For full information—

Now is the time to stock up with these easy-moving Barrett Specialties!

START the Spring season right. Place your orders now so you'll be all ready when spring buying begins. If you haven't our latest Price List, a copy will be mailed on request.

These famous Barrett products are known all over the Dominion for their high quality and great economy. For years they have been the fastest-selling specialties on the market.

This year we shall continue our aggressive advertising in leading farm publications and newspapers. The already big demand will be bigger still.

These products will make money and build business for you, because they will save time and money for your customers. You can sell them with absolute confidence. They're made by Canada's oldest and largest manufacturer of roofings and industrial specialties.

For Roof Repairs

Plastic Elastigum Patching Cement. Has no equal for patching holes in all kinds of roofs, repairing leaky flashings, gutters, etc. Known as "The Plastic Cement of a Thousand Uses." Invaluable for general repair and waterproofing work. Sticks fast to either wet or dry surface. Easy to apply. Comes ready for use.

Liquid Elastigum. For coating all kinds of roofs. Gives new life to prepared and "rubber" roofings; protects metal roofing from rust and corrosion. A big money saver. An occasional coating adds years of service. Comes all ready to apply.

Everlastic Liquid Roofing Cement. Makes old prepared and "rubber" roofing almost as good as new. Seals up the small holes and gives a long-wearing new surface. Everlastic Roofing Cement has about the consistency of thick molasses—it is *not* a roof paint. Comes all ready for use. Dries quickly into a smooth jet black surface.

Protective Paint

Everjet Elastic Carbon Paint. A high quality, inexpensive protective paint for all exposed metal and wood surfaces. Just the thing for farm implements. Waterproof, acid-proof, weatherproof. Wears stubbornly under all conditions.

Fly-Oil and Cow Spray

Creonoid. An effective, economical fly-oil, lice-destroyer and cow spray. A big favorite with Canadian farmers and dairymen because it is safe and easy to use, and gives unfailing results.

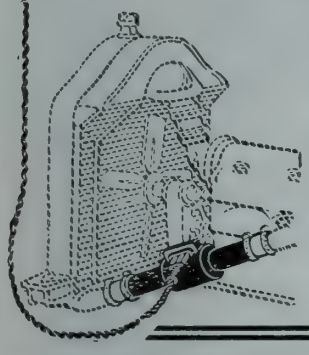
TORONTO, ONT.

MAYALL MOTOR HEATER



Suggest to your customers the convenience of a warm engine in winter. Nothing easier than the Mayall. Connected to any lamp socket it warms the water into constant circulation, prevents freezing and assures easy starting. Can be installed in a few minutes.

Motor Sundries Corp. Ltd.
Head Office and Factory:
414 Eastern Ave., Toronto

Also manufacturers of Hurst Motor Heater, Float-a-Ford Shock Absorbers, Mayall Flat-Spring Bumper.

IF YOUR MESSAGE TO THE TRADE

is advertised in Hardware and Metal it goes by paid subscription to every wholesale hardware buyer in Canada and over 90% of the retailers. An examination of hardware-store displays, or inquiries in the stores, will convince you that these men invariably prefer to buy goods made familiar in the advertising pages of Canada's only weekly hardware trade paper.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

"Standard" Jap.	46.00	...	
"Universal" Nic.	53.00	6.75	7.00
"Universal" Jap.	48.00	6.00	6.25
Vacuum Sweepers.			
"Grand Rapids" V. S.	106.00	13.25	13.75
"Household" V. S.	94.00	11.75	12.25

*Western Provinces in which the higher prices prevail owing to freight: Man. (excepting the City of Winnipeg), Alta., Sask., B.C.

New prices on Bissell sweepers (more than ever the most economical work-saver—costs only 50 or 60 cents a year on conservative basis of ten years' service).

Each sweeper now in an attractive, convenient to handle and deliver carton.

Replacements mean many sales (about one-tenth of the millions of Bissell sweepers now in use are replaced annually).

The carpet sweeper as needful and as much desired as ever for everyday use—recognize this.

A great home building wave is full upon us and growing (this means home equipment needed).

Business conditions improving steadily—have a reasonable optimism. The return to normal buying habits bodes well for Bissell's (an obvious fact).

The better living standard now established in thousands of homes means a larger potential market—realize on it

With all these opportunities can you doubt that greater profits through increased sales will accrue to you who go after it?

Our sales material, consisting of fine cards, circulars, co-operative cuts, lantern slides, etc., plus our continuous magazine publicity, and a name that is an honored household word will help you.

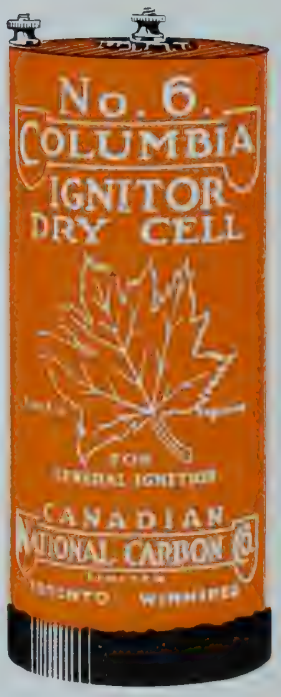
1922 The Banner Year For Columbia

COLUMBIA dealers should prepare for the largest sales of Columbia Dry Cells they have ever enjoyed. The prestige of the Columbia line is in itself an assurance of a steadily increasing sale—but the advertising and sales plans which will be put into effect by the Company this year will make Columbia Sales increase faster and to a greater volume than ever before.

The dealer who stocks and pushes Columbia Dry Cells has the advantage of his competitor. Columbia Dry Cells have an enviable reputation for quality and long life—a reputation built up through years of testing by a critical public.



Columbia advertising is nation-wide. It reaches into the hamlets and villages as well as into the towns and cities where many thousands of Dry Cells are used.

Not only will newspaper, magazine, and farm paper advertisements be used to create public demand but the dealer will be plentifully supplied with striking window and store displays.

If you are not already a Columbia dealer, ask our representatives or your jobber's salesman about Columbia Dry Cells. It will pay you in handsome profits.

SMP Advertising in over 700 Canadian Newspapers

Our great campaign of national advertising of Diamond and Pearl Ware is now appearing in over 700 of Canada's best daily newspapers, weekly newspapers, farm journals and home magazines. The headings of just a few of these papers are shown on this page.

Just think how this tremendous advertising will stimulate business and create fine profits for retailers handling Diamond or Pearl Ware.

87,500,000 Advertisements in 1922

Over 87,500,000 Diamond and Pearl Ware advertisements will go into Canadian homes in newspapers during 1922!

This advertising makes Diamond and Pearl Ware two of the most important lines handled by retail hardware and general merchants.

Think of the prospects for live retailers! Think of the profits to be made in frequent turnovers of Diamond or Pearl Ware.

If Diamond or Pearl Ware isn't one of your big lines, our advice to you is to stock up with either or both at once.

Write or wire our nearest branch or your nearest jobber. **Don't delay another day.**

Splendid Profit; Easy Sales!

EVERYWHERE—throughout the broad expanse of the Dominion, merchants are fully alive to the importance of dependable light for farm and home use. Coleman Quick-Lites are fast sellers because people want 300 candle power brilliance. The economy, cleanliness and safety of Quick-Lite Lamps and Lanterns are appreciated in more than a million homes across the border and in Canada.

Coleman Quick-Lites not only sell themselves—they help sell other merchandise for you. If you are handling paint—arrange a display of our color cards and cans with a Quick-Lite Lamp to show the true value of the colors. Use a Quick-Lite Lamp lighted on top of your show case in which you display cutlery. Use the Quick-Lite for lighting up your windows at night. There is no greater attention-getter than a lighted Quick-Lite in any store. Naturally, sales are easy.

The Marlin in 1870-and

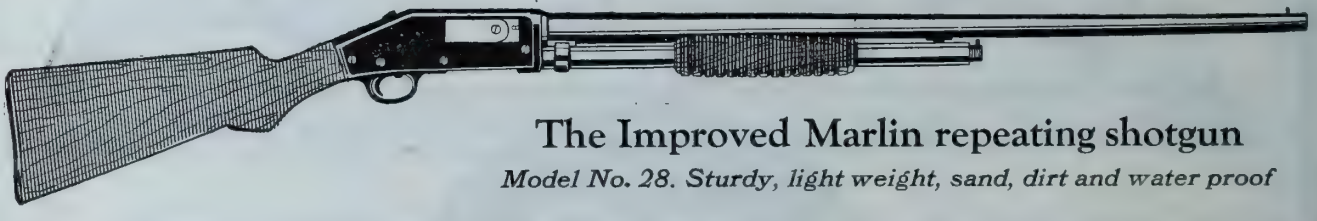
51 Years of Accuracy and Dependability

SINCE 1870 when John M. Marlin, who until then had confined his activities to pistol making, took over the then famous Ballard rifle, the history of Marlin firearms has been brimful of the romance that makes such a gun the pride of those who own one, the desire of all others.

The Marlin of 1870 was renowned for its accuracy and the favorite arm of sportsmen of its day. Marlin, however, applied his noted mechanical genius with the result that his improved rifles were highly prized by hunters of buffalo and big game and many a redskin became a "good Indian" because of the unerring accuracy of Marlin rifles in the hands of the plainsmen.

From then on the improvements made in rifles and shot-guns by Marlin and his associates were productive of a growing demand which had reached its zenith in 1916 when, at the behest of the Allies, the Marlin organization turned its entire activities to the manufacture of the famous Marlin machine guns.

It was impossible, therefore, during the period of the war and the days of reorganization, thereafter, to fill the orders of the sport-public. To those who have awaited the return of the Marlin, we are extending our thanks through an extensive national advertising campaign—and announcing a complete line of Marlin guns now ready.



The Improved Marlin repeating shotgun

Model No. 28. Sturdy, light weight, sand, dirt and water proof

Place your orders NOW' for these Marlin guns

Small game rifles now ready

Model No. 20. .22 Caliber Rifles—Slide action, hammer, 24" octagon barrel
Model No. 38. .22 Caliber Rifles—Slide action, hammerless, 24" octagon barrel
Model No. 39. .22 Caliber Rifles—Lever action, 24" octagon barrel
Model No. 27. .25-20 Caliber Rifles—Slide action, 24" octagon barrel
Model No. 27. .32-20 Caliber Rifles—Slide action, 24" octagon barrel
Model No. 27. .25 Rim fire Rifles—Slide action, 24" round barrel

Big game rifles now ready

.30-30, .32 Special, .32-40 and .38-55 Calibers

the New Marlin 1922

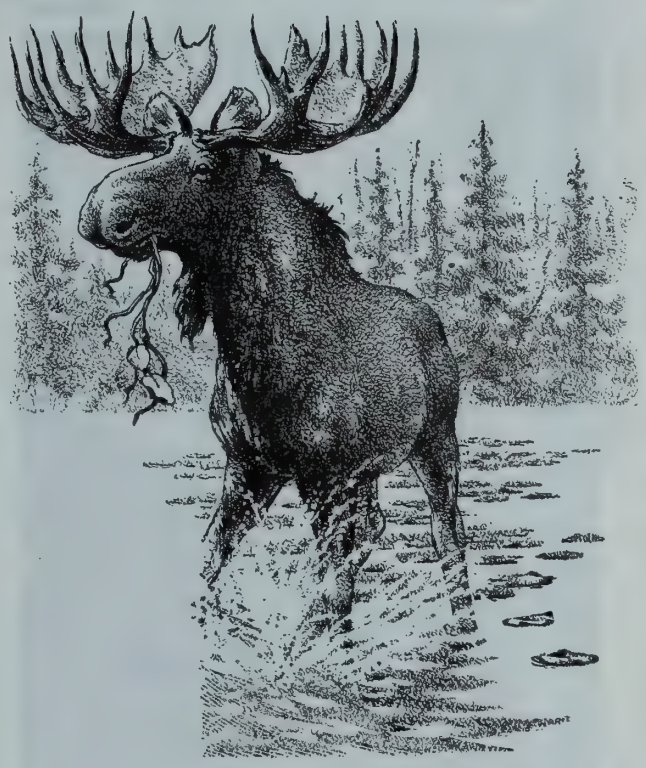
Now ready for the peacetime invasion

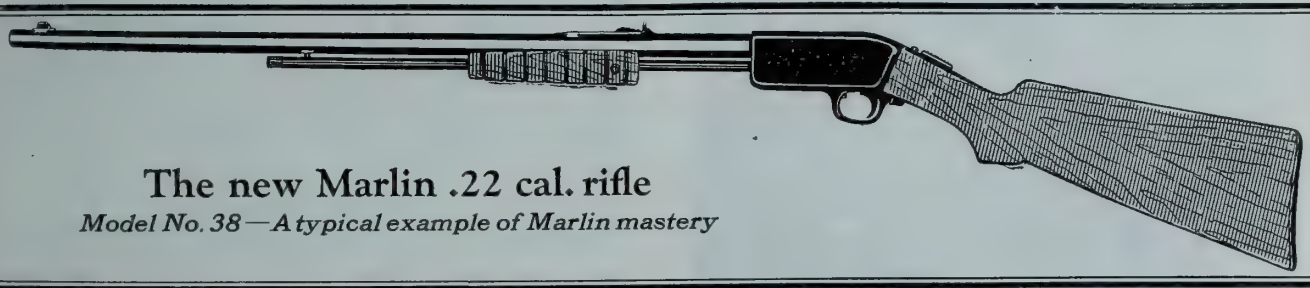
THE wartime activities of the Marlin organization necessitated large additions to our plant. These increased facilities, and the vast experience gained now stand us and the public in good stead, enabling us to introduce into Marlin shotguns and rifles great improvements over former models and to produce in numbers to meet the demand.

These improvements extend throughout the entire Marlin line. There is a wonderfully attractive new .22 caliber hammerless take-down rifle—Model No. 38—A quick-handling, finely balanced, medium weight firing piece, repeating with short, long and long-rifle cartridges without adjustment. Superb in model and finish: a strong accurate shooter, an arm to be proud of.

Marlin shotguns are made in 12 and 20 gauges, hammer and hammerless types, for duck shooting, trap shooting and field shooting. A full assortment of splendid guns—a gun for every man.

The Marlin .30-30 is a smooth-working, finely balanced, high powered, repeating rifle. It typifies the simplest, strongest and quickest repeating mechanism used in any big-game repeating rifle. Extremely accurate. Used extensively in target and big game shooting.





The new Marlin .22 cal. rifle

Model No. 38—A typical example of Marlin mastery

Repeating shot guns now ready

Model No. 42	12 gauge	visible hammer	take-down	Grade A
Model No. 28	12 gauge	hammerless	take-down	Grade A
Model No. 31	20 gauge	hammerless	take-down	Grade A

For further information write Dept. T-41

Order from your jobber—NOW

Take advantage of our national advertising and the fact that you can supply a reasonably-priced gun with a history that gives one pride in its ownership.

A B C
OSCILLATOR

It Has Taken Canada by Storm

The A B C Oscillator at $135.00 has proved it is a value that thousands have awaited.

It is selling right off store floors without advertising or any special sales effort. Sales on it at $135.00 are attracting buyers in numbers that have astonished even the most optimistic dealers.

Never before has a washer of this type, bearing a famous maker's name —a washer of full-size six-sheet capacity with **heavy tin-lined copper tub**, heavy angle-iron frame, quiet springless mechanism and **galvanized "Armco" iron cabinet** safely enclosing all moving parts yet permitting free access to them — been sold at such a price.

You can put on a sensational sale with this value—you can get behind it enthusiastically because **the price allows you a FULL profit!** You can do business, make friends, make money—**now!**

We will show you how to proceed—along exactly the lines already proved so successful by other dealers.

This is the time! The public is looking for a chance to buy such a value! It has been proved in cities everywhere!

The proposition deserves your inquiry —to-day!

5-burner Stove
with Cabinet

See The New

NEW PERFECTION

At the Hamilton Convention

(Booth No. 37)

COME and see the big, new 5-burner New Perfection Oil Cookstove. You will be delighted with this addition to our line of stoves.

The 5-burner New Perfection Oil Cookstove is an all-the-year-round convenience. Has all the good features of the 2, 3 and 4-burner stoves but the provision of an extra burner means that while two are being used for baking, there are still three burners available for other cooking service. The 5-burner New Perfection offers all the advantages of ample oil cooking facilities to even the largest family.

New Perfection Oil Cookstoves, Perfection Oil Heaters and New Perfection Water Heaters are always good lines to handle. Heartily endorsed by more than 4,000,000 satisfied users who know from experience the economies, conveniences and comforts they bring.

Make a special point of seeing our display at Booth 37. You will appreciate the complete range of home equipment the Perfection line offers. If you are not already handling the Perfection line you will be specially interested in our dealer proposition. Stop at our booth anyway and get better acquainted with the Perfection line and let us get better acquainted with you.

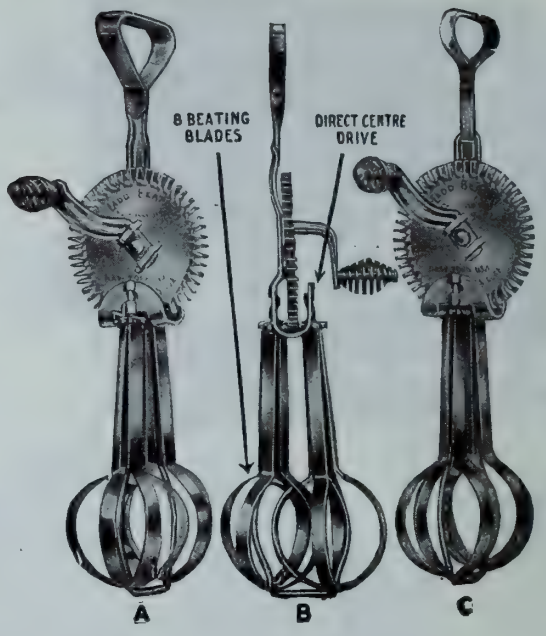
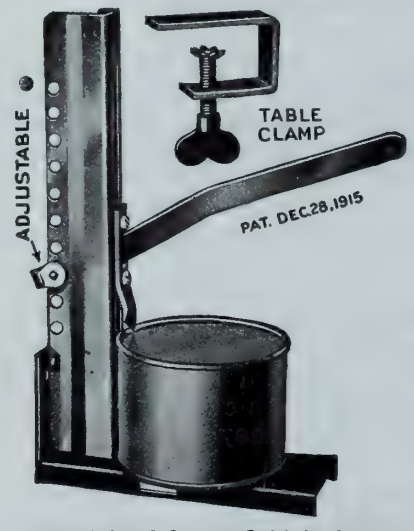
Ladd All-Steel Beaters

3 Sizes---For All Requirements

At the beginning of new and vigorous uplift in business, dealers must be thoroughly alive to the requirements of their trade. This country has not gone back to knick-knacks and NEVER WILL. These BEATERS, CANDIDATES FOR EVERY HOME, are HEAD AND SHOULDERS in QUALITY above anything for these purposes made anywhere in the world. So PROFITS must be LIBERAL and THEY ARE. SATISFACTION MUST RESULT from their use and IT DOES. Your BEST SERVICE goes along with their sale, and, DUE TO THEM, you are always remembered.





SATURN STATIONARY CAN OPENER

OPENS CANS OF ANY SIZE OR SHAPE

An **entirely new principle** that any child can work without possibility of injury, worthy to displace all old styles.

Prices and Prices

Goods of **no** quality bring one price; **quality** goods another. The **public knows this** as well as you and we, and **approves** it.

Fact is a reasonable **high price** convinces public of **quality, promotes confidence** and **sales.** We have no intention of reducing prices to enter the knick-knack class and decrease your profits.

LADD Mixer-Churn

LADD MIXER CHURNS—1 qt.—2 qts.

A little lower now—Are superior to anything yet made for their purposes, being 3 ARTICLES IN 1; in fact, the KITCHEN'S MOST USEFUL UTENSIL.

SATURN REELS (Clothes-line)

Every house wants these and LOOKS TO YOU (we don't want mail orders) TO SUPPLY THEM. As handy as can be.

JOBBERS the world over and US.

Get these from your jobber or DIRECT FROM US, and BY ALL MEANS CARRY THEM ALWAYS.

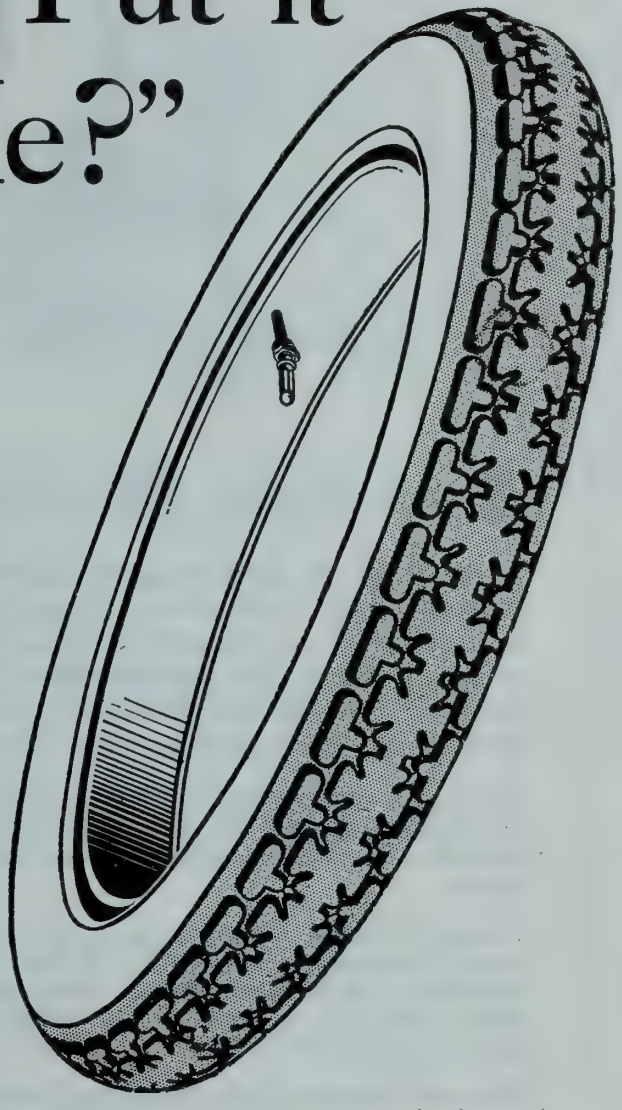
"Will You Put it On for Me?"



IF a customer buys a keg of nails or a washing machine or a wheelbarrow, you either deliver it or help him load it. It isn't much more work to put a new tire on a customer's car. Every hardware man can sell tires if he will give a little bit of service. When a tire customer asks you: "Will you put it on for me?", tell him: "Yes, with pleasure." There's a good profit in selling tires–it is one department in which SERVICE PAYS.

Let "Gutta Percha" Lead Your Tire Department to Success.

Keep down the dust cloud-

Ordinarily the broom stirs up more dust than it collects—but not when floors are treated with Imperial Floor Dressing. You can then sweep without filling the atmosphere with dust, as Imperial Floor Dressing holds it to the floor where it is easily gathered up and disposed of.

Dusting is practically eliminated in stores where Imperial Floor Dressing is used, and counters, show cases and merchandise present a clean, attractive appearance at all times.

Imperial Floor Dressing is a sanitary preservative for wood, linoleum or oil cloth. It does not gum or evaporate and is most economical. One gallon will treat from 500 to 700 square feet of floor surface and one application will last for weeks.

Display Imperial Floor Dressing prominently. With your own floor as a practical demonstrator you can sell it readily to your trade. Our salesman will be glad to tell you more about this profitable line.

IMPERIAL OIL LIMITED

PEERLESS FENCE AROUND THE ALL

STAR Hack Saws

People Are Buying More Carefully

There's plenty of buying going on, but it's very careful buying, compared with the way goods went over the counter a few years back. The customer wants 100 per cent. value for every dollar he spends.

It's up to the dealer to be equally careful in selecting his stock. It's no time to keep a long string of idle brands, with slim demand behind them, on your shelves.

When it comes to hack saws, you can play safe by pinning your faith on Star Blades. The leadership enjoyed by Star Saws for 38 years makes them the logical brand to push.

Star Saws are now sold direct from the factory at Middletown, New York, where they have always been manufactured.

A Spramotor in the Hand is worth Two in the Factory

You wouldn't find a hardwareman so neglectful as to be without a spade or rake in stock—there's too much demand for them.

Yet—there is a garden and farm implement every bit as much in demand, that some hardwaremen don't keep in stock—or don't offer to send away for for their customers—that's the

Spramotor
It isn't a SPRAMOTOR unless we made it

Every grower of fruit and vegetables has a need each year for the Spramotor. The Spramotor way is the only effective way to spray—the farmer has had that told him by his farm papers for years, and he has the word of his fellow farmer to back it.

Every farmer and gardener sprays — more and more each year are spraying the right way—the Spramotor way—and it is up to you, Mr. Hardwareman, to see that you get in on the profit of the Spramotors sold in your district.

We have an attractive agency proposition for the livest men in many districts.

Write to-day.

Many Problems for Next Parliament

Next Session Opening on March 8 Will Deal With Suggestions for Sales Tax Revision, Marking Imports and Other Items of Importance to the Hardware Trade — What the Hardware Merchants Think of Sales Tax.

SEVERAL matters of vital importance to the hardware trade will be dealt with at the forthcoming session of Parliament which opens in Ottawa on March 8. Already there is much speculation concerning the attitude of the new party which has been elected, toward certain legislation enacted by the late government. One of the matters in which the trade is particularly interested is in connection with the sales tax, for while this form of taxation has been looked upon as a model by many business men in this country and abroad, it has been found that it operates unfairly in certain respects and numerous representations have recently been made for a change in the method of application. Some of these recommendations have been outlined in recent issues of Hardware and Metal.

As a rule the present Act assesses a sales tax of 1 1-2 per cent. on sales by manufacturers to wholesalers, another 1 1-2 per cent. on sales by wholesalers, and a straight 3 per cent. tax on sales by manufacturers to retailers and consumers. On importations by retailers or consumers the sales tax payable at the custom house is 4 per cent., and on other importations it is 2 1-2 per cent.

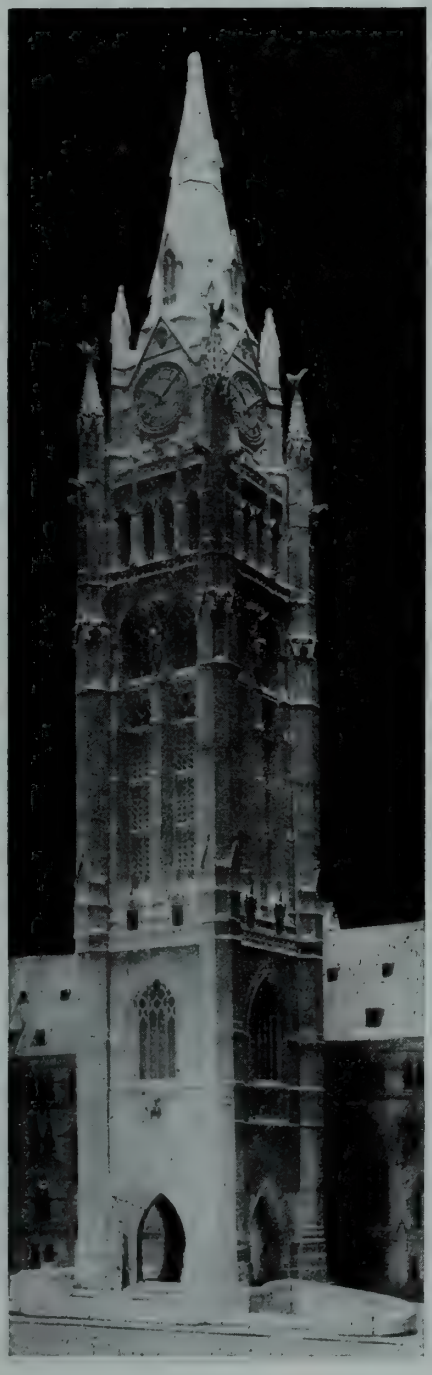
Suggested Changes

One suggestion which has been made is, briefly, as follows:

That sales by manufacturers to wholesalers for resale by the latter, and sales by wholesalers to other wholesalers for resale be exempt from sales tax:

That sales by manufacturers and by wholesalers to retailers or consumers be subject to sales tax at the rate of 3 per cent.:

That it be compulsory to extend such sales tax on the invoice as a separate charge to be added separately to the selling price—without the manufacturer or wholesaler being allowed to absorb any part of the tax.



The proposal, as it reached the Canadian Manufacturers' Association, includes no suggestion of change in the present sales tax requirement "that domestic purchases by manufacturers for the purpose of re-manufacturing into other goods for sale are subject to 1 1-2 per cent. sales tax," nor in the present requirement "that importations by manufacturers for the purpose of re-manufacturing into other goods for sale, and also importations by wholesalers, shall be subject to 2 1-2 per cent. sales tax, payable at the custom house."

If the Act were amended in accordance with the above suggestion, it is claimed by those advocating the changes that it would:

1. Eliminate the necessity of a manufacturer charging sales tax where his sales are exclusively to wholesalers holding a sales tax license as a wholesaler;

2. Do away with the present situation, with which all wholesalers and many manufacturers are faced, of absorbing half of the sales tax when selling direct to retailers or consumers;

3. By exempting from tax purchases made by wholesalers or jobbers from manufacturers, do away with the agitation of the wholesalers that the manufacturer should absorb the present sales tax of 1 1-2 per cent. on sales by manufacturers to wholesalers.

4. Reduce the possibility of loss in the event of wholesalers becoming insolvent;

Under the current rulings where a wholesale customer becomes insolvent, and a manufacturer has paid the Government the sales tax in respect of goods sold to such customer, but has

SUGGESTIONS ON SALES TAX REVISION

1—Manufacturers' sales to wholesalers for resale be exempt.
Wholesalers' sales to other wholesalers for resale be exempt.
Manufacturers' and wholesalers' sales to retailers or consumers subject to 3% tax.
To extend sales tax on invoice as separate charge added separately to selling price. Manufacturer or wholesaler not allowed to absorb any part of tax.
2—Retailer suggests manufacturers collect all sales tax and include it in cost of goods rather than as separate item.
3—Only about 25% of present tax passed on to consumer says another retailer, suggesting manufacturers and wholesalers include it in prices shown on invoice.
4—Margin of profit on certain fixed price lines too small for retailer to bear cost of sales tax.

not received payment of the tax from the customer, the loss falls upon the manufacturer;

5. Simplify the collection of the tax.

Manufacturers Only to Collect Sales Tax

The opinion of certain retail hardware merchants as to the operation of this tax has been ascertained by Hardware and Metal, and an outline of the opinions of these retailers appears as follows:

A. W. Allin, President Allin's Ltd., Lindsay, Ont., states:

"Relative to the absorbing of the sales tax by the retailer, we are very much interested in this matter as we have contended that the sales tax has always been paid by the retailer especially on lines on which there is a more or less standard resale price. For instance, take an article which is always sold at 25 cents, the sales tax on each article is only a fraction of a cent and the retailer cannot very well collect on a fraction so has to absorb this tax himself. This same instance applies in most cases and we feel that the present method of collection of the sales tax does not put the burden where it belongs but places it on the retailer.

"We feel that a more equitable solution of this problem, and we are all anxious to help out in this matter all that we can because we all realize that a large revenue has to be collected, would be to have all the sales tax collected by the manufacturer and have him include it in the cost of the goods rather than as a separate item on his invoice. There would then be a small number of people enngaged in the collection of sales tax instead of a small army as at present.

"Thanking you for the privilege of airing our views on this matter, and trusting that some workable solution may be the outcome of the action of Hardware and Metal on this important question."

Not Show it Separately

J. G. Galloway, Walker Hardware Co., Belleville, Ont., states: "Regarding sales tax legislation, we might say that we think it a hardship on the retailer, as our experience has been that only about 25 per cent. has been passed along to the consumer. We absorb the balance, owing to it being a lot of extra work to distribute it on shelf goods, etc. If the consumer is asked to pay it he thinks it an imposition, and that we should pay it out of our profits.

"We think it would be much better if the manufacturers and wholesalers would include it in their prices of the goods to the retailer and not show it separately on the invoice."

R. Hawkins, Smiths Falls, Ont., states: "In figuring costs of goods, I add together the sales tax, transportation charges and containers (if any), then ascertain the percentage this total bears to the net price of the goods, adding this percentage to each item, with some variation according to value and weight of the goods, a matter of judgment in each individual case, but in a general way to spread these items of expense which amounts to 5 to 10 per cent., (some less and others more than this percentage) on the cost of the goods and base our selling prices accordingly.

Retailer Bears the Cost

"There are, however, a few articles on which the retail prices are fixed and the retailer must bear the sales tax on these items, such as certain lines of razors, carpet sweepers, wall finishes, etc. Some of these lines bear sufficient profit that the retailer can afford to bear the sales tax, while on others such as five-dollar razors, the margin of profit is too small for the retailer and quite large for the manufacturer, who should be willing to pay the sales tax on these lines. There is probably room for some readjustments between the different branches of trade, in this respect.

"We, as citizens of Canada, must recognize the fact that huge debts have been incurred in connection with the war and re-construction, and must be met, with interest. It is a problem of the best methods, to provide the necessary funds. I consider the sales tax the best method, yet evolved to meet a portion of the war debt. It distributes the tax in the least burdensome manner. The method of collection is simple, efficient and inexpensive and the returns are large.

"I have observed the system has been favorably commented upon by recognized political economists and critics including "Collier's," which referred to the system as the "Painless Tax." While experience may discover some minor points of improvement, the general principle and application should not be seriously disturbed. It would be a serious matter to throw a monkey wrench into an expensive, smooth-working machine.

"While the average retail merchant is loyal and willing to do his share of bearing the burdens of taxation there is a limit to his capacity, which is pretty well taxed at the present time. When we consider the numerous calls for charity, subscription lists, tickets for entertainments by many organizations, etc., and the losses he is bound to face, from bad debts this year, it behooves the Government to seek some other source of revenue than the convenient channel of merchandising which if overdone may endanger the industrial fabric of the country. The questions of economy and production call for consideration.

Suggests Conferences

"I believe much benefit would be derived from a series of informal conferences, two or three times a year, by representatives of the hardware manufacturers, wholesalers and retailers, to discuss and adjust problems interlocking between the different branches of the trade, with a view to improving condition and rendering better service to the public generally. Might I suggest the appointment of three to five delegates

(Continued on page 55)

TINSMITHS' CASE TO THE SUPREME COURT

The controversy over the status of the tinsmith for taxation purposes has been very much drawn out and the various stages have been dealt with in Hardware and Metal. It will be recalled that a test case instituted at Ottawa in the case of a merchant tailor to determine whether any merchant doing business on the same basis could legally be classed as a manufacturer, was decided in favor of the retailers and no trouble was anticipated. It developed, however, that this ruling was not being upheld by the Collectors of Inland Revenue and a subsequent case involving a confectioner was tried. This case was decided in favor of the Government, and the case is now to be taken by the Retail Merchants Association to the Supreme Court, as mentioned in last week's issue of Hardware and Metal. This case will be in the form of an appeal from the last court decision. The case is being followed closely by retailers who operate tinsmith shops and the decision will be one of great importance to the trade.

"Trying to Milk Cow From Both Ends"

Is Charge Laid by Sales Manager of Oak Tire & Rubber Co. at Automotive Retailers' Convention Concerning Policies of Tire Manufacturers in Conducting Commercial Accounts—Bona Fides of Certain Customers Are Questioned—Have Poor Check on Dealers

ONE of the most lively conventions which has been held for some time was that of the Automotive Equipment section of the Retail Merchants' Association, held in Toronto. The first sessions of this convention were dealt with in last week's issue of Hardware and Metal, but as the convention progressed many other matters of vital interest to the trade were dealt with and some definite action taken.

The tire situation was dealt with further, Mr. Musgrave, Sales Manager Goodyear Tire & Rubber Co., pointing out that with the last reduction made this week reductions on tires are through for some time due to the fact that tires could not be made by the manufacturers at any lower prices than are now being offered unless unexpected revisions in costs were brought about. Mr. Williams, Sales Manager Dunlop Tire & Rubber Co., confirmed this stand pointing out that the only way there would be lower prices would be by lowering the quality and this was not desired or expected.

Mr. Maus, Sales Manager Oak Tire & Rubber Co., Toronto, pointed out that there was entirely too much prevalence of commercial accounts for tires among certain manufacturers. It was stated to be the policy of his firm that only "legitimate" dealers should handle tires, and that it was his intention to do the right thing by such dealers by confining the distribution of tires to them.

"Unfortunately in the tire business somebody has been trying to milk the cow from both ends," said Mr. Maus. "We find this is the situation in connection with the distribution of tires. To my knowledge there are something like 200 so-called commercial accounts in Toronto alone who enjoy the privilege of buying tires at dealers' prices and yet I believe it is the policy to build up the dealer as the rightful medium of distribution. We are strong advocates of establishing distribution through the dealer and no one will give stronger support to the legitimate dealer than we will."

Question Certain Customers

Upon the conclusion of this address a number of dealers present questioned Mr. Maus concerning the bona fides of certain firms which were listed as commercial accounts of the Oak Tire & Rubber Co. In one case a wholesale grocery firm was buying tires at dealers' prices and friends of the members of the firm were securing their tires in the same manner. Other cases were cited where delegates did not agree that certain direct customers of this company were "legitimate" dealers. In some cases Mr. Maus pointed out reasons why the particular firms were considered "legitimate" dealers, but in other cases the issue was quite plain, and Mr. Maus could only promise to look into the matter and if the facts were as stated to have such firms struck from their dealers' list immediately.

The discussion became quite heated, certain delegates complaining bitterly of the action of certain tire companies in making it appear that they were cultivating the dealer while at the same time selling as many tires direct to consumers as possible. It was stated that many firms wich were only supposed to buy on a basis of operating ten cars were buying on a three and four car basis. The discussion concluded with a resolution to the effect that the tire manufacturers undoubtedly were in good faith, but that some of them had a very inefficient check upon their dealers.

Workmen's Compensation Under Fire

G. A. Kingston, Commissioner of the Workmen's Compensation Board, gave a very interesting outline of the Act governing this board, with special application to the needs of the dealers present. Referring to a resolution which had been passed by the convention opposing the application of this Act to the retail trade, Mr Kingston pointed out that he was unaware of any general movement to have retailers brought under this Act, but stated that certain retailers have applied as employers for protection under the Act. Answering a question concerning a business where a retail and an automatic repair business is carried on together he pointed out that where the repair business is absolutely distinct, it only is required to come under the Act and not other departments of the business. A delegate drew to Mr. Kingston's attention the fact that whereas a firm employing less than four men does not come under the Act, it had been his experience that if a combination hardware and automobile repair shop were conducted by the same management under the same roof that the whole staff of both retail store and repair shop were counted in establishing the required number of employees to bring it under the Act.

Where Hardware Store Comes In

A hardware store alone does not come under the Act, but where a plumbing business or an automobile repair business is added the plumbing or repair business is affected. Another delegate cited an instance where there were five employees in a hardware store and two in the plumbing department, yet the whole seven came under the Act. Mr. Kingston stated that this was not correct and agreed to consider any representations which might be made having in mind an alteration of this condition.

Opposition was also taken to the plan of classing automotive equipment and repair business with manufacturers and applying the same rate to both under the Workmen's Compensation Act. It was claimed that whereas in the case of manufacturers 80 per cent. of the staff is in the manufacturing end and about 20 per cent. in the office depart-

Conventionalities

1—Sales Manager Oak Tire & Rubber Co. attacks prevalence of commercial accounts by tire manufacturers and is subsequently questioned concerning bona fides of certain customers of his own firm.

2—Current reduction in tire prices indicated as the lowest point likely to be reached unless quality is sacrificed.

3—Resolution that tire manufacturers are in good faith but have poor check upon their dealers.

4—Workmen's Compensation Act outlined by Commissioner Kingston whose rulings were contrary in many cases to those given retailers by the Board.

5—Position of hardware stores under the Act is outlined.

6—Better value in automobiles sold to-day and prices down to 1913 levels. One car for every 16 people in Ontario.

7—100,000 United States motor tourists visited Ontario last year and were worth to Canada over $50,000,000.

ments, that in the automotive equipment and repair business these figures are reversed, and that therefore it was unfair to apply the same rate to both businesses due to the much less hazard in the latter. Mr. Kingston promised to consider representations for an alteration in rate.

The question of how far compensation extended was also dealt with, the case being particularly dealt with of the employee who is injured elsewhere than in the company's offices or plant. Mr. Kingston pointed out that whereas at first rulings were against allowing compensation in such cases, that this had been recently altered and compensation allowed providing the employee is under the instructions of his employer.

Contrary Rulings Given

Here again a delegate raised the point that if this was the official ruling that it was different to a recent ruling made by the Board. He had sent an employee with an automobile to assist at some charitable affair and during which the employee was injured. The claim for compensation had been disallowed because it was a charitable mission and not a business affair. Mr. Kingston disagreed with this alleged ruling of the Board and asked for the facts to take the matter up with other commissioners.

The used car question was also considered, it being the opinion of C. Pearce, Toronto, that the used car trade should be separate and distinct from the new car trade owing to the narrow margin of profit on turnover. J. R. Marlow took violent exception to this, pointing out that the question of selling cars whether new or old was a matter for the automobile dealer and not for owners to have to turn themselves into car salesmen. He maintained that price was the controlling factor in selling used cars and that they would have to be "bought" by the dealer at bargain prices for resale, rather than being "sold" to the dealer by the owner at big prices and left to deteriorate in value before they could be turned over. He showed that the margin of profit in the automobile trade was very small when the question of losses sustained on second cars taken in part payment was considered.

CONVENTION REPORT IN NEXT ISSUE

Readers of Hardware and Metal are reminded that in next week's issue (Feb. 18) a complete report of the 17th annual convention of the Ontario Retail Hardware Association will appear. Merchants in all parts of Canada have displayed much interest in the subjects to be considered at this convention and much of the discussion and information from reports will be of help to merchants in all parts of the country.

Auto Industry Liquidated

T. A. Russell, General Manager Willys-Overland Co., thought that the present scale of prices being about equal to 1913 levels, apart from the improvement in furnishing and construction now evident, was sufficiently attractive to justify predictions of a big movement of cars in the coming year. He emphasized the fact that present day automobiles were better equipped than formerly, and also that the dollar to-day is not worth as much as in 1913. This he thought sufficient evidence that the automobile industry had undergone severe liquidation.

Dealing with the increasing utility of the automobile, Mr. Russell outlined briefly some of the answers which came to the contest recently conducted by this firm in an endeavor to find out how much value to owners were the cars which they drove. One of the prize winning letters told how a salesman had increased his earnings from $3,000 to $9,000 a year by the use of a motor car. Letters from farmers told of increased efficiency on the farm, and what was very touching were letters from housewives telling of the joy

Retailers Before Federal Government

Premier King and Cabinet Members Give Sympathetic Hearing to Retailers' Views re Sales Tax and Other Important Matters— Premier Outlines Attitude of the Government Toward Retailers —Ask Suspension of Marking Act

By Ottawa Representative of Hardware and Metal

PREMIER King and his Cabinet colleagues extended a most sympathetic hearing to a large delegation of retail merchants, representatives of various parts of Canada, who waited on them in the parliament buildings to set forth their views concerning the operation of the sales tax, and other important matters.

"That the method of carrying out the provisions of the sales tax by the Department of Customs and Excise, be changed," was the wording of the resolution, presented to the premier.

Re-Cast Sales Tax Act

It was distinctly and emphatically pointed out by E. M. Trowern, secretary of the Dominion Board, Henry Watters, and other spokesmen for the retail merchants, that what was wanted was not a new Act, but proper adherence both to the letter and spirit of the regulations already in operation. They asked that the meaning of the Act be more clearly defined. The intention of the Act, they understood, was that the tax be applied only to manufacturers and importers. With this they found no fault; it suited them admirably, but the wording of the Act was so clouded, as to render it unintellibible. What they wanted was a re-casting of the Act, so that it might be clearly understood by everybody.

While no definite promises were made, the Premier stated that he was pleased the Retail Merchants' Association had taken the matter up with him and had offered their counsel and advice. Mr. Watters seized upon this opportunity for pointing out the necessity of having the fullest co-operation between the Association, as representative of the retail trade of Canada, and all departments of the Government, especially the Department of Trade and Commerce.

Ask Suspension of Marking Act

In reply to Mr. Watters, the Premier, said:—

"I think you will find us, while not perhaps at all times in accord with your views, at least sympathetic with the great body of retail merchants. This is going to be a government for the people."

The delegation requested that the operation of the Marking Act governing the marking of the country of origin on imports, be suspended. This Act was recently postponed, until the end of the coming session of parliament.

Other matters discussed with the government were as follows:—

The abolition of the fees for the inspection of weights and measures as far as the retail trade is concerned.

That the amount which was collected by the Government from automobile dealers throughout Canada, when the luxury tax was removed, and which amounts to about one million dollars, be refunded.

That the duties now performed by the Gold and Silver Marking Act Inspector be extended so as to include the prosecution of those who advertise goods falsely in any line of retail trade.

Brenner's Income in 1920 Was $200,000

Investigation of Affairs of Defunct Metal Firm of N. Brenner & Co., Toronto, Reveals Big Dealings In Metal and Exchange With British Munitions Board and Other Firms—Large Brass Shipment of Inferior Quality

A GREAT deal of evidence is being taken in the hearings of the case in which Nathan and Meyer Brenner and G. Blackford are charged with fraud, conspiracy and theft of $700,000 in connection with the assignment of the metal business known as N. Brenner & Co., Toronto, with whom metal dealers in Canada, the United States and abroad had had considerable dealings.

The statement produced and accepted by Brenner showed that he had withdrawn $246,616.55 and had paid out for the company $80,467.32, leaving net drawings of $166,149.23. Leaving out the profits on merchandise, Brenner admitted making about $400,000 in United States money on exchange. Between $30,000 and $40,000 ring profits were also made. He claimed that when he ceased drawing money from the company in August, 1920, the affairs were in good shape. Subsequently the market in exchange became unfavorable and some losses resulted. Brenner claimed that he paid the losses himself, instancing one case of a cheque for $31,367 drawn in favor of Zimmerman & Forshay, New York.

Regarding Nathan Brenner's old book accounts, Meyer Brenner said the company did not take them over. His father was debited with them in "accounts payable" and credited with them in "accounts receivable." There was a surplus which was paid over to his father. In the various instances where Nathan had deposited cheques sent to the firm, to his own private bank account, Meyer said that these represented goods he had sold from his father, the company not having purchased Nathan's old stock of merchandise.

Asked by A. C. McMaster, K.C., in reference to his statement at the bankruptcy proceedings that the firm of N. Brenner & Co., Ltd., were unable to take delivery of some metal from the Imperial Munitions disposal board because they had not the money, Meyer Brenner stated that they were not in a position to pay out five or six million dollars when they could not dispose of the brass. It had been previously stated that the material was inferior in quality.

BRENNERS SENTENCED

As we go to press word is received that the jury in the trial of officials of N. Brenner & Co., have found Nathan and Meyer Brenner guilty, the first on four counts, the latter on six counts. The accountant, Gordon I. Blackford, was found not guilty and was liberated. Sentence is deferred on the Brenners for a week.

Testifying in his own behalf Meyer Brenner sought to justify his action in taking certain cheques payable to the company and depositing them in his own private account, with the explanation that he considered he "owned the company."

Meyer Brenner, vice-president of the defunct firm of N. Brenner & Co., Ltd., Metal Dealers, Toronto, holding the bridle of one of the race-horses in the stable which he purchased at a cost of $25,000, the year in which the firm failed.

"Why do you say that when your father was holding the shares?" asked his counsel, A. C. McMaster, K.C.

"He was merely holding them for me," replied Brenner, adding that the company was formed with the object of starting him in business, but at that time his father considered he was too young to take full control. The witness said that at a family reunion attended by all the shareholders in the summer of 1919, his father had expressed satisfaction that the company was making profits and had told him that he was free to draw those profits at any time.

Counsel referred to Meyer Brenner's evidence at the bankruptcy proceedings, when he said he had nothing to do with making entries in the books. "That was not correct?"

"Not exactly."

Witness first received $75 a week remuneration as vice-president, manager and secretary. It was later advanced to $100.

Asked what his other sources of income were, he said, after hesitation, that he received moneys from his father, also interest on war bonds.

"What else?" "That's about all."

Under pressure from the crown, he admitted he owned several race-horses, having bought half of Giddings' stable. He had been "dickering" for the purchase of the stable several months before the assignment and completed it within a couple of months of date of same.

"How much did you pay?" "I agreed to pay $30,000."

"How much did you pay?"

Mr. McMaster objected, but the objecton was not sustained.

"How much did you pay actually?" "$25,000."

He paid a deposit and cleared off the balance during the racing season of 1921.

The crown reminded him that at his bankruptcy examination he had stated his only revenue, except his salary, was derived from racing.

"What was your income in 1919?" "I cannot remember."

"What was your income in 1920?" "$175,00 to $200,000."

Winners in Hardware and Metal Xmas Window Display Contest

Following are the prize winners in the 1921 Hardware and Metal Christmas Window Display Contest. The eight cash prizes will be mailed to the winners, who are congratulated in securing prizes in what was probably the largest and most keenly competitive contest ever conducted by Hardware and Metal. It will be noted that the displays in places under 5,000 population rank very creditably alongside displays by merchants of the larger centres. Every photograph received was given very careful consideration and received fair judgment.

PRIZE WINNERS—Places 5,000 and over

First Cash Prize—G. Matheson, Mills Hardware Co., Barton St. Store, Hamilton, Ont.

Second Cash Prize—E. Rahn, Bond Hardware Co., Guelph, Ont.

Third Cash Prize—E. H. Braden, Otton Hardware Co. Ltd., Barrie, Ont.

Fourth Cash Prize—Alex. Baillie, Sumner Co. Ltd., Moncton, N.B.

Honorable Mention—E. Babineau, Sumner Co., Moncton, N. B.; Miss Dickson, Sumner Co., Moncton, N. B.; B. Caplan & Son Hardware Co., Queen St. E., Toronto; Wm. Haire, Tourtellot Hardware Co., Pt. Arthur, Ont.; Mr. Moore, Hewitt & Black Ltd., Medicine Hat, Alta.

PRIZE WINNERS—Places under 5,000

First Cash Prize—C. H. Johnston, Gibb, Brown & Odell, Ltd., Hanna, Alta.

Second Cash Prize—G. P. Eldridge, Geo. W. Ecclestone Ltd., Bracebridge, Ont.

Third Cash Prize—Adamson Hardware Co., Orangeville, Ont.

Fourth Cash Prize—T. S. Tait & Son, Campbellford, Ont.

Honorable Mention—Rutherford & Kayser, Simcoe, Ont.; H. C. Curry Falconer Hardware Co., Orangeville, Ont.; R. T. Holman Ltd., Summerside, P.E.I.; Ecclestone & Bates Ltd., Bracebridge, Ont.; Manly's Hardware, Grand Forks, B.C.; G. A. Culbert, Johnson Bros., Boissevain, Man.; J. McIntyre, Whitby, Ont.

HARDWARE & METAL

"Canada's National Hardware Weekly"

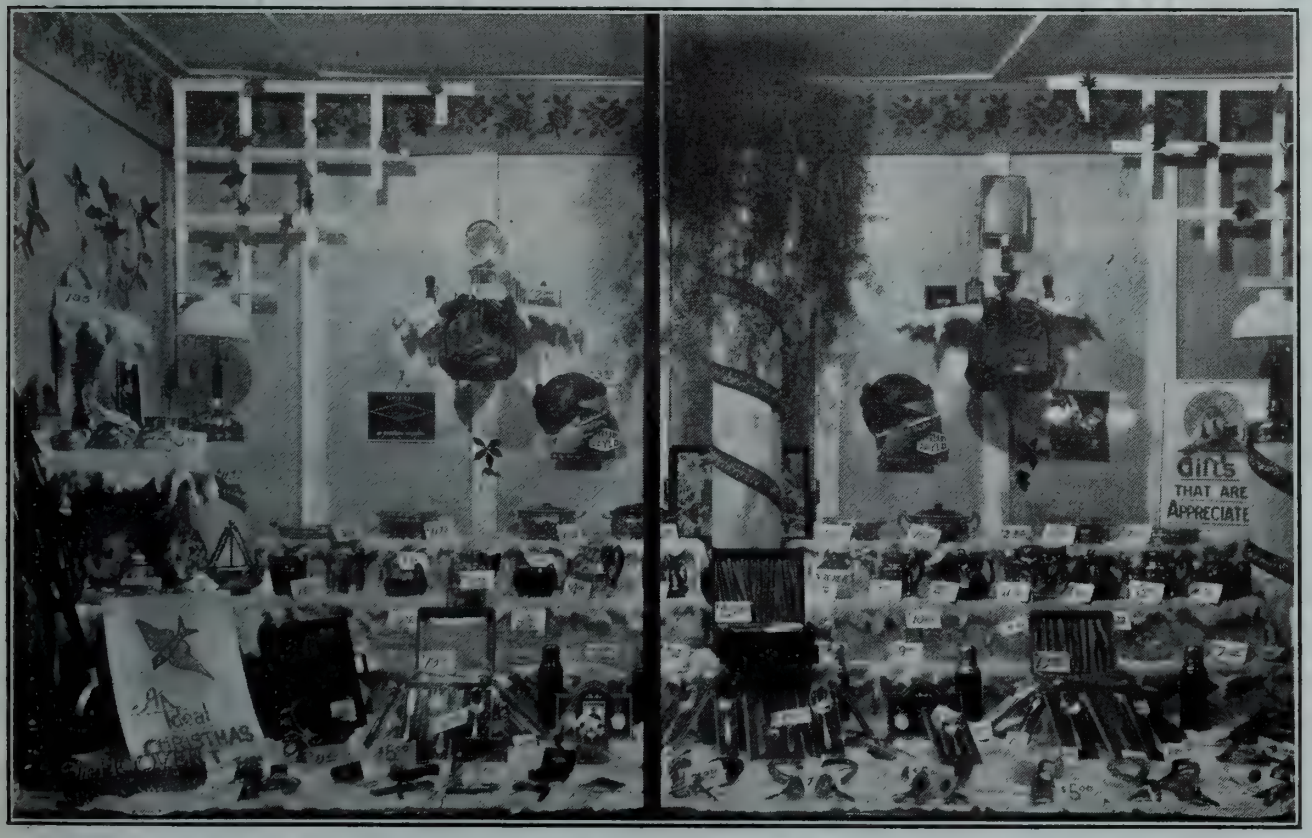
143-153 University Avenue
Toronto, Canada

Montreal Branch, Southam Bldg.
Winnipeg Branch, Confederation Life Bldg.

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

FIRST PRIZE WINDOW—OVER 5,000

This window display of Christmas goods which won first prize in the group including places of 5,000 population and over in the 1291 Hardware and Metal Christmas Window Contest was dressed by G. Matheson, Mills (Barton) Hardware Ltd., 425 Barton St. E., Hamilton, Ont. This display was claimed to be a large producer of business last Christmas. Unfortunately in this and all other reproductions, some detail evident in the photograph is lost in the process of halftone.



FIRST PRIZE WINDOW—UNDER 5,000

This entry which received first prize in the 1921 Hardware and Metal Christmas Contest for the group representing towns of less than 5,000 population, was dressed by C. H. Johnston of Gibb, Brown and Odell, Ltd., Hanna, Alberta. It represents a tastefully arranged display comprising a wide range of suitable gifts without any appearance of overcrowding. Price tickets on each article greatly increased the selling value of the display. The window is entirely enclosed with suitable trellis work arranged in the upper corners. Cotton batting depicts snow.

A new store front was recently added to the Walker Hardware Co., Belleville, Ont., and the present modern appearance of the store is shown herewith. This store formerly had the oldest store front on the main street of the city and it is an interesting indication of the value of window displays and appearance that though this store has been in operation for some years in Belleville, many new customers have been made since the front appearance has been made more inviting. Good use is made of the display facilities now afforded in the showing of seasonable lines. In the above display is shown a group of winter automobile accessories including mats, chains, tools, batteries, etc. In the other window is shown an arrangement of ammunition.

Sells Fifty Cars of Cement Annually

Purely Retail Business in Cement Trade of Walker Hardware Co., Belleville, Ont., Approximates a Car a Week—Educating Farmers to Various Uses—Avoids Tendering on Quantity Work—Separate Warehouse Removes Common Objections—Selling Barn Paint to Farmers

TO HAVE worked up a retail cement business which now has attained to a volume of approximately a car a week, has required some careful merchandising on the part of the Walker Hardware Co., Belleville, Ont. In discussing with Hardware and Metal some of the circumstances concerning the establishment and growth of this line of trade Charles Hanna a member of the firm and who has also the honor of being mayor of the city, outlined some interesting points.

The cement business done by this firm is purely of a retail nature and no attempt is made to enter into the highly competitive contracting branch of the business. By thoroughly cultivating the regular customers of the store, and particularly the farmers, a business has been developed which calls for approximately fifty cars of cement per year.

Plaster, lime, etc., is handled in conjunction with the cement business and a separate building has been set aside as a warehouse for these and kindred lines. An illustration of the building interior is shown elsewhere, indicating the size of the stock of cement, plaster, lime, etc., which is kept available for immediate business.

Educating Rural Customers

Some time ago, when the cement business was in the primary stage in this store it was found that much educational work could be done with the rural customers as to the uses for cement and methods of handling it. To a large extent this work still continues where new prospects are involved, but with the knowledge which has been passed on to them on this subject by the store in past years, many of the regular customers have become thoroughly acquainted with the uses of cement, the quantities required and how to handle it, so that they now come to the store and order just what they require.

Literature provided by manufacturers concerning the use of cement is kept on hand to be passed on to prospects desirous of such information but under the coaching of the store salesmen in recent years, it is found that there is not now much call for such literature.

"Not one in ten of our cement customers now ask about the method of mixing it," said Mr. Hanna, adding that occasionally some questions are asked concerning the advisability of using this product for new purposes around the farm.

An indication of how busy this store is kept filling orders for cement is the fact that between forty and fifty of the two hundred odd farmers who visit the store on an average Saturday are purchasers of cement in some quantity whether large or small. Delivery is made by motor truck within the city limits and an indication of the delivery activities of this firm is seen in the fact that the truck covers fifty miles daily. This is considerable for a city the size of Belleville. Farmers who buy cement or other requirements attend to the matter of delivery themselves and in many cases delivery of cement is made right from the car on the railway siding to save trucking it to the warehouse and having to re-load it.

Half a Car Kept on Hand

Due to this plan of delivering considerable quantities of cement direct from the car there is an average of only half a car kept on hand at the warehouse. In order to facilitate matters, Mr. Hanna sees to it that cement orders are grouped just prior to the receipt of a car, so that the greater part of the shipment can be delivered direct from the car. A short time before the car is due he gets

in touch with all prospects and generally finds that they are sufficiently ready to take away their requirements direct from the car when it is opened.

The uses of cement on the farm are numerous. The management of this store suggest it for troughs, fence posts, fence post settings, floors, driveways, walks, etc., and complete details are available from each of the store salesmen concerning the method of procedure in accomplishing the use of cement for any of these purposes. As result of this educational effort farmers in Belleville district find they can almost constantly find a use for cement and new uses are constantly being discovered. Most local farmers now keep a supply on hand for various odd jobs and have become quite expert in handling it.

Charging For Bags

A common complaint in the handling of cement is the loss of bags and consequent loss to the merchant for bags not recovered. This difficulty was experienced by the Walker Hardware up until a short time ago when the policy of charging for cement was altered. Where formerly the buyer was trusted with the bags and only charged when he did not return them, it was found that money was lost due to the fact that buyers were lax about returning the bags and were more lax about paying for a bill charging them with a certain amount for bags not returned. Such accounts were known to stand on the books for months and no settlement forthcoming because the purchaser did not look upon it as a just charge for value received. This plan has now been changed and today the purchaser of cement pays an extra 5 cents per bag when buying his cement and this charge is credited to him.

Have You Had This Experience?

Readers of Hardware and Metal will, no doubt, appreciate the sentiment expressed in the following letter which was received by Mr. Weldon, President of the S. Hayward Co., St. John, N.B.:

> Dear your of Jan 25 receved with statement wich i call right but the 10 Days draft i must to say so right down i do not see my way to do so, as you say cannot do business without money and i cannot paid without money you may not know how it is over here at the present time it is hard for me to sue but i will do it soone if no change ge give up business and get to Hell out to here do the Best you can so i will do the same.
>
> Hardware Merchant

No complaint is forthcoming when it is pointed out that the charge covers the cost of the bag, and there is more desire on the purchaser's part to return the bag when he knows he is to get a credit for it.

No Tendering

The cement business of this store is confined to retail trade of the nature outlined. Many opportunities have been presented for tendering on large quantity business for highway and other such work, but this business has been carefully avoided due to the fact that price cutting is the usual feature of such tendering and it is the opinion of Mr. Hanna that should low price tenders be made on such work and local building contractors and dealers find out about it there might be some disposition among them to hold out for similar prices. In order to avoid any such complications which might interfere with the usual run of retail cement trade in this store, such tendering on quantity business is avoided.

The use of a separate building for cement, plaster, lime, etc., is recommended by Mr. Hanna, as a means of overcoming one of the common objections to t handling of cement, namely, the circulation of the dust throughout the store. A separate warehouse is also kept for handling glass.

This store is carrying an average stock of $40,000. In discussing business conditions, Mr. Hanna pointed out that the turnover of this business has suffered very little recently. More aggressive selling effort has resulted in the opening up of several new accounts and considerable hardware has been sold to the engineers who are working on highway construction in Belleville and district. Mr. Hanna thinks business will be much better toward spring when a building boom is expected to materialize. While predictions have frequently been made concerning a building boom and such has not followed it is pointed out by Mr. Hanna that enquiries now being made by customers indicate that a stim-

The separate warehouse for cement, plaster, lime, etc., as used by the Walker Hardware Co., Belleville, is shown herewith. A fair indication of the stock maintained is shown herewith. The separate warehouse concentrates the dust from the handling of these lines and keeps it away from the store. Much of the cement sold by this firm is never housed in this warehouse, it being delivered to customers from the car on the railway siding. It is the job of one man to maintain the records of stock on hand, empty bags returned, and deliveries and receipts.

ulation of building is to be expected after the winter is over.

While it has been noticed that customers are following more closely the "shopping" habit now than formerly, it is held that such customers still place service on a level of equal importance with price and in service this store endeavors to specialize. The salesmen go to almost any lengths to give the unique service which builds permanent trade. Farmers in this district, as in others, are somewhat restricting their buying in the hope that hardware prices will decline further.

A splendid paint year has been experienced by this store. A feature of this business has been the fact that whereas ready mixed paint was at a disadvantage through costing more than the lead, oil and other component materials bought separately, the recent declines on ready mixed paint have stimulated its sale until now it is bought in preference to the separate materials. Particular steps have been taken to educate farmers along the line of false economy of neglecting to paint barns. It is common to see many barns which have never had a drop of paint and the owners of such property are absolutely ignorant of the surface saving value of paint. A special campaign was conducted to reach these property owners and as a result thousands of gallons of barn paint have been sold. Advertising, demonstration by samples in the store and service work in the way of estimating requirements and showing correct method af application were the means employed in this campaign.

In meeting current problems of the retail hardware trade Mr. Hanna points to the necessity of buying carefully. By this he does not mean to curtail buying to the danger point, but to buy the goods for which there is a ready sale and then make every effort to move them rapidly. "Keep the stock up to requirements because this is the only way to give service which retains customers," says Mr. Hanna.

Meeting Mail Order Competition

Dealing with mail order competition in the district Mr. Hanna pointed out that the biggest difficulty in this connection is to establish what people are doing the buying from mail order houses. In some cases customers split up their buying between the local store and the mail order houses, taking advantage of the special prices offered by each. When he suspects a customer of following this plan Mr. Hanna will point to some article and question them as to what price the mail order catalog is quoting in it, taking care not to mention the mail order "leader" which is specially priced to act as a bait. Then, by comparison, he can generally establish in the customer's mind the idea that apart from the "leader" which is quoted in the mail order catalog the prices of the latter are equal or greater than those quoted by the local hardware store. When this has been pointed out Mr. Hanna asks for an opportunity to quote on the whole order the next time one is available, assuring the customer that no loss will be experienced and that probably a saving will be effected in prices, to say nothing of the more rapid delivery and the advantage of seeing the goods before the purchase is made. This has generally been sufficiently effective to offset mail order competition once the prospect has been forced to admit that he has been a mail order customer.

Cash Basis Increased Week's Sales $573

Sales Records of Carter Bros., Picton, Ont., Show Substantial Increase in Trade Since Adoption of Cash Basis—Recent Three Days' Trade Totalled $864, A Goodly Sum for a Country Hardware Store in a Small Town—Linking up With Local Movements

GREAT success is claimed to have resulted from the adoption some time ago of the strictly cash system of conducting business by Carter Bros. Hardware, Picton, Ont. An announcement was made in Hardware and Metal some months ago when the new system was introduced by this firm, and Mr. Carter now advises that the results have much exceeded expectations.

Speaking of the new basis of conducting business, Mr. Carter states, "It is really wonderful the success it has been, and where as we looked for a slump in business when we started it and were quite prepared to meet it, it has been a wonderful surprise to see the great increase in sales it has brought forth."

Mr. Carter takes a close interest in the local Poultry Show, arranging a special sale on this occasion. Some clippings from the Picton newspaper commenting on the success of the Cash system in this store appear elsewhere in this article. In regard to the clippings dealing with the Poultry Show Sale days, Mr. Carter draws attention to the fact that these go to show how business can be stimulated the very dullest season of the year by promoting a plan of this kind.

"Our sales for the three days of the show were $864.08," said Mr. Carter, "which is a tidy sum to be taken in by a country hardware store situated in a small town like Picton. Ordinarily the sales for these days would amount to about $180 at this time of year so the extent of the increase is at once apparent."

Mr. Carter has taken much interest in the Prince Edward Poultry Ass'n, since its inception some years ago and for the past two years has been president of the organization. A glance over a local newspaper at the time of the last show reveals the fact that all local merchants lend their active support and link up with the affair in their advertisements. An ad by Carter Bros. on that occasion is headed Poultry Show Sale . . .dates . ., Bigger and Better than ever before. We are offering on Poultry Show Days our entire stock at great reductions. Coming as it does just at inventory taking, in-

1. "Carter Bros. have great cause to congratulate themselves on the success of their first Poultry Show Sale under the new cash system, as on the first day alone they waited on 216 customers more than on the first day of their sale last year, and their sales exceeded the combined cash and credit sales of that day by $155.62. And the public is well aware of the crowds they waited on, on the second day, which was the day their Agate Ware Sale took place."

2. "Carter Bros. have great cause to congratulate themselves on their Christmas trade under their new cash system, as it exceeded all former years by long odds. Last Friday they waited on 71 more customers than on the corresponding Friday of a year ago, and their sales were $192.19 greater, and the following day, Saturday, they waited on 129 more than on the Saturday of a year ago, and their sales for the week totalled $573.17 over the week of a year ago."

3. "There is music for the merchant in the jingle of his cash register, and Carter Bros.' cash register jingled a merry tune all day last Saturday, and when the music ceased at night they found they had waited on 379 customers, an increase of 107 over the corresponding Saturday of a year ago. Taking into consideration that Carter Bros. were doing a splendid business last year, last Saturday made a remarkable showing for them."

"Possession is Nine-Tenths of the Law"

The plan of displaying kitchen utensils, electrical goods and other household lines on long narrow display tables among which the housewife may wander at leisure and handle the various lines shown, has been proved to be highly successful by A. R. A'Bear, hardware merchant of Montreal. Mr. A'Bear knows that allowing customers to handle the actual merchandise stimulates the desire for possession. It has been said that "goods well displayed are half sold," but Mr. A'Bear goes one better and sees that every facility is provided to allow customers to handle the article in which they are interested. There is a difference between possession and ownership, but when the law looks upon possession in such an important light, this merchant realizes that it means something in selling merchandise.

duces us to offer bigger reductions than otherwise would be possible."

Picton merchants find that active co-operation with an affair of this kind helps stimulate trade and Mr. Carter has found it of outstanding value as evidenced by the figures.

4. "Their new cash system is putting Carter Bros. off to a good start for the New Year, as last Saturday they waited on 253 customers, an increase of 66 customers over the corresponding Saturday of a year ago, while their sales were $43.88 greater. Carter Bros. are proving to the entire satisfaction of their customers that a firm that buys for cash and sells for cash, can and does sell cheaper, than firms that are burdened with bad debts, bookkeeper's salary, costly ledgers, account paper, postage on accounts, etc."

Some indication of the success which is attending the use of the Cash system in this store is found in the paragraphs shown on this page as taken from various recent issues of the local newspaper in Picton.

These reveal some interesting facts including the following:—On the first day of the Poultry Show sale 216 more customers were waited on than on the first day of the sale last year and an increase of $155 was made in volume of business. Christmas trade was greatly stimulated, 71 more customers being waited on on one day than on the corresponding day the previous year and and increase in sales of $192. Sales for week prior to Christmas amounted to an increase of $573 over the corresponding week in 1920. A recent Saturday's business showed 379 customers waited on, an increase of 107 over the previous year. This latter figure and the returns for the week after Christmas indicate that this was not merely an increase in Christmas or other special trade, but that a steady increase in general business from day to day is taking place in this store.

5. "It was wonderful trade Carter Bros. was favored with during Christmas week, exceeding as it did by $573.17 the corresponding week of a year ago. And after enjoying such a great week's trade they fully expected that last week would fall away below zero, but not so, as they waited on 212 more customers than on the corresponding week of a year ago. And despite the big snow storm of last Saturday, they waited on 58 more customers than on the Saturday of a year ago and their sales were $34.85 greater."

Progress in Display

A SURVEY of the photos of Christmas window displays as entered in the 1921 Hardware and Metal Christmas window contest, indicates that gradual improvement is being made in window dressing by hardware merchants. The entries revealed the fact that more attention is being given to the fundamental principles of window display and the result has been windows that are more pleasing in arrangement, which include some element which commands attention from the passer-by and which subsequently arouses buying interest. The windows indicate that ability to sell goods has been the principle on which they have been arranged. This appears particularly to be the case with displays from merchants in smaller centres, those of less than 5,000 population. Comparing both sets of entries it would appear as though merchants in the smaller centres were making more progress in display than their brothers in the larger centres.

Fake Directory Schemes

A NATION-WIDE swindle involving over a million dollars and of which business men are the victims has just been brought to light as outlined elsewhere in this issue. As it is possible that the large plunder secured may tempt others to try similar schemes in this country it is well that the trade should be made acquainted with the modus operandi adopted.

The operator, a well dressed businesslike man, calls upon a firm with a dummy directory, (which turns out to be a bogus one), in which appears an advertisement of the firm in question. He asks for payment. If the order is questioned a signed contract is produced, the signature to which has been obtained by one of several fraudulent methods. In most cases however the presentation of the printed advertisement is sufficient to lull suspicion and the amount demanded is paid.

The scheme is not a new one; it was worked for a time in England some years ago, but for much smaller amounts—usually two or three dollars—on the pretence that the firm's name was to appear in larger type in a directory, which of course was a mythical one.

It should be borne in mind that no honest publisher of a directory will require payment without full investigation where any suspicion exists in a customer's mind. Where doubt arises business men are warned to investigate thoroughly before making payment for advertising space.

Solving Trade Problems

RETAIL MERCHANTS generally benefit to a considerable extent by participating in conventions where subjects of a practical nature are dealt with and where there is in attendance a sufficiently representative gathering to make valuable the interchange of ideas and thoughts. Especially under present conditions is it of value for retail hardware merchants to come together to discuss problems and establish certain effective ways of meeting to-day's problems. To make a convention of this kind it is necessary for every eligible merchant to attend and give thought to the questions to be dealt with. A glance through the program of the forthcoming annual convention of the Ontario Retail Hardware Association, as found in this issue, will indicate to hardware merchants that the trend of thought at this gathering will be such as to help any hardware merchant whether his business be small or large. It therefore remains with the merchants themselves as to what measure of success the convention will achieve. For the benefit of all concerned it is to be hoped there will be a large and enthusiastic attendance.

Hardware merchants have numerous problems on their hands to-day, such for instance as policies to be followed on a declining market in order to secure maximum business with minimum risk; the relation of various branches of trade to the readjustment process in view of public sentiment; wages of employees; cost of doing business, giving service, new lines, advertising, collections, success or otherwise of cash business, etc. These and a large number of other topics require a good deal of thought and each merchant's individual problems will also be brought before the delegates at the convention for an expression of opinion.

The Sales Tax

A NUMBER of recommendations will come before the next session of Parliament which is to assemble on March 8, and to the trade one of the most important matters will probably be that of the Sales Tax. While in principle this form of taxation is as acceptable as any form of taxation could be, yet there are many loopholes in connection with the regulations under which it is imposed which permit of a good deal of misunderstanding.

Recent articles which have appeared in Hardware and Metal on this subject have set forth views of retailers, wholesalers and manufacturers on this question and it is apparent that there is a great need for some definite line of action to be established and followed throughout. At the present time some manufacturers are absorbing the Sales Tax while others are not, the same applies to many wholesalers and retailers. The way it works out the retailer generally has to absorb a goodly portion of the tax and this is contrary to the original regulation in which the government made it clear that the Sales Tax was to be passed on to the consumer. Certain manufacturers who are passing on the Sales Tax, as they are expected to do, complain that the practice of other manufacturers in absorbing it as an added incentive for business are establishing a precedent which makes it hard for them to do business. The retailer in turn objects to having to absorb a tax which the government wishes passed on to the consumer and when this objection is raised, certain manufacturers come back with the argument that retailers as a class are making a larger percentage of profit than are the manufacturers and that they can afford to absorb this Sales Tax. One manufacturer discussing this matter with Hardware and Metal this week pointed out that in a recent investigation the retailer was shown to be making a very much greater percentage of profit than was the manufacturer.

A great deal could be said on this phase of the subject but it is unnecessary as the question of margin of profit does not directly bear on the question of how the Sales Tax should be handled. The equitable way for the tax to be dealt with is to pass it on to the consumer as the government intended it to be. Everyone is a consumer and will pay a fair portion of taxation according to what they buy. It is to be hoped that a thorough airing of the question will result in some satisfactory action at the next session of Parliament.

Fake Directory Scheme Run to Earth

Ringleaders in National Directory Frauds Indicted by Grand Jury—Five Men Arrested on Charge of Mulcting Million from Directory Advertisers in Many Cities

IF AT any time during the past twenty-five years your firm has paid forty, seventy-five or several hundred dollars to a business directory publishing house merely to honor your signature to a contract for advertising space which the officer signing did not recollect ordering, and of which no record could be found—you were possibly one of thousands who have been victimized to the estimated extent of more than a million dollars by a ring of alleged directory swindlers who have waxed rich on their spoils through a generation.

It has remained for the vigorous administration of the New York District Attorney, Joab H. Banton, at the request of the National Vigilance Committee, to take action of a decisive nature by rounding up five men, known in eminently respectable business and social circles in New York and Brooklyn, who are alleged to be the "higher-ups" in this nation-wide scheme which is believed to have bled unsuspecting business men in the name of advertising. Incalculable injury to the legitimate directory publishing business has resulted from the practices against which action has been taken. In the past, legitimate directory publishers had themselves spent thousands of dollars to fight these practices with which they were, as competitors, almost powerless to cope.

Under the keen direction of Assistant District Attorney Jerome Simmons, who had charge of the investigations for the State, the intricate phases of the alleged fraud were uncovered one by one. It was the privilege of the National Vigilance Committee of the Associated Advertising Clubs of the World to aid Mr. Simmons in many ways. When arrests were made every New York City newspaper gave a front page column or more to the story. Newspapers in scores of other principal cities carried similar stories.

The Men Arrested

Three brothers by the name of White and a partner, William B. Orr, were indicted by the New York County Grand Jury and arrested on December 30th, 1921, on charges of Grand Larceny. The White brothers are James H., Michael, and John F., all of New York City. William B. Orr is a resident of Brooklyn. These men did business under the name White, Orr & Co., at 156 Fifth Avenue, New York City, where they published a book known as "Reference Register." It is alleged that they collected every year on advertisements in this book although two issues only were published in the last four years. The book also contained advertisements of financial and commercial firms of high standing which had never been ordered nor paid for by the advertisers.

Arthur B. Bowen, one the principals in the alleged fake directory scheme—but operating independently of White Brothers and Orr—was indicted and arrested several weeks ago. His arrest was kept secret until the others could be apprehended. The charge against Bowen is forgery, alleged to have been accomplished by altering an innocent signed paper into a contract for advertising space in a directory which never existed. Bowen's arrest was made by Detective Joseph A. Daly, of New York Police Headquarters, in charge of detectives who worked on the case, when he discovered a hunchback negro in a little job printing shop in Harlem by whom it is alleged Bowen had advertisements printed and additional lines printed on signed slips to be collected.

Among the business directories, under spurious publishers' names, on which it is alleged fraudulent collections have been made in various parts of the country are: Randall's Commercial Register, Lockwood's Reference Directory, Cushing's Directory, Livermore's Lexicon of Financial Firms' Howard's Handy Guide, Lloyd's Industrial Record, Parker's Annual Business Manual, McMillan's list of Manufacturers, Norcross Reference Book, Plymouth List of Jobbers and Odell's Official Directory.

An Ingenious Scheme

Sun Varnish Stains

Most Varnish Stains Look Alike—In the Can

But there's a world of difference sometimes where the finished surface is concerned.

It's there that Quality counts. And Quality in Varnish Stain is altogether a matter of Appearance, Durability and Ease of Application. Sun Varnish Stain excels in all three.

It is therefore the safest varnish stain to recommend for a "touching up" of odd corners, as well as for a complete renovating of old shabby floors, furniture or woodwork.

Sun Varnish Stain varnishes and stains at one operation and correctly reproduces the beauty of the natural wood.

If you are a C.P. agent, see to it that you are never short of a good stock of this widely known and popular Varnish Stain. If you have yet to learn the big selling possibilities of this and other Canada Paint Products, write our Montreal Office for detailed particulars of the C. P. agency offer.

SOME FACES WHICH WILL BE SEEN IN HAMILTON NEXT WEEK

Some of the officials of the Ontario Retail Hardware Association are shown here including left to right, R. Hawkins, of Smiths Falls, Geo. May, vice-president, Toronto, Ed. Wanless, Chatham, Nelson Mills, President, Hamilton, W. F. Macpherson, Prescott, Secretary, F. B. Smith, Belleville, John Caslor, Treasurer, Toronto.

FAKE DIRECTORY SCHEME

Continued from page 47

Bowen and their agents have been engaged, while old in concept, has been somewhat ingenious in application. It was particularly well designed to evade detection and identification of the principals.

Checking accounts were opened at various small banks in New York and New Jersey in fictitious names and checks made out to them were collected through these accounts, it is alleged. Assistant District Attorney Simmons found that under the names of Alexander Livermore and Benjamin Knapp, more than $30,000 was cleared through an Edgewater, N. J., bank in about 16 months. This money was then checked out to enrich Orr, the White brothers and their agents.

Serious Losses to Advertisers

Investigation showed that numerous firms have been victimized to a serious extent through payments for directories which have never existed. A paint and oil company in New York, when approached by an investigator, searched its files for only 18 months back and found receipts and cancelled checks for advertising space in various spurious directories aggregating almost $3,000. All of these were identified by the investigator as fraudulent.

That the operators of this kind of scheme find graft easy is shown by marginal notations upon some of the used "order blanks" in the possession of the District Attorney. A series of these bear the rubber stamp of a New Orleans lumber merchant, with the signature of his secretary. The slips bear dates of February, 1907, and call for amounts of $700, $640, $510, and $1,000. Upon the $700 order is this pencilled notation: "Signature O. K. Soft."

Written in ink on another order is this: "Have agent discontinue calling. Signature O. K. but don't like price. Too high. Will cut to $500, and keep between it and $600."

But conditions evidently changed for a later order bore this pencil message: "Make it $1,500. Soft."

According to accomplices in the scheme, who have confessed to Mr. Simmons, signatures were obtained originally by getting signed requests for a free directory or a signed order for listing a name in the directory.

Turned Signed Forms Into Contract

After obtaining an original signature, the signed paper was altered by the ancient but convincing process of cutting off a printed line at the top and by printing in new lines, such as, "Order for Advertising Space," or "Publishers' Advertising Contract," and other phrases essential to the alteration in space left for the purpose. One of the witnesses before the Grand Jury was a man who is said to have actually seen James White alter the signed slips and who himself, at White's direction, filled in amounts to be collected time again by getting the victim to ed. Signatures were obtained time and sign a blank form on the excuse that it must be returned to the collector's office to show that collections had been regularly made. Such form was called a "Has Paid Voucher."

It is alleged that "Phillips Directory," a small but legitimate publication, bought by the Whites some years ago, was used to get signatures on orders which were later altered and collected upon in various amounts—depending upon the commerical rating of the firm and the ease with which it could be parted from its money by the system employed.

Studiously avoiding use of the mails, great pains were taken by collectors to avoid arrest or serious consequences if arrest occurred. The "collector" always travelled with an "outside" man who carried all the signed papers and receipts to be covered in the day's rounds. The collector carried only his one victim's signed "contract," a receipt and the directory. The book he carried was probably the only one in existence. Thus equipped, he was ready to show the victim his page or half-page advertisement, which in fact had been specially printed and pasted in the book. It carried also many advertisements of prominent houses which were not paid for but were inserted to create an atmosphere of respectability for the book. If the victim became suspicious, the collector withdrew, saying that he would have the office write about the matter. He then returned the signed contract to headquarters and advised that it be killed.

Alleged Principals Evaded Custody

If a collector at work was ever arrested the papers and book in his possession made slim evidence on which to base a criminal charge and yielded no trace of the collector's employers or associates. In fact, as far as is known, few of these agents have ever been in custody. Michael White was arrested in Dallas, Texas, in 1915 with a coworker named J. Mack, but could not be held because of lack of evidence. It is said that an operator in Elgin, Ill., was forced to flee across the prairies to Chicago, to escape arrest by the local police. In San Diego, Calif., many years ago the authorities met with greater success by arresting an agent named Fleischman who carried on his person incriminating evidence leading to a sentence of 5 years in San Quentin.

Final Plans For O. R. H. A. Convention

Lieutenant-Governor Cockshutt to Address Delegates at Banquet Tendered by Manufacturers—Merchants Much Interested in Broad Range of Helpful Questions to be Discussed.

The growing importance of Hamilton as an industrial and business centre is somewhat indicated by the improvements and additions being made in the rail and road approaches to the city. The above picture shows the new high level bridge on the left, which has just been completed, and it also shows the other numerous approaches to the city from the north-east.

IT IS HOPED that when the opening session of the 17th annual convention of the Ontario Retail Hardware Association is called to order on Tuesday morning next there will be a large attendance of hardware merchants to take advantage of the many social and educational facilities which have been provided. The program which will be followed throughout the four days of the convention is shown in this issue and a glance over the wide range of subjects to be dealt with will prove conclusively to any retail hardware merchant that the convention should prove of real and direct benefit especially under prevailing conditions.

When in Hamilton this week Hardware and Metal was advised that the manufacturers who are conducting the banquet on Thursday evening of the convention, have succeeded in their endeavors to have the Lieutenant-Governor Cockshutt of Ontario give an address. This will be but one of the many important features to be introduced on that occasion.

Interest in Questions

The list of questions which have been prepared for discussion in the sessions devoted to Question Box have brought forth much favorable comment from retail hardware merchants in various parts of Canada. Many of these merchants undoubtedly wish they had the opportunity of attending the convention to take personal part in the discussion, but they will be given as much information as possible through Hardware and Metal.

Each afternoon will be devoted to visits to the exhibits at the armories and this is expected to be an important feature in bringing about closer acquaintances between retailers and manufacturers as well as to give the trade an opportunity of examing samples of lines being offered.

Apart from the convention, visiting retailers will find Hamilton a city of much interest. It is particularly well suited for a convention of hardwaremen in view of the outstanding importance of its large number of industries engaged in the hardware and metal trades. Opportunity will be given for visits to be paid to certain of these plants. The location of the city is also such as to encourage the attendance of a large number of retail hardware merchants from all parts of the province. Hamilton is very centrally located as regards the most thickly settled trade centres of Ontario and it is therefore in close proximity to the greatest number of merchants.

Apart from the industrial and business aspect, Hamilton is attractive from the standpoint of local beauty and the city boasts of good hotel accommodation, theatres, restaurants, etc., so that the social requirements of delegates will be well cared for.

The city is an important terminal for radials, railways and water transportation. Recent development provides for the reclaiming of a great amount of land to be used for industrial purposes on the water front and this will increase the city's importance as a manufacturing and shipping centre.

At present Hamilton has industries numbering nearly five hundred and employing more than thirty thousand workers. Its manufacturers have stood the strain well during the recent depression and are now in a position to plan expansion in the future. Cheap electrical power through close proximity to Niagara has been an important factor in developing Hamilton's industries. From the standpoint of a home city Hamilton is not found wanting with its attractive residential districts and hospitable citizens. The retail merchants and others in Hamilton always do their utmost to make pleasant the visits of delegates to the O.R.H.A. conventions and so from every standpoint those attending the forthcoming convention are assured of a pleasant and helpful time.

DEATHS FROM IMPROPER USE OF EXPLOSIVES

"The improper use of explosives, caused 31 deaths and 73 injuries during 1920," remarked Lieut.-Col. G. Ogilvie, chief inspector of explosives, Ottawa, during an account of the operation of the Explosives Act of Canada. Sheer negligence, he said, was the cause of many accidents and recklessness contributed its share. "It is very fortunate for us," continued Col. Ogilvie, "that the supply of explosives, other than fireworks, is practically all from Canadian factories. Not only does this facilitate the authorization of the explosives put on the market, but, enjoying as we do the co-operation of manufacturers, we have benefited by their influence over their customers in matters relating to the keeping of explosives."

STEEL INDUSTRIAL CONDITIONS ABROAD

Halifax, N. S.—In an interview, R. M. Wolvin, president of the British Empire Steel Corporation, just returned from Europe, said that while in Germany and England he had been negotiating for sales of iron ore from the Wabana Mines, and felt the negotiations would result in satisfactory business in the future.

"In Britain business conditions have improved very greatly during the year, and British export trade is increasing," Mr. Wolvin said.

"In Germany there is little evidence of unemployment and the condition of the people seems reasonably satisfactory. The German Steel industry is working to about 60% of capacity, and would do better if it were not that Germany has to make deliveries of coal to France. Skilled workmen in Germany now receive 100 marks a day, equivalent to fifty cents in Canadian currency."

Program of 17th Annual Convention Ontario Retail Hardware Ass'n

February 14, 15, 16, 17th 1922, at Hamilton, Ont.

TUESDAY, FEBRUARY 14
Royal Connaught Hotel.

8.30 a.m.—Secretary's office, located on mezzanine floor, open for registration of members and guests, distribution of badges and general information.

9.45 a.m.—Convention Hall on mezzanine floor, community singing.

10.00 a.m. (promptly)—Opening session, President Nelson Mills presiding.
Song, "God Save the King."
Invocation, Rev. Dr. W. H. Sedgewick, minister Central Presbyterian Church, Hamilton.
Annual Address, President Mills.
Civic welcome, Mayor of Hamilton.

10.30 a.m.—Question Box, Ed. Wanless, Chatham, presiding.
Special topics for the day, questions 1 to 5, inclusive.

11.00 a.m.—The maintenance of established resale prices on well advertised products, H. J. Haire, The Alabastine Co., Paris.

11.30 a.m.—How dealers may successfully advertise, L. R. Green, advertising manager Tucketts, Limited.

12.00 a.m.—Appointment of convention committees and introduction of new business by members.

12.30 p.m.—Adjournment.

1.00 p.m.—Opening of hardware exhibition at the Armouries, John St. North. Hours. 1 to 10 o'clock.

During the afternoon, only merchants and ladies accompanying them will be admitted to the exhibition. These hours every day are reserved for business intercourse between exhibitors and those who buy to resell or use the products exhibited.

Members and their ladies require no admission tickets, their badges are credentials at all hours.

Non-members and other buyers will be provided with "Merchant Tickets" by exhibitors and by secretary.

7.00 p.m.—Exhibition open to the public. Children unaccompanied by parents not admitted. Music provided both afternoon and evening.

10.00 p.m.—Closing hour.

WEDNESDAY, FEBRUARY 15

8.30 a.m.—Secretary's office open on mezzanine floor of hotel.

9.15 a.m.—Community singing.

9.30 a.m. (promptly)—Convention Hall, Question Box, George E. May, Toronto, presiding. Topics for the day, Questions 7 to 12 inclusive.

10.30 a.m.—Reports of officers and committees. Treasurer's report; Secretary's report; Auditors' report.

11.00 a.m.—The banker and the retailer, J. P. Bell, General manager Bank of Hamilton.

11.30 a.m.—Hardware mutual fire insurance, C. L. Clarke, Winnipeg, Canadian manager, Canadian Hardware & Implement Underwriters.

12 a.m.—F. J. Penberthy, Lowe Bros., speaking on "Business Disease."

1.00 p.m.—Hardware exhibition at the Armouries. Afternoon for buyers and representatives of business houses. Evening open to the public.

7.00 p.m.—Association banquet for ladies and men, Royal Connaught Hotel. Tickets, $2.50 each. John D. Wells, Buffalo, managing editor "Buffalo Times", will speak at the banquet. Subject, "Whoa," (full of wit and humor.)

Tickets should be secured at secretary's desk not later than Wednesday noon, if possible.

THURSDAY, FEBRUARY 16

9.15 a.m.—Convention Hall, Community singing.

9.30 a.m. (promptly)—Question Box, H. N. Joy, West Toronto, presiding. Topics for the day, Questions 12 to 18, inclusive.

10.00 a.m.—H. E. Mihell, executive member "Save the Surface" Campaign.

10.30 a.m.—Prof. W. C. Clark, director of courses in commerce, Queen's University.

12.00 a.m.—The association price book, introduced by secretary. Open discussion by members.

12.30 p.m.—Adjournment.

1.00 p.m. to 6.00 p.m.—Hardware exhibition at Armouries open to buyers and dealers.

6.30 p.m.—Complimentary banquet tendered by the Hardware Manufacturers of Hamilton.

7.00 to 10.00 p.m.—Exhibition open to the public.

FRIDAY, FEBRUARY 17

9.15—a.m.—Convention Hall Community Singing.

9.30 a.m.—Question box. Topics for the day. Balance of Questions.

10.00 a.m.—Reports of committees.
Resolutions.
Nomination of Officers.
Election of Officers.

Unfinished business.

10.30 a.m.—Visit new factory of Libbey Owens Sheet Glass Co.

1.00 p.m.—Visit Hardware Exhibition, finish buying and file buyers' cards with the Secretary at booth No. 99 or else mail it to him at Prescott, Ont.

QUESTION BOX DISCUSSION

1. How closely should we follow declining markets in adjusting our selling prices?
2. Are the Jobbers as prompt as they should be in meeting the declining market?
3. What shall we do with wage question as the high living costs decline?
4. How can the cost of doing business be cut and maintain service?
5. What new lines did you add during 1921, that have proved profitable?
6. How many dealers present, pay a bonus on sales by Clerks?
7. Could not active steps be taken by this Association to prevent Wholesalers from doing a Retail business?
8. What is the best way to get results from advertising folders etc., as furnished by manufacturers?
9. How much should a dealer pay for goods he takes out of stock for his own use?
10. What should properly be included in over-head Expenses?
11. What is the average wage paid. Clerks, Tinsmiths, Plumbers? Have any reduced wages yet?
12. Has anyone definite information regarding workshop in connection with store? Does it pay?
13. What is the best way to handle slow accounts without offending customers?
14. What is the average percentage of loss on credit accounts?
15. Have any members successfully turned a credit business into a cash business? How was it done?
16. In changing credit to cash business would it be advisable to allow monthly accounts to telephone customers, and to customers who are building or painting?
17. How do you proceed to collect tough accounts?
18. What experience have dealers present had in handling auto supplies, tires, etc., in a small town? Do they find it profitable, or is most of the business going to garages? If Hardware dealers get bulk of the business, how do they do it?
19. What are the advantages or disadvantages of marking selling prices in private code?
20. Why are cheap platform scales still, many times the pre-war price?

Important Discussions at Convention of The British Columbia Hardware Club

Annual Meeting One of Best on Record—Good Advice by Prominent Business Men

By Hardware and Metal Vancouver Representative

CONSERVATIVE optimism was the keynote of the fourth annual convention of the B. C. Hardware Club which was held this week in the Hotel Vancouver. There was a large attendance of retailers from Vancouver, Victoria, New Westminster, Chilliwack, Armstrong and Duncan. The morning session was taken up largely with the registration of delegates, reading of minutes and correspondence and presentation of annual reports.

New Officers

At this session also, the following officers were elected for the ensuing year: Honorary presidents, Jos. Burton, of Denmark and Burton of Chilliwack and A. Peterson of the Cowichan Merchants Ltd. of Duncan; president, T. H. Latimer, Vancouver; Gordon Kearns, first vice-president; W. H. Hudson, second vice-president; W. C. Stearman, treasurer and R. A. Ogilvie, secretary, all of Vancouver.

Following are the names of the out-of-town delegates in attendance: A. Davis, Cunningham Hardware Co., New Westminster; R. R. Taylor, president of the Victoria Hardware Club; Angus McPhail, Armstrong; A. Peterson, Duncan; Jos. Burton, Chilliwack; C. P. Schwengers, managing director of E. G. Prior and Co., Ltd., Victoria; Walter Fraser, Victoria; R. H. Powell, of Geo. Powell & Son, Victoria; Frank S. Bonnell, B. C. Hardware & Paint Co., Victoria; Chas. Bryson and Jas. Hyslop, New Westminster. The newly elected president was unable to take the chair owing to an attack by thugs at his place of business the previous evening.

Frank Parsons, director of the Gregory Tire & Rubber Co., Ltd., and chairman of the Made-in-B.-C. Campaign committee, was the first speaker at the afternoon session which was presided over by past president Jas. Hyslop. He told the dealers that consumers should not be asked to pay more for goods manufactured in B.C. He urged them to stock B. C. goods first, Canadian manufactures second and British goods third.

Taking the provincial per capita expenditure at $25.85 per head based on a population of 523,000, the latest census figures, Mr. Parsons said that more population was needed to reduce taxation which was much higher than in other provinces. In 1920, 4,000,000 pounds more canned fruit and vegetables had been used than in 1919 and the cans, boxes, nails and labels had not been produced in this province. He closed by itemizing several lines such as nails, wedges, wire clothes lines, brooms, incubators, sand paper and roofing paper which could be bought in B. C.

Question of Competition

Leading a discussion on Mr. Parson's address, W. C. Stearman said he supported the speaker although he found it difficult at times to meet outside competition. He illustrated his point by stating that goods could be brought from Chicago including payment of duty and exchange and the cost would be lower than the B. C. product and in addition the imported product had a better finish. The customer, he declared, always was impressed by the finish of an article.

Mr. Stearman told of one line of B. C. goods which he had bought at $12 per dozen. He had sent a few to customers and had tried to sell them at $1.50. At the same time agents were going from door to door selling the same article at $1. Until manufacturers stopped this sort of practice, they could not hope to market their products through the retail trade, he asserted. He recommended the manufacturers to place their name on their product with an attractive label.

Angus McPhail of Armstrong referred to the action of Vancouver wholesale grocers buying from the Dominion Can-

(Continued on page 68)

DEATH OF THOMAS DALLAS

After a ten days' illness with pneumonia, Thomas Dallas, hardware merchant, Lamont, Alta., is dead. The late Mr. Dallas was born in Orillia, Ont., in 1869, of Scottish parentage. When he was twelve years of age his father died and at the age of 15 he was apprenticed to John Gilpin, hardware merchant, Orillia, but some years later proceeded to Western Canada, where he entered the service of the late A. S. Smith, hardware merchant, Moosomin, Sask. After spending some time with Mr. Smith and becoming thoroughly familiar with Western conditions, he removed in 1906, to Lamont, Alta., and started in the hardware business on his own account.

LATE THOMAS DALLAS
Hardware merchant of Lamont, Alta., and for many years engaged in the hardware trade in various parts of Canada, whose death is announced.

The late Mr. Dallas earned and enjoyed the regard and esteem of those with whom he dealt. He was a man of sterling integrity, a pleasing and genial personality and he did his bit in the upbuilding of the West. He worked hard for and deserved his success and he will be missed by many friends.

PERSONAL

L. A. Leavens, managing-director, McGregor Hardware Co., Ltd., Medicine Hat, Alta., has returned home after attending a meeting at the company's head office, Brandon, Man.

Events in the Trade

BUSINESS CHANGES

Toronto.—Geo. Garrett has discontinued hardware business at 1244 Gerrard St. E.

FIRE LOSS

Montreal.—Lacroix & Leger, wholesale and retail hardware, suffered fire loss.

Ft. William, Ont.—W. S. Piper, hardware has suffered slight fire loss.

Sioux Lookout, Ont.—P. Perlen, hardware, has been burned.

Montreal.—Damage estimated at between $200,000, and $250,000 was caused by fire on St. Catherine street east. The National Stove Manufacturing Co., suffered most from the outbreak, and officials estimate the loss on the building at about $100,000, and the value of the stock destroyed at $40,000.

OBITUARY

William Mearns, of Scotch extraction on his father's side, and English on his mother's, born in Montreal, but in course of time a hardware merchant in London, Oshawa and Toronto, died in Chicago on Saturday last of pneumonia, in his 85th year.

Joseph Henry, senior member of the firm, J. Henry & Sons, hardware merchants, Orono, Ont., who died recently, was one of the pioneer figures in the retail hardware field. The bereaved relatives were the recipients of several messages of condolence from wholesale firms in Toronto and other establishments with which the firm had done business for a number of years.

PERSONAL

W. J. Carter of Carter Bros., Picton, Ont., is visiting his son, D. G. Carter, in Montreal this week.

W. A. C. Hamilton, secretary of the Consumers' Cordage Co., is in the Maritime Provinces this week.

G. H. Wall, hardware merchant, of Wyandotte, Ont., was a visitor in Toronto and called upon the firm of Lyons & Marks.

F. P. Jones, President of the Canada Cement Co., and W. Beverley Robinson, President of the B. & S. H. Thompson Co., have left Montreal for New York, en route to South America, where they will look into business conditions. They will be absent about three months, in all.

C. J. and H. C. Brown Purchase Horne Bros.

C. J. Brown and H. C. Brown, father and son, of Montreal have purchased the retail hardware business of Horne Bros., Sudbury, Ont.

Mr. Brown, Sr. has spent the past thirty years in the hardware trade, part of which was spent in the section of the country to which he is returning. In the earlier days he was in the employ of the Cochrane Hdwe., both in North Bay and Sudbury. He was still able to keep in touch with business in this Northern section when later he joined the selling forces of Lewis Bros., Ltd. for this territory. For the past few years Mr. Brown has been working on the inside for this firm, latterly being promoted to the position of purchasing agent.

H. C. Brown has followed in his father's footsteps, his earlier training also being with the Cochrane Hardware.

C. J. Brown (upper) and H. C. Brown (lower), father and son who have purchased Horne Bros. retail hardware business at Sudbury, Ontario.

McCLARY MFG. CO. BUYS REPUBLIC STAMPING AND ENAMELING COMPANY

Announcement has been made to Hardware and Metal by the McClary Manufacturing Co., London, Ont., of the purchase by that firm of the Republic Stamping and Enameling Company of Toronto.

HAVE OPENED ELECTRICAL DEPARTMENT

The Cross & Sutherland Hardware Company, Ltd., Hanover, Ont., with a branch store at Durham, have recently established an electrical contracting and electrical merchandising department and are carrying an up-to-date line of electrical appliances and fixtures. Their contracting department has just been awarded the contract for reconstructing the electrical service and adding an additional 40 h.p. motor to J. Metzgar's grist mill at Neustadt.

NO CHANGE IN STEEL COMPANY OF CANADA OFFICIALS

Persistent rumors which have been prevalent in local hardware circles in the last few days concerning anticipated changes in the personnel of officials of the Steel Company of Canada, Ltd., Hamilton, have been put at rest by word received by Hardware and Metal from Robert Hobson, President of the company who states that 'the matter has never been discussed," and that no change is anticipated.

D. McPHERSON JOINS LYONS & MARKS

D. McPherson, previously with the Kennedy Hardware Co., of Toronto. will in future be associated with the firm of Lyons & Marks, also of Toronto, and will cover the city hardware trade in the interests of the latter firm.

URGE COUNCIL TO ORDER LICENSES ON BICYCLES

Bicycle manufacturers, jobbers and dealers in Toronto have sent a petition to the Council asking that a by-law be passed requiring all owners of bicycles in the municipality to carry a license, and that the license number should be displayed on each bicycle. It is claimed that the license would be of assistance in preventing thefts and help the police in tracing machines.

FRENCH SALESMEN MAKE PRESENTATION

Montreal.—The French section of the city sales force of Lewis Bros., Ltd., took the opportunity on Saturday last to present both Mr. Frazer and Mr. Carter with a beautiful gift, upon their resignation from the above firm. Each was also handed a letter conveying the regrets of the salesmen upon losing two business associates who had always been helpful in their duties, and ever willing to co-operate in the extension of their sales. Mr. Frazer received a beautiful green gold cigar cutter with chain, while Mr. Carter was presented with a sterling cigarette case and holder.

W. E. PLATT

Hardware merchant, St. Clair Avenue, Toronto, who was elected a member of the Executive Committee of the newly formed Retail Hardware and Paint Dealers' Club of Toronto at the recent organization meeting in Toronto, outlined previously in Hardware and Metal.

HYSLOP BROS., LTD., CLOSE MONTREAL WAREHOUSE

Montreal.—The premises formerly occupied by Hyslop Brothers, Ltd., bicycles, automobile accessories, etc., at 11 Park Ave., Montreal, have been vacated and for this season the office and warehouse of the company in Montreal will be discontinued. Quebec and Maritime Province customers will be served from Toronto with necessary freight adjustments.

AMERICAN STEEL WOOL CO. TO HOLD DISPLAY CONTESTS

The American Steel Wool Mfg. Co., 451 Greenwich Ave., New York, is offering cash prizes of $25, $10 and $5 in the first of a series of window display contests it plans to be held during 1922. The first contest extends from March 1 to May 1. Display material will be furnished merchants by the company.

ASBESTOS EMBARGO FOR QUEBEC

Quebec.—"The government is giving the matter of an embargo on raw asbestos very serious consideration," Premier Taschereau states. "We are anxious to do everything possible to build up an industry in manufactured asbestos in this province, so as to reap the benefit of the great asbestos deposits this province contains."

INTEREST INCREASES IN KITCHENER ELECTRICAL SHOW

Kitchener, Ont.—That the Twin City Electric Exhibition has created a stir in the Electrical world is indicated from the fact that already three months in advance of the opening of the show here twenty-one booths have been contracted for by electrical firms, and inquiries for space are said to be coming in thick and fast from interested firms. It is confidently expected that before the next month is passed all of the available space at the show will be subscribed for by electrical dealers throughout the country.

CONSTITUTION FRAMED FOR RETAIL HARDWARE AND PAINT DEALER'S CLUB OF TORONTO

The Executive Committee of the newly formed Retail Hardware and Paint Dealers' Club of Toronto met this week and framed a constitution to be submitted to the members at the next meeting. Arrangements have been made to hold the next gathering of the members in the form of a dinner on Tuesday, March 14, at 6.30 p.m., in the Board of Trade dining room, top floor of the the Royal Bank Bldg., Toronto. The officials of the Toronto Paint, Oil & Varnish Club will be the guests, and a large attendance of Toronto retail hardware and paint dealers is expected. Invitations are being sent out to the trade.

MANY PROBLEMS FOR NEXT PARLIAMENT

(Continued from page 36)

by the officials of the manufacturers and wholesalers and a similar number by the president and secretary of the O. R. H. A. for this purpose? I think also that another step further along this line would accomplish good results, and venture the suggestion that the governments, both federal and provincial, might profitably invite conferences with a small number of public-spirited trained business men, selected from the various branches of trade, to exchange views, offering and receiving suggestions relative to problems which confront the country at the present time.

"While members of parliament may be very well informed along certain lines, it is difficult for them to keep in close touch with, and understand the needs and sentiments of the people to the same extent as the retail merchant, who is in daily contact with them. Had I an opportunity of a survey of the war obligations and revenues received and applied to same, I might be able to arrive at a more concise opinion and plan to meet the requirements."

"BICYCLE WEEK" MAY BE LEFT TO LOCAL ORGANIZATIONS

Considerable difference of opinion was in evidence at the executive meeting of the Canadian Bicycle Dealers' Association held in Brantford, regarding the correct or advisable time for the holding of Bicycle Week. The majority of the officers present favored staging Bicycle Week in June, preferably about the middle of that month while one or two officials suggested that the trade drive be held early in April. The discussion brought out many interesting opinions, as well as sidelights, and, because of the diversity of opinion, it was finally agreed to leave the matter open until the next meeting of the executive which is to be held in Toronto on March 9. Various manufacturers and jobbers will be invited to send representatives to this conference to thresh out Bicycle Week problems. It was also decided to leave open the proposal that the 1922 week in Canada be held under the direct auspices of the Canadian Association. There is a possibility that the staging of Bicycle Week will be left to the local dealer organizations in the Dominion.

WM. LAKE

Hardware merchant, 608 Queen St., W., Toronto, who was elected Treasurer of the newly formed Retail Hardware and Paint Dealers' Club of Toronto at the recent organization meeting fully outlined in January 28 issue of Hardware and Metal.

D. G. Carter, assistant sales-manager, Lewis Bros., Ltd., will resign this position on February 15th to join the Prescott, W. Robinson Sales Co., Montreal. Mr. Carter's new connections will still leave him in touch with the trade in Eastern Canada.

Letters to the Editor

Editor Hardware & Metal, Toronto.

On page 37, of your Hardware & Metal of Jan. 21, you reproduce the Question Box of the Ontario Hardware Convention: They are the most sensible lot of questions, in our opinion that have been put to any convention for quite a while. May we ask you to reproduce both questions and answers in your valuable paper, after the convention?

Yours truly
L. Dutil,
Blairmore Hardware Co.
Blairmore, Alta.

L. DUTIL REPLIES TO SECRETARY MACPHERSON RE INVENTORY

Editor of Hardware and Metal, Toronto:—

Referring again to Mr. MacPherson's letter on page 33 of Hardware and Metal, Jan. 21st, I still fail to be able to fall in line with Mr. MacPherson's idea on inventory that tells the truth, and I certainly would welcome the opinion of other hardwaremen expressed in your columns regarding this subject. In the meantime our stock sheets will show our stock of paint will be written at present price basis (this is wrong according to Mr. MacPherson, as part of the stock dates back to 1915 and cost price was quite a bit less then); we still have some 1916 nails, but they will be all taken at present replacement values. I also notice 20 pairs of No. 241 D2 3½ x 3½ Butts. They were bought by case lots at 40 cents laid down here, present prices 40. per pair. I don't think I am fooling myself or any body else in entering them at 40 cents. It is not our fault if we did not sell them before now, so don't get sarcastic. As for securing insurance adjustment on an increased basis over the stock sheets while the market is taking a toboggan slide, you have some job on your hands.

L. Dutil,
Blairmore Hardware Co., Blairmore, Alta.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

CANADIAN HARDWARE & IMPLEMENT UNDERWRITERS

Messrs. Mason & Dale, Bowmanville, Ont.—In connection with the Canadian Hardware & Implement Underwriters Insurance. Is there any security for the policy holders deposited with the Dominion Government in case of loss by fire?

Answer:—We have information to the effect that the Canadian Hardware & Implement Underwriters have on deposit with the Receiver-General of Canada, $150,000, which we believe covers the requirements of the Dominion Government. They are also operating under Dominion and Provincial Government supervision. They also give as references, the Bank of Montreal at Winnipeg and Montreal. Their record in the United States is a good one and authorities here state that they consider this company a safe one with which to place insurance.

GLAZED CHIMNEY TILE

Aiken Bros., Allenford, Ont.—Will you please advise as to where we can procure Glazed chimney tile.

Answer.—The following is a list of Canadian manufacturers of mantel tiles: Alabastine Company, Limited, Paris, Ontario; Canada Glass Mantels & Tiles Limited, Toronto, Ont.; Montreal Terra Cotta Company, Limited, Montreal, Que.; The Middleton Marble & Granite Company, Hamilton, Ont.; H. Wase & Company, Toronto, Ontario; Smith Marble & Construction Company, Limited, Montreal; The Sanitary Tiling Company, Montreal, Que.; Robert Reid, Montreal, Que.

WOODEN DOOR KNOBS

Heuhn Bros, General Merchants, Heidelberg, Ont.—Kindly advise names and addresses of manufacturers of wooden door knobs.

Answer.—The following is a partial list of firms making these articles: The National Lock Co., Rockford, Ill., U.S.A.; Stephenson Works Co., South Bend, Indiana; Grand Rapids Brass Co., Grand Rapids, Michigan; E. B. Estes & Son, 75 Warren Road, New York, N.Y.; Lennox Novelty Co., 230 W. Broadway, New York; Gallup-Ruffling Handle Co., Norwalk, Ohio; Piqua Handle and Mfg. Co., Drawer 741, Piqua, Ohio; L. W. Strock & Co., Bethlehem, Pa.

CASTORS

Kent, Garvin & Co., Hamilton, Ont.—We would be pleased to have you quote us the Canadian manufacturers of castors.

Answer.—The only Canadian firm listed in this respect is the Springfield Lock Manufacturing Company, Belleville, Ont.

ICELESS REFRIGERATORS

The Carroll Bros., Tillsonburg, Ont.—Will you kindly give names and addresses of manufacturers of iceless refrigerators?

Answer.—Canadian—The Toronto Laundry Machine Company, Limited; American—The Iceless Machine Co., Cleveland, Ohio, Ideal Sheet Metal Works, Michigan Ave., Chicago Ill.; Chicago Iceless Refrigerator Co., Chicago, Ill.; Walkup Bros., Waco, Texas; Empire Mfg. Co., Spokane, Wash.

STEEL FIRE ESCAPE LADDERS

Messrs Codere & Fils Limited, Sherbrooke, P.G.—Kindly inform us as to where we can procure steel fire escape ladders.

Answer.—The following is a list giving names and addresses of manufacturers of such ladders:—Fire Escapes—Canadian Allis-Chalmers Ltd., Toronto, Ont.; John Watson & Son, Montreal, Que.; Toronto Steel Construction Ltd., Toronto, Ont.; Canadian Ornamental Iron Co., Toronto, Ont.—Empire Steel Ladder, Ltd., Moncton, N.B.

WATER COOLERS

Messrs. Congdon & Marshall, Hardware, Dunnville, Ont.—Kindly advise as to where we can procure the water coolers with the inverted glass holder.

Answer.—These can be obtained from the York Springs, Limited, 17 Gould Street, Toronto, Ont.

BASEBALL AND SPORT GOODS

Messrs. Frank Fales & Sons, Ltd., 61 Dock Street, St. John, N.B.—Can you place us in touch with manufacturers of baseball goods in Canada?

Answer.—Walter Bentley and Company, Ltd., Niagara Falls, Ont.; The A. J. Reach Company, Brantford, Ontario; The Harold A. Wilson Co., Ltd., Toronto, Ontario; Winnett & Wellington, Ltd., Toronto, Ont.

PERMANENT METAL SCREENS

Campbell & Best, Peterborough, Ont.—Please advise where we can obtain non-adjustable metal permanent window screens and door screens.

Answer.—These are manufactured by and can be obtained from the Geo. B. Meadows Alive, Iron & Brass Company, Ltd., 479 Wellington Street W., Toronto, Can.

OIL BURNER WICKS

D. B. McLeod, Ripley, Ont.—Kindly advise me as to where we can procure wicks for oil burner stoves.

Answer.—The Hamilton Cotton Company, Hamilton, Ontario.

CROQUET SETS

Geo. D. Delmer, Conestogo, Ont.—Please inform us as to the Canadian manufacturers we can procure croquet sets from.

Answer.—Beauchamp & Co., Montreal, Que.; The Heavy Wise Woodenware Co., Palmerston, Ont.

TIN CANS.

A. W. Dean, No. 80 Park Street, Sydney, N.S.—Will you put me in communication with a firm that manufactures tin cans?

Answer—The A. R. Whittall Can Company, Limited, of Montreal, Que.

AUTO SPRING CLIPS.

Campbell & Fowler, Limited, St. John, N.B.—Would you be good enough to give us the names of firms who manufacture Clips for automobile springs?

Answer—The Cleveland Hardware Company of Cleveland, Ohio; The Richard Eccles Co., Auburn, N.Y.; D'Arcy Spring Co., Kalamazoo, Mich.; Strieby & Foote Co., Newark, N. J.

CANADIAN HARDWARE & IMPLEMENT UNDERWRITERS

W. C. Hoskins, Champion, Alta.—I have been approached by the Canadian Hardware & Implement Underwriters to place insurance with them. Kindly advise if you consider them good to insure with, and would recommend policy to us.

Answer:—We are of the opinion that it is O. K. to place insurance with Canadian Hardware & Implement Underwriters. As you may know, we have carried some advertising from them in our paper, and before accepting this advertising we made enquiries in a number of places in order to satisfy ourselves that the company was reliable. They have a splendid record in the United States and have received the endorsation of the Retail Merchants' Association in Western Canada, and also of the Ontario Retail Hardware Association, and we know they have secured a considerable amount of business. We have been advised by "THE FINANCIAL POST" that this company has the necessary deposit with the government, and in their opinion is a safe and reliable company to do business with.

Catalogues and Booklets

Those interested in any of the catalogues described below can procure a copy of the same by writing direct to these firms. Mention that you noticed this in Hardware and Metal

New Catalogues of the Welsh Tin Plate and Metal Stamping Company, Limited.

The Welsh Tin Plate and Metal Stamping Co., Ltd., Cambrian Works, Llanelly, South Wales, have issued their 1922 catalogue of Goat Brand Hollow Ware. Section one covers Tinned, Japanned and galvanized goods. Section No. 11 is devoted to enamelled ware. Section No. 1 on tinned, galvanized and japanned ware is comprised of 107 pages splendidly illustrated and showing an exceptionally wide range of goods.

Section No. 11 devoted to enamelled ware, consists of 137 pages and is handsomely illustrated, many of the illustrations being in colors. Two novel and practical features in the latter catalogue are the color chart and also views of displays of the company's products, which could be adapted to splendid window displays or displays for exhibition purposes. Copies of the new catalogue will be supplied to the trade upon request. The Welsh Tin Plate and Metal Stamping Company, Limited, are represented in Canada by Frederic Sara & Company, 1309-12th St. West, Calgary, Alberta, for Western Canada; and The W. H. Thornhill Company, 46 St. Alexandra Street, Montreal, for Eastern Canada.

Extend Explosives Regulations To Quebec

Control of Explosives in Quebec Formerly in Hands of Provincial Authorities—Many Changes to be Made by Extending the Federal Regulations of the Explosives Act

By Special Correspondent, Hardware and Metal

OTTAWA, Ont.—Federal regulation of the sale of explosives is now being extended to the province of Quebec. Heretofore the control has been entirely in the hands of the provincial authorities, who have never laid down many hard and fast rules. Such regulations and requirements as existed, other than the collection of a yearly license fee, have been abrogated, the provincial authorities realizing that a double set of rules would only complicate the situation and make regulation a difficult matter.

The question of revenue is a small matter insofar as the federal authorities are concerned, as evidenced by the fact that the yearly license is to be only one dollar. Proper control is what is aimed at in the change in authority.

In accordance with the provincial law a license was required for the sale of explosives, but not for magazines for explosives. By the Explosives Act of Canada, which now becomes operative in the province of Quebec, the manner in which explosives are kept, whether in magazines for explosives or in small quantities in general retail business premises, is regulated. In accordance with this law licenses are required for magazines for explosives, but not for the keeping for sale of explosives in such small quantities as are allowed to be kept under these regulations in other places.

In a circular letter being sent out by the Explosives Division, Department of Mines, to the hardware merchants and other dealers in the province of Quebec, handling explosives, it is explained:—

"If you keep or desire to keep explosives in a larger quantity than is allowed by these regulations, and so require a magazine for their storage, it will be necessary for you to make application for a license for such magazine for explosives, and to furnish particulars regarding it. The fee for the license is one dollar, and we will be pleased to give you full information regarding the procedure to be followed to obtain one, if such is required in your case, as without a license the keeping of explosives, otherwise than as prescribed in the regulations governing the storage in unlicensed premises, already referred to, would be unlawful and render the owner liable to penalty under the Explosives Act."

Factors Which Are Influencing Tire Prices

Manufacturers of Automobile Tires Announce Ten Per Cent. Decline in Prices on All Casings and Tubes

TIRE MANUFACTURERS have announced another general reduction in prices, effective February 1, this change applying to both cord and fabric tires in practically all sizes, as announced in last week's issue of Hardware and Metal. The extent of the decline is stated as approximately 10 per cent., but of varying extent on the different sizes, being around 9 per cent. on some and a little more on other sizes. This lowering in the quotations on casings and tubes has come as a surprise to some sections of the trade, following on the substantial decreases announced by tire manufacturers late last year. However, both manufacturers and distributors have expressed the opinion that these current price revisions now place the tire market on a substantial basis for future trade.

Spring buying by the consumer is expected to be stimulated as a result of the lower levels, it being pointed out by one manufacturer that prices on cord tires were now lower than the cost of fabric tires some two years ago.

As outlined in last week's issue of Hardware and Metal, the current price change is attributed to some reductions in production costs, including rubber, cotton and exchange rates. The fact that large quantities of raw materials for the manufacture of tires, such as rubber and cotton, are imported, becomes a factor of special prominence when exchange values are attaining a normal level. Rubber prices are still very low, much lower than pre-war prices, while some easing in raw cotton markets is described as another factor entering into future price estimates. The present fluctuation in cotton is considered only as a minor point in the current reduction, by some producers, as large stocks of rubber and cotton are usually carried by tire makers. Another manufacturer stated that the pruning of overhead costs, coupled with a recent improvement in the volume of factory output had resulted in reducing their operating costs, and these reductions were being passed on to the consumer. Tire dealers have been going light on stocks and purchases for some time past, but with the approach of the spring and summer seasons an improvement in trade in these products is generally looked for. The new prices are contained elsewhere in this issue.

Twenty Years Ago

Following items are reproduced from Hardware and Metal of February 8 1902:—

Frothingham & Workman, wholesale hardware merchants, Montreal, have dissolved and a new partnership has been registered.

Nathan Brenner, dealer in scrap iron, etc., Toronto, has sold out to Katie Brenner. (This is interesting in view of the present developments in the Brenner case.)

The hardware section of the Toronto Junction Branch of the Retail Merchants' Association elected the following officers for 1902: President, James Bond; 1st vice-president, E. Rogers; 2nd vice-president, J. E. C. Willard; secretary, T. Padget; treasurer, H. D. Snell; Delegates to R. M. A., N. Raybould and A. Chislom.

W. S. Rogers & Son, hardware, Glencoe, Ont., has been disposed of to T. E. Pool.

F. S. Murdoch, who has been representing Jas. Robertson Co. for eight years, succeeds the late Gabriel Crawford in traveling for the Canada Paint Co. in the Maritime provinces.

E. A. Wills, retiring secretary of the Toronto Board of Trade, was banqueted by friends of the National Club and the Board of Trade. Edward Gurney presided.

At the annual meeting of the Montreal Board of Trade the following were among the officers elected: 2nd vice-president, Geo. E. Drummond, iron; treasurer, Robert Munro, paints and oils. Members of Council, James Davidson, stamped and enamelled ware, J. J. McGill, rubber products. On the Board of Arbitration were the following: John MacFarlane, R. W. MacDougall, Robert Bickerdale, Rob't. Reford, etc.

A communication has been sent to the Canadian Manufacturers' Ass'n. by H. C. MacLean of Toronto, suggesting the consideration of a scheme for advertising Toronto in the Southern States as a summer resort.

Some current quotations on hardware are as follows: Wire nails $2.50; barb wire $3.00; building paper dry fibre 50 cents per roll; Canadian Portland cement $2.50; pig iron $17.50; bar iron $1.95; Black sheets $3.15; Canada plates dull $3.00; Galvanized sheets, Queen's Head $4.50; tinplates $4 per box; copper ingots $15 per 100 lbs.; black pipe $5.40 for one inch; white lead, pure, No. 1. $5.50; pure paints $1.20 per gal.; turpentine, single barrels, 68 cents; linseed oil, raw, 1 to 4 barrels 77 cents.

New Hardware Goods

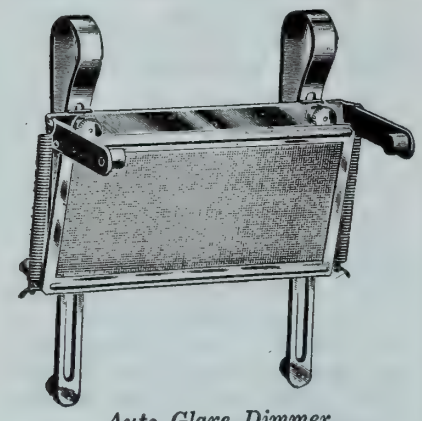
OFFERED TO CANADIAN HARDWAREMEN

AUTO GLARE DIMMER

This device fits on the windshield and filters the blinding glare of approaching headlights. It is claimed with this installation, the driver has a clear vision of the road ahead at all times. It is made of metal, the frame being spring brass. The dimming effect is obtained by the use of a special woven bronze screening of very fine mesh, the whole being heavily nickel-plated.

The device fits any car and is adjustable for the height of the driver.

When not in use a touch of the fingers



Auto Glare Dimmer

flips it out of the way. It is fitted with rubber bumpers. It is made by the Ray Filter Co., Marion, Indiana, U.S.A.

HANDILITE MAGNETO FLASHLAMP

Spielman Agencies, Registered, of Montreal, recently announced that they have been appointed sole agents in Canada for the Handilite Magneto Flashlamp, which is manufactured by the General Electric Company, of England.

This new product is a small device made on the principle of the ordinary pocket dry battery flashlight, but with the difference that the Handilite generates its own electrical power. The replacing of batteries is eliminated. The source of the electrical energy is a small dynamo machine with magnets completely enclosed in a finished nickel case and operated through a train of gear wheels by a lever. The case and the lever are so designed as to fit the shape of the hand. The manufacturers claim that the Handilite Magnetic Flashlamp is unaffected by the climatic conditions, and after being immersed in water, will operate again after being drained out. The total weight is 15 ounces.

NEW STEEL FOR DRILLS

A new form of steel has been developed by the Cleveland Twist Drill Co., Cleveland, Ohio. This steel is to be used in the manufacture of their drills, and such drills are to be known under the trade name of "Mezzo." Speaking of the new steel, the Cleveland Co. say that it possesses some very unusual qualities, and that these are result of a special heat treatment. The word "Mezzo" is intended to convey the meaning, midway between carbon and high speed steel.

These drills should be operated at approximately double the speed of carbon drills. They are not intended to supersede high speed drills, but rather to furnish a type midway between the two extremes.

ONE-MINUTE VALVE GRINDER

This valve grinder is based on a principle, combining intermittent rotation and hammering actions. The makers say it will grind a valve of ordinary size in from 20 to 40 seconds. It is easily operated and adjusted and works by turning a crank.

All parts subject to wear are hardened. With each revolution of the spindle the valve is raised from its seat and returned with a hammering blow, succeeded by a partial revolution of forced grinding action. The positive hammering it is said, firmly embeds the abrasive between the seats and each raise of the valve provides to replace the abrasive into a new position, thereby increasing the efficiency of the abrasive. Made by the One Minute Valve Grinder Co.

ROSE EVERLASTING BATTERY CLIPS

This battery clip is made of a non-corrosive metal. The makers say it reduces charging costs as there is no loss of current in transmission as in the case where exposed conducters are employed. They will fit all sizes and types of battery posts now in use.

The conductor is heavily insulated and both ends are cast in, making it impossible for the acid to come into contact with the copper cable carrying the current.

The Rose battery clips can be more or less easily and quickly attached while either end may be employed in completing the connection. Compressed, clothes pin fashion, the open end will slip over the straight post, and when the pressure is released will grip the post firmly. Compressing the taper end of the clips they may be slipped into the taper opening of the female type of post, giving a firm contact the entire width of the post. It is claimed they will also grip various sizes of wires, cables, flat bars,

RAMSPRING BUMPER

The Ramspring bumper, made by the Ramspring Bumper Co., Chicago, Ill., is different from other bumpers in point of principle and construction.

This bumper uses a sturdy pressed steel section, connected to a small vertical cylindrical housing secured to the frame. Within this housing is located a heavy coil spring, suitably connected to the front section of a lever arm and a connecting rod. The operation is simply one of winding the coiled spring up when an obstruction is encountered.

The front section of the bumper is

"Ramspring" Bumper

of pressed steel. This member has a heavy channel section and the width of the channel varies from about ¾ in. at the tips or outside edges to about 2 in. in the center. At each of the two vertical members of the front section is located the connection for the forked member or connecting rod that is secured to the lever arm which in turn is secured to the coiled springs. The result is that a flexible installation is made which protects against head-on and side blows. One side may be deflected without materially deflecting the other side. The action of the coiled spring may be varied by changing its tension, which is done by loosening the nut on the bottom and winding up the bottom cap. The bottom cap which holds the spring tension is serrated with heavy square teeth.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

PRICE revisions continue to flood the hardware markets in rapid succession. The current reports contain lower quotations, in some quarters, on galvanized sheets, while declines are general on automobile tires, sash cord, galvanized wire clothes lines and cotton rope. Other commodities on lower price levels include, machinist hammers, asbestos sheathing, cotton clothes lines, cow bells, tire tape, and the Gem line of food choppers. The discounts on sand and emery paper are under revision, while revised quotations are anticipated on Gilmour eye and auger bits. Another shoefinders' tack list has been issued, with new prices on steel wire shoe rivets. The lower quotations on gas stoves are now generally in effect, the extent of the decline being around seven per cent. Another revision to slightly higher levels has been announced on Trimo wrenches, while increases also appear on copper wares, such as tea and coffee pots, these products being now at net list where formerly a discount was given. Steel buyers remain in a conservative mood, although a brighter outlook prevails as to future conditions in this industry. The lower prices on boiler tubes are credited with having stimulated seasonal trade in these products. Only moderate trade is recorded in scrap materials, while a buyers' market still prevails in ingot metals, with a marked relaxation in the tone of copper. Buying for spring is moderate, with orders being small but fairly numerous. This condition is reflected in wholesale circles. The cautious attitude is still prevalent in purchasing, with sorting orders constituting the bulk of present buying since the completion of the inventory period. The present volume of business is considered very fair for this season, with good prospects for early improvement along general lines.

Montreal Markets

MONTREAL, February 9.—Numerous price recessions again attract attention in the hardware markets. The easier tendency in the cotton market, and lower quotations on cotton clothes lines, cotton rope and sash cord, offer the feature reduction. Another important line showing further reduced prices is automobile tires. Both casings and tubes have new lower quotations, following the downward revision toward the latter end of last year. Asbestos products have also been on the downward trend since the opening of the year, pipe coverings showing a substantial decline in prices while sheating is now quoted locally at $8.00 per 100 lbs., former price being $10.00. Wire clothes lines have new lower prices in both gauges and machinists' hammers are reduced approximately 10 per cent. Tire tape is again reduced and new quotations are announced on cow bells. It is now generally announced that gas stoves for spring delivery will be lower in price. A few weeks ago certain makers stated that they would reduce their prices for later deliveries but the general announcement was not forthcoming at that time.

An outstanding advance in quotations is recorded on copper nickel plated tea and coffee pots. These are now quoted at net list, former discount being 10 per cent. Ingot metals display a slightly better tone, but business remains very quiet. Other lines of heavy hardware in general are little changed this week, with jobbing houses reporting a fair amount of business in these staple commodities. Certain lines of spring goods are now being shipped, which lends a more active appearance in jobbing circles.

MACHINISTS' HAMMERS HAVE EASIER QUOTATIONS

Montreal

Machinists' hammers show a reduction of approximately 10 per cent., and following are revised quotations; No. 30, 1 lb., $9.20, 1¼ lb., $9.90 a dozen.

TIRE TAPE AGAIN QUOTED AT LOWER PRICES

Montreal.

New lower prices again appear on tire tape, with new quotations as follows; 1 oz., 59c. lb.; 2 oz., 57c. lb.; 8 oz., 53c. lb.

N. P. TEA AND COFFEE POTS NOW NET LIST

Montreal

An advance in prices of approximately 11 per cent. has been made on copper nickel plated tea and coffee pots. These are now quoted at net list, whereas formerly they were less 10 per cent. Other lines such as tea kettles, and boilers, are for the present unchanged, but according to dealers, a revision in these also would not be surprising in the near future.

REVISION IN GAS STOVES IS NOW GENERAL

Montreal.

It was announced in one of our later issues toward the end of last year that certain manufacturers of gas stoves were booking orders for spring deliveries at slightly reduced prices. At that time, however, all manufacturers had not adopted the new lower quotations, apparently awaiting the more active booking season afer the turn of the year. The reduction is now generally announced, the decline in prices being approximately 7½ per cent.

NEW LOWER PRICES ON CLOTHES LINES

Montreal

In line with other cotton goods, cotton clothes lines are now quoted at lower prices, and following are new quotations; 30 ft., $2.10 doz.; 40 ft., $2.60, and 48 ft. $3.10 a dozen hanks.

REDUCTION IN AUTOMOBILE TIRE PRICES

Montreal.

A further reduction is announced in automobile tires, both casings and tubes quoted at reduced figures. The extent of the decline varies on the different sizes and grades, but is covered by approximately 9 per cent. This is the second recession in prices in recent months, a previous reduction being announced toward the end of the year. The present change, following the previous revision indicates the trend of the market in this industry when both the rubber market and cotton have recently recorded easier levels. The present improved rate of exchange is also said to have been a factor in deciding the new lower levels. Following are revised prices and discounts:

AUTOMOBILE TIRES

CORD—

30 x 3½, 4 ply	$22.00
30 x 3½, 6 ply	25 30
32 x 3½	30 85
31 x 4	35 65
32 x 4	39 25
33 x 4	40 50
34 x 4	41 50
32 x 4½	50 70
33 x 4½	51 90
34 x 4½	53 15
35 x 4½	54 75
36 x 4½	55 85
33 x 5	63 15

35 x 5	48 20	55 50
37 x 5	51 00	59 00

Less 20 per cent.

TUBES—

	Regular	Ex. Heavy
30 x 3½	$2 50	2 75
31 x 3¾	[illegible]	[illegible]
32 x 4	3 75	4 00
34 x 4	4 10	4 40
32 x 4½		5 20
34 x 4½		5 50
36 x 4½		[illegible]
35 x 5		6 50

EASIER PRICES RECORDED ON SASH CORD

Montreal.

The easier tendency in raw cotton circles has also reflected on sash cord, and the various sizes are now quoted at lower prices. The reduction is 6 cents per lb., and following are new quotations: No. 6, 53c. lb.; No. 7, 52c. and No. 8 and up, 51c. per lb.

COTTON ROPE HAS NEW LOWER QUOTATIONS

Montreal

Corresponding to the recent easier trend in the raw cotton market, new lower quotations are now announced on the various sizes of cotton rope. Revised prices are as follows.

COTTON ROPE—	Per lb.
1-8"	0 43
5-32"	0 42
3-16"	0 39
¼ and up	0 38

EASIER PRICES RECORDED ON ASBESTOS PRODUCTS

Montreal

Since the opening of the year the trend of the asbestos market has been decidedly downward, and in the past six weeks quotations on pipe coverings have dropped approximately 25 per cent. Asbestos sheathing is now quoted at lower figures, showing a reduction of 2 cents per pound. This is now quoted locally at $8.00 per 100 lbs. Local distributors now anticipate a fairly steady market as present levels are well down to productive costs, and compare favorably with pre-war prices.

FAIR AMOUNT OF CONSTRUCTION FOR CEMENT SUPPLIES

Montreal

Current quotations on cement are unchanged since the revision at the beginning of the year. Trade is seasonably quiet at present but dealers are anticipating a renewal of activities early next month as contemplated building returns show that a good amount of construction work will commence as soon as the weather permits. Following are unchanged quotations;

CEMENT -

Car Load Lots—	
Per bag, f.o.b. cars	0 92
Per bag, delivered	1 00
Less Car Lots—	
Per bag, delivered	1 10

Less 5 Per Cent.
Rebate of 20 cents for empty bags.

WIRE CLOTHES LINES ALSO SHOW A REDUCTION

Montreal.

Galvanized wire clothes lines will now cost less, a reduction being given in all lengths on both sizes. Following are new prices;

WIRE CLOTHES LINES—	per 1000 ft.
No. 18 x 50 ft.	$6 25
No. 18 x 100 ft	5 65
No. 19 x 50 ft.	5 65
No. 19 x 100 ft.	4 70

GILMOUR BITS HAVE REVISED QUOTATIONS

Montreal

A revision in prices is announced by the manufacturers of Gilmour bits, with a reduction of varying extent made on the various kinds. At time of going to press new quotations were not available, but these will be given in next issue.

FIRM TONE CONTINUES IN ROPE MARKETS

Montreal

A firm tone continues in the rope markets in general, sisal hemp showing strength since the increase in sisal and lathyarn a few weeks ago. It will be remembered that pure manilla rope did not show the advance at that time, and prices are now said to be in a firm position. There is a fair amount of activity in bookings, but deliveries now are naturally backward. With dealer stocks in a low condition in practically all sections, manufacturers anticipate a fairly active season at a little later date.

PRESENT DEMAND FOR SHEETS STILL VERY MODERATE

Montreal

Present business in the sheet markets in general is still of a quiet nature, but there is the optimistic tone among jobbing circles when speaking of the outlook for future business. Stocks are reasonably low to take care of prevailing trade only, but a like condition exists in dealer stocks and for this reason also dealers anticipate a revival in trade following the present winter months. Quotations are nominally unchanged, with the same variation among the different jobbing houses.

BLACK SHEETS

PRICES ON LEAD PRODUCTS EASIER BUT UNCHANGED

Montreal

Although an easier tendency has crept into the market for ingot metals, and tin, copper and spelter have been shown at reduced prices in recent weeks, there is no revision yet recorded in the market for the finished lead products. It is noticeable in the primary market that lead has been the steadiest metal on the list for some time past, and according to one local manufacturer, this in itself has been a deciding factor in the maintenance of present levels. It is also pointed out that when these same metals displayed a firm tone, and prices were increased, the quotations on lead products in general remained unchanged. For this reason it is believed

that the softer tone will have to continue for some time yet before it will reflect on the manufactured lines. Following are unchanged quotations.

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3* lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½
Cut sheets ¼c lb. extra, and cut sheets to size, ½c lb. extra.	
Solder, guaranteed, lb.	0 28½
Do., strictly, lb.	0 26½
Do., commercial, lb.	0 23½
Do., wiping, lb.	0 24½
Do., wire, lb.	0 32½
Zinc sheets, casks	0 11½
Do., broken lots	0 12

TRADE IN COMPRESSION GOODS OF A QUIET NATURE

Montreal

The various lines of compression goods show no further price changes since the revision of certain lines of valves two weeks ago. Trade continues of a quiet nature, with orders still of a sorting character, and dealers anticipate little variation until the later months of spring when building operations will require supplies.

Compression work, standard	43%
Fuller work, standard	30%
Bath cocks, compression	30%
Basin cocks, Fuller No. 0	30%
Do., Nos. 1 and 2	30%
Flatway stop and waste cocks, std	54%
Roundway stop and waste cocks, std.	46%
Brass steam cocks, standard	40%
Do., removable disc	58%
Globe, angle and check valves, standard	25%
Gate or straightway	16/10%
Emco Globe valves	33%
Emco check valves	33%
Jenkins Globe, angle, check and swing check	19%
Jenkins Iron body gate	33%
Jenkins gate or straight way	25%
Jenkins iron body, globe and angle	15%

FAIR DEMAND CONTINUES FOR BOILER TUBES

Montreal

The current demand for boiler tubes is described as fair for the present season of the year, in fact all during the past weeks there has been a fair amount of business for repair work. Quotations are nominally unchanged as follows, for moderate sized orders, with a further price concession offered for attractive inquiries.

BOILER TUBES—	Seamless	Lapweld
1 inch	24 70	.....
1¼ inch	24 50	.....
1½ inch	24 00	.....
1¾ inch	26 00	28 00
2 inch	24 50	20 50
2¼ inch	27 75	23 50
2½ inch	32 50	24 50
3 inch	40 00	34 75
3½ inch	52 50	34 75
4 inch	65 00	44 00

NEW PRICES ANNOUNCED ON COW BELLS

Montreal

New quotations are given on cow bells, showing a slight reduction on the various sizes. Following are new prices;

COW BELLS—

No. 0	1	2	3	4	5	6	
$12.95	10.55	8.65	6.70	5.75	5.25	4.30	doz.

EARLY IMPROVEMENT FOR CORRUGATED SHEETS

Montreal

There is little or no change to report in corrugated sheets, quotations remaining at the revised discount of a few weeks ago, and business continuing on the quiet side. Dealers are still quite optimistic in regard to increased activity at an early date, and towards the middle of the present month a gradual improvement is looked for. A fairly steady situation is also looked for, insofar as prices are concerned, for the earlier spring business at least, it being pointed out that existing quotations compare favorably with the present levels on flat galvanized sheets. Unchanged prices and discounts are as follows;

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins., 75c. a square extra.

FEW ACTUAL PRICE CHANGES IN INGOT METALS

Montreal

There is a slightly better feeling in the ingot metal market, and for the present at least the steady downward trend, recorded in the past few weeks, has subsided to an extent. Although there is no sign of a firmer condition, prices show little change during the week, with quotations on outside markets also showing little variations. Business in general is very quiet, but on the other hand present levels are generally admitted reasonable. Lead continues to display more briskness than any metal on the list, but in this line also an easier tone has been displayed in the past two weeks. Tin, copper and spelter are quiet but unchanged, while antimony and aluminum are listless on the market.

WARE NOW ON A FAIRLY ACTIVE MARKET

Montreal

The movement of wares in general is now described by manufacturers as fairly active, especially does this apply to enameled ware and aluminum ware. Since the beginning of the year sales have shown a gradual improvement, and apart from lines which are usually booked in the opening months of the year, staple lines are now moving remarkably well. Low dealer stocks in all sections, realized by merchants after inventory, and the reduction in prices in December last, are the two factors contributing to this increase in sales, according to local dealers. With the gradual approach of spring months, a further improvement is looked for. Quotations on the various lines are fairly steady at this time, although a slight increase is announced on certain copper nickel plated lines.

SEASONABLE DULLNESS FOR TROUGH AND PIPE

Montreal.

Eavestrough and conductor pipe quotations are unchanged since the revision in recent weeks. The movement of these products is naturally quiet at this season of the year, but towards the end of the month increased sales are looked for as dealers will at an early date anticipate their season's requirements. As in the case of other galvanized products dealers state that present prices on these products are now well down to existing quotations on galvanized sheets, and a fairly steady outlook is lent for spring business. Naturally the trend of trough and pipe depends entirely on the market for these sheets and on this market it has been pointed out for some time past that further revisions would be of a minor nature as present prices are considered reasonably low at manufacturing centres. Unchanged prices and discounts are the following;

EAVESTROUGH—

O. G. round and half-round, per 100 ft.

8 inch	10 inch	12 inch	15 inch	18 inch
$16 90	$18 70	$22 20	$29 80	$37 80

O. G. Square bead, per 100 ft.

8 inch	10 inch	12 inch	15 inch	18 inch
$15 90	$17 70	$21 20	28 80	$36 80

Discount 70/10 per cent.

CONDUCTOR PIPE:—round, plain and corrugated, per 100 ft.

2 inch	3 inch	4 inch	5 inch	6 inch
$18 40	$22 30	$29 60	$40 00	$49 00

Discount 70/10 per cent.

CONDUCTOR ELBOWS—

Plain or corrugated.	dozen
2 inch	$ 5 25
3 inch	6 00
4 inch	10 50
5 inch	24 00
6 inch	29 00

Discount 60 per cent.

NEW RANGE BOILER LIST NOT GENERALLY ADOPTED

Montreal

Although new list prices and discounts were issued on range boilers last week, there are still a few distributors who are still quoting at the older net list. In discussing this situation with Hardware and Metal one large distributor stated that while they had not yet adopted the new schedule of prices, it would in all probability be put into force in the very near future. They are quoting $8.75 net on the 30 gal. boiler, this being the same quotation as the new list calls for, with the discount. Business is still on the quiet side for boilers, sales continuing for small quantities only. Following are the list prices and discounts adopted by most dealers one week ago;

RANGE BOILERS—	
5-gallon	$ 13 50
12-gallon	14 00
18-gallon	15 00
25-gallon	16 50
30-gallon	17 50
35-gallon	20 50
40-gallon	22 75
52-gallon	38 00
66-gallon	60 75
82 gallon	74 00
100-gallon	103 00
120-gallon	117 00
144-gallon	164 00
168-gallon	187 00
192-gallon	210 00

Discounts, Standard weight, 50 per cent. Extra heavy, 40 per cent.

Toronto Markets

TORONTO, February 9.—Another extensive list of price revisions includes lower quotations on galvanized sheets, auto tires and sash cord . Sheets are reduced approximately 25 cents per 100 lbs. on all gauges, while the reduction in casings and tubes which was outlined in last week's market reports is in the neighborhood of ten per cent. on all sizes. Certain cotton products are recorded with lower prices, among them being sash cord and other similar lines, this revision also being forecast in a previous issue of Hardware and Metal. Substantial reductions are noted on the Gem line of food choppers. A decline has been recorded on galvanized wire clothes lines in the different sizes and lengths, while a new list on shoefinders' tacks shows lower prices on steel wire shoe rivets. Asbestos sheathing, sand paper and emery cloth, are other products with easier price levels. It is reported that some revision may be made in the discounts on Gilmour bits, while higher quotations appear on copper wares such as tea and coffee pots, these being now at net list where formerly a discount was given. Another change to slightly higher levels is recorded on Trimo wrenches.

MAY REVISE DISCOUNTS ON GILMOUR BITS

Toronto

It is announced that a revision will likely appear in the near future on the Gilmour line of auger and eye bits. However, these revised discounts were not available at the time of going to pres.

DECLINE ON GAS STOVES NOW MORE UNIFORM

Toronto

Some lower quotations on gas stoves are now generally announced by manufacturers of these products. Easier levels on certain makes have been effective for a few weeks, this change now being more uniform. The extent of the decline is approximately 7½ per cent. This reduction is expected to stimulate the volume of spring booking orders.

NEW LIST ISSUED ON SHOEFINDERS TACKS

Toronto

Another revised list of shoefinders tacks has now been issued, effective February 8, 1922. The only change from the previous list is on steel wire shoe rivets, where a reduction in quotations is noted. Other nails, such as heel or shoe nails, hob and hungarian nails, channel nails, tacks and shoe nails, remain unchanged. Following, therefore, is the portion of the new list with the revised prices on shoe rivets only:

SHOEFINDERS TACKS

Shoe Rivets

In 1 lb. Papers

STEEL WIRE—

1 Ge and Heavier per 100 lbs.
3/8 $23.00, 3½/8 $19.50, 4-4½/8 $17.00, 5-5½/8 $16.25, 6-6½/8 $15.50, 7-7½/8 $14.50, 8-8½/8 $14.00, 9/8-11½/8 $13.25, 12/8-17/8, per 100 lbs., $12.25.
17 Ge. Add $1.00
18 Ge. Add $2.00

Clinch Point:—
3/8 $24.25, 3½/8 $20.75, 4-4½/8 $18.25, 5-5½/8 $17.50, 6-6½/8 $16.75, 7-7½/8 $15.75, 8-8½/8 $15.25, 9/8-11½/8 $14.50, 12/8-17/8 per 100 lbs. $13.50.
17 Ge. Add $1.00
18 Ge. Add $2.00

Cobblers' Rivets—
3/8 $26.00, 3½/8 $22.75, 4-4½/8 $19.50, 5-5½/8 $18.50, 6-6½/8 $17.75, 7-7½/8 $16.75, 8-8½/8 $16.00, 9/8-11½/8 $15.25, 12/8-17/8 $14.25.
17 Ge. Add $1.00
18 Ge. Add $2.00

REVISED DISCOUNTS ON SAND AND EMERY PAPER

Toronto

Some changes in the discounts on sand paper and emery cloth bring quotations on these products to a lower level.

HIGHER PRICE LEVELS ON COPPER WARES

Toronto

An advance in the prices on copper tea and coffee pots is now recorded. These products are quoted at net list, where previously a discount of 10 per cent. was given.

ANOTHER REVISION IN TRIMO WRENCH PRICES

Toronto

It is announced that another revision has been made in the discounts on Trimo wrenches, and prices have therefore been slightly advanced on most sizes.

SASH CORD PRICES NOW ON LOWER LEVELS

Toronto

As outlined in last week's issue of Hardware and Metal, some easier price levels have now been announced on sash cord, cotton rope and cotton clothes lines. These reductions reflect the conditions at present existing in the raw cotton markets. The decline on sash cord amounts to six cents per lb. Following are the revised prices:

CORD (SASH)

No. 6, lb.	0 53
No. 7, lb.	0 52
Nos. 8, 9, 10, 12	0 51

DECLINE ON GALVANIZED WIRE CLOTHES LINES

Toronto

Reduced prices on galvanized wire clothes lines ar also recorded this week. Folowing are the revised quotations on these products:

CLOTHES LINES, Galvanized.—

17 x 50 ft.	7 50
17 x 100 ft.	6 85
18 x 50 ft.	6 35
18 x 100 ft.	5 65
19 x 50 ft.	5 25
19 x 100 ft.	4 75
18 x 1000 ft. spools	5 75

LOWER QUOTATIONS APPEAR ON ASBESTOS SHEATHING

Toronto

Another revision has been announced in the quotations on asbestos sheathing. This leaves the current local markets with a certain variety in the new prices, some distributors quoting a new level of $8.50 per 100 lbs., while in other quarters a quotation of $8.00 is announced.

STEEL BUYERS REMAIN IN CONSERVATIVE MOOD

Toronto

The iron and steel market situation has shown very little improvement during the past week or two. The general condition is that demand has not improved since last month to the extent generally looked for. However, the volume of inquiry, both on the foreign and domestic centres is reported as slightly improving. Some shading of the recent new price levels on these bar products is recored on attractive orders, but buying in general is in small lots. While it is sometimes said that distributors and manufacturing consumers are ordering in conservative fashion because they are somewhat doubtful as to the future of quotation, yet another judgment of the trade is that the chief concern of buyers affects their own selling ability or the stability of their distributing markets. It is inferred that if steel purchasers were assured that their requirements would continue, or if any increases in future demand could be calculated upon, much freer buying would result. Reports from American centres indicate that any order of mederate size is sufficient to draw forth a concession from the regular market level.

IRON AND STEEL—

Mild steel bars base	2 85
Mild steel bands, 3-16 in. base	3 35
Bar iron, base	2 85
Angle iron, base	2 95
Horseshoe iron	3 60
Tire steel	3 35
Spring steel	5 50
Sleigh shoe steel	2 85
Hoop steel	3 75
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	30 00
Mining drill steel	18 60
Cast tool steel, high grade	31 00
Cast tool steel, medium	18 00

LOWER PRICES DEVELOP BUSINESS IN TUBES

Toronto

Since the introduction of the lower prices on boiler tubes, business in these products is stated to have registered some lines of improvement. The volume of inquiry for small repair orders has increased, while trade of a sorting nature has materialized in some quarters. The following quotations represent the average prices on the local markets:

BOILER TUBES

Size	Seamless	Lapweld
1 inch	$24 75	$.....
1-¼ inch	24 50	.....
1-½ inch	24 00	.....
1-¾ inch	26 00	.....
2 inch	24 50	20 00
2-¼ inch	27 75	23 00
2-½ inch	32 50	23 75
3 inch	40 00	30 00
3-¼ inch	50 00	32 50
3-½ inch	52 50	34 25
4 inch	65 00	43 50

FURTHER REDUCTIONS ON GALVANIZED SHEETS

Toronto

A reduction of approximately 25 cents per 100 lbs. has been announced on galvanized sheets. This change results from the primary market conditions, it being noted that galvanized has been so little sought during the past few weeks in southern centres that price concessions on these products had been recorded. Buyers continue cautious, and the irregularity in American price levels has been reflected in the easing of domestic quotations. While it is yet early for spring business, a few bright spots are reported from time to time. The volume of inquiry is described as more encouraging as to the impetus expected from the seasonal buying usually evident during the next two months. Following are the revised quotations:

BLUE ANNEALED—		
10 gauge, base	3 75	4 50
12 gauge	3 80	4 55
14 gauge	3 85	4 60
16 gauge	3 90	4 65
BLACK—		
18—20 gauge	4 30	5 05
22—24 gauge	4 35	5 10
26 gauge	4 40	5 15
28 gauge	4 50	5 25

Charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	Queen's Head	Fleur-de-lis.
28 gauge	7 00	7 50
26 gauge	7 75	7 25
24 gauge	7 35	6 85
22 gauge	6 90	6 40
18 and 20 gauge	6 75	6 25
Premier and Apollo.		
1934 oz	6 00	5 75
U. S. 28 base	5 60	6 35
U. S. 2	3 30	6 05
22 and 24	5 15	5 90
18 and 20	5 00	5 75
16	4 85	5 60
12 and 14	4 70	5 45

An extra 40c per 100 lbs. is charged for Keystone and Premier brands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10 3-4 oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds

PLATES, CANADA—	
Dull 60 sheets	5 30
Ordinary, 52 sheets	5 25
PLATES, COKE TIN—	
I.C., 20 x 28, 112 sheets	13 50
IX, 20 x 28, 112 sheets	16 50
IX. 20 x 28, 56 sheets	9 00
PLATES, CHARCOAL TIN—	
1X, 20 x 28, 56 sheets	14 00
1XX, 20 x 28, 56 sheets	16 00
PLATES, TERNE—	
1C, 14 x 20, 112 sheets	12 00

SUBSTANTIAL REDUCTIONS ON "GEM" FOOD CHOPPERS

Toronto

Lower prices have now been announced on the Gem line of food choppers. The reduction is in the neighborhood of 25 per cent. Following are some of the revised quotations:

FOOD CHOPPERS—	
No. 20¾	$21.60 per dozen
No. 22	25 80 per dozen
No. 24	34 20 per dozen

BETTER FEELING NOTED IN PIPE MARKETS

Toronto

Inquiries for steel piping are described as slightly more numerous, although the volume of current business is not large. Since the completion of inventory work, some sorting orders have been reported. The general situation, however, both in foreign and domestic pipe markets is described as offering a fair amount of small business with inquiries in steady proportion. Here and there are noted spasmodic signs that larger sizes of pipe contain prospects of improvement. There are some reports circulating that in spite of the prevailing low levels, certain independent steel mills levels, certain independent steel prices on attractive orders. The list No. 54, however continues to cover the local markets:

ONLY MODERATE TRADE IN SCRAP MATERIALS

Toronto

Most divisions of the waste material markets have been slow as regards either the volume of transactions or the amount of interest. Scrap iron and steel are still moving spasmodically, with prices generally unchanged. Current business is mainly confined to immediate and nearby requirements. Interest in copper grades has suffered a relapse due to the easier tone in virgin copper prices while other metals have just about stood still. The following are averages of local dealers' buying prices for fairly large quantites:

Gross Tons— Scrap Iron		
Heavy melting steel (Hamilton)	$11 50	$12 00
Borings and turnings	2 50	3 50
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	6 50	7 50
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	18 00	19 00
Stove plate	12 50	13 50
Grate bars	11 50	12 50
Standard car wheels	13 50	14 00
Scrap Metals.		
Heavy copper and wire	10 00	10 50
Light coper	8 00	8 50
No. 1 composition	9 00	9 50
No. 1 comp. turnings	6 00	6 50
Light brass	3 00	3 50
Heavy yellow brass	5 50	6 00
Heavy lead	4 00	4 50
Tea lead	2 00	2 50
Scrap zinc	3 75	4 00
Scrap Rubber		
Boots and shoes	2 50	3 00
Lumbermen's rubber boots	1 50	2 00
Auto tires	0 50	1 00
Solid tires	0 75	1 25

TEN PER CENT. REDUCTION IN CASINGS AND TUBES

Toronto

As covered by a report appearing in a previous issue of Hardware and Metal, a further readjustment has been made in prices on automobile tires which places the quotations on these products at a lower level. Both cord and fabric tires are affected approximately to the extent of ten per cent. in all sizes.

In announcing the reduction on casings and tubes, tire manufacturers attribute the primary reasons for the change to easier exchange rates, some slight downward revisions in the raw cotton markets, and a general depression in rubber, which factors combine to lower production generally. This easing of costs, state the producers, is being passed along to the consumer. The fact that large supplies of raw materials in the shape of rubber and cotton are imported for the purpose of making auto tires, reflects an important side-light on production costs when the rate of exchange is returning to normal levels. The new prices are contained on another page in this section.

BUYERS' MARKET EXISTS IN INGOT METALS

Toronto

A buyers' market now generally prevails in all the ingot metals. The firmness in copper circles has receded owing to the preparations of producers to resume operations, coupled with the fact that consumers are fairly well supplied for the initial quarter. Other metals have shown some signs of slightly fluctuating, especially in London, but the undertone in most ingots remains more or less unchanged with prices fairly steady.

COPPER—Dulness is the most prominent future of the copper markets. Buying continues of a light nature, with American reports indicating that some export sales have recently been made at concessions. The fact that more copper producers are preparing to resume operations in the near future, has caused the present dullness. Consumers appear to have their needs covered for the first quarter, and a waiting policy is generally being adopted as regards future requirements. The local quotations remain between 17½ and 18 cents.

TIN—The tin market is quiet with but little variation in prices. Some easier levels are reported from London, but not of sufficient extent to afect the comparative firmness of the market of this side. Inquiries are not lacking, but actual business is quiet. The local price average is 38 cents.

LEAD—The tone of the lead market is nominally unchanged, although prices in London have again eased off a little. The advance in exchange accounts for this to some extent. There are few orders being recorded at present, and the local situation remains practically unaltered. The quotation of $6.75 is unchanged.

SPELTER—The market is described as moderately steady with a fair amount of activity. Some awakening of buying interest is looked for, with slight indications of a firmer recovery. Prices of spelter on domestic circles are generally unchanged, the local level being $7.25.

ANTIMONY—There is little animation in the market for antimony, and some selling pressure is noted which imparts an easier tone. Consumers are stated to be fairly well supplied, and there is no demand for export. Purchases are therefore very slow. The local prices remain unchanged, between 8 and 10 cents.

ALUMINUM—There has been no change in the aluminum market worthy of particular record. Holders, however, are not pressing any metal for sale, so that prices generally remain unchanged from previous levels. The local quotation averages 27 cents.

London Markets

LONDON, February 9.—The budget of price revisions this week includes lower prices on sash cord and cotton rope. Ball pein machinist handled hammers, window rubbers and steel sash pulleys are quoted on easier levels. Further increases, however, appear on both turpentine and linseed oil.

Business in this district is reported as fairly good, with a continued slight improvement. Seasonal lines are in good demand. Merchants are now preparing for Spring trade and in many cases are accepting their shipments of booked goods.

ADDITIONAL INCREASE IN LINSEED PRICES

London, Ont.

Another advance of five cents per gallon has been announced in the quotations on linseed oil, this current revision bringing the local level to 95 cents for raw and 98 cents for boiled, in barrel lots. Some lower prices than these are still evident on the markets, this being generally attributed to where distributors have larger stocks of the product on hand, which was purchased at easier levels. However, it is thought probable that the following levels will become general in the near future, as the demand is firm with flax seed prices slightly higher.

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls., per gal	0 95	0 98
3 to 5 bbls., per gall	0 94	0 97
6 to 9 bbls., per gal.	0 92	0 95

Less barrels, add 15 cents gal.

ANOTHER INCREASE ON TURPENTINE QUOTATIONS

London, Ont.

Prices on turpentine continue of a very firm nature, both on the domestic and foreign markets. Quotations at primary distributing centres recently registered further advances and this additional charge has already been recorded in some local quarters. The average increase is five cents per gallon, thus bringing quotations to the higher level of $1.40 per gallon.

TURPENTINE—	Imp. Gal.
1 bl. lots	1 40
2 to 4 bbl. lots	1 39
5 gal. lots	1 55

REDUCTION ON MACHINISTS BALL PEIN HAMMERS

London, Ont.

New prices which are approximately ten per cent. lower are now quoted on machinists' ball pein handled hammers. The revised quotation is list less 10 per cent.

LOWER PRICES IN EFFECT ON COW CHAINS

London, Ont.

Lower price levels are now in effect on cow chains. The new quotation is list less 25 per cent.

REDUCED PRICES ON STEEL SASH PULLEYS

London, Ont.

Some lower prices are recorded on steel sash pulleys. The revised quotation on the Wickware pulley in lots of 100 dozen is 56 cents per dozen, and in smaller lots, 62 cents per dozen.

SCREEN WIRE CLOTH NOW GOING FORWARD

London, Ont.

Spring orders are now going forward for screen wire cloth. The quotation on this product is $3.00 per 100 feet for the paint black screen.

LOWER QUOTATIONS NOTED ON WINDOW RUBBERS

London, Ont.

Slightly lower prices are noted this week on window rubbers. Following are the revised quotations on these products:

WINDOW RUBBERS—X.L.C.R. (Metal Frame) —12"—$3.75 doz. 14" $4.25 doz.

PEERLESS—(Wood Frame)—12" $4.75 doz.; 14" $5.25 doz.

SASH CORD QUOTATIONS NOW ON LOWER LEVEL

London, Ont.

A reduction of six cents per lb. has been announced on sash cord prices. This change brings the revised quotations to the following levels:

SASH CORD:—No. 8 to 12—51cs. lb. No. 7 —52c, lb. No. 6—53c. lb.

FAIR ROPE BOOKINGS FOR SPRING DELIVERY

London, Ont.

Rope sales are reported to be seasonably light at present. Booking for spring delivery, however, is stated as very fair. There has been no change in prices since the following levels went into effect:

ROPE:—Pure Manila, 23c. base; Beaver Manila, 20c base. New Zealand Hemp, 20c. base. Sisal 18c. base.

NEW DISCOUNT ON WISS SHEARS AND SCISSORS

London, Ont.

The discount on Wiss Shears and scissors is again revised, this change resulting in the net prices being around 5 per cent. higher than formerly. The discount has been changed from 33 1/3 per cent off the new 1922 list.

REDUCTION ANNOUNCED IN COTTON ROPE PRICES

London, Ont.

A reduction has also been noted on cotton rope prices, the extent of the decline being approximately 5 cents per lb. Folowing are the new prices:

COTTON ROPE:—¼ inch and larger $0.41 per lb; 3-1 inch, $0.42 per lb.

BRISK SEASONAL SALE FOR HOCKEY STICKS

London, Ont.

The season for hockey sticks is now in full swing, and merchants report a big demand for these products. There has been no revision announced in quotations, the brisk sale serving to maintain a firm market.

QUIET CONDITIONS NOTED IN PUTTY MARKET

London, Ont.

Dealers report that a seasonable sale is evident for putty. Prices on this product remain unchanged at recent levels, and quiet conditions generally prevail. Following are quotations:

PUTTY—	Per 100 lbs.
Standard, 100 lb. drums	6 30
Do., 25 lb. drums	6 55
Pure, 100 lb. drums	7 80
Do., 25 lb. drums	8 05

REPORT LIGHT SALE OF WHITE LEAD IN OIL

London, Ont.

A light condition is still evident in the sale of white lead in oil, with no change in price having been reported. The following levels are therefore the current average prices:

WHITE LEAD IN OIL—	Tons.	Less Tons.
Pure, per 100 lbs.	13 30	13 65
Elephant	13 80	14 15
Single Diamond, net list		
Double Diamond, net list.		
Cut Lights. 75 per cent. off light list.		

Winnipeg Markets

WINNIPEG, February 9.—Price revisions on the current hardware markets include lower quotations on general purpose wrenches, ship augers, alarm clocks, and stove pipe. Linseed oil records an advance of five cents per gallon with an improved undertone. Turpentine continues very firm, but no further changes have been announced. There has also been a slight increase in prices on cotton waste, following the recent downward revision on these products. Conditions continue of a quiet nature in the sheet markets, and little variation is recorded in other primary commodities. Both wholesalers and merchants generally are hopeful as regards expected improvement in the volume of spring trade. Buying is still in small quantities, however, with manufacturing rather quiet. Building is slow, it being too early in the season for activity in this line.

INCREASE IN LINSEED OIL QUOTATIONS

Winnipeg

Although Linseed oil has been reduced twice in the past two weeks, this week records an advance of 5c. per gallon. Raw Linseed is now quoted at 93 cents and Boiled 96 cents per gallon in barrel lots.

FIRM TONE EVIDENT IN TURPENTINE MARKETS

Winnipeg

Turpentine, which has advanced twice in the past two weeks, remains at last week's prices. The latest quotation is $1.55 per gallon in barrel lots; with the firm undertone still evident in both domestic and primary centres.

SOME SLIGHT ADVANCES ON COTTON WASTES

Winnipeg

Prices on cotton waste which were lowered considerably last week, have now been quoted at a slight advance in some quarters.

EASIER PRICE LEVELS APPEAR ON STOVE PIPE

Winnipeg.

A reduction is recorded this week in prices on riveted and ready to rivet stove pipe. Following are the latest quotations:

STOVE PIPE

Standard—6 in., $15.00 per 100 lengths. 7 in., $16.30 per 100 lengths.
Ready to Rivet—6 in., 13.50, 7 in., $14.80.
Riveted—6 in., $14.00, 7 in., $14.80.
Elbows, Heavy—6 in., $2.65 per doz., 7 inch, $3.00 per doz.
Light—6 in., $2.20, 7 in., $2.45.

FURTHER PRICE REDUCTION ON ALARM CLOCKS

Winnipeg.

Another reduction is recorded this week on Alarm Clocks. Following are the revised prices:

ALARM CLOCKS

Big Ben, $3.50 ea; Baby Ben, $3.50 ea; Sleepmeter, $2.10 ea., America, $1.40 ea.

NEW DISCOUNT ON WRENCHES LOWERS PRICES

Winnipeg

The discount on general purpose wrenches has been changed from 10 per cent. advance to 5 per cent. advance on list prices, thus placing net quotations on a lower level.

LOWER PRICES RECORDED ON SHIP AUGERS

Winnipeg.

A reduction is recorded in ship auger prices this week and discounts are now as follows:

With Screw 30 per cent advance.
Without Screw 30 per cent advance.

CONDITIONS STILL QUIET IN SHEET MARKETS

Winnipeg.

Prices in sheets are becoming more settled, but business is still very quiet. The benefit derived from reducing prices is said to be slight, as there is only little current business. It is too early to predict future prospects, but dealers are still hopeful regarding improvement with the advent of spring. Following are the unchanged prices:

STEEL SHEETS, BLACK—	
10 gauge	5 70
12 gauge	5 70
14 gauge	5 80
16 gauge	5 90
18-20 gauge	6 30
22-24 gauge	6 35
26 gauge	6 40
28 gauge	6 65
IRON, GALVANIZED—	
Premier; Apollo and "Fleur de Lis"	
10¾ oz. or 28 Eng.	8 20
28 Am. or 26 Eng.	7 80
26 Am. or 24 Eng.	7 20
24	7 05
22	7 05
18 and 20	6 90
16	6 75

Hamilton Markets

HAMILTON, ONT., — Inventories just completed by various branches of the hardware trade show in most cases stocks very much depleted, with the opinion prevailing that major price revisions are done with and that prevailing prices on most lines are representative of sufficiently stable prices to justify booking for Spring requirements.

Steel production is now at about 40% of capacity, but this is hardly a fair comparison with normal due to the great expansion which took place in this industry during and following the war. There has been some reduction in wages in the steel industry but freight rates are still an important factor in prices, it being necessary to transport approximately five tons of ore to produce one ton of steel. If larger volume of freight could be guaranteed at lower rates, manufacturers are of the opinion that there would be a reduction but experience recently has been that lower prices have not always acted as a stimulant. Manufacturers are experiencing some improvement in bookings now that wholesalers are placing post-inventory sorting orders. Contemplated building in the Spring is expected to stimulate the demand for structural steel, though no boom is expected in construction until money rates decline.

Less Margin for Steel Producers

Steel producers point out that many lines are now being sold below cost due to the keen competition for what business offers. The story is being circulated that one independent producer in the U. S. spent $85 expenses to send a salesman to get an order for twenty kegs of nails. The curtailed margin of profit of the largest U. S. steel producer in the last quarter is taken as significant of the conditions prevailing in this industry, the margin showed a decline from 16% in the last quarter of 1920 to .31% in the last quarter of 1921.

Hardware manufacturers point to the fact that where a reputation has been made for a high quality line, business has suffered little in the depression due to the fact that the buyer has had more time to examine goods. One hardware manufacturer reports January the best month since last April from the standpoint of profits and reports that records so far in February are maintaining this condition. Active buying for certain lines for Western Canada trade is reported, though other staple lines are being little called for, thought to be due to the practice of banks of restricting clients who are in difficulties from making new purchases until a certain portion of stocks on hand are liquidated.

Some adjustments will probably be made in wire fencing by certain producers before the end of next month but all current bookings are being made on an April 1st dating. Stocks of fencing held by retailers and wholesalers are said to be low. Farmers, particularly in Western Canada are doing little buying but it is expected that they will be in the market for necessary requirements such as fencing.

Wholesalers claim confidence in prevailing prices in most lines and are showing no hesitation in buying for Spring requirements. Some minor revisions are expected but no changes of sufficient importance to justify taking chances of losing business through not being in position to fill orders. Retailers are still said to be buying in small quantities and doing little placing business. Collections are only fair but there is said to be nothing alarming in the credit situation.

Export trade is reported by some companies to be opening up rapidly, making necessary more industrial activity. Many enquiries are being received daily from foreign points.

Pittsburg Markets

PITTSBURGH, Feb. 9.—There has been a gradual improvement in demand upon the steel mills since the first of the year, but at a decidedly slower pace than was expected.

There are no particularly outstanding features in the steel demand, which is quite variegated in character and comes from all sections of the country, also from all classes of trade. The demand shows just what is going on industrially. Business is being carried on to the extent that is necessary in a period of readjustment and recuperation, and everything is being done on the most conservative basis. Buyers are not making forward purchases in any case and are not attempting to carry anything like normal stocks. The orders are small individually and the specifications are decidedly mixed. It is strictly what is commonly called hand-to-mouth buying.

Operations of Mills Increasing

As the buying is all for prompt shipment, mill operations show plainly the rate of buying. Almost week by week since the first of the year there have been heavier operations by both the Steel Corporation and the independents, but the Corporation has gained more than the independents and is now op-

Continued on page 74

Deterioration=Five Times Fire Loss

Co-operation of various factors involved will help stimulate paint business—
Encouraging a spirit of pride in the local community—
Ways of educating the farmer to the value
of paint as a surface protection for
buildings, implements, etc.

Written for Hardware and Metal by A. J. WEBB

THE FORTHCOMING season of 1922 is one which calls in the fullest measure for "Co-operation" of the highest degree, if we are to make the success that is possible, and if we are to obtain to the full the business that will be going in paints and other lines.

The dictionary definition of Co-operation is "joint labor," but this definition hardly goes far enough in the opinion of the writer. It is very evident that, if, in our efforts, there is no continuous chain, then we are bound to dissipate the strength of them, and we cannot hope to achieve the results we otherwise would.

In the paint and varnish industry there are three essential factors that must be taken into account in our endeavors to secure the fullest co-operation. These are, first the manufacturer, second the jobber and third the retail merchant. It is futile for the manufacturer and the jobber to co-operate, unless they also have the hearty interest and fullest help of the retailer. Given these three factors all pulling one way—all working harmoniously together—then, indeed there is an excellent chance of developing sales of paints, varnish and allied products to the fullest degree.

Various campaigns have been put into force by the manufacturers (the most important of them being the "Save the Surface" Campaign) which are all calculated to increase the sales of paints, varnishes and allied products—to spread the knowledge of the true economy in the use of these products, and finally to educate the people of Canada that to delay painting, (or in other words to delay Saving the Surface) is extravagant and wasteful.

Social Pride

Our propaganda has been the stimulating of the annual Paint-Up and Clean-Up Campaigns of the various cities, and this work will be carried very much farther afield in future. It is hoped to so interest each small town and village in the Dominion of Canada in this worthy object of painting up and cleaning up annually, that many sales will be obtained in this way also. It is the desire to arouse the pride of each community in its own town, village or hamlet, to understand the merits of painting and cleaning up, and to instil in them the economy there is underlying the motive.

Much work has been done by the various paint organizations of the Dominion of Canada, towards this object, from which there has been much benefit. The paint manufacturers of Canada contribute heavily to the expenses of the "Save the Surface Campaign," the merit of which is unquestionable, but it is necessary for the dealer to cash in on these various campaigns and propaganda work, otherwise no one will obtain the ful value of the steady, but consistent work that has been going on for three years. Let us endeavor to arouse the pride of the property owners—of the dwellers in their own houses, or other property—let us drive home to them the very important fact that the moment the surface is unprotected it is commencing to deteriorate—let us point out to them that the official figures of fire losses in Canada for the last year were only 1-5 of the annual loss entailed by deterioration by disintegration, or, in short, by leaving the surface unpainted or unvarnished.

A JOB FOR ALL

There's a job for each good hustler here,
Good work for all to do.
Let's pull together through the year
In nineteen-twenty-two.
Let's add the "Co" to Operate
And each one stronger be,
Let's keep it up and not abate
Our efforts—you and me.
Keep up your plugging early—late
And in the business race,
Midst Canada's industries great
Take proud and rightful place.
Let's bring our message to the fore
That each one great and small,
Use paint and varnish more and more
And "Save the Surface" all!
Now Dealer—Jobber—Paint Men, hear
Let's follow this right through,
And make the greatest painting year
In nineteen-twenty-two!

Raising Tone of the Community

It is a duty to all of us interested in the paint trade to spread the knowledge of this propaganda, and the knowledge of the benefits to be derived therefrom to the limit, and the manufacturers and jobbers have started. Many dealers are realizing results from the many thousands of dollars expended by the paint men of Canada to further this worthy object. To secure these results enthusiasm must be there—interest must be there. Talk painting-up and saving the surface at every possible opportunity. Point out the undoubted saving in actual dollars to the person concerned. Show how the fact of the person's property being painted and being spic and span actually raises the tone of the community. Is it not an accepted fact that wherever one person starts to paint another one immediately follows, and for a good reason? A newly painted house, or a newly painted building, always shows up, in the worst possible way, the houses surrounding it, and particularly this is so if they have been neglected. It is then largely a matter of self-esteem that will prompt the owner of the dilapidated property to paint up, and so, once the ball is started rolling we may look forward to an accumulative effect.

Educating Farmers

The farmer can be greatly educated along these lines, and while it is true

SERVICE

CONFIDENCE

FAIR DEALING

A Hearty Welcome

"As welcome as sunshine
In every place
Is the beaming approach
Of a good natured face."

We hope circumstances will permit of your attendance at the coming Convention of the Ontario Retail Hardware Association. If you go, you will find there a comfortable booth labelled "Lowe Brothers, Limited." It was erected with a desire for your welcome and a thought for your convenience.

By "your convenience" we do not mean that you will be met by an over enthusiastic salesman who will annoy and confuse you with his "sales" rantings, but rather, you will be greeted by a gentleman who will place himself at your disposal to answer your inquiries when they are made. To explain facts, if required, concerning our unusual "Sales Service" display, and to otherwise courteously endeavor to serve you.

To you also who will visit Toronto after the Convention, our factory at 263 Sorauren Avenue (Phones Parkdale 3400 - 3401) is hospitably open.

This is directed to every Hardware Merchant—our Agents as well as our Competitors'—to whom we extend a most cordial invitation.

Lowe Brothers, Limited.
PAINTMAKERS — VARNISHMAKERS

(Continued from page 66)

they have advanced considerably during the last five years, yet much remains to be done. Here is where the dealer can start to move things. He is the man that is in close touch with his customers and can talk to them face to face over the counter. A timely hint at the opportune time regarding property or machinery that the dealer knows the farmer has, can often swing the business, and at the same time inculcate into the farmer's mind the basic fact that you are actually doing him a service by suggesting to him that he preserve his property by proper and adequate painting.

Given perfect co-operation between manufacturer, jobber and dealer the paint, oil and varnish industry of Canada should go ahead with rapid strides and take its place in its rightful position among the industries of the Dominion. The year 1922 is one that is scheduled as the greatest paint, oil and varnish year, but this will never be accomplished without co-operation. Let us put our shoulder to the wheel—our whole efforts behind our sales propaganda—let us spread with enthusiasm, with vigor and with interest, the knowledge of the benefits to be derived from the use of paint, oil and varnish, and if we all work together towards this common object we shall indeed attain our object.

Paint Trade Notes

Richard Moore, President Benjamin Moore & Co., has been appointed a Police Commissioner of St. Louis. At the recent meeting of the St. Louis Paint, Oil & Varnish Club, Mr. Moore was duly installed as the Paint Man's Friendly Policeman.

PARTNERSHIP DISSOLVED

The partnership known as the Scott Paint-Varnish Co., London, Ont., has been dissolved and a charter applied for, the new company to take the name of the Scott Paint-Varnish Co., Ltd., with the motto, "We tell the Truth," a motto which is expeced to win in paint merchandising.

R. SCOTT JOINS SCOTT PAINT-VARNISH CO.

Reginald F. Scott has severed his connection with the Hobbs Hardware Co., Ltd., London, Ont, and joined his brother Charles R. Scott in the firm of Scott Paint-Varnish Co., London.

THEATRE PARTY

London, Ont.—The Scott Paint-Varnish Company gave a very enjoyable theatre party to the nurses of St. Joseph's Hospital who faithfully nursed Charles R. Scott, the manager of sales, through his recent illness. Among those present were Miss Farrell, Tom Houghton, sales manager International Varnish Company, Montreal; Fred Cookson, sales representative of the Company for Western Ontario; C. Hunter and Charles R. Scott.

MILKING COW AT BOTH ENDS

(Continued from page 37)

and relief from monotony which the automobile brought to them by facilitating travel to and from otherwise distant points. As used by retailers, Mr. Russell predicted the automobile would be an important factor in the building up of cities and towns by increasing the range of territory which could be covered, this resulting in bigger business and larger stocks for the retailer.

In Ontario Mr. Russell stated that there was one automobile for every sixteen people. This compared very favorably with other parts of the world, one of the most thickly populated sections of the United States showing the highest record of one automobile to eleven persons. The saturation point was nowhere in sight in Canada, he thought, due to the fact that the renewal business coming every five years for every automobile in use together with the increasing number of users each year would make a constantly enlarging market for automobiles and for the accessories and equipment which they require.

Value of U. S. Tourists

Hardware merchants will be interested in figures given concerning the number of U. S. motorists who visit Canada each year. In 1921 the number was over 100,000 and it is estimated that these tourists spent in Canada over $50,000,000. This number is expected to increase in future years.

T. F. MONYPENNY

Vice-President and Sales Manager Imperial Varnish and Color Company, Toronto, who has been prominently identified with recent movements to secure better co-operation between various branches of the retail hardware trade, and who has also been one of the most active exponents of the "Save the Surface" idea.

Speaking of fundamental factors which govern the trend of the times Mr. Russell drew attention to the fact that whereas savings bank deposits in 1913 totalled one billion dollars, that present deposits coupled with the money invested in the Victory Loans represent savings of over three and a half billion dollars.

F. I. Fox, Manager Ford Motor Company of Canada also stated that he had every confidence in the outlook for automobile business in 1922. The Ford Company he stated had written off nearly two million dollars on inventory last year and this had enabled them to base present prices at a fair ratio to present costs. The minor extent of the last decline in price was taken as an indication that low levels had been reached in automobile prices.

IMPORTANT DISCUSSIONS

(Continued from page 53)

ners in the east in preference to the product of the Kelowna cannery previous to the time the eastern concern established a plant in the Okanagan. Mr. Parsons drew attention to the fact that on a recent trip in the Okanagan, he found five cans of California canned vegetables to one of Okanagan. Replying, Mr. McPhail said the imported stock was sold by Vancouver wholesalers.

The Future Outlook

One of the most interesting addresses was delivered by C. P. Schwengers, managing director of E. G. Prior & Co., Ltd., of Victoria, on the subject of future business conditions. In proportion to the ability of a merchant to discount the future, so would his business prosper, he said at the outset, following by referring to former boom periods and the resultant depression. Business had come throughout the past year in fairly good condition and most of the hardware firms were still operating. The B. C. Hardware Club was given its share of credit for the important part it played during 1921.

Mr. Schwengers went on to say that there was every encouragement for the future, that every known factor in commerce pointed its finger to business improvement. He named six of these factors. Speculation was at the lowest since 1904. Merchants' stocks had dropped from the middle of 1920 when they were 50 per cent. above normal due to slowness in deliveries, to the present when they were 50 per cent. less than normal, and lowest at any time within the past seventeen years.

The abnormal demand for bonds was another factor, the speaker continued, When a dealer liquidated his stock, he usually bought securities which could be quickly realized upon. Bonds filled this need and combined safety. Illustrating

HOW MUCH WILL IT COST?

THERE are many people in your community who long to give to their homes the charm of individuality which only beautifully tinted walls and ceilings can give, and are deterred solely by the idea that such a finish involves a serious monetary outlay.

It doesn't—the Decotint way. Decotint is a beautiful, durable and permanent wall paint that is remarkably inexpensive and is so easy to apply that any amateur can secure excellent results in any one of twenty-two delicate tints or in any color combination desired.

You can recommend Decotint, not only for the beautifying of the home, but also as the most inexpensive and sanitary medium for the interior walls and ceilings of halls, club rooms, schools and public buildings.

Order Decotint now and let the people of your locality know you handle it. Give it display room and watch it sell.

DECOTINT

Sells 400 Brushes in "One Cent" Sale

Ordinarily Not Many Brushes Sold in January, but the "One Cent" Sale Stimulated Brush Business—Large Assortment of Brushes on Hand and Two Given for 76 Cents Where Ordinary Price is 75 Cents Each—Co-operation of Ads With Window Display

WITH the idea of stimulating the brush business in a usually dull month Mills Hardware Co., Hamilton, Ont., conceived the idea of arranging a "one cent" sale similiar to those which have been used for some time by other branches of the trade, especially druggists. The results were not only large for the month of January, but they represented a volume of brush sales which would do credit to the best month of the year. Speaking of the result of the brush sale, Wilfrid Mills stated to Hardware and Metal:

"Ordinarily we do not sell very many brushes in the month of January. By co-operation in advertising in the local newspapers, coupled with a very attractive window display, we sold over 400 brushes in one week during our "one cent" sale. There is a splendid business even in the dullest months, providing the hardware merchants are willing to go after the business.

Two Different Articles—A Unique Feature

"We bought an assortment of brushes including scrub, paint, kalso, lather, bannister, shoe, stove, bowl, whisks, etc., our idea being to put these brushes on sale giving our customers their choice of any two brushes, that is a stove or a shoe brush, etc., both for 76c. The startling feature of this sale is the departure from the conventional 'one cent' sale where an additional article of the same kind is sold for one cent. Here a totally different item is offered for the cent and the effect is certain to arouse the greatest interest on the part of the reader.

"The ordinary 'one cent' sales have lost some of their early glamour as the people realize that many of the items were small leaders to draw trade but this idea is something different. The customer can get two different articles of which he is in need for the price of one, plus one cent.

"If a drug store can create a one cent drug sale, why not a hardware store a one cent brush sale?"

Ad used in the local newspapers by Mills Hardware Company, Hamilton, Ontario, dealing with the first "one cent" brush sale put on locally. This ad in combination with the window displays and other effort resulted in the sale of over 400 brushes in one week.

IMPORTANT DISCUSSIONS

(Continued from page 68)

the point, he said that U. S. Liberty Bonds had jumped fifteen points within three months.

Pig Iron Situation

Still another factor, Mr. Schwengers said, was the pig iron situation. At the top of a boom, when business turned, the output of pig iron would decline. There were indications of an increase in business when the output increased. Quoting figures, the speaker said that the output to-day was 50 per cent. greater than at this time a year ago.

Bank loans of the Federal Reserve Banks of the United States had been reduced from $2,850,000,000 to $1,100,000,000 while deposits had increased and reserves had been greatly strengthened. Call money, too, had dropped to as low as 2 1-2 per cent. within the last month. These factors, the Victoria man added. had never failed. "Let's be optimists and help business along," he said in conclusion.

Mr. Schwengers was given a hearty vote of thanks as proposed by Messrs. Davis and Harry C. Martin, of Martin, Finlayson & Mather.

Pay Attention to Profits

Mr. Martin, leading a discussion on the address, said that business during the past month had not been up to the mark, for which many in the trade were disappointed. He hoped Mr. Schwengers was right when he said that the sun of prosperity was to follow. With careful engineering by the merchants there was no reason, he declared, that when they met again next year, the individual houses should not be able to show credit balances. He said that it was not necessary for retailers to lay in large stocks as there were good wholesale houses in Victoria and Vancouver which were well supplied. He recommended retailers to pay more attention to their profits and losses and to take a monthly balance.

"Credit—the business man's greatest asset," was the subject of an instructive paper read by E. Munton, of the whole-

Champion Pure Liquid White Lead

Made of
Pigment—Pure Government Standard White Lead
Liquid—Pure Refined Linseed Oil
—Pure Spirits of Turpentine.
and that's all!

You Can Now Get The Good Old-Fashioned White Lead In Liquid Forn

Champion Pure Liquid White Lead is a white lead paint, ready for immediate use. It is absolutely pure, made from Government standard white lead, with the addition of pure refined linseed oil and pure spirits of turpentine, ground and mixed in scientifically correct proportions which are always the same.

It stays in suspension. No breaking up. Use it from the tin. Saves time and waste.

Painters will use it because it saves time and gives perfect results.

Every customer, whether for a quart or a barrel will buy Champion Liquid White Lead in preference to buying the lead, oil and turpentine and mixing them by the old laborious method.

Factories, Mills, Hotels, Public Buildings, Steamships, all big consumers—will be glad to get Champion Liquid White Lead and save the labor expense of the old-time hand mixing.

Get ready for the painting season. Put in a stock of Champion Liquid White Lead. It will sell readily—and make extra sales for you, once your customers know that ready-to-use liquid white lead is available.

Weekly Paint Markets

Montreal

MONTREAL. February 9.—A rapid rise in linseed oil prices and a further increase of 2 cents in quotations on turpentine have been the price developments in the local paint market during the past week. Oil prices have continued to soar during the whole week, showing three different advances of a quite substantial nature. Raw oil commenced at 85 cents, was increased to 87 cents, then to 91 cents, and the latest price available was 93 cents per gallon in one barrel lots, with boiled increased accordingly. The advancement of prices is said to be purely in sympathy with the higher prices on seed, and even now the flax market is very firm, with further increases not unlikely. The question of a shortage in seed supplies, as outlined in a previous issue of Hardware and Metal, is now stated to be more than mere market gossip. Although not considered serious by some well informed a few weeks ago, it is now uppermost in the minds of local crushers. Argentine crop estimates have not been at all favorable, and present large American interests, anticipating the seed shortage, have looked to Canada for supplies which would naturally boost the home market.

Although a further advance of 2 cents is again recorded on Turpentine. local distributors state that existing levels are not yet on a plane with Souhern quotations. Present levels in the South should mean a price of 4 to 5 cents higher on the local market, but owing to cheaper supplies still on hand in some quarters, new stocks cannot demand the proper prices. A firm tone is still displayed in the South, with producers apparently in control of the situation, and offering only enough new supplies to take care of present demands.

Paint and varnish sales are steadily increasing with the approach of the painting season, with prices on all lines holding unchanged. The same might be said of brushes, business taking a more active turn after the close of the month of January.

RAPID INCREASE IN LINSEED OIL QUOTATIONS

Montreal

The action of linseed oil in the past week has been such that quotations have been rather hard to follow, prices registering a continued climb, and by no means of a gradual nature. Raw oil, with boiled in proportion, commenced at 85 cents, was advanced to 89 cents, later to 91 cents and the last price obtainable was 93 cents per gallon, with a further increase of 2 cents quoted in some quarters.

With such a rapid rise already recorded, there seems every likelihood of a further advance within the next few days. The flax market is very firm at present, with the question of future seed supply now uppermost in the minds of crushers. A few weeks ago it was stated by one local crusher that it was questionable whether the seed supply would outlast the coming season. This is now considered more than mere market gossip, as already the shortage is being felt both locally and in outside markets.

Argentine reports a keen European demand and with crop estimates not too favorable, American interests are now looking to Canada. The appearance of these crushers on the domestic market is undoubtedly the chief reason for the present flurry, and if these purchases are only fairly extensive, they would leave the Canadian sources of supply in a short state.

Locally, demand is still of a quiet nature, but crushers are not at the moment so much interested in this as the question of supplies to meet the improved demand which is bound to follow in the coming weeks. Quotations at time of going to press are as given below:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal ..	0 93	0 95
3 to 5 barrel lots, per gal.	0 91	0 93

Less barrels, add 10 cents per gallon.

FURTHER ADVANCE IN TURPENTINE PRICES

Montreal.

Turpentine quotations locally again register a two cents advance, bringing the present price to $1.27 in one barrel lots. The recent strength displayed in Southern markets is claimed by one local distributor as not being fully reflected on the local market up to the present, and with existing levels remaining unchanged at primary centres, local prices should continue to show slight advances. In other words, present Southern prices should mean a quotation of some 4 to 5 cents a gallon higher here, but owing to cheaper supplies still on hand in some quarters, new stocks cannot demand a price that leaves a reasonable amount of profit. For this reason, upon older stocks becoming depleted, prices should soar in proportion to existing outside quotations.

Current reports from the South indicate a maintenance of the firmer tone, and quotations during the week were slightly advanced. The gain has not been so rapid, but would seem to be in sympathy with the gradual increasing demand. Offerings of fresh supplies are still comparatively small, this being a deciding factor in assisting to maintain higher levels. Locally, demand is still for small quantities for the most part, but with a season of heavier consumption fast approaching, sales should increase. Following are revised quotations:

TURPENTINE—	Imp. gal.
1 barrel lots	1 27
3 to 5 barrel lots, per gal.	0 91 0 93
Broken lots	1 37

ROSIN MARKET IS NOW MUCH STEADIER

Montreal.

Trade in rosins continues very quiet, but not unusually so for the present season. However, consumption of this product will not, in all probability, reach the same proportion this year as in past seasons, figures even for last year showing a decided falling off from those immediately preceding. The reason for this has been outlined in a previous issue, and is due chiefly to soap and varnish manufacturers not requiring supplies for the making of their products.

This decrease in imports is not expected to further reduce prices to the same extent as in the past 12 months, when substantial reductions had been recorded. Although this condition would ordinarily assist toward lower prices, it is said to be offset by the curtailment of production, producers realizing the smaller demand. Quotations remain locally as follows:

RESIN—	bbls.	100-lb. kegs	Less quantities per 100 lbs.
G., medium grade	3 00	4 50	6 00
Water white	4 75	6 25	7 75

IMPROVEMENT NOTED IN BRUSH SALES

Montreal

The current business in paint and other brushes can be stated as showing a gradual improvement, the opening of

MONTREAL PAINT MARKETS

Continued from page 72

this month apparently bringing to a close the more inactive period. Orders for future deliveries are said to have slackened during the month of January, after a fair amount of business in the closing months of the year. From now on, however, dealers anticipate a more active demand, and some of the larger orders that were withheld until after inventory, are expected in the present month. Prices are remaining steady for the present.

Toronto

TORONTO, February 9.—Interest in the current paint markets as regards prices is centered upon the further increases in linseed oil and turpentine quotations. Additional advances of five cents per gallon have been announced on both products, thus bringing prices to higher levels than have prevailed for some time past. The meeting of the Paint, Oil & Varnish Association in Montreal, and also that of the Lead Ass'n, attracts marked attention in view of possible developments affecting the paint industry in general. However, other features are supplied by the firm undertone to the glass markets and the rumor that slight advances may materialize in quotations in window glass in the future.

PRICES ON LINSEED OIL SOAR HIGHER

Toronto

Another advance of five cents per gallon in the local quotations on linseed oil. This additional revision brings the current price up to the level of 95 cents for raw and 98 cents for boiled in one and two barrel lots. Some lower prices than these, however are still appearing on the market, one distributor quoting as low as 91 cents for boiled. However, the condition of the market renders changes imminent from day to day. Any such easier figures are generally attributed to where some stocks are on hand, which were purchased at easier levels than those now prevailing. The demand for oil has recently experienced a marked recovery, and prices have consequently reflected this interest. Flax seed prices are also slightly higher, these conditions contributing to the firm undertone in linseed circles. Following are the revised levels:

LINSEED OIL—	Per Gallon.	
1 to 2 barrel lots	0 95	0 98
3 to 4 barrel lots	0 94	0 97
6 to 9 barrel lots	0 92	0 95

STILL HIGHER PRICES APPEAR ON TURPENTINE

Toronto.

Another additional increase of five cents per gallon on turpentine prices attracts considerable interest this week, as the local prices are thus raised to the level of $1.40 per gallon in one barrel lots. Quotations at primary distributing centres have again registered further advances, and this current change places the markets on a higher level than has prevailed for some time. Prices on turpentine, both on the domestic and foreign markets, continue of a very firm nature, with producers at Savannah attributing the rise to the ebb of fresh receipts and the fact that they are now entirely inadequate to meet trade requirements. Drafts are therefore continually being made on the tanked product. Thus producers are more or less in full command of the present situation. Under the circumstances the obvious position of the current price is one where the holder insists upon receiving a certain amount. The foreign demand is quite small and daily orders are for immediate requirements. These conditions are expected to prevail, at least while the present price levels are in evidence and until the new crop moves. Some local distributors are adhering to price levels a few cents below the nominal quotations. This is particularly where some stocks are available which were evidently purchased prior to the existing market:

TURPENTINE—	Imp. gal.
1 barrel lots	1 40
2o to 4 barrel lots	1 39
5 gallon lots	1 55

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton London, Brantford, Collingwood, Guelph Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots—15 cents per gallon Extra

IMPROVEMENT NOTED IN PAINTS AND VARNISHES

Toronto.

Current activity in paint and varnish is stated as being well up to the average expectations of manufacturers and distributors at this time of the year. Signs are not wanting of early activity in building circles, and it is evident that fair prospects at present exist for a marked season in both the construction and paint industries. The erection of many houses is reported planned in both city and small town localities, and this is generally expected to prove an added stimulant to the paint trade. Orders for the Spring season are coming along in better volume with each succeeding week, and optimistic expressions are being supported by an improved demand. Prices are at present unchanged, and manufacturers are practically unanimous in stating that no revisions in the present levels are being contemplated at this season of the year. It is pointed out that no easing of production costs has been evident since the reductions last Fall, and in some cases raw material prices have increased. Whether any discussion of this subject will result in some action along the lines of lower prices at the meeting of the Paint, Oil & Varnish Association in Montreal, could not be ascertained.

IMPORTANT DISCUSSION

(Continued from page 70)

sale grocery firm of W. H. Malkin & Co., Ltd., and vice-president of the Canadian Credit Men's Trust Association. Credit was only as good, he said, as the strength of the firm to which it was given. It was based on confidence, character and integrity.

In the discussion which followed Mr. Stearman very clearly showed the advantages to be gained by the taking of discounts, his percentage savings running up to 750 per cent. He believed that trade in Vancouver would be much worse were it not for the influence of the B. C. Hardware Club. He advised the dealers to shorten their line of credit, clean out dead stock and "Don't mix hardware and real estate, as they don't mix."

Mr. John Dunsmuir, of Wood, Vallance & Leggat, Ltd., said that the present was not a time for retail hardware men to stock up and that he considered the hand-to-mouth system the best just now, while the trade was working on a falling market. Retailers should make the wholesalers take the chance, he declared.

Other speakers were Messrs. J. Payne of North Vancouver and A. Davis.

Banquet and Cabaret

In the evening the big feature was the annual banquet and cabaret which were held in the ball room of the Hotel Vancouver at which upwards of 450 people were in attendance. Mr. Stearman was master of ceremonies. There was a very attractive program including an address by Pres. R. R. Taylor of the Victoria Hardware Club in which he told of the progress made in Victoria ending with an invitation to the B. C. Club to visit Victoria on June 14. Mr. Hyslop told briefly of the progress of the club during the year and expressed the hope that its membership would be doubled by next year.

The following committees had charge of the arrangements for the cabaret: Banquet, W. C. Stearman and J. H. Roaf; entertainment, G. Kearns, C. Bryson, F. Ball, and P. Gordon; tickets, J. B. Payne, G. J. Gunn, J. A. McCallum, J. Hyslop, Gordon Brown and L. W. Latimer; reception, T. H. Latimer, G. Brown, H. C. Martin, R. Bull, M. Dumond, J. H. Roaf, J. B. Payne, W. C. Stearman, J. Hyslop, W. Kidd, W. H. Hudson, J. Sargison and C. Bryson.

PITTSBURG MARKETS

(Continued from page 65)

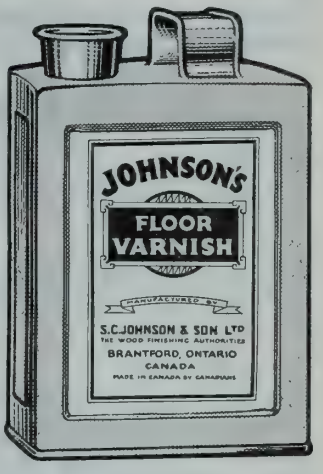
erating almost one-half greater percentage of its mill facilities than are the independents. With the increase that has occurred since the first of the year the Steel Corporation has been producing steel ingots in the past two weeks at the rate of about 11,500,000 gross tons a year, while the independents, with their gain, are doing about 10,500,000 tons a year, making about 22,000,000 tons a year as the rate of the steel industry as a whole.

There's Profit and Prestige in Handling the Complete Johnson Line

YOU'RE in business to make money. Johnson's Artistic Wood Finishes net you a substantial profit on every sale. But in addition Johnson Products are business builders—they make satisfied customers — repeat buyers — the kind that mean a steady, continuous, profitable business to you.

Johnson's Sani-Spar Varnish Stain is a waterproof product which will not turn white. Gives wonderful results on furniture, floors, woodwork and all interior and exterior surfaces. Put up in four sizes and in natural and four shades only, consequently a small investment brings you a complete stock.

Johnson's Floor Varnish is as good as Johnson's Floor Wax. What more can be said? It gives a beautiful, high gloss which will not mar, blister or scratch white. Dries dust-free in 2 hours and hard over night. Is absolutely waterproof and will stand all reasonable tests.

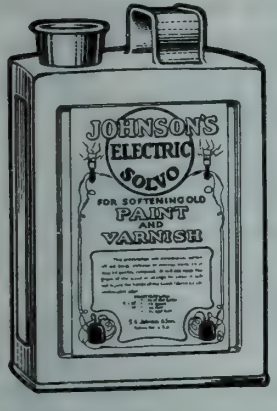


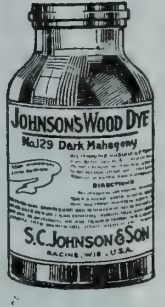
Advertising

The complete Johnson line will be extensively advertised throughout Canada. The leading magazines will carry the interesting Johnson story right into the homes of the people who are your logical customers. By displaying all the lines in your store and windows you will be the final link in completing the sale.

Sales Helps

And in addition to the advertising there will be attractive sales helps — counter cards, window cards, booklets, folders, envelope stuffers, and many other features that will aid you in building up an interesting and profitable business in Johnson products. When you send in your order specify just what sales helps you need.





Johnson's Is a Quality Line

Only the best grades of raw materials are used in the manufacture of our products and every department is in the hands of experts. This insures a uniform manufactured product of the highest quality. All Johnson Products are well canned—beautifully labeled—well advertised—and allow the dealer a good margin of profit.

Johnson's Car Savers---A Profit-Pulling Auto Accessory Line

No accessory stock complete without Johnson's Car Savers. They have stood the test of time. You can handle them right in connection with the regular Johnson Line without devoting much space to their display or tieing up much of your capital. There's a Johnson Car Saver for every purpose—for removing carbon—mending leaks in radiators—for renewing old tops—for varnishing old cars—for lubricating springs—for removing pits and foreign substance from valves —for patching tubes, casings, etc. The demand is for "Johnson's."

JARDINE
Pedestal Blower

A new, simply designed blower with only two pairs of gears which, because of scientific designing, run practically silently, without friction. The gears are flooded in oil; the fan shaft runs in ball bearings. Superior design gives the Jardine No. 14 a superior blast pressure for the power applied, and straight into the air pipe without the loss, by faulty direction, as in many ordinary blowers.

Ask for Catalogue No. 18 of our full line of Blacksmiths' Tools and Machines.

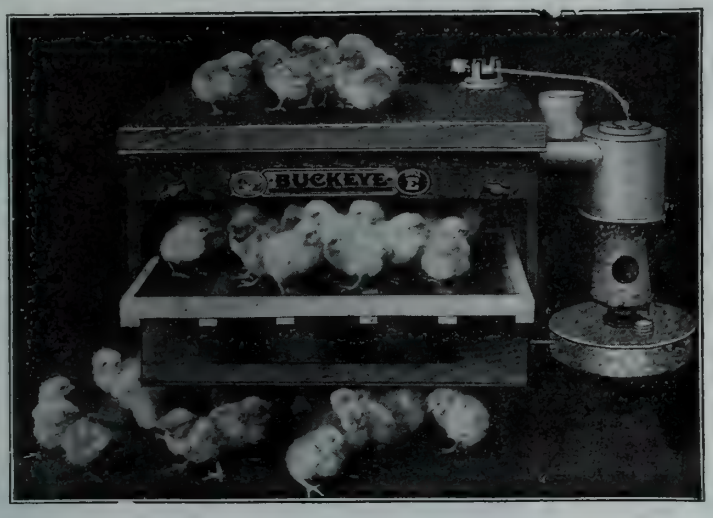
The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada



Buckeye Incubator and Fittings

Their Superiority Evident at a Glance

It will pay you to go after "poultry" business. By keeping Buckeye Incubators in sight, well displayed, and by local advertising, you can keep your store in the minds of your prospects as the place to go for poultry farm equipment.
The chicken raising man takes in the good points of the Buckeye Incubator and fittings at a glance. Their superiority is self-evident. Proof that their success and great sales are founded on merit is shown by their continued use at Canadian institutions like MacDonald College, Ontario Agricultural College and by many Canadian poultry farms.

Locks and Prevents Tampering With Your Barrels

"EMCO"

For Those Steel Barrels

Hinged Lock Lever Oil Cock

Simple and Easy to Use-- No extra Work to apply

This simple, convenient cock is easily attached to your steel barrels and drums by simply screwing it into the tapped and threaded hole.

When you have done that you have locked your profit in the barrel where it cannot escape until you are ready to draw it out and cash it.

The "Emco" Hinged Lock Lever Oil Cock prevents loss by carelessness or petty dishonesty. It is a perfectly ground cock that together with the steel barrel, practically eliminates your previous losses by evaporation, as well as by carelessness and dishonesty.

"The 'Emco' cock protects oil stock"

Empire Brass Mfg. Co.

Limited

London and Toronto, Canada

Hardware and Metal Circulation Dominates in Western Canada Because:—

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 33 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

Stop The Passing Trade—

Write for Illustrated Booklet C-16

For 35 years Bowser Piston-Type Measuring Pumps have been the symbols of Good Gasoline Service. Thousands of motorists are being added each year to the hosts who prefer Bowser-served gasoline and oil. Gasoline customers bring trade on other lines.

The patented Centrifugal Separator guarantees that Bowser-served gasoline is clean and power-*full*. It takes all moisture and dirt from the gasoline before it is pumped into the car reservoir. Bowser Piston-Type Measuring Pumps deliver quickly any desired amount. Positive mechanical stops assure accuracy.

Because the Pumps and Tanks are evaporation-proof and all-metal, all losses are eliminated. Increase your business by installing a Bowser.

Bowser Equipment is MADE IN CANADA by

Now is the time to stock up with these easy-moving Barrett Specialties!

START the Spring season right. Place your orders now so you'll be all ready when spring buying begins. If you haven't our latest Price List, a copy will be mailed on request.

These famous Barrett products are known all over the Dominion for their high quality and great economy. For years they have been the fastest-selling specialties on the market.

This year we shall continue our aggressive advertising in leading farm publications and newspapers. The already big demand will be bigger still.

These products will make money and build business for you, because they will save time and money for your customers. You can sell them with absolute confidence. They're made by Canada's oldest and largest manufacturer of roofings and industrial specialties.

For Roof Repairs

Plastic Elastigum Patching Cement. Has no equal for patching holes in all kinds of roofs, repairing leaky flashings, gutters, etc. Known as "The Plastic Cement of a Thousand Uses." Invaluable for general repair and waterproofing work. Sticks fast to either wet or dry surface. Easy to apply. Comes ready for use.

Liquid Elastigum. For coating all kinds of roofs. Gives new life to prepared and "rubber" roofings; protects metal roofing from rust and corrosion. A big money saver. An occasional coating adds years of service. Comes all ready to apply.

Everlastic Liquid Roofing Cement. Makes old prepared and "rubber" roofing almost as good as new. Seals up the small holes and gives a long-wearing new surface. Everlastic Roofing Cement has about the consistency of thick molasses—it is *not* a roof paint. Comes all ready for use. Dries quickly into a smooth jet black surface.

Protective Paint

Everjet Elastic Carbon Paint. A high quality, inexpensive protective paint for all exposed metal and wood surfaces. Just the thing for farm implements. Waterproof, acid-proof, weatherproof. Wears stubbornly under all conditions.

Fly-Oil and Cow Spray

Creonoid. An effective, economical fly-oil, lice-destroyer and cow spray. A big favorite with Canadian farmers and dairymen because it is safe and easy to use, and gives unfailing results.

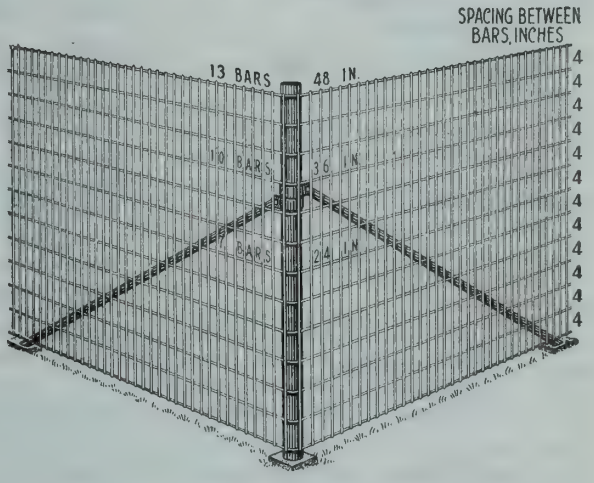
Get Ready for the FENCE Business



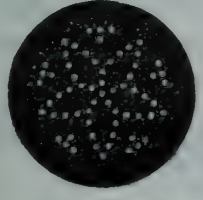
The Fastest Selling Fence to-day

is Lundy's Electric Weld. Stronger than other kinds. Comes in uniform sizes. Has the advantage of PRICE as well as POPULARITY. Get our quotation on your wire fence requirements.

A. R. Lundy

257 King St., West, Toronto

Durable Three-ply Veneer Seats



These splendid, three-ply veneer seats are made in a pleasing variety of patterns, carefully shaped, corners rounded, edges smoothed and sand papered, and fastened with genuine water-proof cement. They will not warp, curl, crack or come apart. Even the severest weather will not cause these excellent seats to come apart.

There is no better line that you can handle than these Perforated Three-Ply Veneer Chair Seats. The extraordinary care and attention we give to their manufacture is producing results in increased sales for Dealers everywhere. They are a continual source of revenue in money, good-will and business held and gained.

Gore Park Hamilton Armouries--Where Exhibition Is Held

Retail Hardware Convention

Will You Be There To See

The Splendid Exhibits? Your Old Friends? Prominent Speakers?

(Special R. R. Fares)

ARE you coming to the most important Retail Hardware Convention we have ever held? It is worth laying aside business to attend. You will benefit yourself and your business by coming.

We need your help in discussion of many important topics and questions which will be presented.

You will benefit by hearing views on the hardware business, present and future, of many distinguished speakers. Wisdom obtained by this means helps everyone and hurts no one. It is helpful to you and your business to see the splendid exhibits—thirty more of them than there were last year!

A special feature of interest and real value lies in the "Buyers' Card" which will be furnished every buyer. Whenever you purchase, have the Exhibitor enter on it his name and approximate money value of your purchase. Graded cash awards will be made to buyers of the largest aggregate purchases and several graded awards to dealers buying from the largest number of exhibitors. At the convention's close hand or mail your card to the Association Secretary.

Ask for a certificate on buying your railway ticket; present it to the Secretary and help us get reduced fare for everyone paying over 75c one way on the railroad.

Be there February 14, 15, 16, 17—you need it, and the Convention needs you!

Ontario Retail Hardware Association

W. F. Macpherson, Secretary, Prescott, Ontario

"MONITOR"

Coal Oil

Brazing Lamp

Stoves, Blow Lamps and Furnaces

Very strongly made of Polished Brass. An efficient and powerful Lamp for Brazing, and similar operations on a big scale. Burner of improved type, giving a clean, blue flame covering a large surface. Portable and easily handled, can be used in any position with safety. Burns coal oil, 30% hotter and much cleaner than gasoline, can be used for pre-heating for oxy-welding.

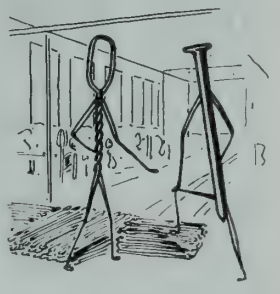
LAIDLAW'S WIRE BOYS

Their Chat No. 17

"Let's Ask Convention Visitors out to see the plant"



"That's a good idea, B. T., for a good many of the boys have never seen a bale-tie made, yet most of them sell them in large quantities.

"They will see why Laidlaw bale-ties stand the test under all conditions."

"We'll see that they get good attention if they come down, W. N.; in fact, I'll be glad to go and get them at the Armouries and take them back too."

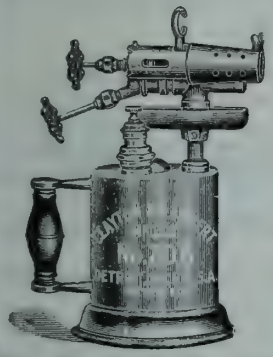
The Stratford Manufacturing Co., Limited
STRATFORD, ONTARIO



A QUALITY TORCH

No. 208 Double Needle Torch produces more heat, costs less to operate and will last longer than any other quart size torch. Burner is of improved Construction, having wonderful generating power. Burns gasoline or kerosene. Upper needle cleans, lower needle regulates the flame. Both needles have blunt points which make it impossible to enlarge the gas orifice and ruin the burner. Jobbers supply at factory prices. Ask for catalogue.

CLAYTON & LAMBERT Mfg. Co.

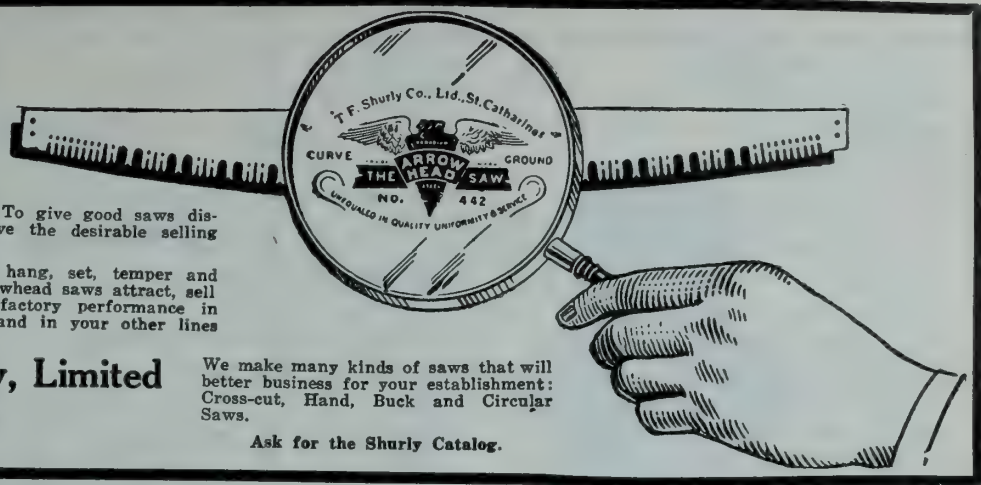
Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.



T. F. Shurly Company, Limited
St. Catharines
Ontario

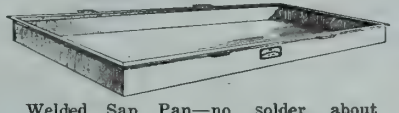
We make many kinds of saws that will better business for your establishment: Cross-cut, Hand, Buck and Circular Saws.

Ask for the Shurly Catalog.

HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worth-while buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.

Here's a Money Maker!
MAPLE EVAPORATOR
and
WELDED STEEL SAP PAN

This evaporator fills the popular demand for a handy, efficient, up-to-the-minute machine at a reasonable price.
It is specially made to meet the requirements of the small farmer who wishes to get all the money profits out of his maple bush without too heavy an outlay for **apparatus.**



Welded Sap Pan—no solder about it to melt or leak—a pair of handles on each side and heavy angle steel around top.
Standard sizes: 6″ x 24″ x 5′ ; 6″ x 36″ x 7′ ; 6″ x 24″ x 7′ ; any size to order.

Placed on market last year and proved a great success.

Write us for trade prices and further particulars regarding these two money makers — we also manufacture steel baths, tanks, sanitary closets, dairy equipment, etc.
Send list of prospective buyers and we will mail literature to them.

The Steel Trough and Machine Co., Ltd.
Tweed, Ontario, Canada

Complete Your Chair Seat Line With
THE "STANDARD"
Superior Fibre Chair Seats

No matter how many wooden seats you sell for ordinary use, when it comes to rich appearance, matching fine leather chairs, and so forth, it will pay you to supplement your line with the "Standard" Superior Fibre Chair Seats. They are thick and durable, will not split or warp, and are fully guaranteed by the manufacturer's label.

Ask your jobber.

Empty Shelves— and a Prediction

WITH inventories completed, retail hardware merchants find their stocks smaller now than at any time in recent years. Merchants have held back on spring bookings and freely admit that present stocks are totally inadequate for "Spring and Summer" trade.

Reports from retailers in all parts of Canada are such that we predict a pronounced buying movement within the next six weeks. We are entering a period of improved but cautious buying activity. Purchases will be considered more carefully, comparisons will be made more freely than heretofore. Merchants are adopting a "convince me" attitude. Unknown houses and unknown products are going by the boards these days. Merchants are not taking chances on buying any lines where there is an element of doubt as to the standing or reliability of the manufacturer or the product.

Merchants are the "choosers" to-day. The question is not one of where can I secure goods? It is a question of "whose line will I stock?" At the moment of decision, the line consistently advertised in Hardware and Metal—all other things being equal—is the one that stands the best chance of acceptance by the merchant. The 34th Annual Spring Buying and Directory Issue of Hardware and Metal, reaching the trade on March 18th will be studied closely by over 95% of the most important wholesale and retail hardware buyers across Canada from coast to coast. Thousands of feet of empty shelving will be filled up with lines advertised in the 34th Annual Spring Buying and Directory Number. Reservation should be made immediately.

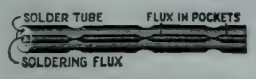
KESTER ACID CORE WIRE SOLDER

FLUX IN POCKETS

—a self-fluxing solder for automotive and general work. Flux and solder are applied in one operation, because the flux is contained inside the hollow wire of genuine tin-and-lead solder. In great demand by all solder users because it saves two-thirds of the workman's time and gives a strong bond the first time. Comes in convenient packages and spools that are easily stocked. Write for free sample—investigate this easy-to-sell, easy-to-use, easy-to-stock solder.



Sectional view. Note flux in pockets.

Kester Rosin-Core Wire Solder is also manufactured for delicate electrical work.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Subscription price of HARDWARE and METAL is $4.00 per year or less than eight cents per issue.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

FOR SALE

FOR SALE — HARDWARE BUSINESS — A going concern centrally located in Western Ontario city, one of the best Dairy centres in Canada. Stock $14,000 turnover 3 times and exceptional opportunity. Box 343, Hardware & Metal.

FOR SALE—HARDWARE STOCK—ENTIRE or blocks. Apply Box 344, Hardware & Metal.

FOR SALE—HARDWARE BUSINESS IN Eastern Ontario. Good transportation, two railways and river St. Lawrence. Stock and fixtures about $11,000. Box 345 Hardware and Metal.

MISCELLANEOUS

NICKEL PLATING — ORDERS EXECUTED promptly. Prices on application. Communicate with F. W. Higginson, 173 William St., Montreal. Telephone Main 8144.

Have you any small needs?

Sales Possibilities

For any hardware business, genuine Rainbow Packing represents a splendid source of profitable business because all steam engineers appreciate its worth. They know the better service it gives in keeping joints tight and in eliminating frequent shut-downs to re-gasket steam lines.

You do well to let every steam plant in your district —large or small—know that you sell genuine Rainbow Packing, and that you can supply their needs without loss of time.

But be sure you see the Diamond Rainbow trademark on every yard. Your customers have learned to look for it. Genuine Rainbow is made in Canada. Get in touch with your jobber or write direct for interesting proposition to hardware dealers.

Empty Shelves— and a Prediction

WITH inventories completed, retail hardware merchants find their stocks smaller now than at any time in recent years. Merchants have held back on spring bookings and freely admit that present stocks are totally inadequate for "Spring and Summer" trade.

Reports from retailers in all parts of Canada are such that we predict a pronounced buying movement within the next six weeks. We are entering a period of improved but cautious buying activity. Purchases will be considered more carefully, comparisons will be made more freely than heretofore. Merchants are adopting a "convince me" attitude. Unknown houses and unknown products are going by the boards these days. Merchants are not taking chances on buying any lines where there is an element of doubt as to the standing or reliability of the manufacturer or the product.

Merchants are the "choosers" to-day. The question is not one of where can I secure goods? It is a question of "whose line will I stock?" At the moment of decision, the line consistently advertised in Hardware and Metal—all other things being equal—is the one that stands the best chance of acceptance by the merchant. The 34th Annual Spring Buying and Directory Issue of Hardware and Metal, reaching the trade on March 18th will be studied closely by over 95% of the most important wholesale and retail hardware buyers across Canada from coast to coast. Thousands of feet of empty shelving will be filled up with lines advertised in the 34th Annual Spring Buying and Directory Number. Reservation should be made immediately.

Our Advertising is Having a Splendid Effect on Business

Retailers handling Diamond or Pearl Ware report a marked increase in sales since our advertising commenced. For one thing, our advertising is powerful. And it's having a powerfully good effect on our own business.

Think this over! Our ads are appearing in over 700 of Canada's best newspapers, magazines and journals during 1922. The headings of a few of these papers are shown on the opposite page.

FREE Price Tags

We now have ready for immediate distribution a large number of good-sized price tags in the shape of our SMP Shield. These are free and will be distributed to each SMP dealer upon application.

And we just figured out that over 87,500,000 copies of these advertisements will circulate in Canada this year.

Now, how about YOU?

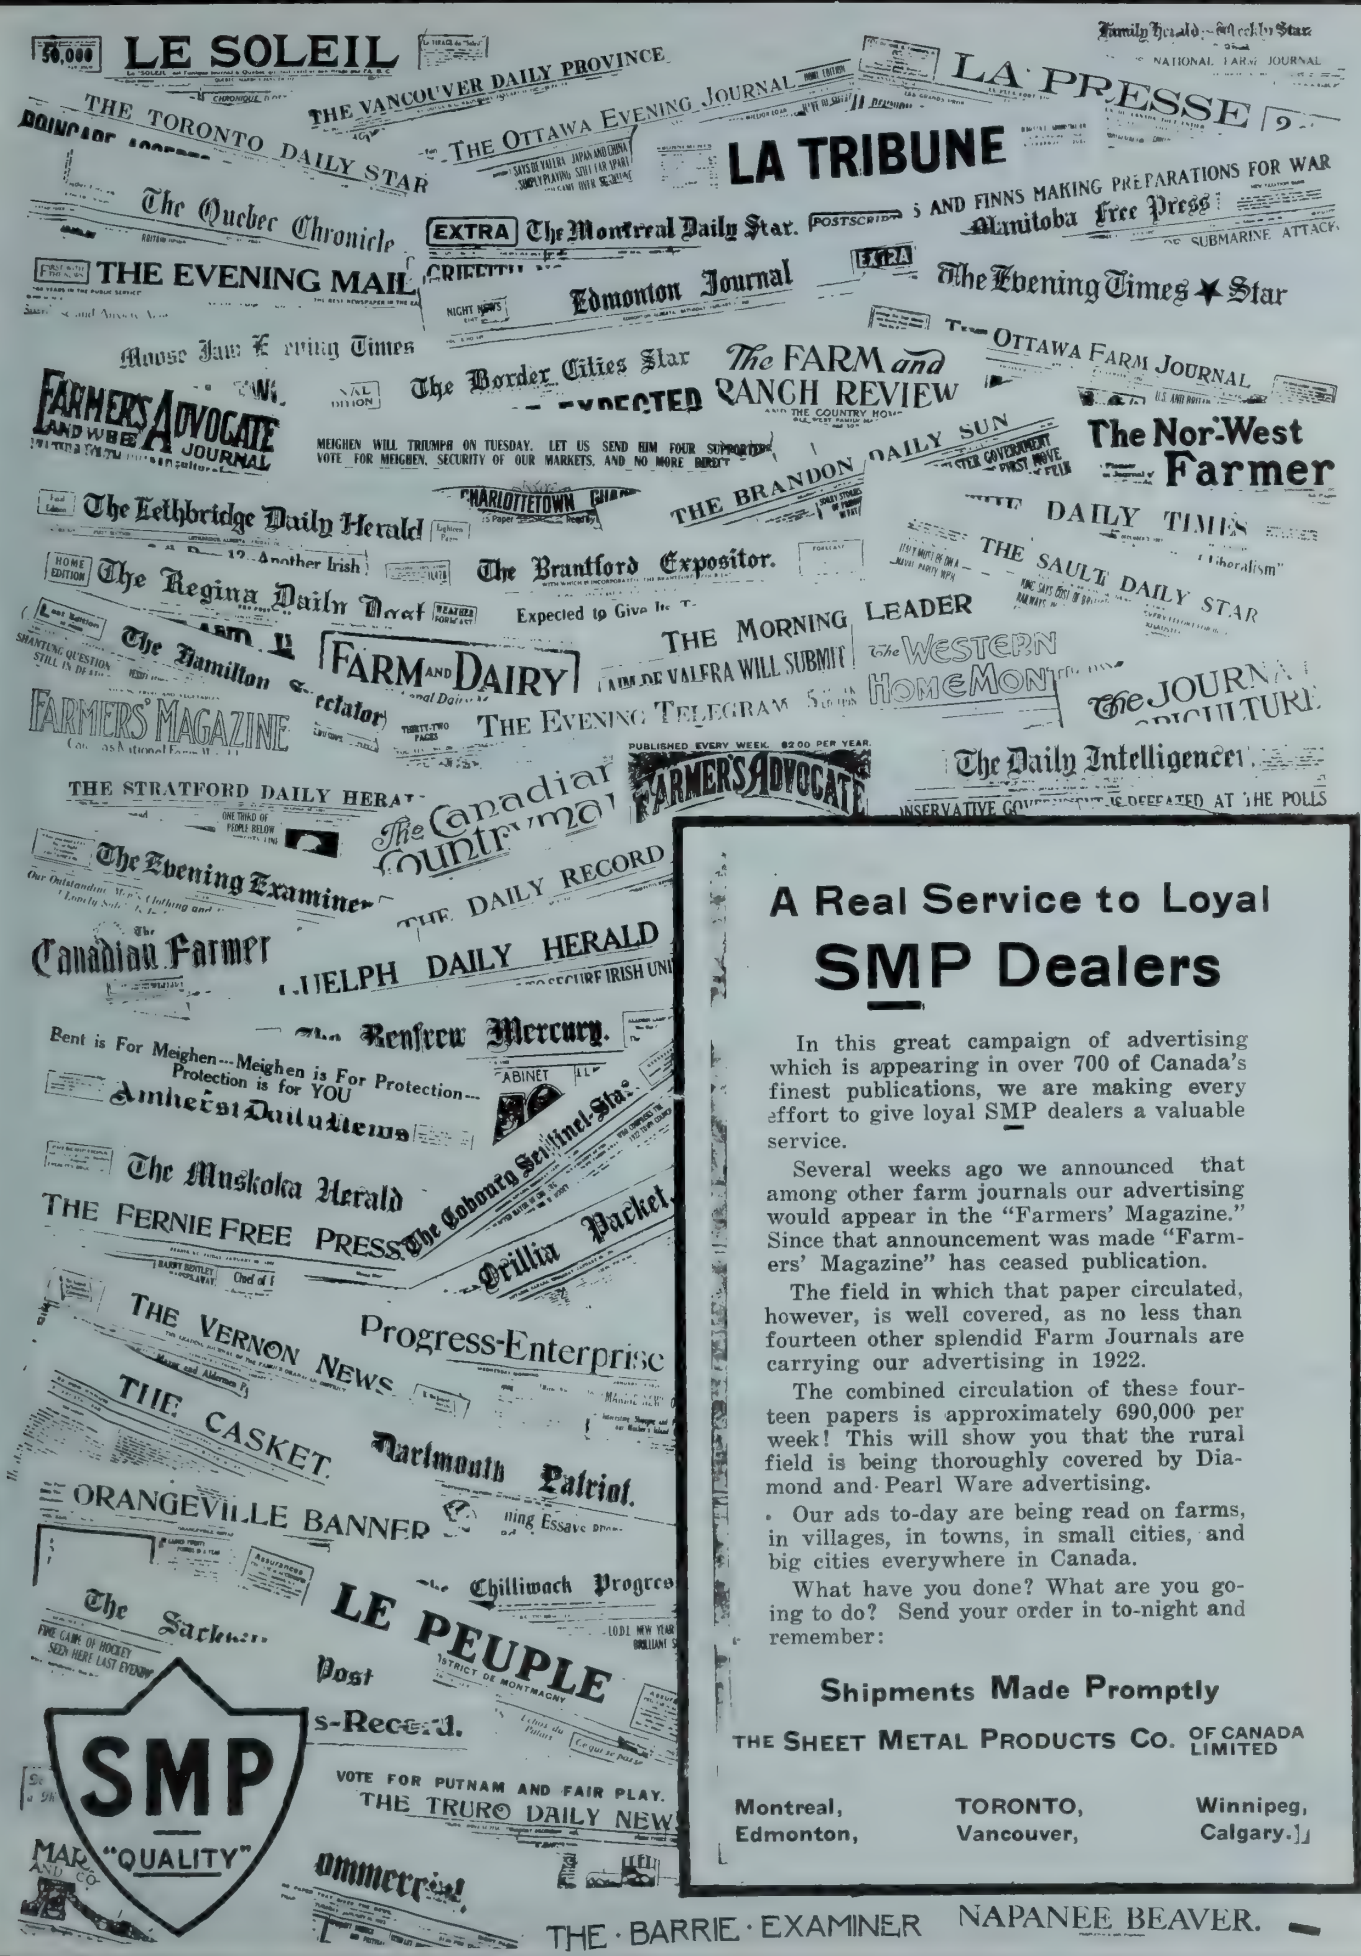
Are you in on this thing?

Or are you marking time and losing some fine business through lack of co-operation, or because you are handling the wrong lines?

If you want to make 1922 a real, bang-up year for your store with a big turnover and lots of profit do it with the help of our genial friend, Mr. SMP.

He's all ready to help you. He's at your service, sir, and itching for action.

Order from our nearest branch or your nearest jobber. But GET IN IT right away.



A Real Service to Loyal

SMP Dealers

In this great campaign of advertising which is appearing in over 700 of Canada's finest publications, we are making every effort to give loyal SMP dealers a valuable service.

Several weeks ago we announced that among other farm journals our advertising would appear in the "Farmers' Magazine." Since that announcement was made "Farmers' Magazine" has ceased publication.

The field in which that paper circulated, however, is well covered, as no less than fourteen other splendid Farm Journals are carrying our advertising in 1922.

The combined circulation of these fourteen papers is approximately 690,000 per week! This will show you that the rural field is being thoroughly covered by Diamond and Pearl Ware advertising.

Our ads to-day are being read on farms, in villages, in towns, in small cities, and big cities everywhere in Canada.

What have you done? What are you going to do? Send your order in to-night and remember:

MILLERS FALLS TOOLS
SINCE 1868

Announcing a New Finish for Millers Falls Tools

Millers Falls Breast Drill No. 97—the most complete breast drill on the market. 5 distinct actions. No workman can see its beautiful new finish without being impressed.

Length, 17½ inches

MILLERS FALLS tools have been giving a good account of themselves for two generations. We now take pleasure in announcing a new finish for our tools which will make it possible for you to obtain a greater turn-over on Millers Falls products.

We have adopted an attractive red finish for prominent parts of our tools. This is applied by a new process which gives a smooth, glossy, enamel finish. On the gears of our breast drills is placed a gold-leaf decalcomania. On the handles of other tools is placed a small transfer which is a reproduction of our trade mark. Frames are treated with a new japanning process. All nickel parts are polished and nickeled with greater care than heretofore.

The new finish adds wonderfully to the physical appearance of the tools and makes them a better selling proposition than ever before. It protects and prolongs the life of the tools—tools already remarkable for their long life and durability.

WE feel sure this new Millers Falls finish will be greeted with enthusiasm by everybody who in any way is concerned with the sale or use of Millers Falls tools. Your customers will see in it greater usefulness, longer life, more impressive value. They will turn with greater interest to the Millers Falls Tools displayed in your store, because of the attention-compelling value of our new finish.

Millers Falls Hand Drill No. 2—the finest hand drill made. Used by skilled workmen all over the world. Finished throughout in the new Millers Falls Finish.

Length, 14½ inches

Our good friends, the dealer and the jobber, will see in it greater display value, faster turn-over, quicker and more frequent profits.

TRADE MARK ARMCO REG. U.S. PAT. OFF.

PURITY THE BASIS FOR RUST-RESISTING IRON

ARMCO Ingot Iron, is the **only pure iron** manufactured in commercial quantities by the Open Hearth furnace process. Pure Iron of the ancients after hundreds of years of service under the most severe conditions has demonstrated that purity is a fundamental requirement of a long-lived ferrous metal. ARMCO Ingot Iron is even more pure than these ancient irons.

ARMCO Ingot Iron contains in the aggregate not more than sixteen one hundredths of one per cent. of the impurities–manganese, carbon, copper, phosphorus, sulphur, silicon and the gases, oxygen, hydrogen, and nitrogen, common to other ferrous metals. Such an extreme purification results in a dense homogeneous iron that will resist rust and give long service.

Elimination of impurities in iron is highly important because the presence of such substances as manganese and copper, as well as excessive gases, accelerates electrolytic action which has been found by eminent metallurgists to be the cause of rapid corrosion.

The artificers of old could not have been any more careful or painstaking in their crude processes than are the highly skilled workmen in Armco's modern plants, who, today are responsible for the purity and service giving qualities of rust-resisting ARMCO Ingot Iron, Sheets and Plates.

ENAMELEDWARE

The CLEAN *Ware*

Of all the much-advertised kitchen wares **Enameledware** is by far the cleanest and cheapest in the end—and out of all makes of **Enameledware** the "DAVIDSON" line is probably the best known and certainly the most reliable.

The Davidson Trade Mark—"The Seal of Durability" is our own personal guarantee of quality, known throughout the trade and respected everywhere since 1860. At the present time there is an extensive advertising campaign running in Newspapers and Farm Journals from coast to coast and already there is a favorable response on the part of the public who, despite inferior attractions, has always recognized the superior utility of Enameledware as a household utensil.

The non-metallic acid stain-proof surface of **Enameledware**—resembling china in its texture—ensures greater cleanliness, less waste and absorbs and retains more heat than any other form of cooking utensil.

"Glad? I'll Say 'Yes'"

"TWO years ago I nearly gave up the Tire end of my business. I'm too busy to spend time 'making adjustments' on poor Tires. Last year I handled

"GUTTA PERCHA" TIRES

and I had very little adjusting to do, and no complaints. My customers were so well pleased that I shall continue to push my tire department as long as I can get "Gutta Percha" Tires. It is worth the trouble to stick to a good article that pays a good profit and gives satisfaction. Am I glad I took up the "Gutta Percha" line? I'll say 'Yes'!"

Beath Welded Steel Barrel-

With Beath Pump

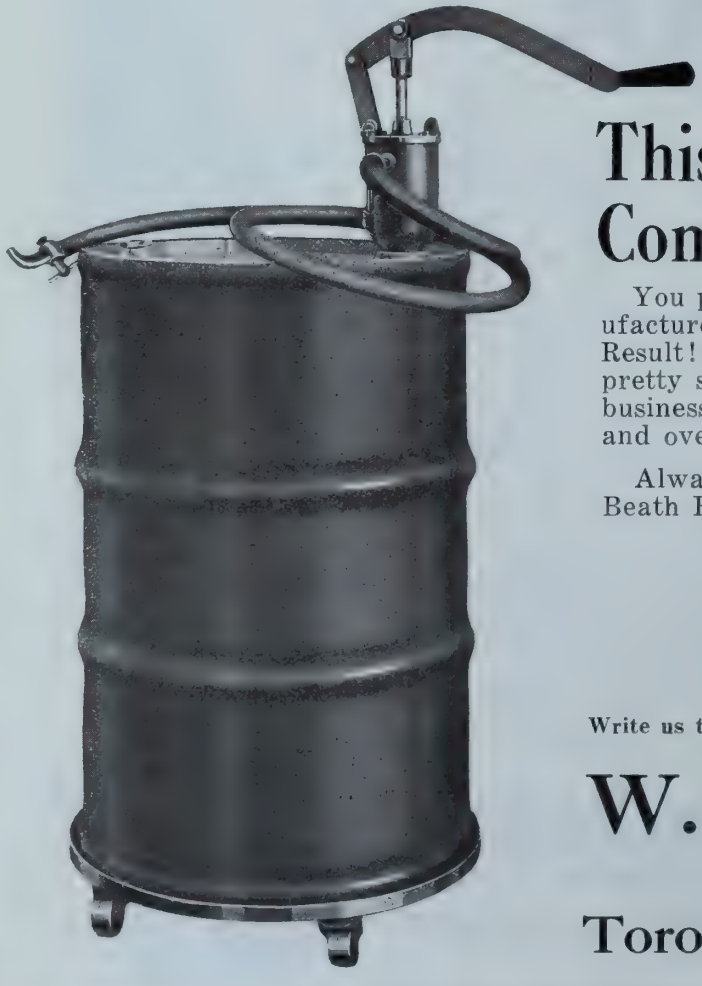
For Your Oil Department.

Do you want to have the tidiest, cleanest, neatest and most economical outfit in town for selling your kerosene and oils—an oil outfit that builds up business?

Beath Welded Steel Barrels with Beath Oil Pumps are the greatest combination ever offered to hardware men for their own use.

Beath Welded Steel Barrels are absolutely unleakable. See how tidy they look in your store. They stand up permanently. They stop waste.

The pump is easy and simple to operate, no valves to get out of order, no complicated parts to wear out. They fit perfectly. Three strokes exactly to the quart. See how quick you can serve customers! And besides—



This Barrel and Pump Combination Sells itself.

You put this neat barrel and pump where manufacturers' motorists can see it in actual operation. Result! You sell Beath Barrels and Pumps, and pretty soon they have worked up for you a tidy business—and have paid for your own outfits over and over again.

Always order your own supplies shipped in Beath Barrels.

We manufacture:
Beath Steel Barrels
Oil and Grease Pumps
Gasoline Storage Tanks
all sizes—for every purpose

IN PLACING FIRE INSURANCE

for the coming year bear in mind the strength, loss paying record and saving of the company you choose.

One glance at the following statement will prove our strength as unquestionable. Fire companies have just passed through probably one of the hardest years of the business, yet our companies were able to make quite an increase in surplus—which, after all, is the real strength of a company.

AS TO LOSSES—well, the fact that we have never had a lawsuit over the adjustment of an honest loss speaks for itself. Losses are paid immediately upon receipt of proofs of loss from the adjuster and NO DISCOUNT.

SAVINGS?—Our hardware companies are now on their 15th year of providing hardwaremen with fire insurance at exactly one half the cost of board companies. THINK OF IT!

Statement of Assets and Liabilities backing the policy we issue.

CAMPBELL & FOWLER EDGE TOOLS

Our XXX single bit axe is made of the very best grade of Crucible Cast Steel, by men WHO KNOW HOW, under the most rigid inspection and therefore we can safely guarantee every axe to give perfect satisfaction. Every XXX axe is ground to a keen cutting edge ready for work, which saves the chopper the usual grinding necessary on other makes. We supply these axes in any pattern required for your trade.

Our Special Hudson Bay Axe is much wider across the eye than the regular pattern, which gives more support on each side of the handle and prevents the handle from getting loose or breaking, which is the case with the old style Hudson Bay Axe. Patent applied for.

Our XXX double bit axe is also made of the very highest grade of Crucible Cast Steel and each bit is separately tempered, which insures them to be of equal temper, as most double bit axes do not contain the same temper point in each bit.
This axe when handled will balance perfectly and each bit will line up true with the handle. Our axes are supplied in any pattern required.

A SELECTION of four favorites. Have you these in stock? Campbell and Fowler Edge Tools have been standard for over fifty years.

Don't be modest about displaying these lines. Get 'em into your windows and on your show racks. Our long experience is your guarantee.

We also manufacture:
Socket Firmer Chisels
Framing Chisels
Draw Knives
Boys', Hunter and Bench Axes
Hatchets
Automobile Springs

Campbell & Fowler Ltd.

St. John Sole Makers XXX Tools **N. B.**

Campbell's Patent XXX Hammer Poll Axe is made with a piece of 1¾ in. best cast steel, fitted and welded solidly into the poll of the axe. Cannot break as it is properly welded and tempered. This axe will not flatten out, and has the durability and cutting qualities which have made our XXX Tools famous. Will balance perfectly on the handle; will chop easier than a light poll axe and has a thin, keen edge which it will retain.

THE HATCH GARAGE DOOR OUTFIT

A Set that Serves Faithfully

IN DAYS of ice and piling drifts of snow; in days of heat and humidity, when physical effort is an aggravation, doors hung with Hatch Garage Door Sets glide smoothly and reliably out of the way, along the garage wall, in response to a touch.

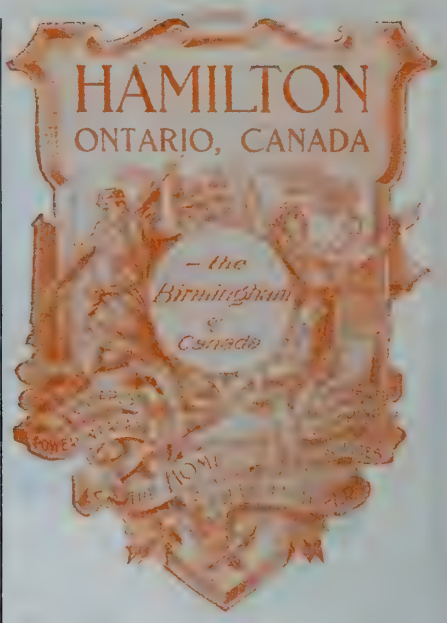
The Hatch Garage Door Set does what is expected of it, so smoothly, certainly, and effectively, that your customers will think of it, and of your business, with good-will every time they use the garage.

The Set includes:

Special Swivel Door Rollers; 22 feet of track; 3 pairs Special Garage Door Hinges; 3 Stay Rollers (floor guides); 2 Extra Heavy Garage Door Handles; 1 Safety Hasp (for fastening doors outside); 1 Hook and Eye (for hooking back swinging section inside).

The track comes in separate bundles—two 8-foot and one 6-foot lengths. Screws and bolts for everything. Japan finished and all neatly packed in a strong box. Ask for prices and details.

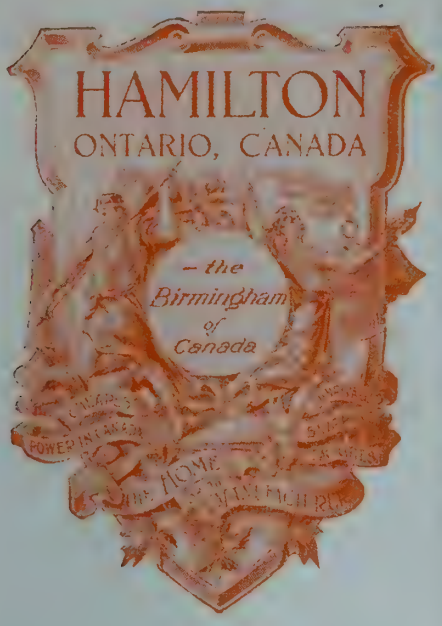
Canada Steel Goods Company, Limited
Hamilton, Canada



In this Hamilton Convention Number it seems appropriate for us to take advantage of the opportunity to respectfully direct your attention to a few facts regarding our plant and product—and our facilities for taking care of our customers' orders.

One of our chief desires has always been to bring our organization to such a state of efficiency that we would be able to give all of our customers at all times the very best brand of service obtainable, and we believe that with the improvements which have been effected in our plant, together with the installing of machinery and equipment of the latest and most up-to-date style, we have advanced in a very considerable manner toward the attainment of that desire.

We would direct your particular attention to the fact that Strap and Tee hinges are packed "one-pair-in-a-box-with-screws." The advantages of this method of handling hinges over the old way must be apparent to any one giving the matter a little attention. A great saving of time to both clerks and



customers is effected, and the hinges are put up with screws of size and length properly proportioned to the hinges with which they are packed.

The use of three butts on every door of regular size is recommended for the purpose of counteracting the tendency of doors to throw out of alignment, which causes them to stick and bind, with probable disfigurement of the woodwork. Experience has shown that as a general rule all full-sized doors when hung on only two butts are apt to give some trouble from warping. The proper size of butts to use on doors of different dimensions and weights can be obtained at a glance from a useful table which we will gladly furnish on application. The proper size butts for custom-made doors, often of odd sizes, can be determined by weighing a sample door and referring to the column of weights mentioned above. Centrally located in Hamilton with its rail, radial and lake transportation facilities we have advantages in obtaining raw materials and in giving prompt, dependable service to our customers.

Corrugated Hinges

No. Sc. 935. 5-inch Strap Hinges

Cut of No. Sc. 935

THIS line is a pleasure to sell; not only does it serve faithfully and fully satisfy your customers but it saves your time in selling.

Customers go where they are well and promptly served. They don't want to wait while packages are unwrapped and parts hunted up.

This handy set, complete in a box, is simple and easy to sell. Reach for it; lay it on the counter; lift the lid and you have practically completed a sale. Ask us about it.

Canada Steel Goods Company, Limited

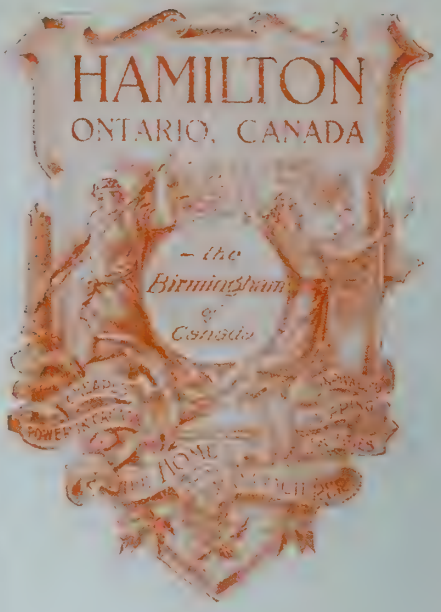
H. E. O. Bull, Montreal, Quebec.
A. T. Chambers, Vancouver, B.C.



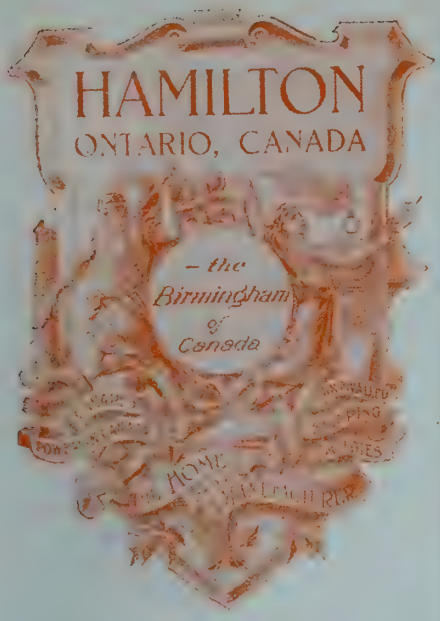
This business we started in a very small way in 1906 and its history is one of steady growth, built up by giving honest value and good service. The customer's interests we always put first, as the future success of the Company depends on the customer being satisfied. Our present Factory floor area is over 55,000 square feet.

Builders' Hardware Specialties

The products include Barn Door and House door hangers and track. Inspected and labelled Fire Door Hardware approved and listed by the National Board of Fire Underwriters and the New England Factory Mutual Fire Insurance Board.

Pole Line Hardware

The Hubbard line of Peirce Pole Line Hardware the standard wherever Electrical Power Lines are erected is made for Canada by us under License and is to be found in the better in-



stallations from Coast to Coast.

Stampings and Drawn Work

Another of the important products of the Company is Stampings and Drawn Work of all kinds in Steel, Brass, Copper and Aluminum. These stampings are supplied to the largest manufacturers and Exporters in Canada.

Forgings

Forgings of small and medium size are very important items in the list of goods we manufacture.

Galvanizing

In this department we have one of the most complete equipments for both the hot dip process of galvanizing and for sherardizing.

Our whole plant is equipped and laid out to take care of any kind of hardware manufacturing from the making of all the Dies and Tools to the turning out of the completed article.

The Slater Line Includes

Merchandise Carriers, Fire Door Fixtures, Garage Sets, Hinges, Store Ladders, Barn and Fire Door Latches, Stay Rollers and Flat, Round, Square and Parallel Track for Hangers, beside the items shown here.
We have every facility for giving prompt service, close co-operation and loyal support to our customers.
We will be very glad to show you what we can do on a trial order—if you are not already a customer.

The Suggestions Shown Here

No. 121, Trap Door Ring. Size 3½ ins. Wrought Steel Flush Trap Door Rings, Baked Japan Finish. Packed ½ dozen in carton with japanned screw. Supplied also in galvanized or plated finish at additional cost.

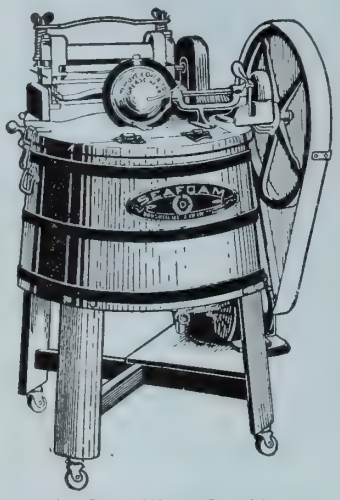
Seafoam Electric

Washing Machine



Style "A" Dolly Type
Reversible Wringer. Washes and wrings at same time or separately—all by power.

1-4 H. P. Splash Proof Motor. Style "B"—For Engine Drive.

THIRTY-FIVE years' experience has taught us to build home laundry equipment that hardwaremen can sell. Dowswell Lees Washers are not parlor ornaments—although they are attractive enough in appearance to be a source of pride to housewives — they are plain, common-sense good washers.

These effective machines are truthfully represented to the public and honestly built. Time has proved that confidence in them was well-placed, both by dealers and consumers.

Our assortment embraces washing machines for hand power, water power, electric power, engine drive; are designed to meet the demand of every purse; are common-sense, practical washers of established reputation. They are simple, durable and practically trouble-proof. Jobbers sell and recommend them.

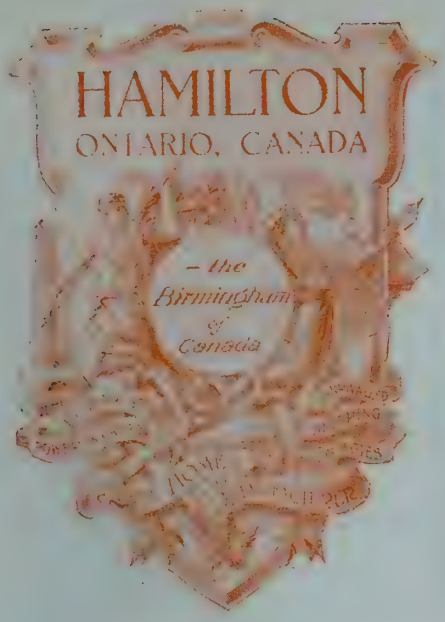
Largest Washer and Wringer Factory in British Empire

DOWSWELL, LEES & CO., Ltd. have been manufacturing Washing Machines and Wringers in Hamilton for upward of 35 years. They started in a very small way, making only the "DOWSWELL" Washer and "ROYAL CANADIAN" Wringer, gradually growing in a healthy business way, through the well merited confidence of the buying public in these quality products, until they now operate the largest Washing Machine and Wringer factory in the British Empire, occupying more than 3½ acres of floor space. Their products now include sixteen different kinds of Washing Machines and twenty-two various types of Clothes Wringers, all of proved quality and value.

The plant has unsurpassed facilities for quantity production, enabling the firm to supply the trade with the highest class goods at reasonable prices. The various departments—wood working, metal working, rubber making, tub making, painting, varnishing, plating, etc., are under expert supervision, and inspection is very rigid, so that when a "DOWSWELL" article goes out it is satisfactory in every respect. They also maintain a splendid service department for the supplying of repair parts promptly, and at low prices.

DOWSWELL, LEES & CO. have enjoyed the confidence and good will of their Hardware friends all these years and value highly their business, which has grown to such large proportions. Large and well assorted stocks are carried at Hamilton and Montreal and prompt shipments can be made either direct from their warehouses or through the Jobbers.



The fact that "Duro" Aluminum Ware is a strictly Made-in-Canada product is not by any means the sole reason why it has met with such success with both the wholesale and retail trade. There are many other features that have helped its popularity.

Quality

One of the most outstanding features is its Quality. To compare "Duro" with any other aluminum ware only serves to prove that it is truly in a class by itself. The workmanship and finish are perfect. A rigid inspection is conducted as each piece of "Duro" is finished and if the slightest imperfection is found that piece is placed in a separate department, and disposed of as a second. Therefore, when you handle "Duro" you are handling a line that will never cause a complaint from your customers but will bring many repeat orders to your store.

Large Range

With the fourteen new lines recently added we have a complete line to offer. All of the leading jobbers are now handling "Duro," many of whom have told us that it is an exceptionally ready seller owing to its very high quality.

The public want good goods at a fair price and the dealer who handles "Duro" will be able to give the public what they want.

An inspection of the whole "Duro" line will convince you that our claim of "Quality" is well founded.

SERVICE

THE ideal relationship between the manufacturer and the dealer — and between the dealer and his customers—is represented by this word — SERVICE. Analyzed, it means fair dealing, efficient friendly co-operation, and, most of all perhaps, prompt execution of orders.

The exhaustive lines we make are but meagrely indicated on this page. Since we first began operating in Hamilton in 1883 our plant has expanded prodigiously, and now embraces the manufacture of thousands of lines.

We are to-day in a position to ship promptly and in full the requirements of hardware and tinware dealers in all lines of Sheet Metal Goods, Lanterns, Bird Cages, Wire Goods, Galvanized Wares—in fact, our stock of all lines is complete. This is what we mean by speaking of "Service."

Dealers interested in Lanterns may secure any of the standard types familiar to Canadian consumers, by ordering from us. They are all made in our factory. Immediate shipments guaranteed. This is "Service."

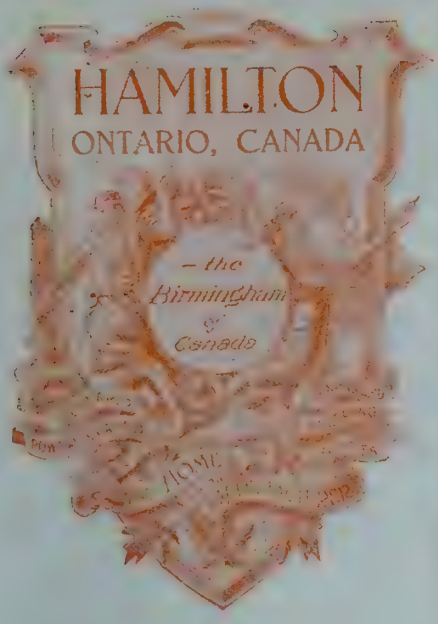
For 1922 we have planned to get in closer touch with our distributors, and assist them in marketing our goods.

The confidence and support we have always received from our many friends in business encourages us to hope that our efforts in co-operation will be well appreciated.

Please remember that we are at your "Service" always.

E. T. Wright Co., Ltd.

HAMILTON - CANADA



QUALITY

STRINGENCY of money with a section of the buying public has brought about the importation, and, to, some extent, the home manufacture, of light cheap grades of aluminum ware, which can be sold by the dealer at comparatively low prices.

These bargain-sale lines may meet with a favorable reception from some portion of the community, but the average Canadian housekeeper is a discriminating buyer, looking rather at quality than price, content to have only the best kitchen furniture on her shelves, and despising transparent substitutes or the production of cheaply paid alien labor.

It is to the high standard of "average" Canadian buyers that Wellworth Aluminum caters.

Made in Hamilton, the "manufacturing city" of Canada, efficient production is assured, and the Wellworth line gives real, genuine value at prices in reasonable proportion to the high quality offered.

There has been no deterioration in the standard of Wellworth Aluminum. On the contrary, since the first Wellworth Aluminum article was sold, the standard has been constantly raised. To-day, all Wellworth Aluminum goods are made in the heaviest weights and the most up-to-date modern shapes and designs.

Sell your customers the best aluminum products made in Hamilton—in Canada—in the world—the Wellworth QUALITY made by WENTWORTH MFG. CO., HAMILTON, CANADA.

"WELLWORTH"

the registered trade mark that distinguishes Aluminum Goods made by

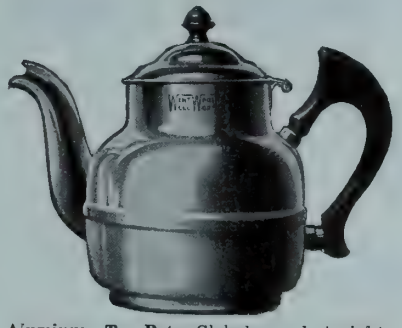
WENTWORTH MANUFACTURING CO. Hamilton, Canada

from the flimsier and less highly finished products of other aluminum makers.

Buy "Wellworth" labelled Aluminum. **Sell Aluminum labelled "Wellworth."**

Aluminum Cast Fry Pans. These are thick, crackproof pans. Scientific aluminum casting work quoted on and executed.

Aluminum Pudding Pans. Clean, smooth finish. All sizes. Heavy gauge.

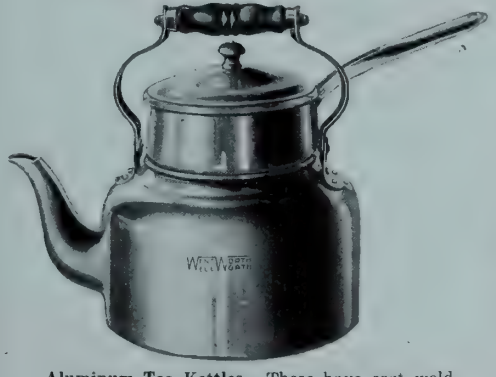


Aluminum Tea Pots. Globular and straight. Electric and ordinary Coffee Percolators.

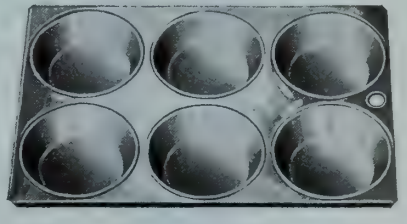
Aluminum Pie Plates. Medium and deep. Good weight.

Aluminum Buffet Sauce Pans. With covers. This style is preferred by some users.

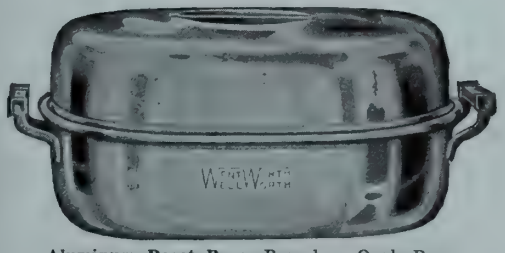
Aluminum Potato Pots.



Aluminum Tea Kettles. These have cast welded spouts. Made in a variety of designs.



Aluminum Tart Pans. Muffin, Biscuit, Corn Cake designs. 6, 8 or 12 cups on frame.



Aluminum Roast Pans. Round or Oval. Beautifully designed. Slide into low ovens easily.

Aluminum Preserving Kettles. All of the latest approved shapes. Larger sizes in "Colonial" design.

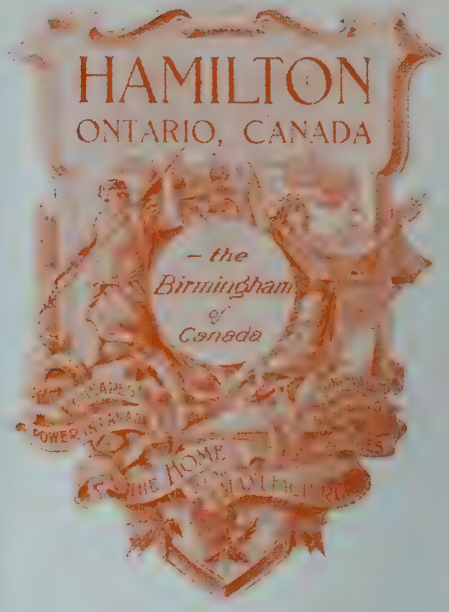
WIRE
Nails and Bale-Ties

Yes! Everything in wire from the finest (5-1000 of an inch) to the half-inch gauge kind is made in our plant in Hamilton.

There, wire that many a Canadian firm thought necessary to send across the line for, is now made by us and is giving even better service than imported lines.

Among Laidlaw products are: bale ties, special hay baling wire made from Bessemer stock, wire nails, fence staples, fine wire (bright annealed and lacquered finish, tinned and galvanized), square, pin, brush, bookbinder's, hat, florist's and a fine quality of tinned or bright mattress wire. All shipments are properly packed and shipped promptly. We solicit your enquiry re special wires of all kinds.

The Laidlaw Bale-Tie Company
Limited
HAMILTON - CANADA



The Laidlaw Wire Boys Meet in Hardware and Metal Every Week

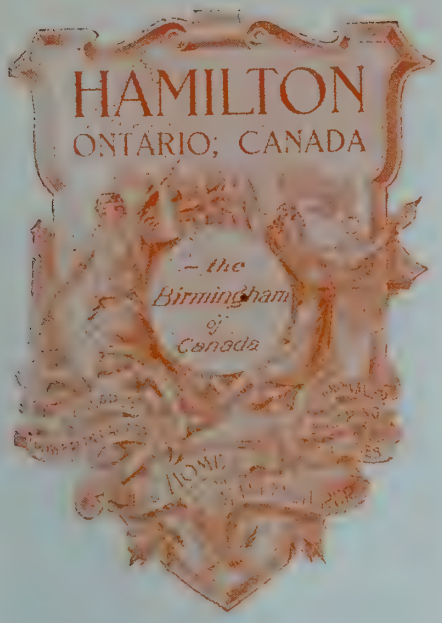
For some time past the Laidlaw Wire Boys (Bale Tie and Wire Nail) have met at the upper right hand corner on or about page 20 of Hardware and Metal.

These young Laidlaw salesmen call on the hardware trade and pick up information concerning conditions as related to the sale of wire nails, bale ties, wire, etc., which is of interest to the retail dealers and manufacturers of Canada.

B.T. and W.N., as they are familiarly called, have both recently reported at the Laidlaw office that there seems to be a very decided optimistic tendency in the trade since the turning of the new year. B.T. tells of a small prepared roofing manufacturer having so much confidence in the immediate future of Canada that he is going ahead in one of Ontario's chief cities with a building programme estimated at over $75,000.

"Confidence in Canada and in a product," W.N. says, "means success every time."

The Laidlaw Boys attended the Ontario Retail Hardware Dealers' Convention this week and were greatly impressed with the apparent enthusiasm and confidence of the retailers who met to discuss their problems. There is no doubt these men will go home and start things humming in their respective localities. A few enthusiastic, energetic hardware dealers turned loose in Ontario will soon make things start on the straight road to recovery. Ginger 'em up, boys.



JUST a few remarks concerning Ajax gas-filled Lamps, often spoken of by others as Nitrogen or type "C" high efficiency units.

In line with the policy of keeping pace with the latest scientific developments of the industry, this company, some time ago, dispensed with the use of Nitrogen Gas in favor of a rarer and more costly element known as Argon Gas.

By virtue of this change they were able to procure a greater candle power output in comparison with Nitrogen Filled Lamps of equal wattage, and at the same time were able to reduce bulb temperatures which meant additional life performance.

Ajax Gas-Filled (Argon) Lamps cost more to manufacture but are listed the same as our former Nitrogen product.

Vacuum and Gas Filled Tungsten Lamps

Licensed under the patents of C. G. E. Co., Ltd.

LIGHT, life and durability are the three principal characteristics of AJAX lamps; but when backed up, as they are, by superior quality of materials, workmanship, and a *guarantee* against mechanical and electrical defects, they constitute a high and lasting value not to be found in cheap imitations.

The best of anything pays the greatest returns in the end. AJAX LAMPS are no exception to this rule.

THE Canadian Wire & Iron Goods Company, of Hamilton, Canada, has enjoyed that healthy growth manifestly earned by its sound policy and business judgment. It has taken front rank in the manufacturing industries for which Hamilton is famous.

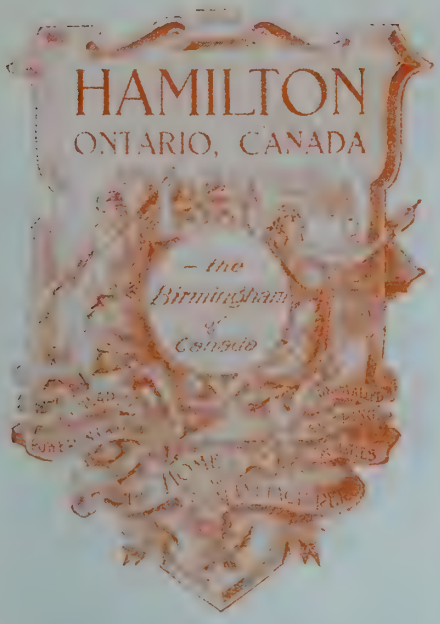
The present company has grown from a modest plant, employing but a few hands, in 1907, to the present large and busy establishment employing over 125 people.

On King William Street is located the large commodious building. It is equipped with the very latest modern machinery for manufacturing wire rope. Rope from the smallest to the largest sizes, for all purposes, is skilfully made. One interesting department possesses many looms for weaving wire cloth from steel, brass, copper and bronze wire.

This interesting company also manufactures fly screen, wire cloth, perforated metal and metal lockers for office, factory or club use.

Wire is now drawn on the premises from rods. From time to time improvements are made as the progress and advances of manufacturing methods make these possible.

Many successful hardware merchants from Halifax to Vancouver are doing a profitable business selling the popular products of the Canada Wire & Iron Goods Co.



Hamilton the Ideal Manufacturing City

WHEN we established our business in Hamilton nearly eighty years ago, the management realized the wonderful possibilities of this city and as years rolled by their judgment proved to be correct.

Hamilton is now the Birmingham of Canada, with more factories, in proportion to population, than any other city in this country.

The advantages to a manufacturer in locating in Hamilton are many. In the first place, we are only a short distance from the places that we depend upon for raw material. We have wonderful transportation facilities both by rail and water. Then we have cheap power and an abundance of labor.

So far as shipping is concerned, we are able to cover all points of Ontario as rapidly, if not more rapidly, than manufacturers located in other places.

Therefore we say that Hamilton is an ideal manufacturing city, and we are glad now that our directors in the early days had the foresight to establish here.

Offering a complete line of Stoves, Ranges and Furnaces, also builders' hardware, and all made in one plant at Hamilton. More than seventy-five years of successful manufacturing.

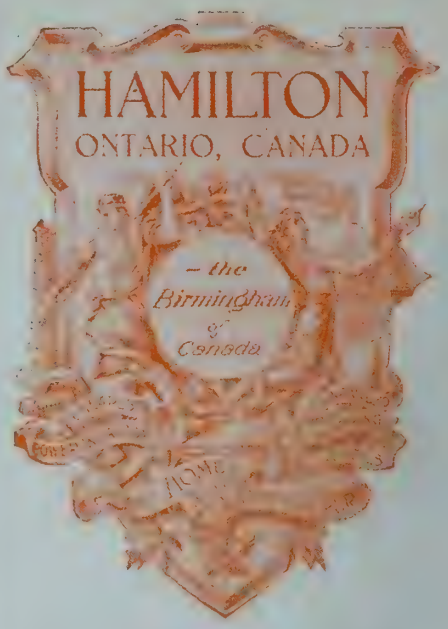
Never-Fail PotatoSprayer



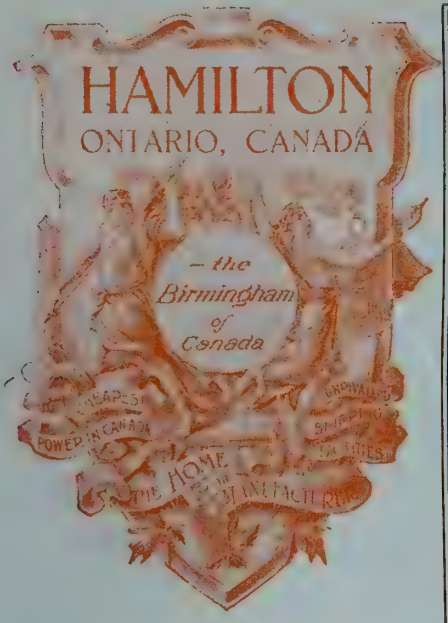
Prices on Made-in-Canada Poultry Supplies Under Import Quotations

The combination of the Collins Manufacturing Company of Toronto and the Never-Fail Products, Limited, of Hamilton, under the name of the Collins Never-Fail Products, Limited, gives a new organization and increased facilities for the manufacture of poultry supplies. The well-known metal poultry supplies and fittings heretofore made by the Collins Manufacturing Company will be developed extensively, as well as the line of sprayers and force pumps which have also attained widespread popularity. Other articles that are in steady demand are the Collins Metal Hen, an incubator and brooder combined.

The Never-Fail five gallon oil and gasoline cans formerly made by the Never-Fail Products, Limited, will likewise be continued by the new company. Thousands of these cans have already been sold in Canada.

The prices on the new line are particularly attractive when compared with import quotations. Many of these articles have heretofore been imported from the United States but the expansion of the two companies make a complete line of Made-in-Canada poultry supplies now available for the Canadian market.

The new company has no excess stock of supplies or manufactured articles. This, combined with the reduced prices now in effect for galvanized sheets and other materials used in manufacturing enables them to quote low prices and to make prompt shipment from their Hamilton headquarters.



THE location in Hamilton of this industry affords us manufacturing and shipping facilities exceeded nowhere in the Dominion.

With the advantages of Hamilton's geographical location and its splendid shipping facilities by rail, radial or lake routes, we are enabled to offer the hardware trade of Canada unexcelled ease of ordering and unparalleled advantages in promptness of shipping.

The steady growth of Hamilton as a manufacturing centre serves to multiply and increase our facilities and services to the trade at large.

Our extensive plant and modern equipment enable us to produce "Maple Leaf," the very finest type of Stitched Cotton Duck Belting, constantly increasing in demand for belt drives and conveyors.

The active demand and splendid sales enjoyed by "Maple Leaf" Belt Dressing are an opportunity and a source of satisfaction and profit to every hardware house desiring to supply customers with the best in material and workmanship, and in valuable, prompt service.

Strong, True-running and Economical "MAPLE LEAF" BRAND Stitched Cotton Duck Belting

YOU will gain the lasting goodwill of your customers by recommending this superior belting as a main drive belt, or for conveyors, and many other uses that have made it a popular, satisfactory article in good demand.

It is notably strong, durable, true-running and economical. Being thoroughly waterproof it gives high efficiency service in either wet or dry places.

"Maple Leaf" Belt Dressing

This dependable, result-giving dressing has an ever-growing circle of purchasers. It gives longer life and improves the service of all makes of belting.

Good turnover, and good profit as well, are the rewards of merchants who gather satisfied, permanent customers by selling "Maple Leaf" Belting and Belt Dressing.

From Tiny Flashlight Bulbs

WHILE Niagara and Chippawa supply a large part of Ontario's electric power, Hamilton supplies the bulk of the appliances that utilize this power.

Hamilton makes electrical products from tiny flashlight bulbs to enormous generators.

The Canadian Westinghouse Company, Limited, is one of Hamilton's oldest and largest industries. The original Westinghouse Plant for the manufacture of Air Brake equipment was established in 1896. The development of electricity led to the manufacture of electrical apparatus in 1903.

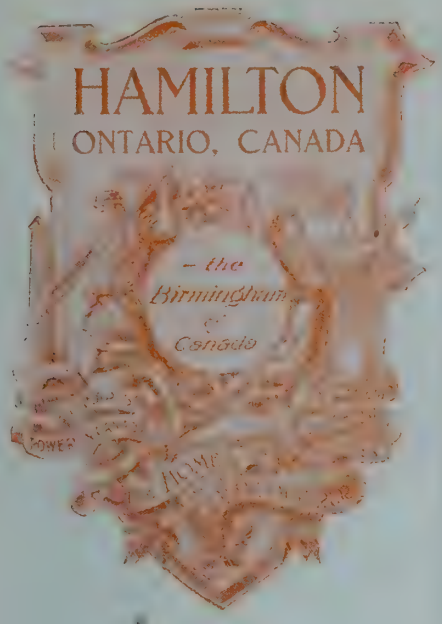
The original site, near Barton and Sanford Avenues, is still occupied, but it has expanded to more than a half million square feet of floor space, exclusive of office buildings.

Westinghouse employees would people a fair-sized town. Their athletic teams are prominent in sport. Benefit and pension departments, and a veterans' association of over 200 members, are interesting features.

These employees in the Westinghouse Plant make many kinds of products: the Westinghouse vacuum and gas-filled Tungsten lamp that lights your dark mornings; the Cozy Glow Heater that warms chilly corners; the convenient Westinghouse electric range; Percolator and Turnover Toaster; Electric Irons; Curling Irons, and Warming Pads.

Westinghouse motors drive familiar street cars; locally, and on radials.

Westinghouse motors also drive domestic fans, sewing machines and



To Giant Generators

vacuum cleaners. Westinghouse makes the meters that measure your monthly consumption of electricity.

Westinghouse makes huge generators, such as develop Chippawa power. For the great generators that Westinghouse built for the Chippawa development, an erecting shop had to be put up. It may become necessary to establish such shops permanently, to handle the large electrical equipment in future.

Such delicate devices as watt meters, ammeters, or volt meters are the other extreme. Other industrial appliances are: transformers, heavy motors, switchboards, railroad controllers, auto starters for industrial motors, electric furnaces, ovens, and other heating devices.

Westinghouse products are diverse and there is an equally great diversity of materials in their manufacture. Practically the whole world from Terra del Fiugo to Kamschatka, and from Alaska to Australia, is drawn on to supply materials for the various Westinghouse products.

The distribution of the finished products requires offices in the principal cities from Halifax to Vancouver, in close touch with the thousands of Westinghouse retailers covering the whole Dominion.

The name Westinghouse is famous as practically a synonym for air brake equipment. Every steam train in Canada is controlled by Westinghouse air brakes.

The name, on electrical equipment, is accepted as assurance of the highest excellence in performance, workmanship and material.

Westinghouse

Tell your next customer that the Westinghouse Type H Iron is liked by women because women designed it. Their helpful suggestions have made it a woman's iron—an iron that does fine work better and flat work more quickly.

Women suggested that the iron have a large flat base through which the heat is evenly distributed—an iron with perfect balance and a comfortable handle that will make ironing less tiresome. Have your customer inspect the iron and note these qualities.

The beveled edge is an exclusive Westinghouse feature. It permits the user to look directly down on the work and makes the ironing of tucks and ruffles so easy.

In addition to all these features the beautiful finish and grace of line of the Type H Iron makes it an iron that will just fit women's needs.

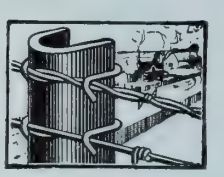
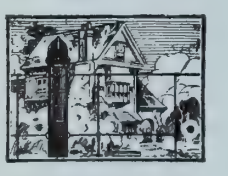
Farmers Are Buying Fence Posts With These Advantages

The laborious job of digging post holes is unnecessary with Burlington U-Bar Posts. You can drive a post a minute.

Burlington U-Bar Posts have the long life that makes permanent, satisfactory fences.



Your customers will find in Burlington U-Bar Posts strength that will stand any farm strain.



Burlington U-Bar Posts make neat ornamental fences. Just the thing for residential sections when used with top cap or top rail.

Long life, ease of erection, strength and sturdy, tight fences is what the farmer wants when he buys fence posts. It will pay you to handle just this kind of a post. Then you are selling satisfaction which means easier sales and repeat business.

Burlington U-Bar Fence Posts

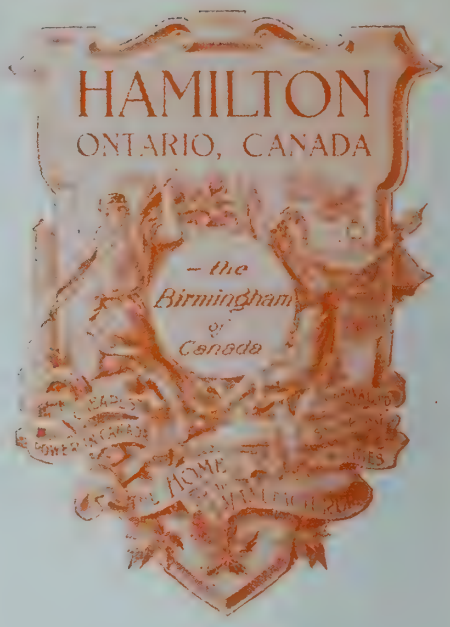
have all these features. They save time and labor in putting up fences. They last indefinitely. They make a strong tight fence. Used with ornamental top cap and rail they make an attractive fence for residential property.

Farmers know about Burlington U-Bar Fence Posts. They are advertised in the leading farm publications. Let us send you particulars of our dealer plan.

BURLINGTON STEEL CO., LIMITED

Sherman Ave. N.

HAMILTON — CANADA



How Modern Methods Reduce Costs

A description of the plant of the Burlington Steel Company, Limited of Hamilton, the largest steel fence post plant in Canada, shows how modern machinery helps to supply the farmer with a fence post that is strong, permanent and satisfactory. This plant has a capacity of several thousand tons of steel fence posts each month. It utilizes such appliances as five-ton electric cranes, pyrometer that registers temperature of the furnace three hundred yards away in the plant superintendent's office and several thousand horsepower of electrical energy. Raw material is utilized and handled so that none is wasted and there is no lost motion in the steps through which the raw steel goes before becoming a finished product. Such scientific methods make for economy.

When length of service and ease of erection are considered the price of steel posts is no more and often less than the price of an inferior wooden post. Another point in the manufacture of steel posts that insures the farmer getting full value is quantity production. A large organization has every facility for buying raw material at low cost and it is an obvious principle that turning out posts in large quantities lowers the price.

The best grade of raw material goes into these posts. The steel is stacked in large piles and handled by the huge cranes. The magnet on these cranes will lift more than three tons. They save the time and labor of a good many men. All the raw steel is tracked to the furnace on cars. This furnace affords another interesting example of economy in manufacture. It burns finely powdered coal. The coal goes through a pulverizer and is then blown into the furnace. So efficient is this system that every bit of coal is converted into heat there being not even any ashes left and not even a trace of smoke from the stack

From the furnace the steel is fed to the mill, and rolled in a U bar shape, the strongest known for the purpose. The red hot "U" bars shoot out from the mill in fiery red streaks to a series of hot beds where they cool. Later they are cut to length, then painted and finally bundled. The posts are now ready for shipment to the hardware, lumber and fence dealer and through him they reach the farmer and begin an indefinite period of service.

HAMILTON
ONTARIO, CANADA
— the Birmingham of Canada

How We Began

IN 1864, William Burrow, Charles Stewart and John Milne, as "Burrow, Stewart & Milne," began business on Caroline Street, Hamilton.

In 1868, land was purchased at Cannon and John Streets, and buildings erected in which to carry on the rapidly increasing business. These buildings were ready for occupation in November, 1871, forming the nucleus of the present large plant on Cannon, John and Hughson streets.

The founders of the business, all practical iron moulders, began as manufacturers of all kinds of grey iron castings, and put in a plant for the making of malleable castings. This part of the business developed rapidly and the factory became known as The Hamilton Malleable Iron Works, manufacturing Carriage and Saddlery Hardware, Curry Combs, etc.

Shortly after moving to the new premises the firm began to make Coal and Wood Cooking and Heating Stoves, and Jewel Stoves and Ranges soon became well known all over Canada.

In 1881 a disastrous fire occurred by which the firm suffered heavy loss, but being by that time fairly well established they were able to struggle along, and in a few years had fully recovered from the effects of that staggering blow.

Then the manufacture of Warm Air Furnaces, Registers, etc., was undertaken, and shortly afterwards another branch of manufacture—since grown to large proportions—was introduced; the making of all kinds of Gas Cooking and Heating Stoves, etc. The making of malleable iron goods was dropped. In 1895 additional buildings were erected on Cannon and Hughson Sts., almost doubling the size of the plant.

In 1898, when business had expanded to large dimensions the present joint stock company The Burrow, Stewart & Milne Company, Limited, was formed under Dominion Charter.

The Directors of the Company are Hon. John Milne, G. Russell Stewart, Charles K. Milne, Edward W. Burrow, and Albert E. Hampson.

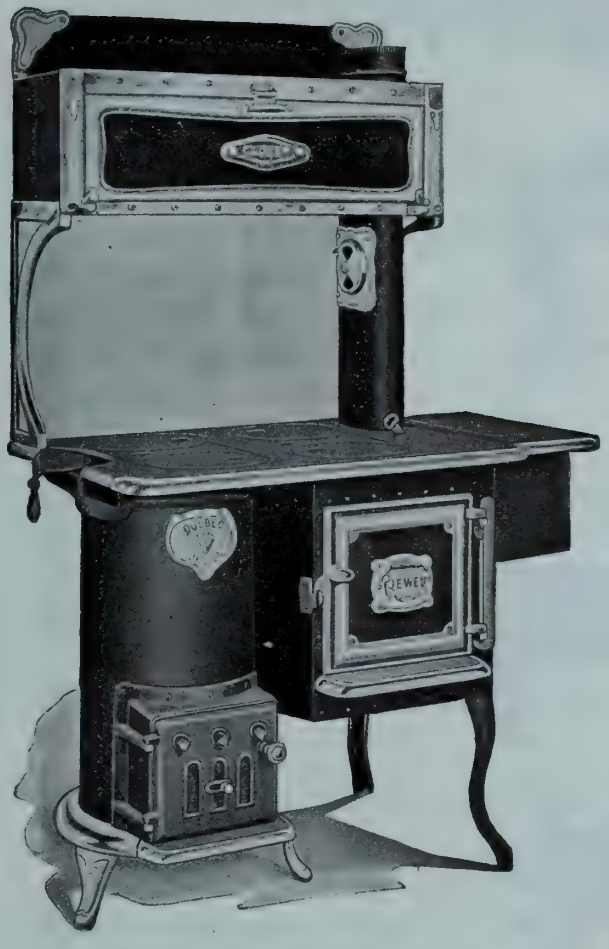
The Officers are as follows:

President and Manager—Hon. John Milne.

Vice-President—Charles K. Milne.

Secretary and Treasurer— G. Russell Stewart.

The New Quebec Jewel



A complete cooking and heating apparatus combined, designed to meet the requirements of small families. Neat in appearance, durably constructed, and a perfectly satisfactory cooking range, as well as a splendid indirect draft heater.

Can be supplied with or without reservoir or high warming closet, or with water front suitable to attach to range boiler.

The Quebec Jewel has a large top cooking surface which has four pot holes, large oven, spacious ashpit with suitable ashpan, heavy brick lining, and is equipped with revolving grates. This is in all a well designed stove, neatly finished and a fully guaranteed cooking appliance at a moderate price.

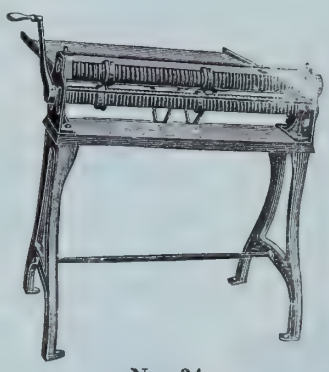
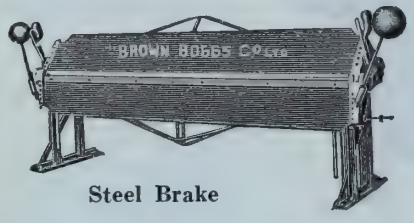
Keen Competition of 1922 Requires B. B. Tool Efficiency



No. 34
Cornice Makers' Rotary Slitting Shears



Steel Brake

Foot Squaring Shear

It is widely predicted that 1922 will be a year of extremely keen competition and there is every reason to believe these predictions sound.

One great factor in the tinsmith overcoming this competition will be the installation of UP-TO-DATE B. B. TOOLS. By making up your own Eavestrough, Sky-Lights, Gutters, Furnace Pipe, etc., you cut your costs considerable, as the spread between sheets and finished products is still very much out of line. It is, therefore, only reasonable to expect that a tinsmith making up his own material is going to underquote the one who has to buy all his.

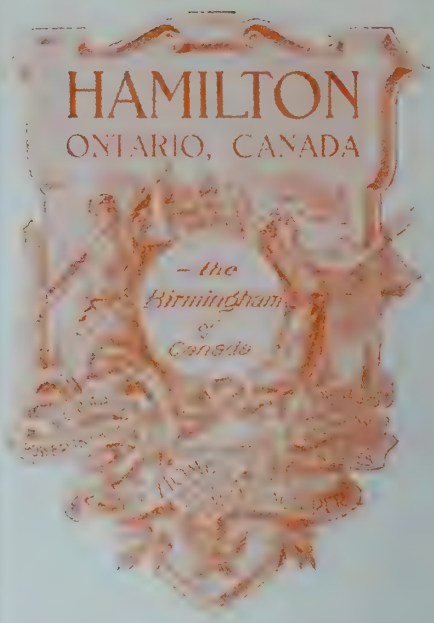
Western Representatives:

BISSETT & WEBB LIMITED, Winnipeg, Man.



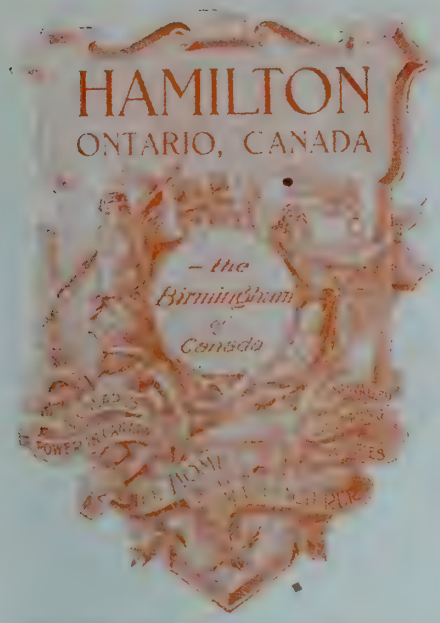
THE Brown, Boggs Company's tinsmith and sheet metal working tools have been before and in the service of the Canadian trade for forty years and to-day you will find B. B. Tools in almost every tinshop in Canada.

In that forty years we have continually improved our product to keep up with the progressive period that Canada has enjoyed, and the many testimonials we receive from time to time from customers acknowledging the superiority of our tools, leads us to believe our efforts have been successful.

The same principle is behind our business to-day that was there at its inception and that is—the most modern tool at the lowest price, consistent with quality backed up by a guarantee of absolute satisfactory service.

An order placed with us is not considered filled when the goods are shipped and paid for. The customer must be satisfied before the transaction is considered closed.

To you, who have not done business with us, we can only say—let's get together. We can supply the tools if you will give us the opportunity.



Hamilton Manufacturer Confident of Good Business in 1922

That manufacturers in the farm field have every confidence in the purchasing power of the farmer and his intention to buy during the coming year is clearly evident from a survey of the premises of the Banwell-Hoxie Wire Fence Company, Limited.

Many dealers who attended the recent Hardware Convention in Hamilton and inspected the plant on Lottridge Street where Peerless Fences and Gates are made were deeply impressed by the amount of fencing the company has ready to take care of 1922 orders. About three acres of storage space provides accommodation for more than thirty styles, each of which is made in rolls of three different sizes, thus the necessity of a hundred distinct piles, one of which, a mountain of Peerless Poultry Fence provided for domestic and export orders, measured 25 feet in height from the railway track where the cars were standing ready for loading.

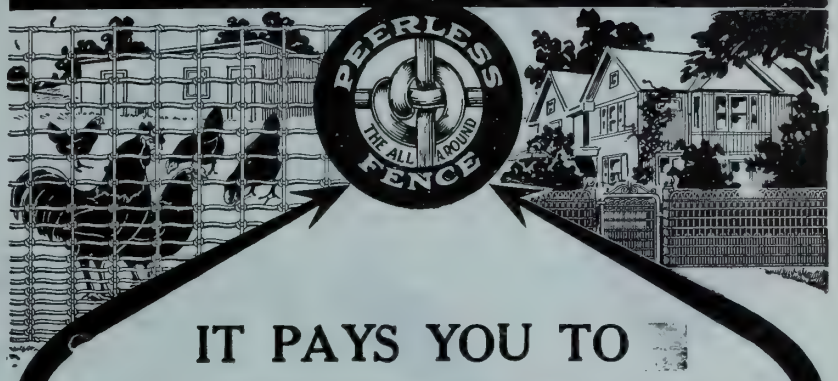
It certainly indicates a good season when a well-established company like Banwell-Hoxie make sales plans of this magnitude. In the last seven years their business has increased one hundred per cent. It extends from coast to coast and includes a nice volume of export business.

A splendid reputation for service has been built up through an efficient system of handling orders. In anticipation of a substantial increase in business in 1922 a large sum of money has been spent in depressing the railway sidings on both sides of the property and in building permanent loading docks on the same level as the fence is piled.

With these new arrangements for loading cars out to three railways and the steamship lines the company expects to handle an increased volume of business and at the same time improve the service to its patrons.

Three attractive signs displayed at the Convention featured Peerless Dealer Service for 1922. In one of these pictures, "The Age of Steel," is exemplified by Peerless Fences. This is sure to attract business to the dealer's store. Signs are provided with the dealer's imprint and this is also done with literature and other sales helps for Peerless dealers.

PEERLESS FENCES
Stand Every Test



IT PAYS YOU TO SELL PEERLESS QUALITY

IT pays you to handle PEERLESS, a quality fence. We absolutely stand back of every rod you sell. You are sure of satisfied customers and future business. With the complete Peerless line you have a fence for every need.

Peerless Farm Fence

Strong enough to withstand any strain demanded. Endued with long life because heavily galvanized. Locked with the same weight wire as the strands themselves. A complete range of heights and styles.

Peerless Poultry Fence

Peerless Poultry Fence supplies the increasing demands of Poultry Breeders. Made in any height, from three to eight feet. Heavier than netting and less expensive.

Peerless Ornamental Fence

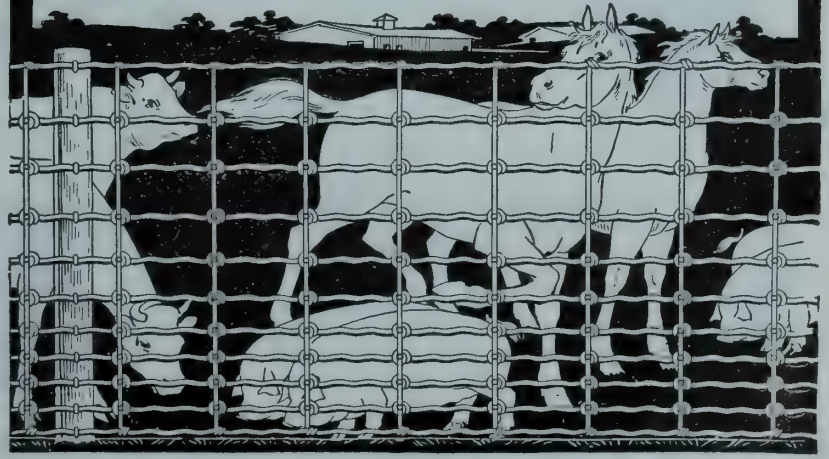
Appeals to every farmer or home owner who really wants to improve his property and have an attractive residence. Made now in seven styles. Any height up to six feet and in three finishes, galvanized, green or white. A postal brings you our new booklet.

Peerless Dealer Service

We were pleased to see so many of our hardware friends at the convention. To those dealers who did not have an opportunity of meeting a Peerless salesman, we will gladly arrange for an interview at your own store to discuss our sales service. Be prepared for spring business.

THE BANWELL-HOXIE WIRE FENCE CO., LIMITED

Hamilton, Ontario Winnipeg, Manitoba



Standard More Than a Half Century

MEAKINS Brushes are unsurpassed in workmanship, material and service.

Since 1852—more than half a century ago—they have been a standard of brush-making in Canada. "As good as a Meakins Brush" has been the argument to sell the obscure lines of brushes.

The prestige and good reputation borne by Meakins Brushes makes them easy to sell. This enables the merchant to do more business and to enjoy a greater turnover.

The Meakins Catalogue for 1922 will suggest many profitable opportunities for live hardwaremen to prosper.

Meakins & Sons

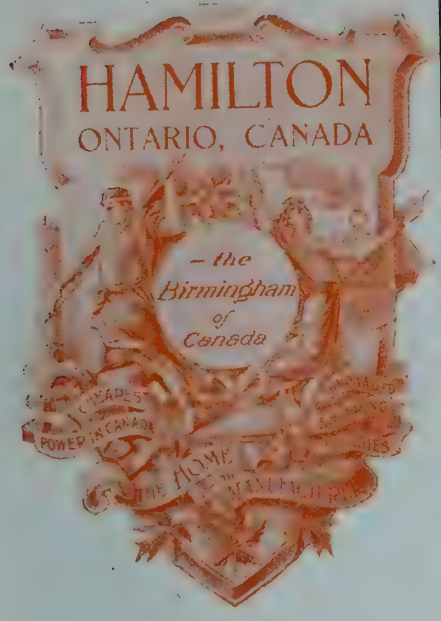
LIMITED

Hamilton, Ont.

Warehouses:

Winnipeg London Toronto Montreal Vancouver
Pilkington Bros., Calgary, Alta.

MEAKINS & SONS, Ltd., moved to Hamilton from Montreal in 1851 and commenced business in Hamilton in January, 1852. Since 1832 they had been established in Montreal under the name of Reid & Meakins. Meakins & Sons originally made furniture and brushes, but gradually went out of the furniture business and continued the brush manufacturing business. The firm moved from Montreal in 1851 because they considered Hamilton would become eventually one of the best distributing points in Western Ontario, which was then opening up rapidly. The Great Western Railway was being put through in 1851 from Niagara Falls to Detroit River and shipping facilities, both by water and rail, from Hamilton were better than from other cities. The firm of Meakins & Sons have therefore seen the City of Hamilton grow from a town of less than 20,000 up to its present size and have never regretted moving West from Montreal.



The Possibilities of a Chi-Namel Agency

TO SELL merchandise it is not only necessary to get a customer, it is also necessary to have a profitable and saleable line.

The quality of Chi-Namel insures its saleability, because it gives satisfaction. It is acknowledged to be the most exclusive line of the Paint and Varnish industry, and Chi-Namel Varnishes are well known as the original Water-proof, Hammer-proof and Heel-proof finishes. The Chi-Namel line, also, carries with it a Graining System which is not only one of the best selling features of the Paint and Varnish industry because of the fact that it reproduces from old discolored wood a beautiful natural, hardwood finish, but it is also an exclusive Chi-Namel feature of which Chi-Namel dealers have exclusive selling rights.

These features, coupled with the wonderful advertising displays and local sales helps that we are giving our dealers, attract customers as will no other article of merchandise. Our publicity efforts are devoted entirely for the benefit of the dealer and are worked out so that he receives as nearly 100 per cent. results as it is possible to obtain.

The Chi-Namel line sells all the year round. To enjoy a steady business during the dull seasons gives the dealer an additional profit, not only from Chi-Namel, but through the sale of other merchandise to customers attracted by Chi-Namel publicity.

But the greatest feature of a Chi-Namel product is the satisfaction it gives. Every customer a dealer sells is a satisfied customer. Chi-Namel quality insures both satisfied Dealers and satisfied Consumers.

A line of this kind surely helps to build better and bigger business, which means prosperity for all.

ASK A CHI-NAMEL AGENT

Chi-Namel

means—
Quality, Satisfaction and Profits

A Chi-Namel Dealer is a Successful Hardware Merchant because His Customers are Satisfied.

Chi-Namel Quality has insured their Satisfaction.

This Satisfaction means "repeat" business, greater sales and consequently greater Profits for the Dealer.

A Real Welcome to Hamilton

TO OUR many out-of-town customers, the ONTARIO PLATE GLASS LIMITED offers through this medium a real welcome to Hamilton.

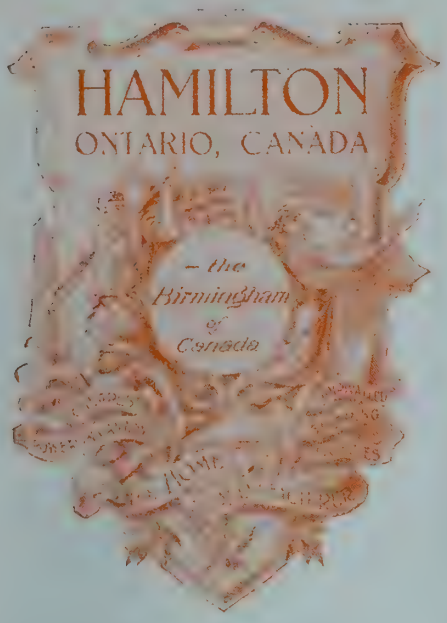
During your visit to our city we will be most happy to meet you if it is only to say "HELLO."

Do not hesitate to call in and see us and we will try to make your visit one to be remembered.

We firmly believe that this convention will reveal to you, in some measure, a few of the more important features of business relationship.

It will provide the opportunity to renew your impressions of Hamilton's many advantages as a manufacturing city. Rail, radial and lake routes make Hamilton an ideal centre for all the opportunities of quick and easy ordering and prompt reliable shipping. Its growth in manufacturing and the indications of its bright future are of interest to every hardwareman who visits the convention.

If we do not see you all, take this advertisement as a delegate to shake you by the hand with a grip which means—Glad to see you.



A New Hamilton Industry

Making Springs Of All Kinds

SINCE its inception in a small way at Bristol, Connecticut, in the year 1857, The Wallace Barnes Company has grown to be one of the foremost industries of its kind in America. The founder, Wallace Barnes, originally started manufacturing Flat Springs exclusively, but the growth of the business soon compelled other types to be added to the product until eventually the name Barnes became the synonym for quality in all types of springs.

Having developed a large export trade with Canada, and realizing the possibilities of this country from a manufacturing standpoint, the present head of the Wallace Barnes Company, Fuller F. Barnes—direct descendant of the original founder—decided to establish a completely equipped branch factory to meet the spring requirements of the Canadian Trade.

Truman M. Norton, having been with the parent plant at Bristol for over seventeen years, originally starting as an operative in a manufacturing department and working his way up through all the intricacies of spring manufacturing to an administrative position, was picked to take charge of the Canadian Factory now located at Hamilton, Ontario.

The new company—the Wallace Barnes Co., Limited—is now in operation, fully equipped and prepared to manufacture high grade springs, including Flat Coiled and Special Flat types, and springs of all descriptions made from phosphor bronze, brass and tempered steel wire.

Special features of this company are the hardening and tempering furnaces which are the very best of their kind in the country and it is the firm intention of all the staff that the name "Barnes" shall continue to represent quality in springs in the future as it has in the past.

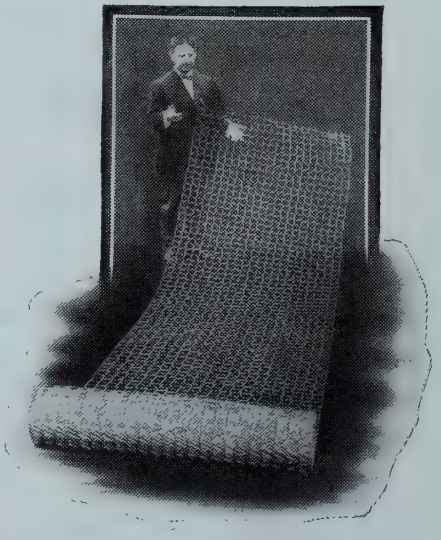
WHY YOUR CUSTOMERS LIKE LAY-FLAT POULTRY FENCE

Greening's Lay-Flat Poultry Fence unrolls straight and even. There is no twisting or buckling. It is easy to put up, stretches perfectly and stays in shape. These are features that anyone who has fussed with old-style netting will quickly appreciate.

You can sell Greening's Lay-Flat Poultry Fence for other purposes also. It's just the thing for tennis courts, athletic grounds, trellises, tool room partitions, etc. And the lay-flat feature makes this fence take up less than half the space required by ordinary netting in your store room.

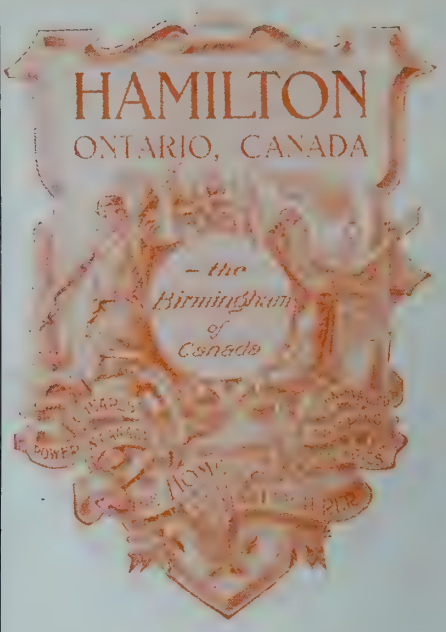
Because of the large profits in poultry raising, more people are going in for it to-day than ever before. With Greening's Lay-Flat Poultry Fence you can sell your customers service and satisfaction.

A store demonstration that convinces. Note how Lay-Flat Poultry Fence unrolls straight and even.



B. GREENING WIRE CO. LIMITED

HAMILTON CANADA



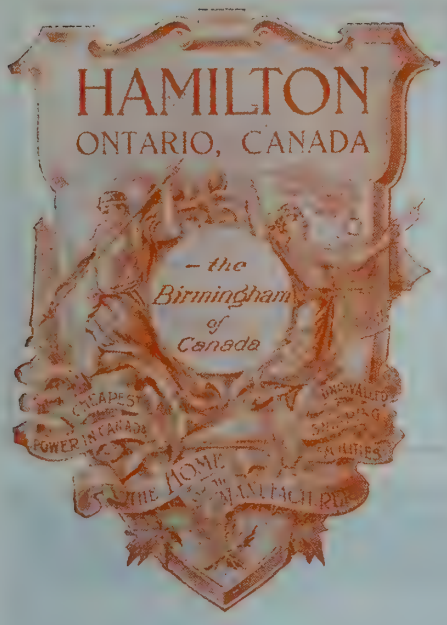
A New and Better Idea in Poultry Fences

EVERYONE who has used or handled poultry netting has wanted a better poultry fence. They have been asking for one that will not buckle, bag nor sag, that requires no top rails or base boards and is built like a regular farm fence, that does not have to be stretched crosswise, lengthwise and every other way and then nailed to position and that will be easy to put up, not too expensive and give good service.

A poultry fence that meets these requirements has been developed by the B. Greening Wire Co., Ltd., an old-established manufacturer of wire rope and wire screens in Hamilton. Double reinforced hinged joints makes the fence stiff and rigid and yet elastic. Parallel wires every two inches, with mesh wires tieing parallel wires together, gives great strength. It is galvanized before weaving. The closeness and strength of the mesh gives absolute protection. The openings are so small that no one can get a foothold to climb the fence, and it is difficult for small animals to get through it.

This fence lacks none in appearance. In fact, it is handsome enough to be used around tennis courts for trellises, in conjunction with the finest homes.

It speaks well for the enterprise of this Canadian organization to be able to introduce and develop a poultry fence so far superior to the old style of netting.



The Soliloquy of Ace Chain

To be only an infant industry or to grow rapidly through practicing the square deal, first, last, and all the time—there *is* no question!

I, the genuine guaranteed ACE non-skid tire chain for automobiles, am in the market—well, to prevent good Canadians from slipping or skidding away from the rapidly approaching good times, now apparent, and sure to come, because Canada is too good a country to be otherwise than in the front rank of recovery from war-time effects.

I am manufactured of Canadian materials by Canadian labor, in the Canadian manufacturing hub of Hamilton, which has all the advantages of any other manufacturing city in Canada, coupled with additional advantages that attract industries and insure advantageous manufacturing costs.

I appear here because I want to meet the hardware people and urge them to ask the boss about me.

He will show them how to build up a mutually agreeable and beneficial business in non-skid chains, with me as the foundation.

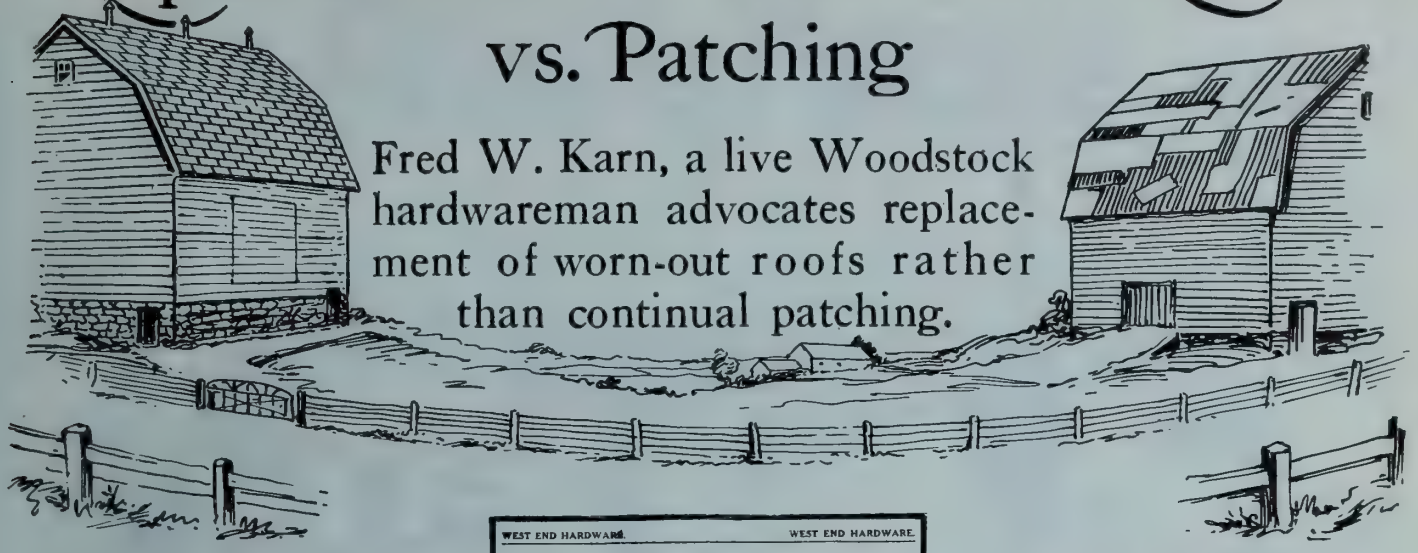
Replacement of Worn-out Roofs vs. Patching



Fred W. Karn, a live Woodstock hardwareman advocates replacement of worn-out roofs rather than continual patching.

The Sale of Bird's Roofing in Woodstock

In the prosperous town of Woodstock, Mr. F. W. Karn has built up a very successful business in the sale of Bird's roofing. Oxford county, of which Woodstock is the county seat, is noted for its fine farms and farm buildings and Mr. Karn makes it his business to keep in close touch with the consumer by featuring in his local advertising, the kinds of roofing that are best adapted for the class of building throughout the county.

It might be mentioned here that Mr. Karn has increased his newspaper space in order that more descriptive and illustrative cuts may be used. The Karn idea of advertising is illustrated in the accompanying advertisement featuring Bird's Paroid Roofing, Asphalt Twin Shingles and Wallboard. Prices are quoted in most cases and consumers are advised to consult his Roofing Department for quotations on the finished job.

Beside the generous use of newspaper advertising space Mr. Karn has a fine mailing list which he uses in sending out manufacturers' literature and personal letters.

WEST END HARDWARE. WEST END HARDWARE.

Paroid Roofing, Wall Board and Asphalt Twin Shingles

We have just received a carload of Roofing, Asphalt Twin Shingles and Wallboard We keep a large assortment of roofing, of the very best quality, also the cheaper kinds Our prices have all been adjusted and marked down to present market prices. We can give you some very interesting prices on large quantities.

NEPONSET PAROID ROOFING

PAROID ROOFING
Paroid Roofing, the best on the market. The roofing that has stood the test for 20 years, 108 square feet in each roll, with cement and nails to put it on.
Paroid Roofing, per sq. $4.00

Have an Art Craft Roof applied right over the shingles The finished job will more than please you Put on by an experienced roofer

Let Our Roofer Give You a Price On Your Job

FRED. W. KARN
NEXT DOOR TO POOLE'S GROCERY.

A Sample Roofing ad. used by Fred W. Karn, Woodstock, in local newspapers. Mr. Karn is a believer in the use of good illustrations.

Less Patching, More Replacement

The increasing value of real estate, Mr. Karn says, makes protection and conservation most desirable and while patching of roofs is better than allowing them to go from bad to worse, he maintains that it is not only desirable but more economical in the end to replace the old roof than to be continually patching it.

Personal Follow-Up

The personal follow-up is a feature of the F. W. Karn business. When he learns of any building that is contemplated, a letter is sent to the builder, personally. This is followed up with a call, which he claims is the only way to get the maximum business. Mr. Karn is an advocate of the "full-spoke wheel" in business getting.

and Territory Shows Steady Increase

Bird & Son Limited, the manufacturers of Bird's roofing, spare no effort to educate the dealer's salesmen how best to sell roofing, no matter what the type of building may be.

Bird & Son Limited back up their distributors by supplying all sorts of selling helps; such as, follow-ups, personal letters to prospects, free electros, and advertising suggestions. This all helps to sell roofing and has accomplished a great deal for Mr. Karn who has steadily increased the roofing department of his business.

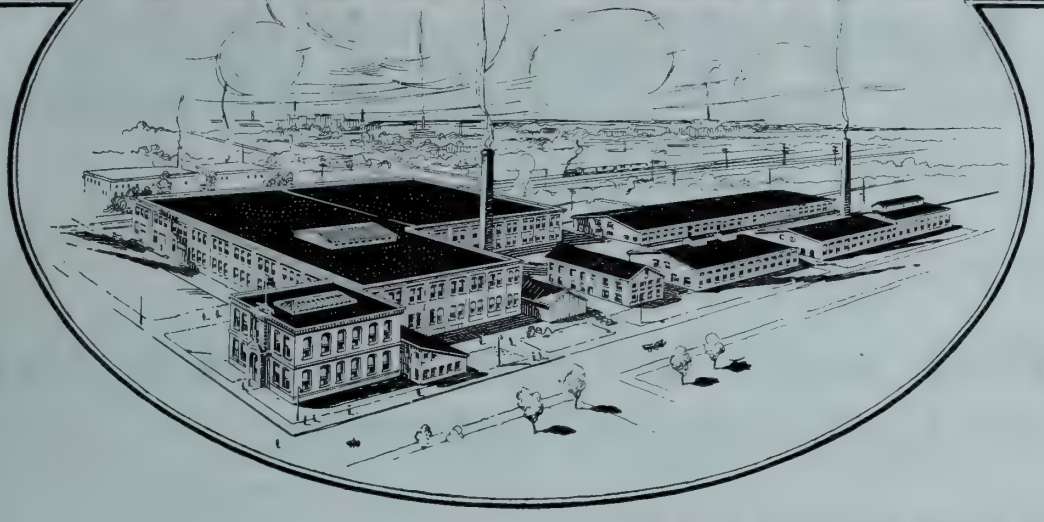
Into a million homes

through leading newspapers, magazines and farm papers goes this aggressive advertising campaign filled with sound reasons why the farmer can afford Frost Fence this year—why he cannot afford to wait, and why Frost Fence, and no other kind, is the only fence he can afford to have. Note also the Poultry ads. and the Lawn Fence ads. that will help to boost your town trade in fence.

Frost Steel and Wire Co., Limited

Hamilton, Canada

The HOME of **Frost Fence** Hamilton, Canada



The Factory That Frost Fence Quality Built

From a little 30 x 50 ft. building to the present large plant, the Frost business has been extended through the efforts of the men who have grown up with the Frost organization from its birth in 1898.

More Frost Fence is sold in Canada than any other kind of wire fence. Nothing but better fence than anybody else could make could have won us this distinction.

We designed and built in our own plant, the special machines that weave Frost Fence so perfectly and evenly that it is easier than any other fence to erect and keep in order. In the same operation every joint is secured once-for-all by the patented Frost Hold-Tight Lock.

The wire in Frost Fence is different. It is drawn, annealed and galvanized in our own plant by our own special and extended processes by which it is given precisely the correct pliancy and toughness to stand up for years longer than any other wire fence.

The Frost organization is one of mutual helpfulness between manufacturer and dealer—not the ordinary "co-operation" but aggressive helpfulness that really aids the dealer to sell more fence. You can be part of this organization if you are located where there is no Frost dealer.

Frost Steel and Wire Company, Limited Optimistic for 1922

During the Convention many hardware men visited the Frost Steel and Wire Company, Limited, at their modern factory in Hamilton.

If every hardware dealer could visit the factories in which his lines are made there would be more hardware sold. Enthusiasm and intimate knowledge of the processes of manufacture are potent sales factors.

Every operation of fence and wire making from the raw material to the finished product is performed in the Frost plant, thus enabling the Frost people to control the quality of their product in every respect. Every hardware man who wants a liberal education in wire should visit the Frost factory where the management see that he feels "at home."

Complex annealing processes give Frost wire the precise degree of pliancy and toughness that adds years to the life of Frost Fence amid the tough weather conditions that any fence has to withstand in the Canadian climate.

The fence weaving machines in the Frost factory are unique, having been designed and built by the Frost staff. Not the least engaging feature is the tieing of the famous Frost Hold-tight Knot, or lock, which holds every joint in Frost Fence once-for-all, and never lets the fence get out of shape. This feature of the machine is almost human in its ingenious method of tieing the knot.

The Frost organization carries the same high standards into the manufacture of wire for many purposes—including galvanized and bright wire, hay wire and bale ties, galvanized gates and manufacturers' Wire supplies; also farm, factory and ornamental lawn fences.

Wire making and fence weaving are processes full of real interest to the visitor who takes advantage of the Frost Steel and Wire Company's cordial invitation to visit their plant.

Lively Discussion at The Convention

Opportunity Taken Advantage of by Retailers at 17th Annual Convention Ontario Retail Hardware Ass'n. in Hamilton, Ont., to Discuss Wide Range of Topics Made Important by Ever-Changing Conditions

By Staff Representative Hardware and Metal

THE many and varied problems which have confronted the hardware trade in the past year provided an unique opportunity for lively discussion at the 17th annual convention, Ontario Retail Hardware Assn., held in Hamilton, Ont., on February 14, 15, 16 and 17, and advantage was taken of every opportunity to set forth views and decide on the best policy to be followed in meeting to-day's changing conditions.

A feature of this year's convention was the community singing of the delegates at the opening of each morning session, and this was indulged in with vigor. President Nelson Mills, Hamilton, Ont., occupied the chair, and after some fitting remarks of invocation from Rev. Dr. W. H. Sedgewick, delivered his annual address in which he outlined considerable progress in the association's affairs during the year past.

In extending a civic welcome, Mayor Coppley spoke with understanding and sympathy of the problems faced by the hardware trade, pointing out that this line of business should be one of the first to recover from the depression and that it represented one of the most important links in the industrial system of the country, as well as a leader in commercial activity.

An Interesting Session

Ed. Wanless, Chatham, Ont., led a spirited discussion on a number of interesting subjects in connection with the Question Box, as outlined elsewhere in this issue, and many helpful pointers were secured.

Following his address on the subject of maintaining established resale prices on well advertised products, as reproduced elsewhere in this issue, H. J. Haire, The Alabastine Co., Paris, Ont., stated in regard to the Sales Tax, that if any suggestion could be made to the manufacturers whereby this tax could be added to the price of the goods and thereby give the dealer his fair profit, he thought they would be only too glad to consider it.

Much interest was taken in the following address by L. R. Green, Advertising Manager, Tucketts Ltd., Hamilton a former hardware merchant and for some time Advertising Manager of the Sherwin-Williams Company, Cleveland. Mr. Green's address, which is outlined fully elsewhere in this issue, dealt with some problems of importance to the trade and full advantage was taken of the period for discussion which followed.

After completing his address, Mr. Green outlined a plan which had been used successfully in a hardware business for getting a list of prospects for building supplies, etc. This had been to advertise a pocket knife for boys and a pair of scissors to the girl who sent in a list of people whom they knew were going to build in the Spring. A splendid list was received which, when followed up, resulted in some good business.

Advertising Expenditure

Replying to a question as to the percentage of sales to be spent on advertising, Mr. Green stated that as high as 5% is spent by some firms, but that he thought was pretty high. The average was between 2% and 3%.

Replying to another question, he stated that a stated amount should be laid aside each year for advertising, probably based on the amount of business done in the previous year.

Mr. Green was against the use of program advertising, pointing out that much of this advertising is solicited to secure funds for some charitable use, and that it would be better to go to the institution needing the money and give them say $2 which would be their share of revenue from an ad which might sell for $10 having in mind printers' costs.

The use of calendar advertising for general publicity he thought to be effective, and in reply to an enquiry as to whether an attractive picture without a calendar would not serve the purpose as well, pointed out that it was a question of utility, that if a person was deluged with calendars, the most attractive one would be retained.

President Mills state that he used newspapers, yard sticks and thermometers for advertising, that a budget was made in January and 3% of sales laid aside for advertising. He thought the average spent on advertising by Canadian hardware merchants to be more nearly 1%.

Before adjourning the first morning session a Resolution Committee was appointed, consisting of the following:—R. Hawkins, Smiths Falls; D. K. Clark, Hamilton; W. Hanna, Pt. Carling; J. McGregor, Caledonia.

Keen Interest in Exhibits

The Exhibit Hall at the Armories was the centre of attraction during the afternoons and evenings, much the largest representation of exhibitors being on hand with attractively arranged booths. There were 99 booths in all and each one contained exhibits of interest to hardware merchants. Advantage was also taken of the opportunity of renewing acquaintances among all branches of the trade. An orchestra provided music to help along the social spirit. During the afternoons, only merchants and ladies accompanying them

were admitted to the Exhibition, the general public being admitted at the evening sessions.

Judging from opinions expressed to Hardware and Metal by exhibitors, much more enthusiasm and confidence was displayed by retailers this year than before, and the results were therefore much better. Some manufacturers reported more enquiries and larger bookings on the first day of the convention than during the whole of previous conventions.

After the discussion of the several interesting topics brought up in the Question Box of the second day's session, the reports of the treasurer and secretary were presented, and many favorable comments were heard concerning the excellent financial standing of the organization.

Much interest was taken in the financial aspects of the situation, particularly in so far as relations between the banker and the retailer was concerned as outlined by J. P. Bell general manager, Bank of Hamilton. This address and the officers' reports are given elsewhere.

Following the address by C. L. Clarke, Winnipeg, manager Canadian Hardware & Implement Underwriters, on mutual fire insurance, a number of questions were asked to which Mr. Clarke made reply.

One retailer asked what amount the policy holder would be held liable for if the company could not pay its losses. The answer was, only for one additional premium.

Replying to another question, Mr. Clarke pointed out that a hardware store would have to be in very bad shape when they would not insure it, as the rate was set to take care of all classes of risks.

F. B. Smith, Belleville, confirmed Mr. Clark's statements regarding paying a 50% dividend to policy holders, after collecting the regular board rate for insurance, he having received notice of a credit of $57.25 on an insurance premium paid of $114.50, this going to reduce the following year's premium unless otherwise arranged.

H. N. Joy who has had some hardware experience in the Northern Ontario stated that he would like to see merchants in that district get the advantage of the mutual fire insurance, but he also warned the company concerning the great danger from fire in that district.

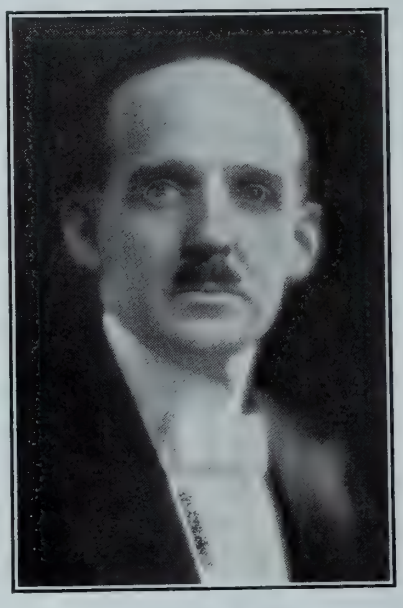
Answering a question as to the largest policy written on one risk, Mr. Clarke pointed out that this was $80,000.

If the company's loss had been 100% last year, it would have necessitated paying out five million dollars in Canada. This would be most improbable to occur, but Mr. Clarke stated that if it did, a special assessment would be made on policy holders in both Canada and the United States to pay it.

The delegates followed with much interest the address by F. J. Penberthy, vice-president and managing director Lowe Bros. Co., Toronto, as outlined elsewhere in this issue. Following this address Mr. Penberthy gave some very helpful suggestions concerning group selling, pointing out that this was one of the most effective means of stimulating trade.

Illustrating this point Mr. Penberthy stated that he had sent to a hardware store for a pair of storm door hinges, and no attempt was made by the salesman to sell him a thumb latch or other items necessary on the storm door.

Another suggestion whereby a sale of 5 cents might be increased to one of 40 cents was in connection with putty, which does not dry out and become loose if a prime coat of paint is put on the sash. In addition a putty knife and other requirements might be mentioned.



GEO. E. MAY

Of West Toronto, who was elected as President of the Ontario Retail Hardware Ass'n. for 1922.

Then in connection with ordinary interior finishing, the housewife comes to the store to buy a can of varnish stain. Here according to Mr. Penberthy is an excellent opportunity to sell some sandpaper, turpentine and other items necessary to a satisfactory job, but which unfortunately many hardware merchants overlook.

Actual cases of where industrial firms had written in to the head office of this firm to obtain paint, etc. because the local agent of the company had not a complete stock with which to meet their requirements, were cited by Mr. Penberthy as instances where business goes begging because the local hardware merchant does not conduct his business in such a way as to take advantage of every opportunity.

Mr. Peart, Regina, spoke briefly in connection with mutual fire insurance, he having been identified many years ago with the origin of the movement in Canada. Mr. Peart suggested that retailers investigate the key rates charged in their communities as he knew of cases where high rates were still being charged on account of risks which had long since been removed.

The Question Box, a popular feature at first and second day's sessions of the convention, also brought out much interesting discussion on Thursday morning, under the chairmanship of H. N. Joy, Toronto.

The addresses at this session were both comprehensive and instructive. These included an address on "Save the Surface" campaign by H. E. Mihell, an address on economics as applied to business by Professor W. C. Clark, Queen's University and addresses on business conditions and prospects by W. Macdonald C.M.A. and Thos. Birkett, president Wholesale Hardware Ass'n.

Col. Maclean Speaks

Colonel J. B. Maclean, president MacLean Publishing Co., was a visitor at this session, and in response to President Mill's remarks concerning the great assistance which has been rendered to the organization by this company, gave an interesting and brief review of the manner in which the association had grown since the early days when the meetings were held in Col. Maclean's office.

"I am one of the 'old men' of the trade, but I still see some friends around such as John Caslor and others," said Col. Maclean, "and I have come back to see how the 'child' is progressing. It is very satisfactory to see such splendid development since the first organization meeting held on a Good Friday, when there were five hardwaremen present to discuss, not the advanced problems of today, but the 'local politics' of the business. This has now developed into an organization which is one of the great powers in the commercial life of the country."

Referring to labor conditions, as introduced by Mr. Macdonald, Col. MacLean stated, "I have been friendly to labor unions. The average union man is very fair as a class, but when you get agitators among them there is trouble."

Col. Maclean referred to meetings now being held openly at which agitators from Germany and Russia were much in evidence, in an endeavor to so handicap business men in this country that other countries might benefit.

The Price Book

Secretary Macpherson briefly outlined the developments in connection with the price book arranged by the association, stating that there were now 311 such books in use, and that over 60 per cent. of the membership shown at the first of the year were using this service. But two of the new members recently secured were said to have declined to use the book.

Mr. Macpherson explained how that net costs, figuring discounts, etc., were shown in the first column of the sheets, and that standard lists as issued by manufacturers were used as the basis, change sheets being sent out when ne-

Outlines Larger Sphere of Influence

Formation of Local Clubs of Hardware Merchants, Such as That Recently Formed in Toronto, to be Encouraged by Ontario Association—Retailers Should Place Business on a "Turn-over" Basis —Habits of People An Important Influence

Address of retiring President Nelson Mills before 17th Annual Convention Ontario Retail Hardware Association

"ANOTHER year has passed and once more we meet as a body of serious-minded business men for the definite purpose of making progress for ourselves and our industry. As we assemble in convention to record our achievements and plan greater ones, we should feel that it is a privilege to be present and take part in the making of this, our 17th year of association activities. The past is valuable only as it gives us hope for the future, and now at the dawn of a new association year we look forward with added courage and enthusiasm for bigger and better accomplishments. The achievements of a single year are not always immediately apparent, and may not bear fruit at the moment, but on the whole, things accomplished are of lasting value and of great importance to our industry. In fact, considering the conditions of the past year, we are obliged to admit that the officers have to a large degree fulfilled their expectations of one year ago. This convention is your opportunity. It gives promise of greater things and I invite you to enter whole-heartedly into and take advantage of each session. We are here to contribute our best thought and energy towards the development of ourselves and the organization of which we are proud to hold membership.

Some Impressions

"It is not my intention to review the history of our association or even the progress of the past year because the reports will show this in detail.

"I believe it will be more profitable to dwell upon some of the outstanding features and give expression to certain impressions gained through my experience in office. No man can be president of this association without receiving some definite impressions and without making observations and forming convictions as to the fields of service which the association should enter.

"The primary function of this association should be to raise the standard of efficiency of the retail hardware merchant; to place the industry on a higher level in the community; also on a more profitable basis to ourselves, and at the same time supply the needs of the consumer as economically as similar service is rendered by other agencies.

"This cannot be done in a day; it will take years, but we are on the way. The principal thing is to have the vision and by organization and co-operation we some day shall reach that ideal.

"Let us work for a future benefit rather than a temporary advantage. It may

NELSON MILLS

Hamilton, Ont., Retiring President of the O. R. H. A., who suggests some future plans for the association and deals with the business outlook from the standpoint of the retail hardware merchant

seem to some of you that the progress is slow, but judging by the reports, you will agree with me that during the past year we hit on all four cylinders.

"I would be failing in my duty if I did not emphasize on your behalf as well as on behalf of the executive, our appreciation of the unfailing services of our secretary. While he has been on full time service only seven months, he has given not merely freely but generously of his time and ability. He has put into the work his whole heart; no sacrifice of time or effort has been too great in the discharge of his duties to advance the foundation work of a new and greater association. It is therefore proper that a richly deserved tribute be paid to whom all credit is due, rather than let any commendation be credited to the administration now reaching its end.

Progress Reported

"The association may find men who will render good service in future but none who can render better. It has been a pleasure and I have gained knowledge working with Secretary MacPherson, and I hope that you will see to it, that he is supported by a strong and able executive. The reports will show wonderful progress made in membership, also service rendered such as the price book and fire insurance. I am pleased also to record a splendid healthy financial position. I would say too healthy. I would rather that we owe money and have rendered added service, which means we must in future deal in bigger figures to accomplish greater things. Men, to do all this we must think, we must study conditions as never before, we must protect our industry and justify our existence in the economic scheme of things. No hardware man can stand alone in times such as these. We must syndicate our interests, organize and co-operate or we cannot reach the fullest degree of our possibilities.

Local Clubs

"The association has made great strides, but I urge that we continue to increase our strength until every hardware man is an association member; then and then only will we have combined effort sufficient to accomplish results. One of the duties of this association should be to assist in organizing local clubs in each town and city. The retail hardware merchants of Toronto recently organized and we are proud to report that our association was represented and showed our co-operation on that occasion. We were not the pioneers, however, full credit is due the Toronto Paint and Varnish Club, but they showed us what we should be doing. This is where the need of co-operation and organization comes in. We must have as our objective a local association, a provincial association and ultimately a Dominion association, and I hope that I am still a retail hardware merchant when that ideal is reached. Under such conditions the retail hardware merchant shall become a greater factor in the business world. There is also a great need for acquaintanceship; getting to know the other fellow, seeing his side of things, and comparing them with yours. This convention brings you men together, that you may know one another for,

"When you get to know a fellow
And you understand his ways
Then his faults won't really matter
For you'll find a lot to praise.

Business Situation

"Now just a word on the business situation, really I am loath to approach this

(Continued on Page 58)

Considerable Increase In Membership

Secretary Macpherson Reports Increased Membership from 342 to 504—Slogan "One Thousand Members Before Next Convention."

TO OFFICERS and Members, Ontario Retail Hardware Association.

As authorized by resolution passed at last annual convention recommending appointment of your secretary as permanent secretary, your executive at meeting held May 11th last, made your resolution effective, services on this basis to begin on June 1st.

W. F. MACPHERSON

Prescott, Ont., Secretary, O. R. H. A., who reports good progress in membership and other association activities for the past year, most of which he has been acting in a permanent capacity.

This report largely covers work accomplished since that date. The membership at last report was 342. On Dec. 31, 1921, our paid-up membership was 504, and in addition some 40 memberships are in the course of collection through the Canadian Hardware and Implement Underwriters in accordance with our agreement with them. With the co-operation of our officers and members, I aim at an objective of 1,000 members before next convention, and with this high aim in view ask for a wholehearted and loyal support.

Some Accomplishments

During the summer months I spent several weeks away from my office, on extension work. Starting on August 15th, accompanied by Mr. Martin, Ontario representative of the Big Three Hardware Mutual Fire Insurance Companies, we covered the principal points in the eastern part of the Province, and met with a most favorable reception of the association and its services. Early in September I spent a couple of days in Toronto, and in company with the best chauffeur in that city, our veteran treasurer, John Caslor, certainly exceeded the speed limit in placing association service, namely "One Price Book every 15 minutes."

On October 15th, accompanied by Mr. Martin, we started a three weeks' trip, covering a number of counties west of Hamilton, meeting with universal success, averaging 25 Price Book services a week, which included a goodly number of new memberships.

With exception of a few additional days spent in Toronto, Hamilton and Ottawa on extension work, my time has been taken up in office work, correspondence and development of Price Book service.

The Price Book

Association Price Book. Owing to the steady growing demand for this price service, much in advance of my anticipations, the large amount of work involved, has retarded somewhat the growth of the volume. However the extra work caused in connection with convention and exhibition, now being over, the next couple of months will see a large number of new pages provided.

The book now contains upwards of 150 pages, the growth of less than six months work. My forecast of 100 volumes as probable issue, made at last convention, for the year just closed, has been exceeded by 211, the number issued to date being 311. To illustrate work involved, I would only mention issue of replacement sheets sent out Feb. 1st, there being 21 000 sheets in this single mailing. The convention program provides a place for discussion of this service, and I would welcome all suggestions which would tend to its betterment.

Service

During the year I have had many requests from our members for information on varied subjects, and would only repeat that the secretary's office is for your use and I always welcome correspondence from our members.

I desire to record my appreciation of the splendid support accorded me by the officers of the past year, and especially of our president, Mr. Nelson Mills, a loyal, capable and persistent worker in the interests of our association from start to finish.

In conclusion I would ask you to take up the slogan, "One thousand members before next convention." The realization of an organization of one thousand members means more to you than would appear at first glance. In unity is strength. Let's up and at it.

(Signed) W. F. MACPHERSON,
Secretary.

F. B. SMITH

Belleville, Ont., member of the Executive Committee of the O. R. H. A., who took a prominent part in connection with the Question Box and other discussions.

Report Of Executive Committee

Endorsation of Canadian Hardware and Implement Underwriters—Deputation to Minister of Justice re Firearms Legislation

YOUR executive committee beg to report having held three meetings during the year.

At meeting held Feb. 18 at the close of last convention a resolution was passed, endorsing the proposition of the Canadian Hardware and Implement Underwriters, subject to satisfactory reports from Vice-President George E. May and the secretary, on financial and service records—the secretary to visit New York Retail Hardware Convention at Rochester for the purpose of investigation. Both reports being favorable the endorsation of the association was sent to the said underwriters with promise of full co-operation.

On May 11th a meeting was held in Toronto at which the executive formally concurred in endorsement of C. H. & I. Underwriters. President Mills and secretary were authorized to join with President Birkett and Secretary Hardy of the Canadian Wholesale Hardware Association to wait on the Minister of Justice in reference to proposed fire arms legislation. This deputation duly waited on the minister, were well received and consideration given to our representations.

Secretary was instructed to take a referendum on holding a summer session in Toronto during the Exhibition. There was not sufficient support promised to warrant holding same. Permanent secretary was appointed effective June 1st.

On August 31st a meeting was held in Toronto to make arrangements for annual convention and exhibition, and necessary committees named to carry out same.

EXECUTIVE COMMITTEE,
Per W. F. Macpherson, Secy.

JOHN CASLOR

Toronto, Treasurer of the O. R. H. A., who reports a healthy financial standing for the association.

Believes Wholesalers Following Price Reduction Policy But Not Manufacturers

Lively Discussion Centers Around Question of How Various Branches of Trade are Dealing With Declining Markets—Bonus to Salesmen —The Wage Question, Plans For Reducing Costs of Business, etc., Also Dealt With

MANY INTERESTING discussions were heard on the subjects introduced in the Question Box on the first day of the convention. This session was under the chairmanship of Ed. Wanless, Chatham, Ont.

On the subject of "How closely should we follow declining markets in adjusting our selling prices," a number of retailers indicated that they were basing prices on replacement values immediately on receipt of notice of revisions. F. B. Smith, Belleville and W. Bell, Beeton, Ont., followed this policy, the latter pointing out that when prices were advancing he marked up quotations when revisions were made, but that a competitor did not always keep pace with the market and therefore caused some reflection to be made on him (Bell), and brought about some unfair competition. This he thought enabled the wholesaler to have an advantage in the process over the retailer. Chairman Wanless answered that if the competitive retailer followed the same plan to-day, as he probably did, then any advantage would go to other local merchants who passed on any price advantage to the consumer. Mr. Bell drew attention to the fact that the longer stocks were kept on the shelves the greater was the loss on them when finally moved.

Vice-president George May, Toronto, thought it well for retailers to "take their tonic" now and pass on price declines as soon as possible. R. Howkins, Smiths Falls, Ont., thought it well to let the customer know what policy was being followed, to increase confidence among buyers.

ARE JOBBERS AND MANUFACTURERS PROMPTLY MEETING DECLINING MARKET?

On this subject, W. Rankin, Ottawa, thought competition among wholesalers and manufacturers sufficiently keen to enforce this policy. W. Bell thought if the retailers were as well organized as the wholesalers they would be much better off. Mr. McGregor, Oakville, Ont., thought the wholesalers and manufacturers should not use their organizations for the purpose of deriving more of a margin than they were entitled to. "If the organization permits these men to get a profit which is unnecessarily large it should not exist," said Mr. McGregor. Chairman Wanless did not think this condition existed.

"I think jobbers are revising prices as fast as they decline, but I don't agree that the manufacturers are," said Mr. Smith, Cornwall, Ont., "and I happen to be connected with several firms the policy of which I do not approve. They are holding up prices beyond what they should and they are making excessive profit. I am convinced that the manufacturer has not dropped prices as he should. One manufacturer said the merchants are loaded up with stock and that it was therefore better to make an occasional revision of 5 per cent than to make a flat reduction of 25 per cent., and thus give the retailer a chance to unload his stock. I would rather see a 25 per cent. reduction, and if the merchants express that opinion to manufacturers I think we would get some action." This suggestion was referred to the Resolutions Committee.

ED. WANLESS

Chatham, Ont., President in 1920 of the Ontario Retail Hardware Association, who conducted the Question Box discussion on the first day of the convention.

Another retailer pointed out that representatives of certain paint firms and others had told retailers that prices were not likely to come down because they would have to protect retailers who were loaded up with their line, and yet this advice was frequently followed shortly after the price declines on these lines.

WHAT SHALL WE DO WITH WAGE QUESTION AS THE HIGH LIVING COSTS DECLINE?

A. J. Wright, Hamilton, pointed out that he had reduced wages 10 per cent. recently, pointing out to his staff that busines had declined about 30 per cent. He had lost none of his men by this action. Mr. McGregor, Caledonia, thought that wages had not borne a fair proportion to living costs when prices were advancing and that this should be taken into consideration now. H. N. Joy enquired as to wages paid to salesmen by other merchants and one merchant replied that his chief clerk's wage of $16 a week before the war had risen to $25 and that a 10 per cent. reduction on this latter sum had recently been made. Mr. Joy pointed out that costs are not declining and that something must be done to increase business or a reduction in costs would have to follow.

Chairman Wanless thought it was not right that the sheet metal worker, plumber, etc., should be drawing more remuneration than the hardware salesman.

HOW CAN COST OF DOING BUSINESS BE CUT AND MAINTAIN SERVICE?

George May, Toronto, thought the solution to this question was to get more business from the existing staff. Chairman Wanless told of a hardware merchant who called his clerks together and adivsed them that he was not going to cut wages if he could get 20 per cent. more business, and the business was forthcoming. Mr. Smith, Cornwall, thought the mail order competition something which could be combated in the interests of more business. He is going to try a plan of combining with merchants in other local businesses to get out a comprehensive catalogue along the same lines as the mail order catalogues and sent them out in the immediate district twice a year. He is of the opinion that prospective customers will prefer to patronize local firms when the facilities are equally good.

"HOW MANY DEALERS PAY A BONUS ON SALES BY CLERKS?"

W. Rankin, Ottawa, pays a small bonus on sales by clerks and reported it as effective. The same bonus is paid on everything, this is not governed by the amount of profit on the item. George May, Toronto, had adopted the plan last December to stimulate trade, advising clerks at the beginning of the month that their Xmas present would be a percentage on sales. He found that only one junior clerk took advantage of the opportunity.

LIVELY DISCUSSION AT CONVENTION

(Continued from page 54)

cessary. A rate of 20 per cent. has been used for overhead, and varying margins of profit from 10 to 30 per cent. according to the line have been considered in making up prices.

Message of Sympathy

Following this review, Mr. McGregor, Oakville, seconded by George May, Toronto, proposed a resolution that a message of condolence be sent to Mr. Wood, head of the firm of Wood, Alexander & James, Hamilton, in his sad bereavement by the death of his wife.

On Thursday evening a most enjoyable social time was experienced on the occasion of a banquet tendered by the hardware manufacturers of Hamilton.

Friday morning was the last session of the convention, the balance of questions being considered and officers elected, as outlined elsewhere in this issue, after which a visit was paid to the new factory of the Canadian Libbey, Owens Sheet Glass Co., where the interesting process of glass making was described to an interested group of delegates.

OUTLINES LARGER SPHERE OF INFLUENCE

(Continued from Page 55)

subject. It seems to me however, from reports that the retailer is going very cautious and I believe he is justified in doing so. We have passed through many changing conditions since the world war began and ended, and the experience gained has if anything been beneficial to the retail merchant. A return to normal conditions does not mean a return to 1913 prices, but means reaching a basis on which the prices of products bear the proper relation to the cost of manufacture. It is therefore essential for all three, manufacturer, jobber and retailer to adjust merchandise to replacement value, and write off your loss. If you didn't do so in 1921 you will eventually be compelled to take much greater losses as time goes on. I am of the opinion that it is good business from now on to work on a turnover basis, and be in a position to purchase merchandise at the lowest figures as prices decline.

"The decline in prices will in all probability be a step by step process covering a period of several years. I can only suggest that you keep your stocks well assorted. Don't hesitate to buy new goods; use the jobber often, advertise what you have to sell and you will be kept so busy that you will not worry about conditions.

"I would like to quote in passing, how Ralph B. Wilson of the Babson organization sums up conditions. He says: 'That business conditions are not determined by statistics but by the character of the people.

Habits of the People

" 'In periods of prosperity, the people develop habits of extravagance, indifference, inefficiency, immorality and selfishness. These qualities developed in a period of prosperity lay the foundation for, and cause a period of depression.

" 'In periods of depression and unemployment, people develop habits of thrift, industry, efficiency, morality and service. These qualities developed in a period of depression lay the foundation for, and cause a period of prosperity.' Here is a true picture of the ups and downs of our business career, and let us be thankful that we are laying the foundation which causes a period of prosperity.

"With no desire to censure, and with the best interests of the hardware trade in mind, I have come to believe that hardware men should read more trade publications. Our trade papers have made every effort to improve our industry and place it on the highest possible plane. They keep us well informed in matters of greatest value and importance, and it is our duty not only to subscribe to them but to digest them and transform their contents into action.

"Although I retire as president at this convention my interest in the association is so firmly grounded that I will con-

(Continued on page 65)

Much Overlapping In Present Taxes

Great Need for Tax Revision—Too Much Tendency Toward Legislation in Provincial Governments and Not Enough Element of Self Reliance

Address by Mr. Macdonald, Manager Legal Dept. Canadian Manufacturers' Association before O.R.H.A. Convention

REPRESENTING the Canadian Manufacturers' Association, Mr. Macdonald, Manager Legal Department C.M.A., addressed the convention on the business outlook, pointing out that the summary of opinions recently secured from representative business men was to the effect that the industrial depression has reached rock bottom and has commenced on a gradual backward swing.

Speaking of the needs of the situation, Mr. Macdonald pointed to the necessity of a scheme of immigration and the righting of the labor problem.

"The war has created a great disturbance, and I am convinced that it will be necessary for the employers to take a very firm position if they are going to run the business of the country and not allow outsiders to do it. The time has come when employers must definitely declare for 'open shop' in every possible way. Unions have frequently benefited the people they represent but sometimes it is possible for an organization to go beyond the limits of propriety."

Speaking of taxation, Mr. Macdonald pointed out that there was much overlapping of taxes and that a serious situation will arise if this continues. He referred to the province of Manitoba where a 2 per cent. income tax on the net returns of businesses has been instituted as a provincial tax.

The plethora of legislation recently enacted by all provincial legislatures was also mentioned, it being shown that 267 bills had been passed in Ontario this year, 96 in New Brunswick, 199 in Nova Scotia, 70 in British Columbia, 95 in Alberta, a total for Canada of 511 bills and orders-in-council. What we wanted, according to Mr. Macdonald, was more self-reliance and thinner statute books.

"We have farmers and labor men in the Ontario Government, no manufacturers or merchants, and we are getting educated in a way that is going to cost us something," said Mr. Macdonald.

Combating the "Business Disease"

Lack of Realization Accentuated Recent Business Depression—Greater Activity Is The Keynote to Recovery—More Sales Achieved Through Developing And Adapting The Laws of Salesmanship

Address by F. J. Penberthy, Manager Lowe Bros., Ltd., Toronto, before Convention of Ontario Retail Hardware Association

THERE is nothing remarkable about the period of business depression which we have passed through. The law that depression follows prosperity would seem from past experience to be almost as inevitable as the Law of Gravity.

The really remarkable thing about hard times is that so few of us realized that hard times were bound to come and made provision against them. That very lack of realization made hard times harder; made recovery more difficult; and made them last longer and the recovery slower. Gentlemen, the term "Lack of Realization" covers a multitude of sins, and, incidentally, discloses the nature of my address and the disease in question.

If the observations made during my recent travels North, South, East and West in Canada and the other side count for anything; if the analysis that I have made, in an effort to get at the root of the cause of many failures and near failures, has any weight; if investigations conducted and statistics recorded by the foremost business men of the continent are at all accurate; if the statements of representative hardware merchants themselves are true, and they are true, then I may safely define business disease as a complex ailment of the mind, having for its constitution a combination of some or all of these outstanding characteristics:

Lack of understanding of business fundamentals—economic and otherwise.

Lack of appreciation of the possibilities of the goods you handle.

Lack of concentration or division of effort and indolence.

Lack of knowledge.

Guesswork.

Like all others the business disease has its symptoms. In the present case it is lack of faith and lack of courage. There seems to be an irresistible feeling that the way to business salvation is through the avenue of cheap, and necessarily undependable goods — cutting down of expense, and sitting tight until business improves. There seems to be an inclination to follow the crowd wherever it leads—in other words, an inclination to follow the line of least resistance and it is time to take precaution against the disease that is sure to follow these symptons.

I speak of lack of faith, lack of courage, desire for cheap goods, cutting down expenses, and sitting tight. One might have faith and still lack the courage of his convictions. If he loses a sale, on account of price, his courage fails him, and he immediately believes that it is necessary for him to have a cheap line of goods as well as quality goods. By so doing he is putting himself in a worse position than he was before. He is investing double the capital in order to make some meagre sales and, therefore, his profits instead of being available for re-investment and turnover remain on his shelves.

I was in a hardware store just a short time ago and noticed five different lines of floor wax and four different lines of brass polishes on the dealer's shelves. How much Floor Wax and how much brass polish will that man have to sell

F. J. PENBERTHY

Vice-President and Managing Director, Lowe Bros. Co., Toronto, whose address on "Business Disease" was very helpful to the delegates under present conditions.

before the working capital and profit which remains on his shelves will be turned into an actual profit for re-investment?

The cutting down of unnecessary expenses, provided they are unnecessary, is to be commended, but great care should be exercised in determining just what expenses are unnecessary, so that in making a reduction your business will not suffer.

In our business, I do not care how much our factory wages are in dollars and cents, nor do I care what the factory expense is. In our overhead I care nothing about what the salesmen's expenses are, nor what the advertising expense is, nor do I care about general expense—including interest, discount and exchange, clerk hire, stationery and other incidentals — providing none of these exceed their proportion of percentage. And the only way that that percentage can be proportioned is for us to sell the goods to make the percentage proportionate.

Greater Activity—The Keynote

During the trying months of October, November and December we ran our factory full time. We did not reduce the wages of a single employee in our factory nor in our office. We had confidence in our ability to sell, we had confidence in our dealers, we had confidence in the future of Canada and, with the confidence we had, we went ahead and filled our warehouse with manufactured goods in order that the purchasing power of the men who served us faithfully would not be impaired. The result has been very gratifying. Our men made the goods; our packing room packed the goods; our salesmen have sold the goods and at the closing of our five months' period which ended January 31st, our business shows a very satisfactory condition. We attribute this showing to greater activity which I am going to dwell on later in my talk.

Our overhead expenses as shown in our books in dollars and cents are alarming but our percentage of overhead to sales as shown in our selling records has gone down to almost where it should be and prospects of an even greater reduction with the best period of our year —spring—still before us.

You, gentlemen, should be in the same position. You are entering a period when your expenses will be corrected in proportion as you turn over your merchandise. You cannot sit in your store wondering what is going to turn up. You've got to make somthing turn up. Sitting around doing nothing will not pay your rent; will not pay your factory; your electric light bill; your clerk hire; or your delivery. The only thing that will pay these things is profit. The only way to make profit is sales. The only way to make sales is to apply the energy that God gave you to sell something. The inertia displayed by some clerks and even proprietors of retail stores is absolutely astonishing. A salesman on the road would starve to death in two months if he were to apply the same tactics as displayed by a great many clerks who are drawing fair money for practically driving permanent cutomers away from the store.

I have given you, gentlemen, our own experience in coping with and overcoming the tendencies to business stagnation, and I have tried to show you that in the last analysis, whether or not your business is prosperous depends absolutely on your volume of sales. I have tried to more firmly establish the proposition already conceded generally that MORE SALES is the cure for all negative business tendencies.

With these generally acknowledged facts before us we must conclude that the only corrective for slumps, depressions, etc., summed up in two words, is

Maintaining Prices on Special Lines

Protection and Co-operation Between Manufacturer and Retailer Stimulates Trade in Well Advertised Standard Specialties—Successful Marketing Gives Prestige to Known Brands—Overcoming The Universal Price "Kick."

Address by H. J. Haire, Sec.-Treas. Alabastine Co., Ltd., Paris, before Convention of Ontario Retail Hardware Association.

I AM DELIGHTED to have this opportunity of appearing before you hardware dealers of Ontario and am deeply sensible of the kindness of your secretary, Mr. MacPherson, in inviting me here. I say this because I sincerely believe that the enterprise, the honesty and integrity of our retail merchants have been a very vital factor in upbuilding every Canadian community and in rearing and maintaining the great structure of our commerce, and of all classes of trade it is freely acknowledged by business men everywhere that the hardware trade is the cleanest, most substantial and most satisfactory of all to do business with.

I am here as representative of a factory that has been marketing its product only through regular wholesale and retail channels in Ontario for the past 35 years. As a result of our experience we long ago decided that the hardware trade was the most satisfactory class of accounts and have acted accordingly. I see here representatives of several other manufacturers. Let me say to you as we are saying in our advertising to the public, "Your Local Dealer is Entitled to your Trade." I believe the hardware dealer is entitled to your protection now. On the other hand if the manufacturer protects the hardware he feels he is entitled to expect co-operation from the hardware, and that is what brings me here to talk to you to-day.

Protection and Co-operation

A manufacturer protects the dealer by Standardizing, Trade Marking and Advertising. The dealer co-operates by recommending the goods, keeping an adequate stock, and maintaining a Fixed Price.

It would seem to be the natural condition for a man to know his wishes or needs and to indicate them to those who had the goods or service to supply, but the fact is that men do not always know their needs or do not feel them strongly enough to supply them without solicitation. A farmer may need a gas engine but almost invariably he will not buy until influenced by oral or printed solicitation. Furthermore, human needs are subject to constant change and development. Staple goods for which there is a regular demand, move in the world's markets with a minimum amount of sales effort. The consumer must have food, clothing, nails, rope, etc. The luxuries, sanitary goods and novelties demand more sales effort. But times move swiftly and the luxury or novelty of one year will be a staple in the next. An attractive new article like a Thermos Bottle or a Vacuum Sweeper fills a real need, though the consumer did not know before its appearance that such an article was a possibility. But immediately the article appeared, thousands became purchasers and the cost of living went up $5.00 or $50.00 for them. It has been charged that advertising has helped increase the cost of living and that if goods were not exploited by expensive sales efforts, prices could be decreased and the cost of living reduced. This conclusion is a fallacious one for it overlooks the important economic principle that with the exception of goods that are imitative of successfully exploited goods and sold by reason of the similarity, everything but the most staple merchandise must be promoted in order that successful sales may be built up. How many cash registers or adding machines would have been sold if the makers had merely perfected the machines and waited for the demand to manifest itself? If sales were to be confined to hundreds instead of tens of thousands the cost of such machines would be prohibitive to the average buyer. Even the sales of staple goods are increased by advertising methods as ready mixed paint, or biscuits or chocolate. If it is argued that the constant changing and creating of needs makes up a wrong system of economics, it might as well be argued that man should gradually retrograde to the savage state where his needs are few and simple. Civilization increases and changes man's needs. It may add to the cost of living and even tend to extravagance, but extravagance must be charged to the individual and to popular ideas rather than to the salesman. The modern tendency is to eliminate certain needless handling of goods and unnecessary profits and to supply the customer as directly as possible.

H. J. HAIRE

The Alabastine Co., Paris, Ont., who gave an interesting talk on the subject of maintaining established resale prices on well advertised products at the convention in Hamilton

The Dean of the Commercial Science Department of New York University, in an article in Printers Ink aptly described the new order of things as follows:

Modern Methods of Merchandising

The old static idea that the wants of the public can be gauged like the depth of a well, and that there continuously exists a certain measure of demand for a certain kind of goods, is no longer held by economists. The modern economic idea is dynamic instead of static, and demonstrates that man is a bundle of potential wants, infinite in number and impossible of hard and fast measurement. Furthermore, it demonstrates how wants can and are being created, and that it is impossible to tell beforehand what new want will develop.

These old-time static economics which fitted production to a given quantity of want, had worked out a beautiful compensating system of accurate quantities and their accurate distribution which never missed a cog nor recognized for a moment an element of uncertainty.

To these old economists all articles were staple, and that elusive quality which distinguishes wants as we now know them to be was blissfully unknown. The newer modern economists to-day judge a civilization and a country by the number and complexity of its wants, recognizing that progress and civilization move in direct relation to the number of wants developed. In the new dynamics there is nothing fixed. You cannot count on my wants for next week and much less can you count on them for next year.

The advertising man is he who sits on a potential want and hatches it into a clamorous reality, who loses no opportunity to tell me with his best word and picture in the medium I am most apt to turn to, of the charm, the irresistibility, the economy, the efficiency, the need represented in his product. And one by one, new tastes, new needs are developed in me and my family as the advertising man succeeds in informing and convincing me of the desirability of the things that men are making.

My old father visited me once, and after observing what we had and what we did, in comparison with his simple, old-fashioned life, he vowed that we were squandering money. We had great numbers of things, he maintained, which he never had. "Yes," I replied, "and my son will have things of which neither you nor I yet dream."

But there is a peculiar thing about satisfying wants. You will observe that we are obliged to starve other wants whenever we select a new one. If we buy an automobile we will not be able to flash the gold, the silver, the silk, and the fine linen which we might otherwise have flashed. In our subconscious way, we put the things on the scales and we decided which we want most.

Successful Advertising

In view of the leadership, on every hand, of concerns that advertise, there is hardly any need to argue for successful advertising as one of the essentials of successful merchandising. Advertising is the greatest aid the salesman has. In some lines of business, advertising completes sales that the salesman could not complete, or does the work more economically than a salesman could do it. When it does not complete sales, advertising informs the public, interests it, and partly or entirely develops the demand so as to make the work of the salesman easy. If every retailer could be sure that every prospective purchaser of his goods would enter his store and see the goods offered for sale, or even go down his street and inspect his windows, he might hope to do without

"The Banker And The Retailer"

The Bank And Its Functions—Bank Serves Merchants by Lending Money And Providing Exchange to Pay for Goods Abroad—Retailers Should Not Need Much Credit From Banks as Wholesalers Provide Sufficient Extension

Address by J. P. Bell, General Manager Bank of Hamilton, Hamilton, Ont., before 17th Annual Convention Ontario Retail Hardware Association

FIRST I wish to thank your association for the honor conferred upon me in inviting me to-day, and I will have pleasure in saying a few words and in giving my conception of the relations between the Banker and the Retailer.

Perhaps it may not be out of place to begin by defining in some measure what a bank is, and the functions it is supposed to perform. But it is not quite so easy as it looks. In the Bank Act of Canada no attempt is made to define the functions of a bank. The act merely states "Any bank to which this act applies." This reminds me of the old riddle, "What is an archdeacon?" The answer, "One who performs archdeaconal functions."

The State of New York makes the plunge and gives the following definition in its banking statutes: "The term 'Bank' means any moneyed corporation authorized by law to issue bills, notes or other evidences of debt for circulation as money or commercial paper and to make loans thereon, and to discount bills, notes or other commercial paper, and to buy and sell gold and silver or foreign coins or bills of exchange."

All these functions are discharged by Canadian banks, but their value to the nation is greatly enhanced by the system of branches which enables the banks to gather and distribute money throughout the length and breadth of the Dominion, thus utilizing as far as possible the supply of loanable funds to meet the demand. Through the branch system money is constantly finding its level without undue restriction.

Some years ago, Sir Edmund Walker, president of the Canadian Bank of Commerce, to-day the dean of the banking corps, as well as an authority in the literature of the subject, very lucidly defined the requirements of a new country like Canada in the way of a banking system:

What is Required of Banks

What is necessary in a banking system in order that it may answer the requirements of a rapidly growing country, and yet be safe and profitable?

1. It should afford the greatest possible measure of safety to the depositor.

2. It should supply the legitimate wants of the borrower, not merely under ordinary circumstances, but in times of financial stress, at least without that curtailment which leads to abnormal rates of interest and to failures.

3. It should possess the machinery necessary to distribute money over the whole area of the country, so that the smallest possible inequalities in the rate of interest will result.

4. It should create a currency free from doubt as to value, readily convertible, and answering in volume to the requirements of the trade.

There should be as complete a relation as possible between the currency requirements of trade and the cause which issues paper money, and, as it is quite as necessary that no over-issue should be possible, as that the supply of currency should be adequate, there should be a similar relation between the requirements of trade and the cause which forces notes back for redemption.

J. P. BELL

General manager, Bank of Hamilton, Ont., who addressed the convention of Ontario Hardware Merchants on "The Banker and the Retailer," outlining some points of current interest.

Deposit Business

The first duty of a bank is to provide a place of safety for the depositor. That duty comes before the duty to its shareholders, and second only to the duty which it owes to its involuntary creditor, the note holder. The losses to depositors through the failure of banks in Canada has been remarkably small compared with that of any other country in the world. The importance of this point is often lost sight of by people who regard a bank simply as a concern from which to borrow money, rather than one in which to deposit.

Some years ago, when one of the Canadian banks opened its first branch in the City of Havana, Cuba, they were warned by some of the best informed people there not to pay any interest on deposits, that the people with money were perfectly satisfied to have a bank take care of it for them, and return it to them when they wanted it, and that the paying of interest would excite the suspicions of the Cubans that there must be something wrong—the bank must want money very badly if, in addition to all the care and responsibility it took of taking charge of the money, it would also be willing to pay for it. Since then, owing to the spread of American and other banks in the Island, this situation has changed, and competition for deposits is just as keen there as it is in Canada.

But the Cubans have once more had a lesson as to the necessity of using judgment in selecting a bank as the depository for their funds, for in the recent financial debacle there practically every native bank went out of business and the business of some of the American institutions was reduced to very small scope.

People sometimes forget the service a bank renders in taking deposits. For example, a deposit may be made up of bank notes, coin, but in these days, largely all cheques. These are drawn on banks all over the country. The risk of fraud and miscarriage, and particularly in paying out money on forged endorsement, is one ever before the banks. They take this mass of material, distribute it, and collect the money, and place the proceeds to the credit of the individual before they are repaid themselves. All this is done practically for nothing.

Meeting Borrowers

The second and most important function of a bank is to supply the legitimate wants of borrowers, and in this connection, you, as retailers, are anxious to know what is the underlying principle that usually governs a bank in its lending to retailers. Let me say in the beginning that the grounds for regular lending to a retailer are something like a chapter on "Snakes" in a celebrated book on the natural history of Ireland. There are none. As a general rule retail merchants are not entitled to unsecured advances.

A merchant who takes considerable credit from a jobber or wholesaler should be able to obtain all the credit he needs from that source, and as a rule a bank should not lend unless he is able to put up good trade bills or other satisfactory security. Bear in mind that a bank can only profit to the extent of the bare interest on its loan, whereas the wholesale merchant has a margin of, shall we say, 20 per cent. to fall back on in case of loss.

Quite often bank loans are sought in order to enable a retail merchant to take advantage of his cash discounts. Do not forget that the usual minimum discount granted by the seller for cash is 1 per cent. per month, or 12 per cent. per annum, that being in effect his estimate of the degree of risk which the bank is asked to take for 7 per cent. or even less. The transfer of an obligation from the creditor (the wholesaler) to the bank, does not diminish by half the risk of the accommodation, and it is illogical to assume such risks by an ordinary bank. Besides these frequently lead to lax methods of collecting on the part of the retail merchant.

"But," you will say, "why is the bank willing to lend to a manufacturer?" There is this fundamental difference. The merchant, if his credit is good enough, can put his stock on his shelves without spending a single dollar except for freight and duty. Good credit will enable him to obtain all he wants from manufacturers here or from wholesalers abroad, but a manufacturer cannot do this. From the time he begins

Successful Advertising for the Retailer

Advertising As An Investment Should Result In Either Direct or Indirect Returns—Difference Between Optional and Involuntary Advertising—First Essentials Form Foundation on Which to Build

Address by L. R. Greene, of Hamilton, before Convention of the Ontario Retail Hardware Association.

IN DISCUSSING retail advertising, let us get right down to basic principles. Advertising to be of any real value to the retailer must bring back to him his investment plus a profit in the way of increased good-will or profitable sales.

When you mention advertising to the average merchant, his mind is likely to immediately revert to the idea of putting a few advertisements in the newspaper, sending out a few circulars, putting up a few signs, any one or all of these things. That, to his mind, is advertising.

Such a merchant is not likely to be a very successful advertiser unless he gets a much broader idea of what advertising really means. The first thing he must consider is what impression his business makes upon those who should or do trade with him; the people who occasionally visit his store and buy his goods. Do they go away with a good impression as to what they have bought and the treatment they have received? Do they like your store, your clerks, the way you arrange and display your merchandise? In fact, does the atmosphere of your business impress them favorably or are there things in your organization and in the way you handle your business which are objectionable to the average customer and which must be corrected, if you are to make full progress?

Optional or Involuntary

Remember this, you advertise whether you wish to or not. It is optional with you as to whether you put an advertisement in the newspaper, as to whether you send out a circular, but as long as you are in business there is one kind of advertising working for or against your business. You cannot avoid it and, therefore, it is of primary importance you give it first consideration. I refer to the appearance of your store, the appearance of your windows, the attitude and service rendered by your staff to the buying public. Untidiness, carelessness, lack of courtesy, if they are in your business, are very much in evidence to your customers and so repel them and create an unfavorable impression, which drives them to other merchants for their purchases.

So surely, the first thing to consider in retail advertising is the appearance of your store, the arrangement of your stock, the attitude and training of your staff and this big question of service to the buying public.

After this convention, when you go back to your business, just for an hour or so, forget all the other important things and helpful suggestions you have received and try and get a fresh impression of your business. Is your stock well arranged? Is it properly displayed? Is your store neat and tidy? You may or may not be in a position to buy the latest and most up-to-date fixtures, but that is neither here nor there as far as giving the proper display to the goods that you handle and the keeping of your stock neat, tidy and well arranged. Remember that when a customer comes into your place of business to buy a certain thing, if your stock generally is well arranged and well displayed, he may see a dozen other things he needs. He may buy them at the time or he may make a mental note and come back later. That fact is recognized by the successful chain store systems. You go into a "5 and 10 Cent Store" and you find all their stock is so displayed that it catches the eye of the shopper. It is not piled away in packages on the shelves, but is laid out where the prospective buyer can see it. The method of display used by the "5 and 10 Cent Stores," sells far more goods for them than

L. R. GREEN

Advertising Manager, Tucketts Limited, Hamilton, Ont., who gave the delegates some interesting pointers on successful advertising plans.

the work of the clerks behind the counter. The goods sell themselves. As it were, they say, "Here I am, look me over, I am worth so much." How much actual selling does the average clerk in a "5 and 10 Cent Store" do? Practically none. It is nearly altogether a matter of clever display. Remember that.

You will say there are many lines in my stock, which I could not possibly display in that way nor have I sufficient counter room. True; but there are innumerable items in your stock which you could display and which are tucked away in odd corners and possibly even you have forgotten some of them.

Principle of Display

It does not matter where your business is situated, in the big city or the small town. The principle of display applies in either case and the sooner you grasp its possibilities and study it out for your business, the bigger will be your returns. Don't think this matter of display simply means piling goods on the counter any old way, have some system and method in your efforts along that line and you will get good returns.

Then there is the personal factor in your business. What about your clerks? Are y yourself setting them a good example in handling and treating your customers courteously or are you simply leaving each boy to do the best he can and follow his natural inclinations, some of which are right and some of which are wrong. What about a meeting once a week with the boys to go over the new lines of goods which have come in during that week, and a discussion of the selling points and the opportunity for their sale? Are you carefully scanning all the literature you receive from manufacturers of the lines you handle and passing the good pieces along to the boys so they can study them and get the talking points?

A salesman calls on you; he has a good product, he talks it well, emphasizing its selling points. You buy, but do you get the boys together at the time for five or ten minutes or perhaps that same evening, and say, "Here! Mr. Jones, you have sold me your goods because you have put up selling points to me which have convinced me of their merit, now pass these same selling points along to my staff so that when those goods arrive in this store we will be able to sell them to the consumer."

A great source of information is the up-to-date trade paper. You probably get it, and you read it, but do you see that your staff also have the benefit of the information it contains?

Now you may say you thought this was to be a talk about retail advertising, but isn't the talking of the goods you sell to your customers on the part of your clerks, advertising? Isn't what favorable things your customers say about your business to their friends, about the good service and the goods you sell, good advertising? Most assuredly it is and if it is favorable, it is the best kind of advertising you can get. If it is unfavorable, it is the most harmful advertising that you can receive.

Advertising Opportunities

What about your window? There you have one of the greatest advertising opportunities possible to have and your windows will insist upon advertising. If they are untidy, dirty, neglected are they not likely to give just such an impression to the man who passes your store? And so he sizes up your business. They are neat, clean, well dressed, filled with attractive merchandise, they are working every minute to sell goods for you and also to create good will.

It is so obvious that properly cared for windows are good advertising, that it is astonishing any merchants neglect them. Let us take a lesson from the great departmental stores who spend thousands and thousands of dollars on their window trimming. They realize there is no better advertising that a well dressed window. If that is so in the cities where competition is keen, how much more so it is in the smaller towns where window trimming is frequently neglected and so you have wonderful opportunities to make your store outstanding in that respect. Your windows will insist in advertising your business and it is up to you whether that advertising be good or bad.

And in touching on store display and window dressing, I cannot help but emphasize an important point in that connection and that is the plain pricing of your goods. Do not be afraid to show prices

(Continued on page 72)

The "Save The Surface" Campaign

And How to Make More Money Out of It—What the Campaign Means to the Retail Hardware Merchant, What Has Already Been Accomplished, and How Best Results May Be Secured in 1922

Address by H. E. Mihell, Imperial Varnish & Color Company before 17th Annual Convention Ontario Retail Hardware Association

I WANT to talk with you to-day on the "Save the Surface" campaign and see if I can point out some reasons why you should make more out of it and some suggestions as to how you can make more money out of it.

For after all, this campaign is yours to make money out of. As it stands today it is more yours than it has ever been before. The cashing-in on it is largely up to you. If as a representative of the committee, I can show the members of your Association how to do it, then I can feel that our representation here has been more than justified.

However, before reaching the "cashing-in" portion of this talk with you, I want to scan, very briefly, the aims and objects of the campaign and its history to the present day.

The "Save the Surface" campaign has not been the result of momentary inspiration, nor was it born in a day. Several years before it was put into operation a few foresighted men in the trade realized that the paint and varnish trade had scarcely scratched its possibilities for sales. We have never at any time been anywhere near the condition of a "glutted market" of adequately painted property.

Two big factors were suffering from the prevailing attitude of the consumer and the seller of paints and varnishes towards painting. The property owner was suffering from lack of protection to his property. Even today, a great many are suffering from the same reason. Paint manufacturers, paint distributors and retailers were, and are today, suffering a big loss from the profits they are not obtaining from the possibilities that lie at their very doors and which are not being taken advantage of.

Losses From Lack Of Paint

I want to illustrate in concrete form some thing of what these losses might be. Based on the census of 1911 it has been estimated that only a partial loss on Canadian property due to lack of paint and proper upkeep amounts to the total annual sum of $71,851,098.00. This figure is made up as follows: 2% depreciation on urban homes alone, or $28,000,000; 2% depreciation of farm property amounting to $17,849,944.00 and 10% on farm implements amounting to $26,001,154.00. You will note that this includes only three classes of property and does not include many others we might take into account.

You are all well aware of the fact that loss through lack of paint or varnish is inevitable and continuous, but that loss through fire is only probable or accidental.

Our average annual fire losses generally vary between twenty and thirty million, yet what are the people of Canada doing to protect themselves against both forms of loss? Taking the figures of 1917 as more nearly normal than any others available, we find that the Canadian public spends $5.44 per capita for fire premiums as against approximately 75 cents per capita for paint and varnish protection. In other words, they spend about 14% for protection against inevitable loss compared with what they spend for probable or accidental loss.

This single condition of affairs alone points to the tremendous opportunity for better paint selling and the necessity of an advertising campaign to awaken the consuming public from their indifferent attitude towards painting.

Now as to what the paint trade has suffered. I know that from the incident cited above and other facts which I have not the time to present to-day, that you should be distributing four times the amount of paint and varnish than you have ever done before, and that instead of Canada producing $19,506,653 worth of paint and varnish materials in 1919 we should have produced

H. E. MIHELL

Imperial Varnish and Color Co., Toronto, and an executive member of the Save the Surface campaign committee, who outlined the campaign to the O. R. H. A. convention

sixty to seventy millions and you should have your proportionate share in that distribution.

There is this also to bear in mind, that if the public can be taught to realize the value of the proper upkeep of property, not only will it effect bigger paint and varnish sales, but it will bring about bigger sales in many other lines of hardware necessary for proper maintenance.

An Economic Necessity

Another desire that underlay the forming of the campaign was to impress upon the public the fact that paints and varnishes were an economic necessity and not a decorative luxury.

A third factor had probably more to do with its immediate formulation and that was the excessive prosperity of war and post-war conditions and the possibility of a slump in industrial and general market conditions. This slump was looked upon as inevitable. The problem then was to commence advertising during the period of prosperity so as to ensure good business during the period of decline. In other words, we sought to insure our future.

Many other minor considerations arose, but the above were the outstanding.

How were these problems to be solved? The answer was to create by disinterested, educational, co-operative advertising a sentiment in the public mind in favor of painting as a protective and preservative means of conserving property.

The solution was the "save the surface and you save all" campaign.

In the execution of this campaign I want to point out clearly the duty of the campaign committee towards the paint and varnish trade as a whole. The committee as a committee has absolutely nothing in the way of goods to sell. We are not interested in any particular line, whether ready-mixed paint, lead and oil, good paint or indifferent paint. We are endeavoroing to advertise and sell an idea, a sentiment, or perhaps I can put it stronger by saying the creation of a conviction in the public mind that they should use paints and varnishes more adequately. If we can change the habits of the people of this Dominion of Canada in regard to the greater and better use of paints and varnishes for the protection of their property, our work will not have been in vain. It has not been in vain either in service rendered to the consuming public nor to the paint and varnish retailer in creating bigger and better business.

When this conviction has become established, what is your duty and mine? My duty, as a salesman of a manufacturer, is to go out and in every rightful manner endeavor to cash in on it. Your duty, as a retail distributor, is to push home the idea to your consuming trade and cash in on it. Any good salesman will admit that conviction is 90% of the battle in selling goods. After that, getting the name on the dotted line or getting the cash is an easy matter.

Want Buying Action

Undoubtedly this conviction has become established in the minds of a great many but there is a vast majority to whom it has not come as it should, or if it has come, has not yet reached the stage of buying action which we want to see. It is here that the responsibility of the retail distributor rests in carrying on the campaign in his own community and which I shall dwell on later.

During the first year the subscribers and the committee in charge pioneered the launching of this campaign in sheer faith, but with a very definite idea of what they desired to accomplish. They realized that its development could only take place through time and make progress through phases or stages of growth. They, therefore, committed themselves to the conduct of the campaign for five years. The next phase was the development of the manufacturers' salesmen into apostles of its great idea so that they could carry it to you. Today we stand before you extending greater co-operation towards the retail trade and seeking greater co-operation from you. Already the campaign has carried sufficient conviction and displayed sufficient confidence to win your respect and support.

As I have said, the campaign belongs to you as much as anyone else. We want you to use it as freely as any subscriber on our list. In fact, we want you to become a subscriber insofar as it can affect your own local community and do so with the feeling that you have the backing of a big strong national campaign behind you.

(Continued on page 65)

Workshop Need Not be Unprofitable

Various Methods of Checking Repair and Other Work Going Through Workshop Outlined in Discussion—Items to be Included in Overhead Expenses—The Bonus System of Paying Retail Salesmen

THE QUESTION BOX discussion on the second day of the convention was under the direction of George May, Toronto, and was opened with some lively exchanges on the question of efforts to prevent wholesalers from doing a retail business. H. N. Joy, Toronto, thought the association should go on record as opposed to this policy, F. R. Jackson, Toronto, wanted to know where the line was to be drawn as between wholesalers selling to manufacturers, contractors, etc., apart from an ordinary retail business. It was the opinion of the chairman that the larger accounts could not ordinarily be handled by retailers and that it was the smaller accounts to which the retailer was entitled that was chiefly in the minds of association members. F. R. Jackson, told how he had recently visited a Toronto wholesale firm to buy 3 doz. bushings, and someone else was buying one. W. Rankin, Ottawa, thought that in view of long-standing policy of certain wholesalers in selling chiefly to blacksmiths, factories, etc., that the question was somewhat belated. Mr. Thompson, Owen Sound, suggested the association memorialize the Wholesale Hardware Association to do everything in their power to curtail retail business by their members.

BEST WAY TO GET RESULTS FROM ADVERTISING FOLDERS ETC. FURNISHED BY MANUFACTURERS

Direct mailing lists were suggested as one of the most effective means of distributing such literature. Chairman May outlined a plan which his firm had used, namely to place such literature in an ordinary envelope addressed to Mr. and Mrs. Hardware User, West Toronto. These envelopes were left by boys at the houses and it was found that the circulars being clean and the envelope rousing a certain curiosity, they received much attention.

HOW MUCH SHOULD A DEALER PAY FOR GOODS HE TAKES OUT FOR HIS USE. ALSO FOR THE STAFF?

One retailer said he charges such stock at wholesale prices when taken out by himself, and he allows a special discount to staff members. Another merchant charged himself and his staff full price because he pays himself a salary from the business. Mr. McGregor, Caledonia, pointed out that if merchants charge themselves retail prices they are paying tax on the supposed profit they are making. A Fort William dealer thought merchants had just as much right to charge themselves wholesale prices as for someone else to go direct to the jobber to buy.

"We have always charged goods to ourselves and employees at cost laid down," said President Mills, "but the Sales Tax is changing the situation."

Chairman May pointed out that his policy was to give a concession of 20% off regular retail prices to any purchases by members of the staff. This left 10% to cover cost of the goods. It is not applicable to specially priced lines.

WHAT SHOULD PROPERLY BE INCLUDED IN OVERHEAD EXPENSES?

R. Hawkins, Smiths Falls, thought every expense in operating the business should be included, naming rent, interest, taxes, insurance, help, cartage, etc. Enquiry as to whether interest on investment could be included in overhead expense, but it was pointed out that this might be done to establish expenses, but that it could not be allowed in making out Income Tax returns. Mr. Hawkins stated that donations to charities could not be included as business expenses in connection with Income Tax statements and suggested that such be included as advertising. F. B. Smith, Belleville, and other merchants stated that they followed this plan. An Owen Sound merchant outlined the plan of a Retail Bureau of the Board of Trade which centralized contributions and passed on the bona fides of the various interests seeking contributions. In this way hundreds of dollars were saved to local merchants who merely showed a card which prohibited them making donations to any but those authorized to collect, by the Board of Trade.

"If you want to know where you stand at end of the year you must put every thing into overhead, even to waste," said Mr. Mills, "or your books will not show your cost of doing business and you will be unable to ascertain the necessary mark-up to allow yourself a fair margin of profit."

Replying to an enquiry as to whether Income Tax could be put in overhead expense, it was pointed out that for correct information this should be charged to expense, but it is not allowed in connection with taxes.

WHAT IS THE AVERAGE WAGE PAID CLERKS, TINSMITHS, PLUMBERS?

F. R. Jackson, Toronto, stated that he had found the bonus system to be a good one. He follows the plan of paying 5 per cent. over an average amount of sales as fixed for the whole business. A retailer from Northern Ontario stated that he had followed this plan and found that he subsequently required more salesmen to look after the business and this added expense, along with the 5 per cent. bonus resulted in him being the loser. He believed it better to pay a good salary to salesmen. Mr. Jackson replied that this had not been his experience and suggested that the fixed amount of necessary sales could be advanced under those circumstances to take care of increased overhead.

A retail salesman pointed out that working on a bonus system he had employed spare time to stimulate business and had been very successful. This plan made unnecessary any increase in the overhead expense of his employer. There were four salesmen in this store and a minimum of $35,000 was set for the store, over which an allowance of 2 per cent. was made.

Another retailer enquired who would look after the stock when everyone was hustling for business on the bonus basis. Chairman May pointed out that of 7 men on his staff everyone had their particular duties and it was up to the head clerk to see that the store was kept in order and that each one did his part. Another suggestion was that retailers pay their salesmen a bonus according to the profits, such as is done by the banks. He had followed this plan, paying from 4 per cent. to 6 per cent. of such profits to salesmen and he found that their energy did not lag through receiving this only once yearly.

Still another plan as followed by a retailer was to pay a fair living wage to each man, and then pay a bonus each six months, a short one in the spring and a long one in the fall.

DEFINITE INFORMATION REGARDING WORKSHOP IN THE STORE

On this subject Mr. Christie, stated that the workshop in connection with his business pays a fair margin over expenses. Each workman is provided with a book and time sheet, pay cheques being made up from information on the time sheet. On repair work going through the store, a perforated tag is tied to the article, one-half having space for workman's initials and details of time spent on it, materials used, etc., the other half is turned in to the office. A book is also kept with a record of each man's earnings by the month. On contract work a special contract book is kept and everything is figured closely. When the job is done a complete record of workman's time and materials used, is available. Figuring each job separately and allowing for a fair margin of profit, Mr. Christie thought there was little ground for the common complaint

Economics As Applied To Business

Closer Relation Between Business Men and University Training in Science of Business Sought by Educational Institutions—Teaching Business Science Would Greatly Assist Young Men Entering Commercial Life After Initial Apprenticeship

Address by Professor W. C. Clark, Director of Courses in Commerce, Queen's University, before O.R.H.A. Convention

THE RELATION of the university and the business man in connection with education along economic lines, was ably outlined by Professor W. C. Clark, Director of Courses in Commerce, Queen's University, Kingston, Ont., before the Convention.

Prof. Clark pointed to the great need for a better understanding between educational institutions and business men as to ways in which they could be of mutual help and predicted that the trend in the future would be toward the higher education of men in the business science.

"Some men think experience is the only teacher" continued Prof. Clark. "There are many good things to be said about the school of experience but the trouble is that it is immensely expensive. It takes a lifetime before you can graduate from the school of experience. The fact that you delegates have been at the convention for three or four days bears out that fact. You believe that there is a shorter way of finding out what you will eventually find out in your business in life's career. By the interchange of ideas you can learn a lot of what others are practising, and that is the basis on which training in the universities is founded. Business principles can be taught. The university can develop the power of analysis which will help enormously in later life, but no training in universities will eliminate the initial apprenticeship in business. You have to start right at the bottom and if a college training means anything it will be that it will enable more rapid promotions afterwards.

Business a Science

"Business is a science just as is medicine, etc., and training in business subjects is just as cultural as the allegedly cultural subjects. Business is not run on a hit and miss basis nor by any rule of thumb method. There is a good deal of instinct in it, there are hunches, but they are the result of a good deal of training.

"Causes lead to certain effects. You will have to allow for varying conditions. That is what the university strives to help you in. It is difficult to develop the principle. The factors business dealt with are more complex than in engineering, etc. You are dealing with human nature and prices. There are more causes in prices than in anything. The conditions under which these factors operate are most diverse. There is therefore all the more need for it to be taught in the university.

Problems Not Insuperable

"These problems are not insuperable, it is possible to develop a science of business. To do so one must have a scientific point of view, you must get at the facts whatever they may be, you must observe those facts, tabulate them and measure them, and then apply the principles of logic.

"We want to take your younger men and give them a broad training to develop their scientific point of view and their powers of analysis. The first two years of the course is devoted to arts subjects, and the second two-year period specializes on business training."

Explaining something of the work of the university, Prof. Clark stated, "we take the business cycles and give the causes for these periods. These are treated as history. Bookkeeeping is an important tool of management. Statistics represent another, and training in finance is important. Speaking of finances, look at the financial mess which exists in Europe to-day. No country can be prosperous with a large part of the world in such a condition."

Something of the work of the courses in

PROFESSOR W. C. CLARK

Director of courses in commerce at Queens' University, Kingston, Ont., who gave the convention delegates some interesting sidelights on the work of the university in extending business education.

being addressed by business men, was explained, it being shown that business men's problems were solicited for the consideration of the students. Cases were cited where the students by applying the principles of logic and considering all the fac were able to arrive at as quite an intelligent a solution as that established by business men long trained at their particular line.

OUTLINES LARGER SPHERE

tinue to work for it and with it, in the endeavor to see the association go on to greater things. This has been a wonderful year to me, and for the opportunity of serving you. We have not accomplished all that we would have liked to, but we have done our best. Service is the keynote of the association and the best members, the most successful business men, and the men who get the most out of life are the men who serve their community and association and interest themselves in the welfare of others.

It is this kind of service that paves the way for useful co-operation, which after all, is service in its most valued application."

"SAVE THE SURFACE" CAMPAIGN

(Continued from page 63)

What has brought about this desire? The objects of the campaign and the arguments used have revealed, in an organized way, possibilities for the sales of paints and varnishes that were not dreamed of before its inauguration. The objective of the campaign has created a greater family feeling of common interest in the paint and varnish trade, but the family is incomplete without the retail distributor. He is needed in this family as he needs us in it. Perhaps if we add the word "family" to the sometimes overworked word "co-operation" we can add new zest to the furthering of our common interest.

Both the work and what has been accomplished already by the campaign has made the situation such that the retail distributor can more readily use it and make money out of it. We have likewise reached the stage where he must play a much more prominent part in its development if he is to obtain his rightful share from it.

I take it, gentlemen, that we are not here to-day to pass mere platitudes or, in common parlance, to kid ourselves or each other, for this reason, I shall be perfectly frank in saying that the "Save the Surface" campaign will be of little use to the man who is a mere order taker or whose sole function is to ring up the cash register.

The Go-Getter Type

But, it can be a mighty useful instrument in the hands of the man who is properly functioning as a merchandiser of paints and varnishes and the other lines in his store. The "Go-Getter" type of retailer and the fellow who is wearing out shoe leather beyond his counter instead of shining his trouser seats behind it, can use this campaign and its arguments towards getting bigger paint and varnish business.

I don't think there is a town in Ontario but what the National "Save the Surface" Campaign has had its effect upon. Whether it is Vankleek Hill, Cochrane, Wiarton, Amherstburg, Fort Erie or Hamilton, more or less of their inhabitants have seen its advertisements and have had more or less conviction brought to them by its arguments.

But like all other articles advertised, there must be a source of immediate supply before that conviction can be realized in bringing action. We'll pick on Jones, who might live in any town in Canada. He has become convinced, through the unique arguments of the "Save the Surface" Campaign, that he ought to paint his property. The retailer who has properly linked up his paint selling with the campaign stands a pretty good chance of getting Jones' business. On the other hand, if there is no local linking up, Jones' enthusiasm may die a natural death and the business you might have obtained is lost.

But there's another man by the name of Brown who has possibly seen the national advertisements but remained unconvinced because these were not linked up with local or immediate interest in his community. If he had seen his local man's name linked up with it the idea would have gotten across with him. There are hosts of Browns of this sort in every community, and it is with such men as these that your great responsibility as retail distributor rests. We want the weight that your name carries in your own community, added to the effect of the national campaign to bring such business to your store.

I need not emphasize the fact that postwar conditions have made selling a real salesman's job to-day. Merely inserting advertising in a national campaign is not going to sell goods or an idea. We have got to have the direct personal contact of the salesman, be he manufacturers' salesman, jobbers' salesman or retail clerk. We have got to back up our advertising with direct convincing word-of-mouth salesman-

Manufacturers as Hosts to Retailers

Hamilton Manufacturers Tender Banquet to Delegates to O.R. H.A. Convention—Lieut. Governor Cockshutt Deals With Some Current Problems—Robert Hobson Outlines Iron and Steel Situation—Freight Rates Must Come Down

ADDED interest and honor was attached to the banquet tendered the Ontario Retail Hardware Association by the manufacturers of Hamilton on Thursday evening, by the presence of His Honor, Lieutenant-Governor Cockshutt. In introducing the guest of the evening, the chairman, Robert Hobson, president Steel Company of Canada, outlined something of his early business dealings, dating back twenty-seven years, at which time he first came in contact with the present lieutenant-governor. Since that time they had been firm friends.

"His Honor was picked for his present position from among our manufacturers, he is a gentleman of more than average ability and a man who rises to every occasion," said Mr. Hobson.

In reply the lieutenant-governor spoke of past happy relations with the business men of Hamilton and expressed his strong belief in conventions as a splendid means of finding out what is best for whatever one is engaged in doing.

"We have many anxieties regarding the future," he continued. "At present we seem to be rather under a cloud but we will not always be there, for it will drift away and the sun will shine and we will feel better for the cloud having been there. As a country and as a province we have great reason for satisfaction in the extent of our natural resources and our transportation of those natural products. In Ontario we have perhaps more natural resources than almost any of the other provinces."

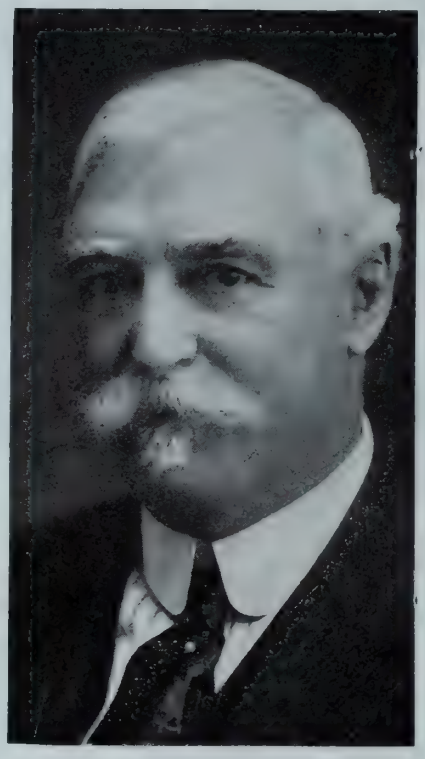
Some Problems to Solve

The situation in regard to the various resources was outlined, the need for conservation of forests being emphasized. The mining possibilities of the province were said to have been but barely scratched and it was the opinion that ultimately it would be found that Canada had unbounded resources in minerals. Fisheries were also described as marvelous, but here, too, the question of improved marketing and transportation facilities was pointed to as a necessity, as well as steps for replenishing the supply of fish in our waters. Transportation and marketing facilities were also a big question in connection with successfully handling the great fruit and vegetable resources.

"These are the problems which must be dealt with," said His Honor. "Transportation is simply a question of having proper facilities to market what we produce. You can build railroads and radials, but what is the use of them if you do not have proper cars on them to handle the products. Organization and proper equipment are needed.

"We have these dull days and we will continue to have them as long as we live. Conditions are different to what they have ever been before. There is in this country at present a young manhood and young womanhood that has arrived at that stage since the war has ceased. They have not had the advantage we have had because of the disturbance of business, therefore we ought to look carefully to see that these young people are salved. We should give them help and encouragement. We are living here for one object, to make ourselves friends for the friendless."

In thanking Lieut.-Gov. Cockshutt for his address, Mr. Hobson, as a director of the C. N. R., suggested that steps would have to be taken to provide better rolling stock facilities to handle the country's products.



ROBERT HOBSON

President Steel Company of Canada, who presided at the manufacturers' banquet to the retailers' convention and reviewed the iron and steel situation.

In the temporary withdrawal of Mr. Hobson, H. P. Hubbard, E. C. Atkins & Co., assumed the chairmanship and called upon Norman Slater, of N. Slater & Co., to propose a toast to Our Guests.

Absence of Gloom

Mr. Slater extended a welcome on behalf of the Hamilton manufacturers, remarking that he had particularly noticed the absence of any gloomy expressions on the faces of hardware men at the convention.

"The past year has been very trying," said Mr. Slater, "but in the older days our fathers had to deal with trying experiences with less than we have to-day and it did not hurt them. The present situation has its bright spots and the clouds now are starting to roll away. If we didn't have any troubles we would be weaklings. We have nothing to complain about when compared with other countries. No country in the world is in better shape for a revival of trade than is Canada, and the greatest asset is our people, who have the spirit of optimism.

"Your stocks are getting low, you are getting rid of high-priced goods and you begin to see daylight. The manufacturers have had a year of declining values and it is one year in which we can say we have sold you goods at less than cost.

"We are glad to have had your convention in Hamilton and I am glad that Nelson Mills, a personal friend of mine, is president. Knowing him as I do I feel sure you could not have anyone who would look after your interests any better than he. I am thankful I was brought up in the hardware business. One particularly good thing about it is the scarcity of failures, which may either be attributed to the profits made in this business or the early training the merchant gets."

Nelson Mills Replies

Replying to the "Toast to Our Guests," Mr. Mills extended the appreciation of the association for courtesies extended by the manufacturers of Hamilton each year, and was specially glad to note the interest taken by these manufacturers in the work of the association. He mentioned the changed policy which now existed in the organization in regard to its relationships with other branches of the trade, stressing the realization of the need to meet the big men of the various branches of the industry.

On behalf of the Canadian Wholesale Hardware Association, President Thomas Birkett spoke briefly, expressing the desire to attend further meetings of the retail organization.

C. Birge, vice-president, Steel Company of Canada, hoped that the association would continue to make Hamilton its convention centre and assured the members of the utmost co-operation of Hamilton manufacturers.

Reviews Iron and Steel Situation

"A year ago I talked in an optimistic manner," said Robert Hobson in an address summarizing developments in the iron and steel industry. "I just slipped a little cog at that time. Trade has not come back as soon as we anticipated, but I am just as optimistic to-day as I was then. Since 1896 I have seen ups and downs in business and I never failed to see the ups beat the downs. If I was to get an absolutely honest confession from you gentlemen, you would confess that your shelves are very bare. They are bare in the U. S. and other countries

as well. You are going to be forced to buy and we are ready to meet you.

"The potential business in this country is enormous. Freights are much too high (and I am not speaking as a director of the C. N. R.). Our rates on coal are a little over 100 per cent. higher than in 1914. These freight rates must come down, but before they can come down railway employees must meet conditions as they are to-day. Also take miners for example. A coal miner recently earned $793 in a month. This is the type of worker who is going to strike on April 1. This miner bought an automobile and there was only eight miles of good road in that district. He spent the next month driving up and down that eight miles of roadway. Building labor also has to come down to reasonable levels.

"In the steel and iron business to-day, with the present freight rates and steel selling as it is, if we got back to 1914 levels steel would have to sell at about 75 cents per cwt. Steel has gone just about as far as it can go, and the trade is about due for a big business revival. I am not going to prophesy beyond that we are on the eve of good times. Wall Street is composed of the cleverest lot of men in the world. You watch the quotations and you watch the price at which seats are sold on the exchange. I notice U. S. Steel, after having gone nearly twenty million dollars behind last year, went up to 92 on the stock market to-day. Something is going to happen."

Basic Factors of Revival

James Hardy, secretary Canadian Wholesale Hardware Association, thought there was ground for optimism in the improvement of exchange, the conclusion of the peace conference, the settling of the elections and the considerable reduction which has taken place in prices.

H. P. HUBBARD

E. C. Atkins and Company, Hamilton, who acted as temporary chairman at the banquet during Mr. Hobson's absence.

George May, Toronto, somewhat prematurely introduced as the new president of the Ontario Retail Hardware Association, expressed appreciation for the hospitality shown by the Hamilton manufacturers and described the relations as an excellent foundation for lasting and helpful friendship.

S. H. Alexander, Wood, Alexander & James, spoke briefly of the advantages of such conventions and affirmed the faith of his firm in the future of business by stating that a most complete stock was being maintained.

Secretary W. F. Macpherson expressed gratification at the steady growth of the association and thought the retailer had fulfilled his proper function in the readjustment. He gave an outline of the aims of the association and assured Hamilton manufacturers that their city would receive every consideration in deciding upon next place of meeting.

A goodly representation of both retailers and manufacturers was in attendance at the banquet. Among those at the head table were the following: Lieut. Governor Cockshutt, Robert Hobson. N. Slater, J. Hardy, C. A. Birge, Nelson Mills, Geo. May, T. Lawson, Rice Lewis & Co., S. H. Alexander, W. F. Macpherson, Thos. Birkett, H. P. Hubbard.

Splendid music and other entertainment was provided and with a sumptuous repast, combined to provide a most enjoyable evening.

MFRS. TO TOUR WEST INDIES

Under the auspices of the Canadian Manufacturers' Association, a delegation, consisting of nineteen Canadian manufacturers, recently sailed from Halifax, on a tour of two months duration through the West Indies, in an endeavour to promote trade relations between those islands and the Dominion. On their return a report will be prepared, with any recommendations thought beneficial by the delegation. The party will be accompanied by Chester Payne, secretary of the Commercial Intelligence branch of the Department of Trade and Commerce at Ottawa.

Hardware Mutual Fire Insurance

Mutual Insurance Companies Have Not Only Paid Large Dividends to Policy Holders, But They Have Accumulated Substantial Reinsurance Reserves—Decrease in Board Rates Ordered in Some States—Loss Ratio One-Half of That of Stock Companies

Address by C. L. Clarke, Winnipeg, Canadian Manager Canadian Hardware and Implement Underwriters, before 17th Annual Convention Ontario Retail Hardware Association, Hamilton, Ont.

THE formal introduction of a representative of the Hardware Mutuals is hardly necessary as so many of you have our calling cards in the shape of policies. It seems to me, such being the case, we can plunge immediately into our discussion of Hardware Mutual Fire Insurance.

In the first place, gentlemen, why was it necessary to organize a mutual company for hardwaremen? Twenty years ago there were scores of stock companies ready and willing to do business with the hardwaremen. In fact these same stock companies were doing business with the hardwaremen and of this fact none were better aware than the dealers themselves for they were the ones who made out the checks in payment of the premiums. The only drawback to the stock companies system was that the hardware men knew they were being charged too much for their fire insurance protection. The rates were out of proportion and more than the business warranted. The result was inevitable and is now insurance history. Nine hardware men of Minnesota got together in 1899, guaranteed the necessary $20,000 to obtain Articles of Association from the State and in 1900 the first policy issued by a hardware mutual was issued by the Retail Hardware Mutual of Minneapolis.

You have already been appraised of the success of this company; how the members agreed to pay board rates and take back at the end of the year whatever saving was made; how at the end of the first year a dividend of 25% was declared; how that dividend was gradually increased until in 1908 the company was paying a dividend of 50% and has continued to pay the same dividend every year since. Also you know that a similar organization was launched in Wisconsin in 1903 and that in 1908 this company paid a dividend of 50% which it continued unfailingly to do every year since. In 1907 the organized implement dealers of Minnesota made the Minnesota Implement Mutual their official company and in 1913 this company started to a pay a dividend of 50%. These companies are the ones that have extended their facilities to you hardwaremen and I am firmly convinced that you have the foresight of the early members to thank for the financial strength of to-day. These members could have taken larger dividends years ago but they started out to make their companies leaders in the field and this they have certainly done.

Financial Backing

It is not, however, the savings which these companies make for you that I want to particularly emphasize. It is the financial backing of the companies and the deductions to be drawn from their success. Is it not remarkable that these three companies in addition to returning such large dividends have accumulated a reinsurance reserve of $2,251,000, and a surplus sufficiently large to guarantee the safety of the companies and the prompt payment of losses. The companies started from nothing and in the short space of twenty years have accumulated assets of over $4,000,000 and a net cash surplus of over $2,000,000. After all you buy insurance for protection and safety is the first consideration, saving the next. The net cash surplus of an organization is its strength for that is what it must fall back upon if losses are abnormal. By charging, therefore, the same premiums as board companies and returning a dividend of 50 per cent. at expiration of the policy we have a surplus which belongs to our policy holders of two millions over and above all liabilities. Where would that two millions of surplus be today were it not for the Hardware and Implement Mutuals? Why, in the coffers of

C. L. CLARKE

Winnipeg, Canadian manager, Canadian Hardware and Implement Underwriters, who spoke to the convention on the subject of mutual fire insurance.

the stock companies to be sure, instead of belonging proportionately to each and every policy holder. Hence, deduction number one—board rates on hardware stores are still too high.

Order Decrease in Board Rates

Please do not misunderstand me in my references to the stock companies. It is necessary that I refer to them for the purpose of comparison for we are using their figures as a basis to work. Their aim is to maintain excessive rates, ours is to reduce the net cost for you. They want you to help pay for losses on more hazardous risks. In support of the latter statement I would call your attention to the recent order of the Superintendent of Insurance of the State of Kansas to the effect that the various classes should pay their own way and that one profitable class should not be called upon to pay for the losses of classes which have shown a high loss ratio. Kansas ordered increases of 40 per cent. on steam railway properties, from 50 to 75 per cent. on automobile business, 15 per cent. on mining and oil properties and 20 per cent. on crop insurance. They ordered a decrease of 20 per cent. on mercantile business which is the hardwaremens class. We commend the Kansas department for its action but really, gentlemen, it is 20 years behind the idea of the Hardware Mutuals and their slogan "Hardware Insurance for the Hardwareman." Then again we have the order of the Missouri department ordering decreases averaging 15 per cent. on all classes. Nearer home we have the Ontario department hot and heavy after the board companies demanding that they reduce the cost of acquiring business with proportionate decreases to the purchaser. Do these eruptions in the business world mean nothing to you? Can you not see the reaction against stock company control? I wish I had the time to draw back the curtain and display the machinations of the stock companies. How at every turn in the road they are trying to block the irresistible advance of the mutuals not only by vile propaganda but by lobbying legislation. What a howl went up from their camp when a mutual man was put at the head of the newly created insurance division of the United States Chamber of Commerce. Figures were hastily prepared by them in an endeavor to show that the premium income of the mutuals was so small as not to warrant the elevation of one of their men to a position of this importance. Think of it! The mutuals were very glad to show their real strength and herein lies food for considerable thought. The mutual man stayed at the head of the insurance division.

The old order must change. While other companies have been bewailing the loss of premiums our companies have been experiencing an increase of business. Any company which held its own last year as far as premium income is concerned did remarkably well. I am glad to say to you that our companies made an increase in premium receipts last year of approximately $400,000. Why was it? Simply because the dealer is looking closer into his personal economics at this time than ever before. Conditions compel him to do so. If he can reduce his fire insurance overhead by 50 per cent. why on earth should not that be the first reduction in his general overhead. Many of our policy holders reduced their insurance on account of decreased values. This decrease was recovered and some added by placing on our books dealers who during the war were content to let well enough alone. But necessity has forced them to decrease running expenses and our companies have thereby profited.

Loss Ratio on Half of Stock Companies

The question is often asked after we have presented the results of a year's operations—How do you do it? There are a number of courses we pursue in order to save you 50 per cent. Probably the greatest is the question of losses and the next that of expense. I can only say with reference to the loss ratio that deduction number one becomes again deduction number two—the board rates are too high. Year after year our loss ratio is about one half that of the stock companies. Take our Canadian experience for 1921 as an example. The estimated loss ratio for all companies in Canada for the year 1921 is 65 per cent. Our loss ratio on Canadian business was 30 per cent. The estimated expense ratio for all companies in the United States and Canada is 45 per cent.

Two Hardware Stores Outsell Five Garages In Auto' Accessories

Definite Testimony Given in Question Box Discussion as to Ability of Hardware Merchants to Sell Tires and Accessories—Turning Business from Credit to a Cash Basis—Some Methods of Collecting Slow Accounts

MANY helpful points were brought out in the Question Box discussion of the third day under the chairmanship of H. N. Joy, Toronto.

On the subject of best ways to handle slow accounts without offending customers, Mr. Allin, Lindsay, Ont., said, "You have to keep such accounts off your books if you want the people on the right side in your business. If you give a man credit you drive him away to a certain extent."

Concerning the average percentage of loss on credit accounts and methods of collecting tough accounts, Mr. Smith, Cornwall, stated that he had written off $2,100 in five years, of which amount $1,600 was one lump sum. A scheme by which he forced payment on a slow account was to send a bill showing an amount on the next sheet in the ledger instead of the right one, and he found the lax customer was quick to come to the store to have the mistake corrected, and frequently paid on the spot.

Mr. Barton, Port Arthur, Ont., does a credit business of from 70 to 80 per cent. of his total trade and his losses on credits have run from 2 to 4 per cent. according to conditions. We grant credit, but if the customer goes on a cash basis we give them 5 per cent. off, said Mr. Barton. F. B. Smith, Belleville, finds red stickers on accounts, with a message gradually becoming more to the point, an effective way of bringing payment. He finds it better to offend a customer whose account is long overdue, if necessary, and his experience has been that few, if any, customers have been lost in this way. Secretary Macpherson reports that in twenty years he did not lose over $400 on credit accounts, but admitted that it was largely governed by the locality. George May makes an allowance each year of 1 per cent. for bad debts but finds it rarely reaches that amount.

Small Loss

George Mathewson, Toronto, does a credit business of from 60 to 75 per cent. and his losses have not amounted to 1 per cent. Mr. Smith, Cornwall, does a large business with farmers and says he has yet to lose a cent on accounts. Mr. Joy told of his experiences in northern Ontario in putting a hardware business on a cash basis. In a country where nearly all business was on credit, he increased his business on a cash basis by advertising that lower prices could be given by eliminating the possibility of loss through credit accounts.

Mr. Allin, Lindsay, Ont., said his firm had been on the cash basis since September 1. This had been done largely because of ill-feeling aroused with certain customers over a disinclination to grant credit, and his experience with a large farmer clientele has been most satisfactory. The change was advertised broadcast and letters sent to those with accounts on the books. The business in the following two months was double that of the same months in the previous year. All phone orders were sent c.o.d., and many such orders were on hand before nine o'clock of the first day the cash basis was started. Prices on all lines were reduced approximately 10 per cent. To-day there are nearly as many accounts on the books but they

H. N. JOY

West Toronto, Ont., who led the Question Box discussion on the third day of the convention.

are with builders, painters, people building houses, etc., and do not represent the former small accounts.

Monthly Accounts to Telephone Customers and Those Building or Painting

On this subject George May stated he did a good deal of telephone business and that it was all c.o.d. Builders and painters are not given credit. Mr. Joy thought the cash principle would be violated if 'phone orders were allowed credit.

Selling Auto Supplies, Tires, etc.

On this subject, while a number of merchants were inclined to question the advisability of handling these lines, the testimony of a number of other merchants was very definitely in favor. Wm. Kerr, Dundas, Ont., said there were two hardware stores and five garages in his town and the hardware stores sell many more accessories than the garages, except in tires.

K. I. Thompson, Owen Sound, does not handle accessories but has a large tire business. A good trade was done the first year, the second year six times the business of the first year was done, and the third year has doubled the second year's business. The sale of tires has been a huge success. Mr. Thompson stated that the garage people were wanting them put off the list because of the keen competition. Mr. Thompson said that he had always maintained prices and sold for cash. The success is attributed partly to the complete range of tire sizes carried. Frequently orders are received from great distances because of the ability to supply all sizes.

THE BANKER AND THE RETAILER

(Continued from page 61)

operations he has to provide for cash expenditures which never cease until goods are sold. In most cases he must pay cash for his raw material and his fuel. His pay roll of wages faces him week by week and must be met. There is no possibility of asking credit here. In some lines where wages are the most important item of cost, getting the money to pay the wages is the most harassing of all financial pressures, much greater than meeting accepted drafts, for the drawers of these can be approached for a renewal in a pinch, while a request to a lot of working men to defer payment of wages is quite impossible. In such circumstances the manufacturer must have recourse to his banker.

Under the Canadian Bank Act special facilities are provided to enable him to give security upon the goods, wares and merchandise manufactured or procured for manufacture, so that he may meet this difficulty. This has been a tremendous factor in building up the business and prosperity of this young country where capital is naturally scarce, and accumulated wealth is not pressing for investment as it is continually in older countries.

Retailer Doesn't Need Bank's Advances

It is clear, therefore, that a merchant, having the power to buy goods at all times on credit, has no reasonable ground for asking regular advances from his banker. He is a foolish man who starts in business without some capital, and surely the minimum should be enough to take care of freight and customs duties, and to keep him from being wholly dependent upon the good will of others. It is therefore that loans to merchants are considered as irregular in the nature of things, and only to be granted in exceptional circumstances.

I have already stated that the Bank Act permits a manufacturer to give security upon his product, but it would be most improper to allow a merchant to do so, for a large part of a merchant's stock has usually been bought on credit. The goods on his shelves are probably not yet paid for, and therefore it would be most inequitable to allow him to pledge these for advances, or for the bank to count upon them.

There are, of course, circumstances, generally seasonal, which make it perfectly right and proper for a bank to grant temporary advances to a merchant, but they should never last more than two or three months at the most, and where they are granted to a firm, the endorsement or guarantee of each individual in it should be

(Continued on page 92)

HARDWARE MUTUAL FIRE INSURANCE

(Continued from page 70)

yet our companies ran true to form with approximately 20 per cent. As to the expense ratio on our Canadian business, I would say that it was considerably above normal in 1921 but that is easily accounted for in the equipment of our chief office in Winnipeg, advertising and the hundred and one necessary items in the opening of a new field. Admittedly a company cannot expect to experience a normal expense ratio the first year in a new territory. But the result of our January 1922 business indicates that when the ratios are computed for 1922 there will be no great difference.

Referring again to the question of losses I would like to point out that our inspections have a great deal to do with keeping down the number of fires. However, the best inspector is yourself and as a policy holder in this organization you are vitally interested in the amount of losses both individually and collectively. Individually because it is the individual losses which make up the whole and whole is the figure upon which we compute our experience. Therefore it behooves us all, and this applies to everyone whether applicable to our insurance or not, to watch your own risk carefully. Clean it up daily, keep the rubbish and packing out of the basement. Allow nothing to accumulate which would assist the spread of fire. By all means take particular care of your oils. Do not let them drip on wood floors but provide, and you can do so at a very moderate expense, a drip pan for every barrel. You know you can fill a gallon measure with coal oil, place a lighted match on the surface and the only result will be that the match will burn itself out, but let that coal oil soak into wood or waste and water will not put it out. If waste is necessary have an enclosed can purposely for it. Have your electric wiring checked over periodically. If any of it is supported by nails take it down at once for there is a fine place for fire to start. Eventually the insulation of the wires will wear off and when the wires come in contact with the nail short circuit results and a fire is started in no time. If necessary to suspend wiring do it with twine. By being individually careful you keep down the enormous fire waste of this country and reduce your fire insurance cost as the same time. Our representatives are always more than glad to go into these matters with you and will welcome your inquiries.

An Important Point

We come now to a point over which there has been much needless discussion, that is the question of our mutual policy conditions reading as follows: "The contingent mutual liability of each member of this company for the payment of losses and expenses not provided for by its cash fund, shall be a sum equal to and in addition to one-third of the cash premium written in this policy." That means a total assessment liability of one additional premium or one-third to each company. Reflect for a moment on the reason for inserting this clause in our contract originally. When the companies were young the various policy holders required definite assurances that if the premium deposits were insufficient to pay the losses that should they be one of those unfortunate enough to suffer a loss they would know they could collect and in purchasing the policy could feel absolute safety in so doing. What was the result. Instead of being compelled to collect additional funds under the option of the policy conditions it was found that the deposits based on the board rates more than cleared the expenses and losses and that dividends could be paid even after setting aside a specific sum for surplus. Still the clause was considered a safety valve and even though the surpluses of the three companies individually are so large now that non-assessable policies are permitted them by the States in which they are domiciled we still feel that the clause should remain for your individual protection. I tell you frankly, gentlemen, that if the time ever comes when it is necessary for us to use that clause and make an assessment you will find the largest stock companies in the hands of receivers. Let me read you what former Commissioner of Insurance, Hon. F. H. Hardison, of the State of Massachusetts, has to say on the subject: "Is the liability to assessment in a well established and well managed full advance premium mutual company probable? I challenge the production of any records that it is. It is no more probable than that a well established and well managed stock company will be unable to pay its losses. Neither the assessment nor the insolvency will come without a catastrophe, and seldom, under modern methods of distribution and reinsurance, even if the catastrophe gets in its dread blow. Hence I hold that the liability to assessment in such a mutual company is negligible." Any competitor that uses our mutual policy conditions for their own gain immeasurably weakens his own case.

SUCCESSFUL ADVERTISING

(Continued from page 62)

plainly in your window. Neat price tickets are a tremendous help to sales. Here again the chain stores have established a very definite policy and I can tell you that chain stores have to be operated mighty efficiently if they are to make money. I have talked to chain store executives and I know in every case they emphasize the importance of price tickets. Even in such an exclusive shopping district as Fifth Ave., New York, the price ticket has its place. A series of experiments was carried out in that high priced shopping district and the window which displayed the prices of the goods it contained was the window which was most profitable to the merchant. The day of marking your goods with hieroglyphics and keeping their price a dark secret is gone by. Well displayed and priced goods in your store will sell themselves. Frequently your customer is timid about asking prices. He does not want to bother the clerk until he has made up his mind as to whether he will buy or not and so he passes out of the store without the knowledge he wishes to have and he may never come back. The price ticket may make the sale on the spot without any effort on your part. I do not mean by that only cut prices should be advertised—far from it. Study the use of the price ticket as you will find it an effective ally in your efforts to build up sales.

Build on Primary Basis

And now we have covered briefly, the first essentials in advertising your business. Get them right and you have laid a firm foundation on which to build your other advertising and get results. What is the use of advertising in newspapers, in circulars or by signs to attract people to your store if, when they reach there, they find a sloppy and untidy establishment, goods poorly displayed, or indifferent or discourteous clerks. You are simply bringing that customer to your store to impress upon him that your place is a poor place to shop and then you turn him loose with that impression, which may remain fresh in his mind for many a long day and by him be passed to others.

And now that we have our inside organization working along proper lines, what else can we do to advertise our store. If we live in a newspaper town or city, naturally you will expect to use your local paper, so let us consider some of the essentials of successful newspapers advertising.

First of all, is the matter of space, as on that depends the amount of money spent. One of the important features in any type of advertising is persistency. If you are going to advertise in a newspaper there is no use in being in to-day and out to-morrow. Adopt a fairly consistent schedule so there will be some continuity to your advertising. Let us take smaller space and use it fairly frequently then large space only occasionally.

Then, as to copy; why do people subscribe to newspapers? Because they wish to read the news. Then just inject that same idea into your advertisements. Make them newsy, chatty, readable and make your statements definite. Don't simply say, "We have a fine line of pocket knives, come in and look them over." Or don't even be satisfied to say, "We have a fine line of pocket knives, priced from 25 cents to $9.00." In that case you are neither newsy or definite. For instance, "At 25 Cents, we have some one-bladed knives which are excellent value at the price, but, of course, if you want a good serviceable knife you have to pay more for it. At 95 Cents, we offer a particularly good line, two blades, fine Sheffield steel, made by one of the world's most famous makers. It is a dandy knife for a boy or even for the man around the farm. We think it is one of the best values we have and therefore, we mention it here. A good, serviceable knife at 95 Cents, and so on." Study your proposition and you will find lots of interesting newsy little items in regard to the goods you handle. Then don't be afraid to give the prices.

The reader will think to himself. Ah! a good knife at 95 Cents. I think I will drop in and get one of those and when you have him in the store, think of the opportunity you have of selling him other goods.

Truth in Advertising

Then make your advertising truthful. Don't exaggerate, don't overstate. If a product is at a low price, don't give the man the idea that he is receiving a high-grade product at half the usual price. It may be excellent value but it may not be as good as it should be and if the customer wants the best he has to pay a higher price. Truthfulness in your advertising establishes confidence, and the confidence of the community in your business and in your integrity is a tremendous asset to you. When you get it by hard work, be very jealous about it and don't let it go.

So, in review, in writing newspaper advertising or any other advertising for that matter, make it newsy, make it truthful and make it definite and don't be afraid to mention prices.

Just imagine what a useless thing the Simpson or the Eaton Mail Order Catalogs would be if they contained no prices. Therefore, take a leaf out of the practices of the big fellows who have grown big because they knew how to do business, and apply them to your own business.

Another big field for you to develop in your advertising is the direct-by-mail method. That is the sending of circulars or letters to customers or possible customers. To do this properly you should really make a survey of the possible field for the development of your business. That is, does it only include your town or part of your town, or does it stretch itself out into the surrounding district. After you have decided as to what section you expect to work thoroughly for business, prepare your mailing list carefully and, if possible, plan to reach your list once a month with some interesting circular or other piece of literature. Frequently, you may only use a part of your list as you may have your list classified so as to work a particular type of buyer on a particular proposition.

In preparing direct-by-mail literature, letters, etc., you can receive a great deal of help from many of the manufacturers, whose lines you handle. Some of them specialize in this type of co-operation w t the retailer and have much valuable and helpful material available for your use which is excellent in itself and helps you to keep down the cost of the work you are doing.

First Annual Banquet a Great Success

Large Representation of Hardwaremen Attend First Annual Banquet Arranged by the O. R. H. A.—Wit and Wisdom Aplenty From Capable Entertainers and Speakers—Some Views on the Outlook for Hardware and Metals

THE first annual banquet arranged by the members of the Ontario Retail Hardware Ass'n. in connection with this year's convention was a decided success and marked another forward step of importance in the annals of the organization. A most enjoyable repast and entertainment were provided for the occasion of the banquet on Wednesday evening, and a large number of retail hardwaremen were in attendance. There was wit and humor aplenty, and some excellent music and other entertainment and some brief and interesting addresses from representatives of various branches of trade.

Toasts to the King, President of the United States and to Canada were proposed by Toastmaster Nelson Mills, the latter fittingly responded to by Colonel C. R. McCullough of Hamilton, better known as the moving spirit in the founding of the Canadian Clubs. Col. McCullough pointed to the hardware trade as adequately representing the mercantile life of Canada, and referred to it as one of the three chief lines of endeavor for which boys in his early days had yearned.

Character of Community Indicated By Hardware Store

"The character of a community is pretty well indicated by its hardware shop," continued Col. McCullough, "and when you find a shop that is kept by a regular hardwareman and find goods in orderly array you will find a shop in which efficiency is not a mere name. This then might be described as 'Canada in miniature.' "

Referring to the singing of "O Canada," Col. McCullough touched on a patriotic strain in remarking that this singing was of valor shielding the fireside of our homes. He fittingly linked this up with the early trials of the pioneers to whom we owed a great debt of gratitude and whose principles must be emulated in our present life in order to overcome the difficulties of today. It requires a great deal of courage to face the problems which have arisen in the post war period, but Col. McCullough thought that the spirit which won the war would bring us out on top in the present situation.

"But we should not keep all our courage for war, we should exercise it now, for this is the time a man should exhibit his patriotism and we should make a serious attempt to 'come through.' "

Col. McCullough congratulated the association on the exhibition and regretted that more adequate facilities had not been provided for such an important affair. Hamilton being so thoroughly representative of the hardware industry, he thought a special effort should be put forth to provide all the facilities necessary to hold this important annual convention. Referring briefly to the future, in conclusion Col. McCullough pointed out that more must be produced, more work must be done, men must not expect to be paid more than their services are worth and more efficient methods for handling goods must be devised in order to allow Canadian goods to find a sale in the world's markets.

GEORGE SPENCE

General Sales Manager, Steel Co. of Canada, who congratulated the association on its progress and dealt with outlook for future business.

"In going back to your businesses you should plan to carry on with the care which has always characterized your trade and influence people to buy carefully and according to their needs. Do not defer till the spring things that can be done now. Let us learn now to be constructive in our efforts in Canada as our fathers were long ago."

Plenty of Wit and Humor

A most unusual and pleasing phase of the entertainment was the message, full of wit and humor, given by D. Wells of Buffalo, N.Y. carded as poet, writer, newspaper man. Mr. Wells' unique style and affable personality, were important factors in the success of his message which occasioned many and prolonged outbursts of mirth as he dealt with the various emotions experienced by the average person returning to their old home town after a lengthy absence. Many of the situations described rang true with the experiences of practically everyone present and thus a more personal atmosphere was established which made the message more forceful and interesting. Mr. Well's oration, into which was worked several creditable selections of original poetry, fully lived up to the high expectations aroused in the audience by Secretary MacPherson who was instrumental in securing Mr. Wells for the occasion.

Iron and Steel Outlook

Representing Hamilton manufacturers, George Spence, General Sales Manager of The Steel Co., of Canada, welcomed the retailers. Mr. Spence referred to 1921 as a trying one for both manufacturers and retailers.

"During 1922," continued Mr. Spence, "it looks as if competition will be very keen indeed. The manufacturers of iron and steel and its products have borne their share of the deflation of the last twelve months. Steel manufacturers in the United States have suffered very greatly, some of them showing losses of many millions. We hope that Canadian manufacturers will not report as unfavorably as that. We are looking forward to the practice of economy to a greater extent than before and we recognize that we must be more efficient than ever. We want the hearty co-operation of the Canadian buyer as we are so close to the U. S. line that competition from outside makes us put forth our best efforts."

Speaks For Wholesalers

S. H. Alexander, Wood, Alexander & James, congratulated the association on its first banquet. "To me it is the best you have ever had," said Mr. Alexander who continued by pointing to the healthy condition in the hardware trade as indicated by the small number of failures in this trade. The manager of one of the mercantile agencies had told him that in Hamilton and seven surrounding counties there had not been a single hardware failure in two years. Mr. Alexander thought there were more hardwaremen present than ever before and that much of this was probably due to the good work of the permanent secretary.

"Looking at the markets as I see them today, I believe it is fairly safe to buy goods," said Mr. Alexander, "and the retailer who goes without goods thinking he may get an advantage of a slight 5 per cent. or 10 per cent. in price is fooling himself. In the next few months I imagine you will see as many increases as declines. Take advice and buy a reasonable amount of goods for the early spring toward which we are headed."

MAINTAINING PRICES ON SPECIAL LINES

(Continued from page 60)

newspaper advertising and similar forms, but. of course, he could not reasonably expect this.

Nor can the kitchen-cabinet manufacturer hope that all the women able to purchase a cabinet will see one of his cabinets on exhibition or learn about it from a purchaser or a salesman. He must use advertising mediums to inform them. At the same time he must do such distributing of his goods and he must plan such sales work that he can get the full benefit of what he spends in advertising. Advertising mutliplies the work of the salesman and enables the manufacturer or the merchant to talk to thousands where, without advertising, he would talk to hundreds. It is easy to lose fortunes quickly from injudicious advertising, but judicious advertising makes the field of many concerns almost limitless.

Advertising is of much more importance, however, to some lines than it is to others. Such staples as bread, sugar, coffee, etc., if of good quality, can be sold without advertising, though it will be freely admitted that the advertised bread or coffee is much easier to sell than the unadvertised brand.

When the goods are unknown to the consumer, though they may be of excellent quality, the salesman has the burden of making the favorable impression, of convincing the consumer that the goods are the equal of some well-known brand. This is sometimes an easy thing to do, but at other times it is difficult. Retailers concede that advertising creates sales and brings many orders that they would never get if no advertising were done for the goods, but they sometimes argue against advertising on the ground that it permits the manufacturers to get too much control of the retailers' trade. Some large retailers, especially, are inclined toward having their own lines of goods, or lines that bear their own label, as far as possible.

Prestige of Known Brands

In a way, it is unfortunate that one aggressive advertising campaign usually makes it possible for manufacturers of competitive goods to follow in the wake of the advertised goods and get considerable patronage from retailers who incline toward the policy of handling the goods on which the largest profits can be made and which they can control more easily than goods that are well advertised by manufacturers. The successful retailer of good capital and a large following is in a better position to force his private brands than are others. Manufacturing problems are too much for most retailers. Well-known brands often give more prestige than a retailer's name.

In nearly every line some manufacturer so far excels the others that his goods are acknowledged as the standard which others try to equal. Nine times out of ten, yes, ninty-nine times out of a hundred, the standardized goods, the goods the others try to imitate are well advertised and the imitation is not advertised or only sparingly so.

In the old days of the west, stray, unbranded calves were called "Mavericks," they were without pedigree, without identity,—without known value—they were just "Mavericks."

To-day, unbranded, unadvertised merchandise is plentiful upon the market, because the manufacturer has not trade-marked his product. You know not whence it comes. Who is responsible for it, who sponsors its quality, and vouches for its worth? Nobody. It is a "Maverick" among merchandise.

An advertised, trademarked article has the 100 per cent. backing of the man who made it. It is an established product. It is only such because it has passed the acid test of public use, or if it is new, the trademark is the manufacturer's pledge to stand behind the article and see it make good, or make good for it. But it is his, he wants you to know it and he tells you with his trade-mark. He is so sure of its quality that he is willing to stand the full force of possible complaints. So I say to you, for safety and economy to-day, buy trademarked goods of known value.

Purchasers of merchandise have no time, money or ability to waste in experimenting. In the factories and laboratories where advertised goods are perfected, specialists are employed to do the testing and experimenting, and after the finished goods are placed on the market with the maker's trade-mark, there is no necessity for mistakes in using the article.

The dealer who offers his goods to the public sees to it that those goods are of standard quality, then he must determine the amount of profit he can sell his goods at and fixes his price accordingly, considering all necessary overhead costs in his expenses. He cannot allow his stock to be carried away promiscuously with no system, or his trade would not get a square deal and his business would go to smash in a short time. His goods represent his stock in trade.

Professional men must act on the same principle and secure an equivalent for that which they dispense to their clients. Material that has been on the market for a good many years, has been made on honest principles, perfected, and never sold for reduced prices is worthy to be considered and preferred.

A really pitiful thing in the market today is the unknown brand, nobody knows it, nobody wants it, though it may be perfectly worthy. Selling it is a thankless job and using it may prove to be a disappointment with no redress.

Reputation in Advertising.

Profits come from turnovers, not from leftovers, and advertising helps to increase the turnover. The manufacturer who advertises his product stakes his reputation on the quality of his goods, which is an insurance of merit. It is estimated that dealers' patrons change from 25 to 40 per cent. yearly and stores handling advertised products do not have to re-educate this constantly changing clientele. Standard brands bring repeat sales and thus the quicker turnover enabled by standard brands gives a larger number of profits during the year. Advertisements are very much like soap after a blanket is washed, you don't see the soap, but you know it has done its work.

Three actors on the stage in a New York theatre were discussing what each had done to help win the war. One of them joined the army and had gone to France. The second had joined the navy and gone to sea. The third man said he was a producer. He had stayed home and produced food. The others acknowledged that his service was just as necessary as theirs and asked what kind of food he had produced. He said he fattened hogs. They asked him if he found it profitable. He said, "Well, I bought 10 hogs for $25 apiece, I fed them $250 worth of feed and sold them for $50 each." The soldier said, "Why, you didn't make any money on them, you just broke even." "Yes, I know," said the man who stayed at home, "but it was the patriotic thing to do and then I had the use of the hogs all winter." Just the same with unstandardized, non advertised merchandise, you buy it because it is cheap, you keep it on the shelves and when you have had the use of it for six months you have to stand up by the counter and persuade people to buy it cheap. After all this fun, what about the space it has taken up and the expense, either in rent or interest on your investment?

The manufacturer in fixing a firm wholesale and retail price has studied the question from all angles and is pretty sure to put the retail price as low as possible and still allow a fair margin of profit to the dealer. Many firms insist on a contract in the order form binding the merchant to maintain a price, but others depend on the self interest of the merchant to market the article at the regular price, and after all this is the right principle. You cannot so well force a man to do your will as you can influence him from a regard to his own interest, and by his sense of fairness to his customer and to his supplier. By fixing the price, the manufacturer protects the dealer from loss by a sudden decline in the market, while the stock in hand in case of a rise naturally returns a greater profit if the dealer wishes to take advantage of it. Unadvertised goods of a staple nature, commonly pass through more hands such as commission men, brokers, importers, exporters, etc., than special and advertised articles. In times of scarcity therefore, prices are unduly enhanced and in a panic the market goes to pieces, making an element of risk that the merchant cannot always discount. It is much easier to manufacture creditable goods than it is to build up a profitable market for them. To sell successfully, goods must be meritorious, but the long list of manufacturers and dealers of meritorious goods who have failed to build up a highly successful business should convince anyone that the handling of a product after it is made, plays the largest part in the success or failure of the product.

There comes a time in the life of every small boy when he walks into a grocery store and after making sure that there is a safe line for retreat asks the grocer if he keeps eggs and when answered in the affirmative says, "Why don't you sell them," and immediately departs as fast as his young legs will carry him.

We very frequently think that there is, after all, a lesson in this youthful impertinence, a lesson certainly for the smaller town dealer. In the large city the tremendous commercial organizations known as department stores make no distinct effort at individual salesmanship, because they carry, or are supposed to carry, everything and their advertising is merely a matter of tabulating merchandise and quoting prices. They exercise no influence upon public taste carrying chiefly those goods upon which there is an established demand or goods which they can buy in quantities at a very attractive figure.

Can Merchants Educate Buyer

The merchant in the small town, however, has upon his shoulders the responsibility of being a public educator. He is, or should be, an authority upon what people should buy, his stock should be representative of the ideal of merchandise in his community. In very few cases should he accept inferior merchandise even if he sells it as such at a price and in every instance should he advise his customers individually that the best economy is in the purchase of the best materials.

The public which he serves does not expect in a store of moderate acquisitions an exhibition of all kinds of merchandise. They rather expect the store keeper to exert a power of selection to supply them with the things that they need at a price consistent and of a quality which he can personally recommend.

We have eminent respect for the dealer in the small communities. In ninety-nine cases out of a hundred he is a strong influence for the good, he is fair in his prices and fair in his dealings with others and we know of few instances, when given a choice, where he has not chosen for his trade the best of two pieces of merchandise. It is comparatively rare when this man does not place quality, utility, satisfactory service to his customers above the immediate profit in a single sale.

There has been a tendency among a certain class of merchants to overlook the benefits of the fixed price arrangement and to use a well known fixed price article as a leader in his bargain announcement.

(Continued on Page 76)

To Incorporate Ontario Retail Hardware Ass'n

Resolutions Committee Endorse Efforts Toward Incorporation and Adoption of By-laws—Appoint Retailers to Solicit New Members

THE Resolution Committee of the Ontario Retail Hardware Association, consisting of Messrs. R. Hawkins, Smiths Falls; D. K. Clark, Hamilton; W. Hanna, Port Carling, and Jas. MacGregor, Caledonia, made the following recommendations:

We, your Resolution Committee, would recommend the adoption of the following:

1. Treasurer's Report.
2. Secretary's Report.
3. Auditor's Report.

That as a matter of principle, the function of the jobbers should be to sell to recognized retailers who carry stock of goods offered for sale, except special cases, such as factories, etc., when a slight preferential in prices should be allowed the dealers.

That this Association sanction the action of the Executive in endorsing and making arrangements with the Canadian Hardware and Implement Underwriters to make favorable terms for insurance of hardware stocks.

That the incorporation of the Ontario Retail Hardware Association be proceeded with and the constitution and by-laws as prepared by the Secretary be adopted.

That the thanks of the Association be tendered the exhibitors and manufacturers' associations for their support and co-operation which contributes so much to the success of the Convention; to the retailers of Hamilton, and to the hotel management for the excellent arrangements for comfort and convenience of the guests, and particularly in connection with the banquet served on behalf of our Association; to the speakers for their instructive addresses, and last but not least our appreciation of the very valuable support and services rendered by the hardware trade papers.

That the following members be appointed to canvass amongst the retailers to enlist further membership and urge a more extensive attendance at future conventions: E. J. Carter, Jarvis; James Hunter, Wiarton; D. B. Wilson, Napanee; Iven Cook, Leamington; H. A. Mistele, Rodney; James Wright, Glencoe; E. J. Creeper, Owen Sound; F. A. Ricard, Sudbury; A. W. Allin, Lindsay; C. C. Lee, Goderich; James Duke, Grand Valley.

R. HAWKINS

Who spent his first year on the Executive Committee of the O. R. H. A., in 1921. Mr. Hawkins took a keen interest in the Question Box and other discussions

SEEN AND HEARD AT CONVENTION

George May was on the point of dozing off at the Tuesday morning session when he heard the familiar Kiwanis bugle call in the rotunda of the Royal Connaught. Heeding the "call of the clan" he received an invitation to luncheon with the Hamilton members

President Nelson Mills experienced some peculiar sensations when Mr. Penberthy in his address pointed out that his purchase of a pair of storm door hinges in the Mills Hardware had not occasioned much show of resourcefulness in that the salesman did not try to sell him any of the other range of articles which might be required, but Mr. Mills equanimity was restored when Mr. Penberthy pointed out that this was undoubtedly due to the fact that Mr. Mills and his head clerk were attending the convention.

So interested were a number of the delegates in having much of the valuable information brought out at the convention, passed on to others in the trade unable to attend, that frequent enquiries were heard as to whether this or that address or discussion would appear in Hardware and Metal. These enquiries were assured that a full report of the proceedings would be given in the February 18 issue.

"SAVE THE SURFACE" CAMPAIGN

(Continued from page 65)

ship. We have got to strengthen up our personal contact all down the line. The manufacturer and the jobber are limited in their opportunity for personal contact with the consuming public, but the retail distributor has unlimited scope for exercising it if he is performing his proper function as a retail distributor. I have called it a proper function, it is his rightful function which no manufacturer or jobber wishes to encroach upon if the retailer performs it properly. This applies to every form of goods, not alone paints and varnishes.

How is the retail distributor to function properly in connection with the "Save the Surface" idea? My answer embodies the practical means afforded by the Committee and which I will briefly describe. Before doing so, however, I wish to point out that the retail distributor who links up closely with the Campaign is bound to be, together with his clerks, saturated with the "Save the Surface" arguments which can be made a tremendous selling force in his personal contact with his customers. In fact, it is essential that such should be the case. Realizing the important function you have to perform in this respect, the Committee have formulated a series of four letters, each one outlining very clearly how you can carry this out.

Mr. Mihell also showed samples of new campaign illustrations and some advertisements of retailers showing use of the "Save the Surface" slogan, loaned by Hardware and Metal.

At the Ontario Retail Hardware Convention

Initial Address of New President G. E. May

Wants 1,000 Members by Next Convention and 997 to Attend, Eliminating Three Who Persistently Disgrace Association Through Drunkenness —Prize Drawing Contest

HAMILTON, ONT.—After the election of officers on Friday morning a hearty vote of thanks was extended to Nelson Mills, retiring president. Following is the introductory speech of the new president, George E. May:

"I thank you for the honor you have conferred upon me. It is undoubtedly a very distinguished honor to be elected president of the O. R. H. A. An honor that I am quite sure might have been more fittingly bestowed upon more capable shoulders at the present time.

"I can assure you gentlemen that it gives me great pleasure to accept this office and in view of the splendid secretary we have and the fine executive committee, and the anticipated help of my good friends the past presidents and the trade press, I am hopeful that along with the sympathetic cooperation of the entire membership of the association we shall all, pulling together, be able to maintain the fine traditions of our organization.

"When I remember all the distinguished gentlemen who have presided over our association in past years, I feel I will have to aim high and walk very circumspectly to maintain the standards set by them.

"This association has had remarkable growth. It appeals to the best men in the trade because we are giving invaluable assistance to the hardware trade of this province. There is a great future in store for us. We want 1,000 members for 1922 and we want 997 to attend our next convention. The odd three are the ones who persistently come here and get drunk as pigs and cast a shadow on us all. Candidly, gentlemen, I think the time has come when we can get along without that class of member. It brings disgrace not only upon himself but on our organization."

Other Members Indignant.

In the discussion that followed Mr. May's address many members waxed indignant over the conduct at the convention of certain members, and a decision was made that steps would be taken to ensure that there is no repetition of this cause of complaint at future conventions.

Prize Drawing Contest

A prize drawing contest was conducted by A. J. Wright, Hamilton, past president of the association, and judging was done by G. D. Davis, manager Hardware and Metal. Twelve prizes were drawn and distributed to members, the first prize being a cabinet of community silver.

OFFICERS ELECTED BY O.R.H.A. FOR 1922-23

President—George E. May, Toronto.

Vice-President—F. B. Smith, Belleville.

Secretary—W. F. Macpherson, Prescott.

Treasurer—John Caslor, Toronto.

Executive Committee—Nelson Mills (retiring president), Hamilton; R. Hawkins, Smiths Falls, Ont.; H. N. Joy, Toronto; W. H. Bartlett, St. Marys Hardware Company, St. Marys.

MAINTAINING PRICES ON SPECIAL LINES

(Continued from page 74)

This practice is unfair to the manufacturer, tends to destroy the confidence of the public in the real value of the goods and disturbs the trade generally without bringing to the price cutter much advantage. I would like to see a resolution put through this meeting to bind the members to first consult the manufacturer of branded and well advertised goods before advertising a bargain price on these goods.

Now if you will allow me to make a few suggestions on selling advertised goods I will give them for what they are worth and trust you to see if any of them can be applied to your business. A merchant wrote to the Retail Public Ledger:

I am the fellow who used to be such a bitter enemy of advertised products, but who finally "saw the light." In this letter I want to tell you how I make the manufacturer's advertising work for me.

Powerful Selling Factors

In the first place, I read very carefully the advertising pages of the important magazines and newspapers that circulate in my locality and mark or clip out the advertisements of goods that I sell. I might say also, that I have another reason in doing this—to keep in touch with the market and learn what the new styles and inventions are. But to get back to the other point—I make my newspaper advertising up-to-date and timely by featuring goods that are being advertised by the manufacturer at that time. When I write my copy I have the manufacturer's advertising before me and use considerable of his copy. That lends a double punch, as a repetition is a powerful selling factor, as witness the Bible. Once a month I issue a circular, and feature in it articles that have been advertised in the magazines and newspapers during the last month.

I further make it a point to get duplicates of the cuts the manufacturer has used in his advertising. This gives my ads a prominence that could not be obtained otherwise. I select from the manufacturer's stock the display signs and fixtures that best fit my store and make judicious use of them in my windows and inside.

I had a carpenter make frames in which I can display proofs or the actual ads. I have three frames, one holds a newspaper page, another holds ads the size of a Saturday Evening Post page and still smaller one to hold smaller pages. I put the ad. in the window, with a display of the product advertised.

My business has almost doubled since I started to push advertised goods.

Tell them the facts—If you're up against the mail-order menace and are seeing good elegant dollars that should go plunk into your cash register, flit away to Toronto or the home of some big mail order house, don't sit down and feel sad for yourself.

Get busy with a little propaganda of your own, and put a few facts before the taxpayers of your town.

Ask them how much money the mail order houses contribute to the taxes of your town, do they help to pay a single item of the expense of keeping proper fire and police protection, for public improvements, for schools and school teachers?

You know they don't, and the people who are buying from them are doing so without considering carefully just what they are doing.

Telling the Facts

If these fellow citizens of yours figured out for a single minute that money sent away from home doesn't contribute one penny toward home town labor—doesn't help fill the dinner pail of a single local worker—doesn't help broaden the knowledge of the children of the town or add to the attractiveness of the town, they'd mighty soon quit sending their money away.

But how are they to know if you don't tell them—how are they to know that money spent with local merchants travels in circles and actually gets into circulation when it is rung up on the dealer's cash register?

You spend your money in your home town. You buy food, clothing, automobiles, sewing machines, pianos. You pay your help for store and home. You buy homes that are taxed and all the things you and your family need in homes, you pay personal taxes, you are or should be a good contributor to the fund that makes your home town attractive, helpful and prosperous.

Further than that, if these townspeople of yours run up against a season of "hard times" and need a little assistance in the way of credit, they get that credit from you, whereas they must "come across" every time when they buy from mail order houses.

COMBATING BUSINESS DISEASE

(Continued from page 59)

a rising overhead. That is the counteraction for the growing pains of expenses, which, the less we sell, is the more acute and this the way to beat the law, which exacts a fearful toll for inactivity, be it forced or characteristic.

More Sales—And Yet More

It cannot be gainsaid that there are rare circumstances which temporarily cripple the hardware business. No one better appreciates than I the immediate depression which follows the closing down of a large industry on which the community depends for its purchasing power. In these circumstances there is much to be considered and I would not be sincere, nor would it be logical for me to state that the activity which we are agreed is the cure for business disease could change such a condition overnight into prosperity. But, gentlemen, we are not all doing business in communities of this nature and to those even who are so situated a great deal can be done through concentration and intelligent sales effort to greatly improve these negative business conditions. There are always men in your community who have money—there are Doctors, Lawyers, Dentists, Railway employees, Barbers, Butchers, etc., who through direct solicitation, aggressiveness and service could be attracted to your place of business. There are towns within the Dominion who through the closing down of a key industry might be termed unfortunate, but not more so than the man who helps heap misfortune on the community and himself by figuratively pulling the blinds and waiting for business to improve.

We are passing through a period when originality of thought and action will prove of far more benefit than following the lead of others. At no other time in the history of business has the law of survival of the fittest so relentlessly demanded its pound of flesh as it does at the present. It is up to us as individuals to devise ways and means which will best enable us to grapple with those problems peculiar to our respective communities, and, in order to do this, we must put on our "thinking caps" and act productively.

Systematic and intelligent thought applied to our business will reveal the fact that our different paths are intersected with periods of opportunity. These opportunities taken in the light of present day conditions can be best grasped by personal dealings. Narrow minded and stereotyped examples will not assist us to the end in

Wholesaler Speaks on Trade Outlook

Steady Reduction in Hardware Stocks Throughout the Country and Considerable Price Reductions Made — Competition Very Keen in Steel Industry — Some Bright Spots in Industry

Address by Thos. Birkett, President Canadian Wholesale Hardware Association, before 17th Annual Convention Ontario Retail Hardware Association

AFTER such an upheaval as the Great War, it is only a miracle that conditions are not a great deal worse than they are, and we have nothing else to thank, for the present very much improved condition, than the formation of the late Union Government. Politics were forgotten, and every one worked for the one great object, namely: After the War was eventually won, to then put our country on the map again, where, gentlemen, it is today in no small measure.

During and immediately after the war, there was a decided shortage of raw material, particularly of steel, due to the tremendous consumption for war purposes, and to so many, in fact, almost every available man being at war; consequently every factory, wholesaler and retailer's stock of all the commodities, necessities particularly, were pretty well exhausted.

All during 1921 there was a steady reduction of stocks in the hardware and steel trade of Canada, while these conditions generally had not advanced during the past few years, in comparison with woolens, foodstuffs, freight rates and railway wages, etc., there was, during 1921, a decided reduction in the prices of many lines of hardware, it being most pronounced in the heavy lines; for example, wire nails about $2 per keg, bars about 2 cents per pound and bolts and nuts over 40 per cent. This was some drop, and one which required care to handle, and some of the generally recognized adjustments made by the steel trade of the world during 1921; not, mark you, without heavy loss, for example, as losses reported by the United States Steel Corporation for 1921, approximately 15 to 20 million dollars, after payment of only 5 per cent. on the common stock. This is the position in all American steel companies. They all show losses in proportion.

Competition Keen

Competition has been most keen among the steel companies, which brought market prices down farther than costs.

The workmen of the steel industry have not escaped, for, from accounts, there is no industry that has made wage adjustments more promptly and of such a drastic character than they.

Common labor, at twenty-five to thirty cents per hour, with the usual increases for the various classes of skilled workmen, but with employment only three days per week or less, have brought a degree of hardship, and it is apparent that further economies, at the expense of the workmen, are difficult of arrangement, under the conditions of limited activity at present existing.

Hope has been expressed that reductions of freight rates will bring much needed relief to the steel trade, but it is evident that reductions in freight rates will be of gradual and slow evolution. The American railroads are finding it difficult, even at present rates of freight, to earn the agreed upon rate of 6 per cent. on railway stocks, and there are a great many repairs and replacements needed.

Moreover, the railway workers are being paid very high rates of wages, out of proportion to all other industrial activities, but are so well organized that the railway labor unions will stoutly resist any but slow and gradual reductions in rates of pay.

Looking at the situation from this angle, our factories have made a wonderful comeback; and, gentlemen, if labor would come from its high horse, and give the factories the production they are paying them for, things would be in a still better position, but unless this does come to pass, and the railroads lessen their excessive freight charges, prices are about as low as they can go.

Some Progress Made

While there is still an abundance to be done before business can be normal, let us think of some great progress that has been brought about in the following grave problems:

THOMAS BIRKETT

President, Canadian Wholesale Hardware Association, who addressed the Convention on "The Business Outlook."

More reasonable attitude of labor.

Liquidation of stocks both in Canada and United States.

Political position improved throughout the world.

Irish question nearer solution.

Adjustment of prices and costs.

Greater money supply and better conditions of funds with United States.

Strength of sterling and its influence with the world.

United States showing more sympathy to their banks for extension of financial help to Europe.

Disarmament agreement.

Coming back to the "Great War," it was not only instrumental in forcing the United States to take more interest in world politics, but Canada was also forced in the same manner to trade with the world, and now she must export all she can to enable her to pay her vastly increased government and other obligations arising out of the war.

Mr. Chairman and Gentlemen, let me mention here, that I am sure you will be glad to hear that foreign markets that have been dead for the past several months are now making enquiries for Canadian products and manufactures, which will have a stimulating effect on our Canadian trade in general. I have on good authority that large bookings have been made.

Again, Gentlemen, the war is over, and with so many obstacles removed, let us start the new year right, discontinue war-time buying, and get down to nails and tacks; buy goods that sell and produce a profit (you will be a friend of the government for life).

Don't Buy Slow Sellers

Don't buy any slow-selling goods; the factory, or wholesalers, will not thank you. You are in business for yourselves, so act according to your better judgment; but tell your troubles, if you have them, to your policeman, be he a jobber, or a manufacturer, so that you can co-operate with one another, when, with the slogan "Effort," you will win out.

1921 has passed into history, and it was a year which none of us, I think, wish to see again; we all learned many a good lesson (some of which cost good money). Some of these lessons we deserved, for we continued to buy in a war-time manner, and when values started to come down and down we saw our dollars going. It was hard to watch, but, I venture to say, there is not one man present this morning who did not think it was right, and he was ready and willing to take his loss. After all, did not all make money when the prices were going higher and higher; therefore, in the end, you are not making a loss but only averaging up with your profits with the margin well on the profit side.

Not Altogether Right Yet

Business could not continue with conditions as they were, and although these conditions are very much improved, they are not altogether right yet; they have, however, improved to such an extent that we have become more optimistic, and are willing to take off our coats and get to work, for no end, ever so humble, can be obtained without work. The opportunity is there, gentlemen, so let us try again and obtain it, remembering that old normal times will never return. We will have a new and better normal, and one, I think, that will bring more real pleasure into business in the future than there ever was before.

Signs point to improvement in pulp and paper trade, and lumber trade, and the spirit of optimism in the trade and business circles, where the general feeling abounds that 1922 cannot possibly be as severe in business adjustments as 1921, for it was in 1921 that deflation occurred and a comparatively safe foundation laid for future good.

Steel and iron stocks are low and should show greater volume this year, coupled with a change in labor, which now seeks work rather than striking for the greater wage.

The railroad requirements are very heavy and cannot be delayed much longer, and it won't be long until they come into the market for large tonnage of steel, etc.

With the shortage of housing privileges, the building trades, if they can pass one year without striking, should be active.

Canada has what the world wants, in her farms, mines, water powers and forests, and with their continued development in a conservative manner it will mean prosperity to us all.

Need For Protection

THE BRENNER case which has just been concluded in Toronto courts wherein the principals of the defunct metal firm of N. Brenner & Co., have been found guilty of defrauding the company and stealing a large sum of money, the rightful property of the company's creditors, indicates the necessity for a tightening up somewhere in the interests of those who invest their capital in Canadian industry. That the principals of an insolvent firm could conduct its business in such a way as is indicated by the evidence placed before the Criminal Court in Toronto, is a distinct shock to a large portion of the business community.

Among the creditors are two large Canadian banking institutions. To one of them had been assigned the firm's book debts as security but when further advances were refused an account was opened with the second bank and there was much confusion in regard to the deposit of moneys which had been received in payment of these debts. Evidence was given showing that many cheques payable to the firm had been endorsed and deposited by the Brenners in their personal accounts and when foreign exchange and metal prices took a slump there was not available sufficient funds to meet the creditor's claims. At the same time the principals had sufficient funds to buy large homes, expensive motor cars, race horses, etc.

The entire proceedings of the case which has just closed indicate a very ineffective check on the firm's transactions by the banks with which the firm had large dealings and despite the subsequent efforts of the banks and liquidator, large sums were apparently diverted from the firm's account to the private account of the principals. Steps should be taken to give better protection to the capital invested in Canadian enterprises than was evident in this case.

A Field For Business

AT A RECENT convention of women representatives of the farming districts of Canada, the results of a recent survey of conditions in farm homes were outlined, showing that as a whole there is a wonderful field for trade in the rural districts for hardware merchants. It was shown that homes in a proportion of 13 to 225 enjoyed electric light, 20 in 225 had gasoline lamps, 124 in 225 had coal oil lamps and the rest apparently had even poorer facilities. In the same proportion 68 reported furnaces and 158 used wood or coal stoves, 165 had no water in the house, 40 had good water systems and 9 had only soft water, 156 had no power machinery of any kind, 66 had washers, 3 had electric washers and churns and 5 had minor electric appliances.

While this condition of affairs would probably not exist throughout the whole of Canada, yet it represents a fairly comprehensive survey, particularly of Western Canada, and indicates that the rural field for business in electrical labor-saving devices, electric light systems, household equipment such as washers, churns, stoves and heaters, furnaces, water supply systems, etc., has hardly been scratched. There is a big field of potential business to be had by conducting educational work among those inhabitating the rural districts and in days when efficiency and economy is the watchword, such educational effort will be rewarded with business, for it can be clearly shown how the use of the lines mentioned will save time and labor beside adding comfort and contentment to what is too often a monotonous existence for these in the rural districts.

Should Stamp Out This Evil

MERCHANTS of Brantford, Ont., have taken the lead in attempting to offset what has become a most unfair medium of reducing the volume of their business in local communities. This has to do with traveling carnival companies and carnival attractions. A campaign has been started because of some bitter experiences of that city in view of the fact that the number of these carnivals touring Canada has been gradually increasing in the past few years. There are several reasons why merchants and other representative bodies should seek to have these aggregations kept out of Canada. It is a known fact that when they visit a city they take away with them thousands of dollars which otherwise would remain in the city to be spent in its stores and in a more useful manner than it can be spent at such carnivals.

An attempt is being made to right the wrongs which have existed for some years in connection with transient traders and hawkers who visit a community and solicit business while paying little or no portion toward the expenses of that community such as the permanent merchant must do. So too the carnival is a transient affair which contributes but a small license fee and takes away a large volume of revenue which otherwise would go to enrich the inhabitants of the community who have their money and interest centered in that community.

Apart from the financial side of the question there is also the moral aspect. No one will deny that these carnival companies in most cases represent the scum of the theatrical world, who do their best to impoverish, both morally and financially, those who frequent their amusements. Steps are being taken by representative bodies in Brantford to stamp out the evil of traveling carnival companies. Already many sections of the United States have barred these traveling companies, and Canada is now looked to as a fertile field for exploitation. Merchants and other representative bodies in other cities might well join Brantford in seeking some means of restraining these compnaies from coming to Canada.

CHANGES which have taken place in the economic situation since the commencement of the year, are generally recognized to contain a larger degree of favorable developments, than otherwise. On the whole, therefore, basic conditions have continued to improve, one of the factors contributing towards this end being the current activity in construction. Prospects for an active year in the building industry are evident in both city and country districts; while acceleration in this direction is reflected in the basic metal industries and the various commodities required in construction work.

News of Western Canada

For comment on Winnipeg hardware market tendencies see "WEEKLY HARDWARE MARKET REPORTS." For current prices see Winnipeg section of "CURRENT HARDWARE QUOTATIONS" in this issue.

Expecting Trade Betterment at Coast

No Display of Undue Optimism, But Little Complaint Regarding Current Conditions— Recovery Expected From Mining and Construction Operations

VANCOUVER, B. C.—While hardware distributors and retail tradesmen on the coast are making no display of optimism as to trade possibilities this week, they are complaining but little, the chief topic being concerned with collections which are not quite as good as usual. Still, it is stated there is no cause for alarm and prospects are fairly bright.

Statements covering operations for January have been prepared and indicate an improvement in tonnage while values are about the same or slightly better than January of last year. This is taken to mean that there are good reasons to believe that the trade is probably at the bottom of the depression and that from now on, a steady growth in trade will result.

Much is anticipated from mining operations which are expected to be of large proportions this year. Arrangements are well in hand to open up new properties and to increase work undertaken last year all of which will mean an increase in demand for hardware stocks both heavy and light. Officials of the "Made-in-B.C." campaign have prepared comprehensive lists showing the products which are available in this province and are leaving no stone unturned to see that the information reaches the "powers that be."

Trade on Vancouver Island is said to be quite satisfactory for the season. It is believed that as soon as the snow in the woods disappears, many of the logging camps will re-open. Already the Comox Logging Company has started a force of 300 men and other large operators are preparing to follow suit. These operations are beneficial to the hardware trade and a fair amount of optimism exists as a result.

Along the northern interior, there are districts which are giving fairly satisfactory orders. One traveller of a local distributing house returned this week from the Grand Trunk as far as Prince George. He set out with the intention of making up two carloads, one for Prince Rupert and the other Prince George. He succeeded as far as the western terminus of the G. T. P. is concerned, reporting good business as far east as Smithers but east of that point, orders were sparse.

As has been mentioned before, the Okanagan is slower on account of the delay in paying on the fruit crop. However, prices are said to be higher on apples in New York which will mean a release of a larger sum of money than for a time, was expected.

Then again, in the upper country there is still a great deal of frost which is keeping back agricultural operations. One of the local distributors told your correspondent that the firm was in receipt of many letters to the effect that as soon as the weather moderates, orders would be immediately forthcoming although in the meantime, buying was confined to essentials.

Price changes have been very limited this week, nothing of any consequence being recorded. As an idea of special prices named for some articles of everyday use, one dealer has quoted $2.50 for the Prince Rupert bucksaw, galvanized clothesline pulleys with swivel eye 50 cents each, tinners' snips 45 cents, Scimitar balded pruning shears 85 cents, three-way shoe lasts $1.10, and household step-ladders $2.45.

NEWS OF WESTERN CANADA

Victoria.—Albert F. Griffiths of this city has been appointed interim receiver for the firm of Wilson & Jessiman, dealers in crockery and chinaware here.

Chilliwack.—The Watson & Thomas Hardware Co. of this city has been succeeded by James Munro and William Vaugn Davies, under the firm name of Munro Hardware Co.

New Westminster.—Thomson and Wilson, who operate a grocery and hardware store in this city have discontinued under that name. The business will be continued by Mr. Wilson.

Vancouver.—Mr. F. C. McKay, a prominent hardware man of Gleichen, Alta., is spending a couple of weeks on the coast. Before returning home on the 20th he will visit Victoria with Mrs. McKay. He is a leading member of the Board of Trade of Gleichen and is taking an active part in the campaign to secure a small flour mill for the town. To Hardware and Metal he said that farmers in the district were favorably disposed toward the movement of wheat through Vancouver.

Victoria.—The B. C. Cement Company announces that it will shortly send a trial shipment of 3,000 barrels of cement to Central America. More would be shipped were steamship service available.

Announcement is made this week in Vancouver that the crockery and chinaware and toy goods house of Millar & Co. has undergone an important change, Mr. R. Millar, leading member of the Retail Merchants Association, Rotary Club, and Board of Trade, having bought out his partner. The firm has been in business in this city for the past ten years during part of which time, the firm has maintained two stores on leading thoroughfares. Mr. Millar states that the general policies of the firm will remain unchanged.

Vancouver.—William Metz, sales agent in B. C. and the Yukon has returned from Dayton and New York where he attended the annual convention of the National Cash Register Company's Hundred Pointers. He was greatly impressed by the Prosperity Pahade of 5,300 employees of the factory at Dayton, the entire assembly being addressed by the mayor of that city who expressed his appreciation of the company's employment of such a large number.

Much favorable comment is heard in Vancouver as to the high grade cordage which is being manufactured by the Canadian Western Cordage Company of New Westminster, a company which started operations after the close of the war, its officers being largely military men. The company is supplying marine cables to many of the C. G. M. M. vessels as well as boats of the Canadian Pacific Steamships. A fair volume of trade was also developed last year with the prairie in the form of binder twine. The company is taking full advantage of the "Made-in-B. C." campaign.

Winnipeg.—Hardware merchants who took part in the curling activities during Bonspiel Week in Winnipeg included the following:—C. O. Glover, Windthorst, Sask.; Wm. Smith, Kipling, Sask.; O. McConnell, Arden, Man.; R. McAskill, Gladstone and D. A. Adamson, of Gladstone, Man.

Vancouver, B. C.—The Britannia Mining and Smelting Co., Britannia Beach, B. C., has awarded the steel contract for their large new $500,000 ore concentrator plant, to the Canadian Northwest Steel Company, of Vancouver. About 1,300 tons of steel will be required for this structure.

Events in the Trade

BUSINESS CHANGES

The firm of McKinley and Northwood, Ottawa, Ont., has been reorganized. Mr. Northwood has severed his connection with the firm, after many years of partnership with John McKinley—years tempered with success and pleasant business and personal relationship. Mr. McKinley remains at the head of the business, as president, while his son, Charles L., who has been an active force in the business for many years, becomes vice-president. A second son, J. F. McKinley, recently appointed judge of the Juvenile Court in Ottawa, becomes secretary-treasurer.

With the reorganization of the firm, a number of alterations in the premises have been made, which are a decided improvement. The main office, which was located at the back of the first floor, has been moved to the second floor, thus providing much additional sales space on the first floor. For the time being, the old firm name of McKinley and Northwood, will be retained.

Burlington, Ont.—Colton & Lorimer, hardware merchants, have sold out to W. W. Main.

Woodstock, Ont.—Floyd and Lindsay Howell of Copetown, have purchased the harware business of Alexander Gardner & Co. Mr. Gardner is a native of this city and has been in business for the past 30 years.

NEW FIRMS

Niagara Falls, Ont.—Munroe & Zavity have commenced hardware business at 124 Main St.

INCORPORATION

Walter C. Cosman and Mrs. Lily B. Cosman of Moncton, are applying for incorporation for the purpose of conducting a sheet metal working business in Moncton, N. B., under the name of Cosman & Co.

Moncton, N.B.—Thaddee J. Leger, Azime D. Leger, Antoine J. Leger, Donat A. Leger, and Leandre J. Leger, of Moncton, have been granted a Charter of Incorporation by the name of T. & A. Leger, Limited, with capital stock of $149,000. The head office of the Company will be at Moncton. The main object is to continue the business heretofore carried on by T. & A. Leger, in hardware stores etc., and to assume the obligations of the said business.

ONTARIO INCORPORATIONS

Fletcher-Reis Brush Co., Ltd., head office Toronto, capital $60,000, to manufacture brushes, brooms, etc.

Craig Damper Regulator Co., of Canada, Ltd., head office, Toronto, capital $40,000 to manufacture metal products, hardware, etc.

Ontario Sanitary Kabinet Co., Ltd., head office, Toronto, capital $250,000 to manufacture apparatus for generation and supply of light, heat and power.

International Accessories, Ltd., head office Toronto, capital $100,000 to manufacture and deal in automobile accessories.

T. Tomlinson Foundry Co., Ltd., head office Toronto, capital $40,000 to manufacture metal products, hardware, etc.

K. & S. Employees Social and Athletic Club, incorporated among members of the K. & S. Tire & Rubber Goods, Ltd., Toronto, to encourage fraternal relations.

PERSONAL

A. W. Poole, Managing Director Stewart & Wood, Limited, of Toronto, is in the hospital undergoing an operation for appendicitis.

At the annual meeting of the Atlantic Underwear Co., Ltd., F. R. Sumner, president of Sumner Co., Ltd., Moncton, was re-elected a director.

H. J. Sykes, has been appointed to the position of Sales and Advertising Manager for the Ontario Wind Engine and Pump Co. Previous to taking over this position, Mr. Sykes was superintendent of branches.

Messrs. McKinley & Northwood, Ottawa, Ont., have been appointed Canadian distributors for the Canadian Johns Manville Asbestos Roofing, in the territory bounded on the west by Kingston; on the east by Montreal and on the north by Pembroke.

L. W. Simms, President & Managing-Director, T. S. Simms & Co., Ltd., passed through Toronto on his way to Chicago, where the matter of freight rates affecting the output of the brush industry will be taken up with manufacturers interested in this development.

Included in the party of Canadian manufacturers who have left on a business investigation trip to the West Indies are the following:—Sir Alexander Bertram, A. R. Whittall, Montreal; R. H. Turner, Peterboro; G. C. McAvity, St. John, N.B; Col. A. Hatch, Canada Steel Goods Co., Hamilton.

PERSONAL

Mayor MacDonald presided at a banquet given by the citizens of Renfrew, to Hon. Thos. A. Low, president Renfrew Electric Products Co., Ltd., in honor of his election to the Dominion Cabinet.

PURCHASE STORE

Thomas Meredith and Co., Ltd., Toronto, have purchased the hardware store which was previously rented from Stephen O. Murchison, for $25,000. The store, which is situated at 156 King street east, is a three-storey brick building with basement, built on a lot 30 x 150 feet.

HARDWAREMEN ON MONTREAL BOARD OF TRADE

Col. Robert Starke, president Starke-Seybold, Ltd.; John Irwin, president McArthur-Irwin, Ltd., and John C. Newman, Montreal manager McClary Mfg. Co., were among the twelve successful candidates for seats on the council of the Montreal Board of Trade. There were eighteen candidates contesting and the election caused unusual interest, especially since all the executive officers had previously been elected by acclamation.

Mr. Irwin and Mr. Newman are old members of the council, while Col. Starke will enter his first year. It will be remembered that a few weeks ago Col. Starke was also elected as a representative of the metal and hardware association of the Board.

OBITUARIES

The death is announced of Mrs. F. O. Wolvin, eldest daughter of R. H. Smart, president A. H. Smart, Ltd., Brockville, Ont.

Sympathy of his many friends in the trade will be extended to A. E. Benford, representative for Brandram Henderson Ltd., in northern and eastern Ontario, whose wife died very suddenly in Toronto this week. Mr. Benford had just arrived at the convention in Hamilton when he received a wire notifying him of the sudden death of his wife.

Coleman Miller, who for over 48 years was connected with Samuel & Benjamin, Ltd., (formerly M. & L. Samuel, Benjamin & Co.) died at his residence, 540 Huron St., Toronto. For forty years Mr. Miller had been a traveling salesman throughout the chief cities and towns of Ontario. He was born in Toronto, and was an ex-member of the Queen's Own Rifles.

TOY EXHIBIT IN TORONTO

An extensive exhibit of toys was made by manufacturers at the Queen's Hotel in Toronto this week for the benefit of the trade who are interested in noting new developments in this industry. The exhibition will continue until Wednesday of next week.

OBJECTS TO SECOND HAND STORE

Hamilton, Ont.—At the request of G. S. Kerr, K. C., and despite the protest of Alfred J. Wright, hardware merchant, a second-hand dealer was granted a transfer of his license from 342 to 338 James street north. Both Mr. Kerr and Mr. Wright produced petitions for and against the transfer. Some people signed both.

HARDWAREMEN IN MONCTON MUNICIPAL ELECTIONS

Moncton, N. B.—In the municipal election, A. C. Chapman, president N. B. Wire Fence Co., who had been Mayor for the past two years, was defeated by J. F. Edgett, Manager of the Reed Co. Mr. Chapman had not intended to offer as a candidate for this term but was persuaded by some of his friends to enter the field at the last moment. B. A. Taylor, Sales Manager of Sumner Co., Ltd., was elected alderman for Ward 1, leading the poll in this ward.

HOUSE BUILDING PLANS IN MARITIMES

Moncton, N. B.—Prospects for building this Spring look good at present, the January permits ran $10,000 over the corresponding month of last year. The Housing Board has just taken an extra hundred thousand dollars from the Provincial Government to be expended this season. The McKinnon Steel Co., of Quebec have just finished the dome-shaped roof of the new rink here which contains one of the largest ice surfaces in Eastern Canada.

ANNOUNCE EASIER PRICES ON FARM MACHINERY

Winnipeg.—A reduction of approximately forty per cent. on all lines of farm machinery has been announced by the United Grain Growers, Limited. In making the announcement, C. Rice-Jones, general manager of the company, said:

"These new prices are not based on manufacturers' prices, but on what we consider a reasonable price for machinery compared with the price of farm products. Manufacturers' prices have not come down yet to a corresponding extent, but the United Grain Growers believe that by next year such a level for farm machinery prices generally will be established.

"We have based the Spring quotations on the implement price prevailing in 1915. Generally speaking, the prices of farm products are down to the 1915 level."

FROM SHEFFIELD TO JAPAN

Sheffield electroplate manufacturers are somewhat disturbed over proposals which have been received from Japan that this class of Sheffield goods be shipped to Japan in an unfinished state and the electro process applied there. Sheffield manufacturers declare that this process is the essence of the quality of the home-made goods, and intend making very definite representations in that respect to the Japanese commercial mission now visiting Great Britain.

ASSIGNEE WOULD SECURE ASSETS OF BRENNER CO.

Action has been entered against Nathan Brenner, Meyer Brenner, the Bank of Toronto and the Royal Bank of Canada by the authorized assignee of the insolvent N. Brenner and Co., Ltd., for a declaration that all valuables in the defendants' banks, as well as money on deposit, together with jewelry, etc., in the vaults, are the property of the plaintiff for the benefit of the creditors. An injunction is asked restraining the banks or the agents of the Brenners from selling or disposing of the property and judgment is asked for the amount of the money and valuables on deposit.

HARDWARE MERCHANTS AT WINNIPEG BONSPIEL

Winnipeg.—Among the hardware merchants who visited Winnipeg during Bonspiel week were the following:—W. E. N. King, Neepawa, Man.; J. Harrison, Langruth, Man.; D. A. Mathewson, Kelwood, Man.; J. A. MacIntyre, Leslie, Sask.; C. J. Roseborough, Grenfell, Sask.; F. F. Chesney, Wolseley, Sask.; F. Yellowlees, Ninette, Man.; W. Nichols, Spruce Lake, Sask.; G. Smith, Moosomin Sask.; F. Decolby, Yorkton, Sask.; B. T. Lawrence, Killarney; H. Minhinnick, Esterhazy, Sask.; D. Burgess, Cypress River, Man.; W. A. Green, Fernwood, Sask.; D. Burnie, Dubuc, Sask.; J. Gobel, Melville, Sask.; E. Fouillard, Lagan, Man.; F. L. Klemm, Yorkton, Sask.; Geo. Markell, Grenfell, Sask.; Sigurdson Bros. and B. Magnusson, both of Arnes, Man.; S. Bookbinder, Hodgson, Man.; B. Irwin, Inwood, Man.; A. Johnson, Arborg, Man.; R. C. Riley, Willard, Man.; C. Finkleman, Selkirk, Man.; Guertin & Co., St. Jean, Man.

SUCCESSFUL ADVERTISING FOR THE RETAILER

(Continued from page 72)

But the time allotted for this little discussion is growing short. Perhaps before closing we might also touch on the value of signs, particularly in the smaller towns or villages. Signs advertising your business can be placed around your district and out along the main thoroughfares leading into your town. Such general advertising serves to constantly keep your name before the people who buy. When the man is on the way to town, jogging along behind the old gray mare or rattling along in his Ford or gliding along in his Packard, these signs may remind him of something he wants to buy in town and naturally such a reminder will direct him to your store.

SPECIAL SHOW ROOM FOR CARNIVAL VISITORS

The J. H. Ashdown Hardware Co., fitted up a special showroom for visitors to Winnipeg during the Bonspiel Carnival week. These arrangements included an effective display of standard lines of automobile equipment, in addition to various other staple hardware products. Emphasis was concentrated on well-established, trade-mark lines, which being nationally advertised, constituted a strong collective appeal to visitors from far and near.

CLAIM NEW PROCESS FOR PRODUCING STEEL

Recent reports from Pittsburgh indicate that Robert McKnight, a metallurgist and chemist of that city, claims to have perfected a process which will produce not only steel from iron ore, but also enable tungsten, uranium, vanadium and tellurium, as well as a combination of these alloys, to be taken from the raw ore.

Extensive experiments with the new process have been under way for some time. While the announcement of the discovery of the new process did not come as a surprise to certain steel manufacturers, there was surprise expressed over the reported ability to utilize this new process in the production of such alloys as uranium, vanadium and tellurium.

The technical nature of the new process was not made public, but it is said that it is not complicated and that the transformation of the raw ore into steel will greatly lessen the present production costs of the finished product.

Exhibit Booth As Accessory Department Brings Good Results

Winnipeg.—Wood, Vallance, Limited, had a novel idea for exhibiting at the Western Canada Automotive Equipment Show. Their booth was made up to represent a properly equipped accessory department. It caused a lot of favorable comment. Quite a few of the customers claimed that from an educational standpoint, it gave them ideas for displaying goods which they felt would help them to increase their sales of accessories. The display was most complete, including a show window properly lighted and neatly aranged. The interior of the booth contained a well assorted stock displayed on shelves, nicely decorated show case, cash register, advertising displays featuring a number of the nationally advertised lines.

Linked up with the exhibit at the show was another display in the sample room at their accessory warehouse. All articles carried price tickets, and Wood Vallance Ltd., report a satisfactory volume of business resulted through these efforts. Another element in this direction was the fact that sales representatives were on hand to attend to their respective customers.

How Enamel Ware Seconds Are Being Disposed Of

Methods of Disposing Successfully of Seconds in Enamelled Ware Products—Now Gradually Disappearing from Stores

THE GRADUAL disappearance of seconds in Enamel Ware from Hardware stores, and also many of the cut price sales on seconds which have been quite in evidence during past years, has led to some inquiries being made as to how these seconds are being disposed of by the manufacturers. Under the old law it was customary to dispose of these seconds indiscriminately during certain seasons of the year with the result that occasionally a merchant in a town or city would secure a large quantity of seconds which he would put on sale at a low price while his competitors were trying to sell the standard goods at a higher price. There was some difference of opinion as to whether this was a good thing for them, while other firms claimed that seconds should be placed in the back ground as much as possible and only first-class goods should be sold. Enquiries by Hardware and Metal indicate that the seconds are still being disposed of by manufacturers. but in a way which it is claimed does not cause so much disturbance among regular merchants. One manufacturer states that the number of seconds today is even greater than in former years, because the inspection now is more strict, and the result is that such lines which would have been passed as first quality goods a few years ago are now classed as seconds. So far as Hardware and Metal can learn the seconds are now being sold by manufacturers to one or two firms who specialize in second quality merchandise, most of which finds it way into the foreign sections of our larger cities. This it is claimed does away with the old practice of selling quantities of seconds indiscriminately throughout Canada, and centres the sale of second quality lines in a few large places, mostly in thickly populated parts where the low price appeals to many people who cannot afford higher priced articles.

Imports and Exports Almost Equal

Canada's Trade for 1921 Reveals Interesting Figures Relating to Proportion of Exports and Imports

CANADIAN trade for the twelve months ending December 1921, reveal practically a parity between imports and exports, each amounting to approximately eight hundred million dollars in value. In imports United States goods stand out prominently with over half a billion dollars in value. The United States was the best customer of Canadian produce in that year, but had a very small margin over the United Kingdom, each buying approximately three hundred million dollars' worth of merchandise from Canada. Other countries from whom Canada bought merchandise are as follows in order;—Cuba, France, British Guiana, Switzerland, British East Indies and West Indies etc. Other countries who were next best customers for Canadian merchandise in that year were as follows;—Italy, Belgium, Australia, Netherlands, Japan, China, Newfoundland, Greece, etc.

Principal imports for the twelve months ending December 1921 included the following;—

Clocks and watches $2,436,639 compared with four million in 1920; Earthenware and chinaware $4,898,780; flax, hemp and jute $7,479,173 compared with eighteen million in 1920; brass, $3,439,272 compared with six million in 1920; copper $3,824,767 compared with ten million in 1920; iron and steel $102,467,745 compared with $213,316,321 in 1920; lead $262,280 compared with $2,589,380 in 1920; tin $5,997,773 compared with $15,395,578 in 1920; zinc $404,544 compared with $681,221 in 1920. Paints, colors and varnish $2,824,618 compared with $5,337,733 in 1920; crude oil $23,815,805; refined oil $12,431,925 compared with $18,000,000 in 1920; rubber $7,638,062 compared with $19,937,289 in 1920.

Principal exports for the same period included the following:—

Cartridges $14,845 compared with $100,940 in 1920; other explosives $287,012 compared with $1,291,357 in 1920; aluminum $1,259,703 compared with $6,094,623 in 1920; asbestos exports of five million dollars were about half the value of 1920 exports; brass exports amounted to $126,832 compared with $475,809 the previous year; copper exports were valued at $7,455,794 compared with $15,877,306 in 1920; iron and steel exports amounted to $23,087,016 compared with $62,240,099 in 1920; nickel fell off from eleven million in 1920 to three million dollars in value in 1921; rubber fell from thirteen million in 1920 to three million last year.

Twenty Years Ago

* * *

Following items are reproduced from Hardware and Metal of February 15, 1902:—

* * *

"W. Stavert, newly appointed representative in Canada of Jenkins Bros., Boston, Mass., who was lately with Peck, Benny & Co., has been visiting the trade in Montreal this week."

* * *

"A. B. Lee, president of Rice Lewis & Son, Ltd., has been elected chairman of the Toronto Harbor Commission."

* * *

"Mr. Marshall, of the firm of Congdon & Marshall, hardware merchants, Dunnville, Ont., was in Toronto this week on business and reports bright prospects for trade."

* * *

"H. J. Clare, of Clare Bros. & Co., Preston, Ont., and J. Breckest, formerly of the McClary Mfg. Co., have succeeded H. Wilson in the management of Clare Bros. & Company's branch at Winnipeg."

* * *

"One of Owen Sound's first pioneers passed away in the person of Mr. John Harrison, founder of the extensive lumber, sash and door factories of the John Harrison & Sons Co., Ltd."

* * *

"T. S. Simms & Co. are advertising for tenders for the erection of a three storey brick and stone factory 100 x 115 ft. on Union St., St. John, N. B."

* * *

"President W. B. Rogers was chairman at the annual meeting of the Toronto branch of the Retail Merchants' Association of Canada in the Temple Bldg. Proceedings were opened with addresses by Messrs. J. A. Flett, Hamilton, and James Wilson, who desire to organize the retail clerks in Toronto, with the consent of the merchants. E. M. Trowern, secretary, reported a balance of $11.60 on hand."

* * *

"This year there is an application to be made to the Dominion Parliament for the incorporation of the Manitoba and Keewatin Railway to connect Winnipeg with Fort Severn or Hudson Bay covering a distance of 325 miles opening up over 135,000,000 acres."

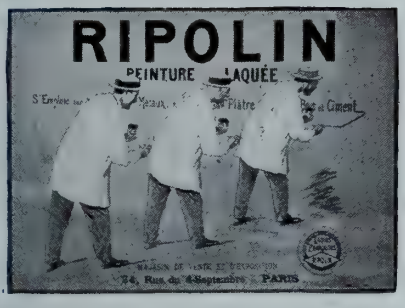
* * *

"At a meeting of the executive committee of the Toronto branch, C. M.A., presided over by J. O. Thorn, it was decided to menorialize the Ontario Legislature respecting the tax exemption of machinery and plant."

* * *

"A most pleasing incident is recorded in Smiths Falls, Ont. Andrew Carnegie offered $10,000 to erect a new public library if the town spent $1,000 yearly in maintenance. Messrs. C. B. Frost and F. T. Frost, president and vice-president respectively, of Frost & Wood Co., supplemented the gift with another of $10,000. W. H. Frost, of the Malleable Iron Works, and H. S. McNeil, wholesale merchant, also made contributions.

It Pays to Sell Ripolin



All Europe knows this famous Ripolin trade mark. The secret process of making Ripolin was discovered in Holland thirty years ago. Since that time Ripolin has become known throughout the civilized world.

This design is the identification mark for *genuine Ripolin Enamel Paint.*

First, because Ripolin sells quickly and with little effort. Its name is known. Its quality is known. It needs no introduction. It is readily accepted by the particular customer, by the architect and by the decorator and painter.

Then because each Ripolin sale represents a decidedly worth while profit. You must sell two gallons of ordinary enamel to equal the profit on one gallon of Ripolin. You expend more than twice the sales effort to sell other Enamels. Ripolin gives you the bigger profit while it is adding its reputation to your business and building up a bigger enamel trade.

Then, too, Ripolin sells in quantity. It is specified for the big jobs. Large size orders prevail. The single gallon profit is many times repeated.

Ripolin is a profit maker and a business builder—IT PAYS TO SELL RIPOLIN.

RIPOLIN

THE ORIGINAL HOLLAND ENAMEL PAINT

To Help You Make 1922

Jap-a-lac Offers You

—A product of quality

Plus

The Canadian housewife has proved the quality of Jap-a-lac by repeated use over a period of 25 years. Only varnish of the highest grade and stains of greatest richness and purity, such as have been invariably used in Genuine Jap-a-lac, could have made this accomplishment possible—Jap-a-lac offers you a high quality product.

—A product in continuous demand

Plus

There are every day uses for Jap-a-lac. Winter, Spring, Summer, Fall, Jap-a-lac is bringing in profits every day for Jap-a-lac dealers. It is this continuous year 'round demand that makes the Jap-a-lac proposition so attractive to Jap-a-lac dealers.

—A product backed by aggressive advertising

Plus

Jap-a-lac has been nationally advertised since 1897. Each year the Jap-a-lac idea is sold to the Canadian public by new and aggressive publicity methods. The Jap-a-lac dealer receives the benefit of local helps that direct the profitable Jap-a-lac business to his store.

—A product that brings sure profits

Steady turnover is the surest sign of profit for the dealer. Jap-a-lac stocks are "turned over" many times during the year. It is the steady stream of Jap-a-lac customers, some new and some coming in for more, that makes "fill in's" necessary and piles up the sure profits.

Jap-a-lac has been nationally advertised since 1897. Few trade names are as well known. This broad reputation can be made an asset to your business with a very small investment. We will gladly send you confidential information prices, discounts, etc. Use the coupon opposite today.

Your Greatest Profit Year

Jap-a-lac Offers You

—*A Complete Merchandising Proposition*

A good product, good selling and good advertising, are the three essentials that are completely and continuously assured by the Jap-a-lac proposition. No business can be successful without them. Jap-a-lac offers them in full measure to every Jap-a-lac dealer.

No single advertisement can adequately cover these dealer advantages. The complete story has been told by descriptions and illustrations in book form ready for free mail distribution.

This is a merchandising book that should be in the hands of every paint and varnish dealer. While it contains proof of Jap-a-lac quality and gives details relating to selling and advertising campaigns it also presents a most unique merchandising plan that gives special sales impetus to Jap-a-lac as well as other paint and varnish products.

This plan is local in character and provides the dealer with a quick action sales drive.

Every dealer who is laying plans for a real business drive should have a copy of "Profits Every Day".

The public has come to realize that there are now many imitations of Jap-a-lac on the market and that none of them can measure up to Jap-a-lac quality. Your townspeople are looking for Genuine Jap-a-lac. The demand is already created. Why not take advantage of this "easy selling" and sure profit proposition? Do it Now!

GLIDDEN VARNISHES

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

SUBSTANTIAL reductions on axes, both handled and without, feature the current hardware markets. Bench axes also have revised discounts, with the average decline on these products being in the neighborhood of twenty-five per cent. Easier price levels are recorded on heavy hammers, and a similar change is noted on all styles of hatchets. Another lengthy list of price revisions includes lower quotations on handled brush hooks, the Engle line of padlocks, Canadian pattern Stillson wrenches, sand paper, emery cloth, Gilmore eye, auger and car bits, carpenters' joiners, both with and without handles, Monty wood planes and plumber's oakum. Another important reduction is recorded on wood screws, the discounts having been revised. Wood handle prices are also under revision, while a change in the discount on miscellaneous wire nails, places these products on a slightly higher price level. The paint markets feature this week, with a rapid rise in turpentine quotations, coupled with some minor revisions on colors in oil announced by paint manufacturers. A moderate tone prevails in the sheet markets, with more optimistic reports in the steel industry generally. An easier tendency has developed in the primary copper stage, and dullness is again apparent in scrap materials, with slight price recessions being evident.

Montreal Markets

MONTREAL, February 16.—Another extensive list of price recessions are included in the hardware markets. Both handled axes and those without handles are reduced considerably. Heavy hammers, an allied line, are also reduced appreciably in all makes. Bench axes are now quoted at 60 per cent off, a reduction of 27½ per cent. Joiners, with and without handles also have new lower prices. The discount on the miscellaneous wire nail list is again revised to 72½ per cent., a former revision only announced a few weeks ago. New quotations are now given on the various lines of Gilmore bits, discounts not being available last week. Monty wood planes are from 5 to 10 per cent. lower in price. The sheet market again displays an easier tendency, and English galvanized sheets, Welsh Canada plate, bright tin plates and terne plates are all slightly reduced. Zinc sheets, on the lead products market are now easier, prices being reduced one-half cent in both full casks and broken quantities. Ingot metals are still very quiet, but the downward trend of the markets in general is not so marked this week.

SUBSTANTIAL REDUCTION RECORDED ON AXES

Montreal

A reduction of substantial proportions is announced on axes, both handled and without. The decline in prices varies on the different kinds, but is covered by approximately 25 to 30 per cent. Following are new base prices with extras:

AXES—		
Boys' axes, doz.	9 50	10 50
Hunters' axes	8 50	9 50
Single bit, doz.	11 50	15 00
Double, bit. doz.	16 50	18 00

On weights heavier than base add to list as follows:—

Group 2—$2.50; Group 4—$1.50; Group 6—$2.50. Group 3—$1.00; Group 5—$2.00; Group 7—$3.50.

BENCH AXES NOW QUOTED AT 60 PER CENT. OFF

Montreal

Bench axes have been reduced through changing the discount from 45 per cent. to 60 per cent. off list prices.

EASIER PRICES ANNOUNCED ON ZINC SHEETS

Montreal

Slightly easier quotations are now recorded on zinc sheets, both in full casks and broken lots, the reduction being ½ cent per lb. in both qualities. All other lines remain unchanged, with the undertone of the market remaining somewhat easier owing to the softer tone in metals on primary markets. In this connection, lead, the principal metal, is reported considerably lower on the London market while the situation on this side remains fairly steady because of consistent demand. Prevailing prices are the following:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10¼
Lead sheets, 3 to 3* lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½

Cut sheets ¼c lb. extra, and cut sheets to size, ¾c lb. extra.

Solder, guaranteed, lb.	0 28½
Do., strictly, lb.	0 26½
Do., commercial, lb.	0 23½
Do., wiping, lb.	0 24½
Do., wire, lb.	0 32½
Zinc sheets casks	0 11
Do., broken lots	0 11½

NEW QUOTATIONS ANNOUNCED ON GILMORE BITS

Montreal

As outlined in our last issue, new prices are now announced on Gilmore bits, showing a reduction of varying extent. Following are new discounts now appearing:

Gilmour auger bits	25-2½%
Do., Special	40-5 %
Do., car bits	12½-5%

MISCELLANEOUS WIRE NAILS NOW ADVANCED

Montreal

Following a recent revision, when the discount of 75 per cent. appeared on the miscellaneaus wire nail list, quotations are again revised, the present discount being 72½ per cent. off.

ANOTHER REVISION IN SHEET MARKETS

Montreal

The local sheet markets are featured this week with revisions on many lines. English standard galvanized sheet, both Queen's Head and Fleur-de-Lis brands being quoted 25 cents per 100 lbs. less. Welsh Canada plates are reduced 25 cents in boxes of 52s. and 60s. while terne plates are now quoted at $16.00 per box of 112 sheets, former quotations being $16.50. In bright tin plate, whole boxes are quoted 50 cents less while the 56 sheets are reduced 25 cents. Black sheets and American galvanized are the only two lines remaining un-

changed, quotations on these still being quoted with a range because of the variation in quotations among the different jobbing houses. Business in all lines is described as seasonably light although a few more inquiries now coming to hand offer encouragement, and dealers are still firm in their opinion that a revival in business will be forthcoming at the close of the winter months. Revised quotations are as follows:

BLACK SHEETS

10 gauge	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 40	4 70
16 gauge	4 50	4 80
18-20 gauge	4 55	5 05
22-24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

GALVANIZED SHEETS.

U. S. Standard.		
10¾ oz.	6 75	7 60
28 gauge	6 35	7 20
26 gauge	6 05	6 85
22-24 gauge	5 90	6 60
20 gauge	5 75	6 45
18 gauge	5 75	6 35
16 gauge	5 60	6 35
14 gauge	5 45	6 35
12 gauge	5 30	6 35
10 gauge	5 20	6 35

English Standard—	Queen's Head	Fleur-de-lis
28 gauge	7 50	7 00
26 gauge	7 25	6 75
24 gauge	6 65	6 35
22 gauge	6 30	5 90
18-20 gauge	5 60	5 75

NOTE.—These prices are full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. Extra for sheets 4 ft. wide, 50 cents per 100 pounds. Extra for sheets 3 ft. wide, 28 ga. and 10¾ oz. 25 cents per 100 lbs.

EASIER PRICES ON MONTY WOOD PLANES

Montreal

New lower quotations are announced on Monty wood planes, a reduction of from 5 to 10 per cent. being recorded on the various lines.

EASIER PRICES AGAIN RECORDED ON HEAVY HAMMERS

Montreal

A reduction of considerable proportions is made in quotations on the various lines of heavy hammers. Following is a complete list of new prices:

HEAVY HAMMERS:—

Nos. 45, 46, 47, 48, 56 and 57.	per 100 lbs.
5 lbs. and over	12 50
3 to 5 lbs.	18 00
Under 3 lbs.	20 00
Nos. 50, 51, 54 and 55.	
5 lbs. and over	18 00
3 to 5 lbs.	23 00
Under 3 lbs.	25 00
No. 58	
1 to 2½ lbs.	25 00
3 to 4 lbs.	18 00
No. 65 mauls	12 50
No. 66 mauls	20 00
Nos. 67, 68 and 68A mauls	17 50
Nos. 69, 70 and 71 wedges	12 50
No. 74 chisels	25 00
Nos. 75 to 85 tools	35 00

JOINERS ALSO HAVE NEW LOWER QUOTATIONS

Montreal

New lower prices also appear on joiners, both with and without handles. Following are revised quotations:

JOINERS—

	dozen
Up to 4 lbs.	11 50
With 21" maple handles	13 00
With 21" all hickory handles	14 00

NO FURTHER CHANGE IN PIPE FITTING PRICES

Montreal

Current quotations on both cast iron and malleable fittings remain unchanged since the revision of a few weeks ago. Business is now described as being of a spasmodic nature, one week showing a fairly active movement, while the next brings reports of a rather dull trade. Unchanged prices and discounts are the following:

FITTINGS—

Cast iron fittings	30%
Bushings, cast	32%
Do., malleable	32%
Flanges	40%
Plugs	30%
Flange unions	30%
Malleable unions	47%
Dart unions, black	33%
Do., galvanized	13%
Nipples, ⅛ to 4 in, close and short..	50%
Do., long	60%
Do., 4½ to 8 in., close and short....	40%
Do., long	60%
Couplings, 4 in. and under	30%
Do., 4 in. and longer	10%

POUND GOODS—	Black.	Galv.
Class A	0 54	0 67
Class B	0 20	0 28
Class C	0 13	0 20

SOMEWHAT EASIER TONE IN BRASS AND COPPER GOODS

Montreal.

Base prices on brass and copper sheets, rods and tubes remain unchanged on the local market, with the undertone somewhat easier, owing to the softer tone in metals on primary markets. Copper in the past few weeks has been quoted slightly lower after the deciding firmness previously displayed. While slightly lower quotations are not unlikely in the near future, following are present quotations;

BRASS—	Base.
Sheets, base	0 25
Rods, base ½ to 1 in., round	0 23
Tubing, seamless, base	0 32
F. o. b. Montreal.	
COPPER—	
Rods, ½ to 2 in.	0 30
Soft sheets, plain, 16 oz. and heavier	0 34
Plain tinned, 16 oz. and heavier	0 39
Polished and tinned, 16 oz. and heavier, lb.	0 43
Tubing, lb.	0 34

Above prices are full sheets and bars. Cut sheets and bars are 5c per lb. higher.

SHIPMENTS OF SAP BUCKETS NOW BEING MADE

Montreal

Shipments of sap buckets are now being made from manufacturers' and jobbers' warehouses. Booked orders for these supplies up to the present have only been of a fair proportion, Quebec territories, where the sugar making industry is carried on more extensively, showing only fair results. The sale of these goods depends entirely upon the opening of the season next month or early in April, and dealers have not felt disposed to place their orders until a later date when the actual demand will be felt. Quotations on both buckets and spouts remain unchanged at opening prices, named a few weeks ago.

SAP BUCKETS—

Straight Pattern—Per 100, No. 7, $13.80; No. 8, $15; No. 9, $1.80; No. 12, $18; No. 16, $21.0.

Galvanized straight—No. 9, $23; No. 12, $27; No. 16 $31.

Western (flaring) pattern—6qt., $13.50; 10-qt., $18.

Frontenac—10 qt., $19.

Galvanized Western—10 qt., $27.

Spouts—Sterling, $20; Eureka, $15 per 1000. Square one gal, syrup cans, $16.75 per hundred.

ONLY SORTING BUSINESS IN WROUGHT PIPE

Montreal

List No. 54 still covers the wrought pipe market locally. Although present quotations are generally considered reasonably low, there are reports of certain mills offering a price concession on attractive orders. The market on the whole, however, is stated to be fairly steady apart from this condition which has recently crept into the market. The movement of piping continues fair for the present season of the year, although orders are almost entirely for small quantities.

ONLY LIMITED BUYING IN IRON AND STEEL

Montreal

The volume of business now recorded in iron and steel is of a limited nature, with stocks also comparatively low but quite ample to take care of prevailing demand. However, expectations of spring business are expressed in different quarters, and an improvement is looked for with the close of the present month. In primary circles, also, trading is at low ebb, with quotations nominally unchanged. Although a revision was made locally only a few weeks ago, it is reported that further price concessions are offered for attractive orders. Whether this will develop into a further general lowering of prices is hard to determine, but the opinion is expressed that improved business in later months will remedy this situation. Unchanged quotations are as follows:

Common bar iron, 100 lbs.	2 65
Refined iron	4 15
Irish finish machinery steel	2 70
Mild steel	2 65
Single reeled machinery steel	4 75
Band steel	2 65
Spring steel	4 25
Sleighshoe steel	2 65
Tire steel	2 85
Toe caulk steel	3 55
Harrow tooth steel, per lb.	2 80
Mining tool steel, per lb.	0 21½
Black Diamond tool and cast steel, per lb.	0 21½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

SOIL PIPE AND FITTING QUOTATIONS UNCHANGED

Montreal

Current quotations on soil pipe and fittings remain unchanged at former discounts, with little variation to report in business conditions. Trade is seasonably light at present with little im-

provement looked for until the weather opens in the spring months. Following are unchanged discounts:

SOIL PIPE—

2 and 3 inch	47½%
4 inch	50%
5 and 6 inch	47½%
Fittings—	
2 to 6 inch	50-10%

ANOTHER REVISION IN WOOD SCREW DISCOUNTS

Wood screw discounts are now revised, thus lowering quotations on these products around 10 per cent. A change of 2½ points has been added to the discount list on bright, brass and bronze screws, in flat, oval and round head.

RE-ACTION MAY DEVELOP IN INGOT METALS

Montreal

Quietness still prevails in the ingot metal markets, with few changes in prices, and the recent declines seem to be nearly completed for the present. What the future will bring forth is difficult to say, but present prices are certainly very low and a re-action upward would not be altogether surprising.

TIN.—Tin has again reached a point very near the low level touched in August last, and it shows a decline of about £22 as compared with six weeks ago. This would seem to be a very safe level. Supplies, however, are still ample and demand is only fair, so that there may not be any particular recovery as yet. Stock price 36½ cents.

COPPER.—London has been weak, partly owing to advance in exchange and also owing to large supplies of recovered metal. New York has also been lower, but producers are again firmer in their ideas and some distress copper has been taken off the market. Local market is quiet with prices slightly easier at 17 cents for electro, and 16½ cents for casting.

LEAD.—London has been much weaker, but the American market remains steady and there is little change on this side. The feature of the past few months has been the consistent demand for this metal, which has helped to stabilize prices. Local market is quoted at 7 cents.

SPELTER.—The London market has again been lower, chiefly owing to the advance in exchange, but East St. Louis spot, and this is probably near the low seems to be more steady at $4.50 for point on this movement. With present price on ore there is little profit to smelters at this figure. Local market is quiet at 7¼ cents.

ANTIMONY.—There is nothing new about this metal as it is dull in sympathy with others, with very little demand. Quotations are unchanged, Chinese being quoted at 6¾ cts., high grade English at 7¾ cents.

ALUMINUM.—This metal still fails to produce a feature in the market, but remains very dull with quotations somewhat easier at 25 cents.

Toronto Markets

TORONTO, February 16.—The list of current price revisions is headed by a notable reduction in quotations on axes of all kinds. The average decline is approximately 25 per cent. A similar change is recorded on hatchets of various styles, and through a revision in the discount, prices on bench axes are substantially lower. Reductions also appear on sledge and striking hammers, handled brush hooks, sand paper and emery cloth, and the Engle line of padlocks. Another decrease is noted on wood screws, which averages around 10 per cent. A further reduction is recorded in certain quarters on plumbers' oakum, and revised discounts are given on Stillson wrenches, Canadian pattern. As outlined in last week's market report, new discounts are now in effect on Gilmore auger, eye and car bits. A change in the quotation on miscellaneous wire nails completes the lengthy list of price revisions.

NOTABLE REDUCTION MADE IN QUOTATIONS ON AXES

Toronto

One of the feature market changes this week is the substantial reduction announced by the manufacturers on all lines of axes. This reduction averages almost 25 per cent., and following are the revised quotations on these products:

AXES—

Boys Axes, doz.	9 50	10 50
Hunters' axes, doz.	8 50	9 50
Single bit, doz.	11 50	15 00
Double bit, doz.	16 50	17 00

On weights heavier than base add to list as follows:

Group 2—$0.50, Group 3—$1.00 Group 4—$1.50, Group 5—$2.00, Group 6—$2.50, Group 7—$3.50.

FURTHER REVISION IN WOOD SCREW DISCOUNTS

Toronto

Another reduction in wood screw quotations has been announced. This change entails increasing the discounts 2½ points on all styles, thus recording an average reduction of 10 per cent. Following are the revised discount levels:

SCREWS:—

Discounts off Standard List adopted Aug. 1, 1908	
Wood, F.H., bright	85 %
Wood, R. H., brass	77½%
Wood, O.H., bright	82½%
Wood, F. H., bronze	75 %
Wood, R. H., brass	80 %
Wood, O.H., brass	77½%
Wood, F. H., bronze	77½%
Wood, R. H., bronze	72½%
Wood, O.H., bronze	72½%

REVISED DISCOUNT NOTED ON STILLSON WRENCHES

Toronto

An additional revision has been made on the Canadian Pattern Stillson wrenches. The new discount is 55 per cent. off list, compared with the previous quotation of 52½ off.

SUBSTANTIAL REDUCTIONS HATCHET PRICES

Toronto

All lines of hatchets, including shingling, lath, barrelling and claw, are quoted with substantial reductions this week. Following are the revised price levels on these products:

HATCHETS, SHINGLING—

	Per doz.
No. 1	9 75
No. 2	10 75
HATCHETS, LATH—	
No. 3	10 00
No. 4	10 00
HATCHETS, BARRELING—	
Nos. 50 and 60	14 50
HATCHETS, CLAW—	
No. 7	12 00
No. 8	12 75

WOOD HANDLE PRICE NOW UNDER REVISION

Toronto

Prices on wood handles are now reported under revision, with new net quotations being issued on the various lines.

BENCH AXES RECORD SUBSTANTIAL DECLINE

Toronto

The discount quoted on bench axes has also been revised, thus recording a substantial decline in prices. The revised quotation is 60 per cent. of list. Following are the list prices and discount:

BENCH AXES

List Prices.	Per doz.
No. 1	35 00
No. 2	40 00
No. 3	45 00
No. 4	49 00
No. 5	54 00
No. 6	60 00
No. 7	66 00

Discount, 60 per cent. off.

HANDLED BRUSH HOOKS HAVE LOWER PRICES

Toronto

Handled brush hooks have also been reduced in price this week. The revised quotations are as follows: Light, $14.40 per doz.: medium, $15.60 per dozen.

ENGLE PADLOCKS ON EASIER PRICE LEVELS

Toronto

A reduction has also been announced by the manufacturers on the Engle line of padlocks and similar products.

FURTHER REDUCTION NOTED ON PLUMBERS' OAKUM

Toronto

A reduction of approximately 50 cents per 100 lbs., has been recorded in some quarters on plumbers' oakum. The revised quotation is $6.50 per 100 lbs. in 50 lb. bales.

NEW DISCOUNTS RECORDED ON GILMORE AUGERS

Toronto

As covered by market reports contained in a previous issue of Hardware and Metal, revised quotations have been announced on the Gilmore line of auger bits. These are now quoted at 22½ per cent. off list; while Gilmore long eye, short eye and nut augers are shown with a discount of 5 per cent.

LOWER PRICES ANNOUNCED ON SLEDGE HAMMERS

Toronto

Price reductions are also recorded this week on masons' hammers, blacksmith sledges and double-face striking hammers. Substantial declines are noted in prices on these products. Following are the revised levels:

HAMMERS.

Masons:—

	per 100 lbs.
Under 5 lbs.	24 00
5 lb. and over	18 70
Blacksmith Sledge:—	
Under 5 lb.	18 75
5 lb. and over	13 00
Double-face Striking:	
Under 5 lb.	18 75
5 lb. and over	13 00

EASIER PRICES ON SAND AND EMERY PAPERS

Toronto

As outlined in last week's issue of Hardware and Metal, revised quotations are now recorded on sand paper and emery cloth. The decline is approximately 5 per cent. on these products. Revised discounts are contained on the current market quotation pages.

CHANGE MISCELLANEOUS WIRE NAIL DISCOUNT

Toronto

Further revisions are noted in some quarters on the miscellaneous wire nail discount. This is reported to have been changed from 75 per cent. to 72½ per cent. off list.

NO FURTHER CHANGES IN OIL PRODUCT PRICES

Toronto

While load quotations on gasoline, coal and lubricating oils, remain at unchanged levels, the easier tendency remains in evidence at primary oil centres. Reductions in gasoline prices have been recorded in certain districts of the United States, but such developments have not been reflected in domestic circles up to the present. Unless crude oil levels show signs of receding still further, the opinion has been expressed that oil product prices are not generally expected to change materially from the current quotations.

MODERATE TONE IN CURRENT SHEET MARKETS

Toronto

The recent lower prices on galvanized sheets have failed to rejuvenate the sheet markets to any noticeable extent. Current trade is described as quiet, but this condition is seasonal at this period of the year. Improvement both in conditions and volume of orders is looked for in the near future, with prospects in primary centres brightening up considerably. The introduction of railroad buying on a more extensive scale has reflected a better tone in southern steel markets, while enquiries for sheets from manufacturing consumers, is considered one of the signs of approaching Spring betterment in general. Prices are approximately steady at the recently revised levels, one distributor expressing the opinion that there is evidently nothing worth while shading prices over, the experience of recent months indicating that cutting prices fails to bring out business that is being held over. With construction activity practically assured of a fairly extensive program for the coming season, trade improvement along general lines is anticipated. Following are the prevailing average sheet quotations on local markets:

BLUE ANNEALED—

10 gauge, base	3 75	4 50
12 gauge	3 80	4 55
14 gauge	3 85	4 60
16 gauge	3 90	4 65

BLACK—

18—20 gauge	4 30	5 05
22—24 gauge	4 35	5 10
26 gauge	4 40	5 15
28 gauge	4 50	5 25

Charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—

	Queen's Head	Fleur-de-lis
28 gauge	7 00	7 50
26 gauge	7 75	7 25
24 gauge	7 35	6 85
22 gauge	6 90	6 40
18 and 20 gauge	6 75	6 25
Premier and Apollo.		
19¾ oz	6 00	5 75
U. S. 28 base	5 60	6 20
U. S. 2	5 30	6 05
22 and 24	5 15	5 30
18 and 20	5 00	5 75
16	4 85	5 60
12 and 14	4 70	5 45

An extra 40c per 100 lbs. is charged for Keystone and Premier brands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10 3-4 oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds.

PLATES, CANADA—

Dull 60 sheets	5 30
Ordinary, 52 sheets	5 25

PLATES, COKE TIN—

I.C., 20 x 28, 112 shets	13 50
IX, 20 x 28, 112 sheets	16 50
IX. 20 x 28, 56 shets	9 00

PLATES, CHARCOAL TIN—

1X, 20 x 28, 56 sheets	14 00
1XX, 20 x 28, 56 sheets	16 00

PLATES, TERNE—

1C, 14 x 20, 112 sheets	12 00

AMERICAN STEEL MILLS OUTBID GERMAN PRODUCERS

Toronto

One encouraging feature in the steel industry from the American viewpoint is the fact that United States mills have recently succeeded in underbidding German producers. Serious price competition has been encountered in foreign markets during the last year or two, through German mills being able to take full advantage of lower wage scales and cheaper production costs, and thus secure coveted orders. This situation is now being reversed in some instances, namely on wire nails and heavy wire products. Southern producers have recently sold wire nail to Japan in the face of German competition. It is stated that this success would indicate that German prices are slightly rising, while prices on this continent have been steadily falling for some time past, due to the producers' efforts to lower costs. Any direct stimulation to the American foreign steel trade reflects in the conditions governing the steel industry in general, and brisk activity in Southern circles is usually accompanied by more cheerful optimism and a brighter outlook in Canadian steel business.

MORE OPTIMISTIC REPORT IN STEEL INDUSTRY

Toronto

With the lower prices on bar iron and steel now generally in effect, some improvement in the volume of inquiry is again reported In some respects this is stated to differ from inquiries that have been received during recent weeks, in that the producers report a slight buying revival in these products, which indicates a future revival along line of fairly respectable proportions. In primary steel centres, the anticipated railroad purchasing is now looming up in a more promising manner, while manufacturing consumers are again noticeably in the market for raw materials. As a consequence of these contributory factors, steel production is working back again to a higher ratio of output, the percentage in some quarters being listed as nearly 50 per cent. Following are the average quotations prevailing on the domestic markets:

IRON AND STEEL—

Mild steel bars base	2 85
Mild steel bands, 3-16 in. base	3 35
Bar iron, base	2 85
Angle iron, base	2 95
Horseshoe iron	3 60
Tire steel	3 35
Spring steel	5 50
Sleigh shoe steel	2 85
Hoop steel	3 75
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	30 00
Mining drill steel	18 50
Cast tool steel, high grade	31 00
Cast tool steel, medium	18 00

DULNESS IS AGAIN APPARENT IN SCRAP

An easier tendency has developed in the scrap material markets. Dulness in scrap iron has been unbroken in the past several days, and there are no signs of an increased buying movement.

Foundries display interest only in immediate requirements. Prices, while not materially changed, showed an easy tone for some dealers were willing to take below market levels in order to do business. Cast iron held its own, but this was due mainly to the firmness of pig iron.

There has been very little activity in scrap metals. Consumers have shunned the market, and little improvement is looked for until there is a firmer virgin metal market.

Gross Tons—	Scrap Iron	
Heavy melting steel (Hamilton)	$11 50	$12 00
Borings and turnings	2 00	3 00
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	6 50	7 50
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	15 75	16 75
Stove plate	11 50	12 00
Grate bars	10 50	11 00
Standard car wheels	13 50	14 00
Scrap Metals.		
Heavy copper and wire	10 00	10 50
Light coper	8 00	8 50
No. 1 composition	9 00	9 50
No. 1 comp. turnings	6 00	6 50
Heavy yellow brass	5 50	6 00
Heavy lead	4 00	4 50
Tea lead	2 00	2 50
Scrap zinc	3 75	4 00
Scrap Rubber		
Boots and shoes	2 50	3 00
Lumbermen's rubber boots	1 50	2 00
Auto tires	0 50	1 00
Solid tires	0 75	1 25

London Markets

LONDON, February 16.—Price adjustments have been lighter for the last week, and merchants are buying more freely for their present and Spring requirements. Linseed oil is very firm and the new quotations this week show a further advance of ten cents per gallon.

Hardware business in this district continues seasonably good and shows some improvement this week. Reports on collections continue good.

REVISED DISCOUNT ON MISCELLANEOUS NAILS

London

A further revision has been announced in the discount on miscellaneous wire nails. The revised quotation is now 72½ per cent. off list, compared with the former discount of 75 per cent.

SANDPAPER AND EMERY CLOTH PRICES LOWERED

London

New Prices approximately 5% lower than formerly have been announced on sand paper and emery cloth. The new discounts are, sandpaper, list less 10 per cent. Emery cloth, list plus 20 per cent.

FIRM TONE PREVALENT IN TURPENTINE MARKETS

London, Ont.

No further changes have been recorded in turpentine prices, as yet, but the tone continues very firm. A fair seasonable sale is reported at the following levels:

TURPENTINE—	Imp. Gal.
1 bl. lots	1 40
2 to 4 bbl. lots	1 39
5 gal. lots	1 55

RAPID ADVANCE IN LINSEED OIL PRICES

London, Ont.

Due to the rapid rise in price of flax seed, quotations on linseed oil have advanced another ten cents per gallon. Shortage of Argentine seed is given as the primary reason for the recent firm tone in these markets:

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls., per gal.	1 05	1 08
3 to 5 bbls., per gal	1 04	1 07
6 to 9 bbls., per gal	1 05	1 05

Less barrels, add 15 cents gal.

COPPERED WIRE HAT AND COAT HOOKS REDUCED

London, Ont.

Coppered wire hat and coat hooks are approximately ten per cent. lower in price. The revised quotation on the 3 inch, is $1.00 per gross.

LOWER PRICES NOTED ON KING CUTTER RAZORS

London, Ont.

New lower prices are now quoted on the King Cutter razors. The revised level on these products is announced as $30.00 per doz.

REDUCED QUOTATIONS ON McCLASKY WIRE NAILS

London, Ont.

Revised quotations for this season are announced on the McClasky line of wire grips. The new lower price is 70 cents each.

COTTON SEINE TWINE PRICES NOW REDUCED

London, Ont.

Prices on cotton seine twine are now five cents per lb. lower. This change follows the easier trend recently recorded on other cotton products. The revised qoutations follows:

COTTON TWINE.:—

No. 18 and larger, 1 lb. cones, 66c lb. No. 18 and larger ¼ lb. cones, 67c. lb. No. 15 and smaller, 1 lb. cones, 67c. lb. No. 15 and smaller, ¼ lb., 68c. lb.

MODERATE DEMAND FOR CUT AND WIRE NAILS

London, Ont.

Dealers report a fair movement of nails at present, with quotations generaly remaining unchanged at the recently revised levels. Following are current base prices:

Wire nails, ... $3.90 base.
Cut nails, ... $4.35 base.

NEW DISCOUNT ON CANADIAN STILLSON WRENCHES

London, Ont.

A reduction of approximately ten per cent. is recorded on Canadian Stillson wrenches. The latest quotation is list less 55 per cent.

REVISED QUOTATIONS ON KNIFE HANDLED WRENCHES

London, Ont.

The new lower prices on knife-handled wrenches, figured from the revised discount level are as follows:

KNIFE HANDLED WRENCHES:—

6″—8.40 doz. 8″—$10.00 doz. 10″—$12.25 doz. 12″—$15.60 doz. 15″—$21.25 doz. 18″—$26.25 doz. 21″—$32.25 doz.

ENGLISH REAPING HOOKS ON LOWER PRICE BASIS

London, Ont.

The current season's new price on the Pox English reaping hooks is almost 25 per cent. lower than previously. The revised quotations follow:

ENGLISH REAPING HOOKS:—

No. 2—$5.75 doz. No. 3—$6.00 doz. No. 4—$6.50 doz.

SHIPPING BOOKED ORDERS OF POULTRY NETTING

London, Ont.

Booked orders for poultry netting are now being shipped. The price on the 1 and 2 inch mesh remains at the recently revised level of list less 12½ per cent.

Winnipeg Markets

WINNIPEG, February 16.—Several more reductions are made this week on Hardware commodities. A feature of the market is the lower prices on pipe fittings through a revision in discounts. Other lines quoted at lower prices are thumb latches, Gem casters, cable chain, Potts' sad irons. Linseed oil shows another advance which is the second increase in the last few days.

LOWER PRICES RECORDED ON THUMB LATCHES

Winnipeg.

Lower prices are recorded this week on thumb latches. Following are the latest quotations.

THUMB LATCHES

Japanned Iron, No. 101—$1.80 per doz.; No. 102 $1.85 per doz.; No. 103—$2.00 per doz.; No. 104—$2.30 per doz.

LOWER NET QUOTATIONS ON "GEM" CASTORS

Winnipeg.

Through a revision of lists and discount on gem castors, the net selling prices are lower. Following are the new lists which are quoted at net:

GEM CASTORS

No. 351, 40c, per set; No. 551, 48c. per set; No. 751, 56c. per set; No. 951, $1.00 per set; No. 352, 32c. per set; No. 552 37c. per set; No. 752 48c. per set; No. 952 84c. per set; No. 553 48c. per set; No. 554 37c. per set; No. 555, 48c. per set; No. 755 56c. per set; No. 556 37c. per set; No. 756, 48c. per set.

LOWER QUOTATIONS ON WROUGHT COUPLINGS

Winnipeg

Lower prices are recorded this week on wrought couplings. Following are the latest discounts:

⅛ in. to 4 in. 25%.
4½ in. and larger 10%.

NEW DISCOUNTS LOWER PIPE FITTING PRICES

Winnipeg.

Through a revision in discounts, nearly all kinds of pipe fittings have been reduced in price. Following are new discounts:

PIPE FITTINGS

Malleable Class A	65%
Malleable Class B & C	70%
Union Elbows and Tees	60%
Crossovers	45%
Boiler Elbows and Couplings	60%
Unions	45%
Union Dart ¼″ to 2″	25 and 10%
Unions, Dart ⅛, 2½ to 4	20%
Railing Fittings	50%

CAST IRON FITTINGS—

PRICE REDUCTIONS ON POTTS LINE OF SAD IRONS

Winnipeg

Reductions are made this week in prices of the Potts line of sad irons and handles. Following are the newest quotations:

SAD IRONS

No. 55, $2.05 per set. No. 50, $2.15 per set.

SAD IRON HANDLES

Common, $1.45 per doz.; Improved, $2.15 per doz.

ANOTHER ADVANCE IN LINSEED OIL PRICES

Winnipeg

This week brings another advance on Linseed oil. Raw is now quoted at $1.01 per gallon and boiled at $1.04 per gallon in barrel lots.

REVISED LOWER PRICES ON WROUGHT NIPPLES

Winnipeg

A reduction is made in prices of wrought iron nipples through revised discounts. Following are the current quotations:

WROUGHT NIPPLES

Close or Short:—4" and smaller, ..40 and 10%
4½" and larger .....30 and 10%
Long:—4" and smaller .....50 and 10%
4½" and larger .....40 and 10%

EASIER PRICE LEVELS ON CABLE CHAIN

Winnipeg.

Prices have been reduced on cable chain. Following are the revised quotations:

CABLE CHAIN

Electric Weld:—3/16 in., $18.18 per 100 ft.; ¼ in., $16.56 per 100 ft.; 5/16, $14.04 per 100 ft. ⅜ in., $12.04 per 100 ft.; 7/16 in, $11.62 per 100 ft.; ½ in., $10.95 per 100 ft.; 9/16, $10.95 per 100 feet; ⅝ $11.55 per 100 ft.; ¾, $11.30 per 100 ft.

Hamilton Markets

HAMILTON, Ont.—A noteworthy fact concerning developments among Hamilton manufacturers and wholesalers this week is the indication of improving trade conditions following upon the completion of inventories and the introduction of more stable price conditions. This is not mere "talk" but facts substantiated by figures shown Hardware and Metal.

A manufacturer of woodenware and an important wholesaler of numerous hardware lines points to the fact that the actual turnover in goods in his business to date in 1922 is equivalent to that of the same period in 1919 which was a record year, and is ahead of the same period in 1920 and 1921. This speaks well for placing business and indicates a fair amount of confidence among buyers, but it is pointed out that there is still room for confidence which has been retarded, in the case of woodenware particularly, due to the instability of prices.

Element of Freight Rates

Freight rates are coming in for much consideration as it is realized that they represent one of the biggest obstacles to lower prices. This manufacturer could not appreciate why a railway employee should receive two or three times the income derived by the farmer and contrary to the opinion that this enabled a greater circulation of money to assist trade, pointed out that too much of the money so earned is spent on extravagant living which does more to hinder than help legitimate trade in necessities. A recent case was cited where the freight on a car of broom corn and on rough timber exceeded the value of the shipment.

This wholesaler reports collections good and after a survey points out that retailers' stocks generally are low. This firm working on 50 per cent. basis of time is getting two-thirds capacity production indicating that the efficiency of labor has greatly increased.

There will probably be some revision in brush prices next July, due to several factors now influencing the situation in this industry. It is not expected that there will be any general decline. Some reductions in labor costs may be made in this industry this spring when normal production is again resumed. At present a schedule of five days a week is being followed by one brush manufacturer who expects soon to increase the working time. Placing business in brushes has been active this year to date, and combined with the sorting business which will later develop, a very fair volume of trade will probably be reported at the year's end. Last year's record is a hard one to exceed in this industry however, as it enjoyed great activity up until June. There are plenteous supplies of materials on hand for another year, bristles now coming from Manchuria. Campaigns to increase the sale of paint always stimulate brush trade, and an active Spring season is looked for, particularly insofar as big paint jobs are concerned. Lack of export businesse is all that keeps this industry from assuming capacity production.

Good Sorting Business

Manufacturers of tools, builders hardware, etc., report a somewhat "spotty" trade though the total represents a bigger volume of business than was enjoyed at this time last year. There has been a good sorting business following inventories, both on the part of wholesalers and retailers. Plans are being made to take care of a considerable requirement of these lines in connection with building operations this spring in eastern cities, but it is expected the West will be slow to offer an active market in these lines. Collections are reported good, and prices firm, with some elements said to be developing that might cause some slight increases in certain directions.

In the iron and steel industry, little new business has been uncovered during the week, and working on about a 40% basis, producers are going carefully, watching for signs of a renewed spring activity in construction and extension work.

Much interest is being taken by local manufacturers and wholesalers in the annual convention of the Ontario Retail Hardware Ass'n. being held here this week and numerous enquiries and a fair number of orders have been placed at the exhibits by retailers.

THE BANKER AND THE RETAILER

(Continued from page 71)

obtained; or if the business is carried on by a joint stock company, the guarantee of the principal stockholders. This may seem a bit harsh, but it is the duty of a bank to get security for its loans, and experience shows that lending upon the general credit of an individual is sooner or later a cause of loss and worry.

There are other ways in which a bank can be of service to a merchant besides lending him money. For example, it can supply him with exchange to pay for his goods in England, the United States or abroad. Sometimes, particularly during the last year or two, when New York funds have ruled at a premium going as high as 19 per cent., some merchants may have thought that this was imposed by the banks rather than by conditions, and perhaps it may not be out of place for me to say a few words on the subject of exchange.

The Exchange Problem

It is a very natural question to ask, "Why should a dollar be worth more in New York than it is in Hamilton?" You know by experience that you can buy as good a dollar's worth for a Canadian dollar in Hamilton as you can for an American dollar in New York. In fact, I think you will get a better meal in Canada for the same money. It would be much easier to understand the situation of the monetary unit of Canada had some name other than dollar. If, for example, it were called a beaver, for the imaginary line that divides the two countries is a very real one in finance.

This is well illustrated by a story of El Paso in Texas. There is a bridge there that crosses into Mexico, and at one time the paper U. S. dollar was at a premium of ten cents in Mexico, while the Mexican silver dollar was at a premium of ten cents in the United States. A bibulous but ingenious gentleman discovered that he could always get ten cents change by taking an American dollar into Mexico and bringing a silver dollar back, and in those pre-historic times that was the price of a drink at the other end, and he kept the process up until the bridge became too difficult to navigate.

Now the reason is to be found in the working of foreign exchange, in settling for goods bought on either side of an international boundary, actual hard money is seldom used and is seldom bought and sold, but the various substitutes for money—cheques, telegraphic transfers, bills of exchange—are things that bankers handle and merchants provide, and prove the motive power of international finance. A bill of exchange (and remember that a cheque is merely a bill of exchange payable on demand) is a debt, and these debts are bought and sold, thus making exchange. The price follows natural laws.

MacLeod, in his theory of banking, says that if money is scarce and wheat very abundant, the price of wheat must fall. If money is very abundant, the price of wheat will rise.

Bear in mind that the ultimate settlement of any debt is in funds of the creditor country, and governed by the condition of the debts between the two countries. But the excess of imports over exports is not the only factor. There are also imports loaned or invested, or exchange for services or representing bonds and securities sold.

Service to Tourists

As an example of service rendered take that afforded visitors to our summer resorts such as Muskoka and the Rocky Mountains. They usually pay in American money sooner or later. The money left by travelers has a very important bearing on the financial condition of the countries. Take Switzerland for example. These and other things make what might be called a hidden balance of trade, and the great drop in the

(Continued on page 96)

COMBATING BUSINESS DISEASE

(Continued from page 76)

view. It will take that individual action which is the result of business acumen and personal study of the situation. It is necessary, therefore, for us to devote more thought and more productive energy to our business. The most experienced counsel can only advise us according to his own state, while we with the close knowledge of the conditions which surround us can —if we will—proceed intelligently and independently towards that success which may only be achieved by personal initiative and effort.

Combating Business Disease

To wait for things to improve is nothing short of disastrous to your business. There never was a time when intelligent action was calculated to produce such marked beneficial effects. Mr. Molson Mills, your president, told me some time ago that it was his intention to leave his office and go behind the counter so that he could meet his customers; know what they expected and how best to serve them; so that he could keep in close touch with his clerks with a view to increasing their sales efficiency; so that he could stimulate the enthusiasm necessary to service and selling, and so that out of his action would arise that keen competition among his clerks that is conducive to the highest type of business ability.

And why? Simply because Nelson Mills has realized that conditions call for different treatment; analyzed the proposition, and appreciates that for every action there is a re-action, that with increased effort he is bound to have increased sales. Nelson Mills is personally going to take a hand in steering his ship through a choppy sea to calmer waters, because he is satisfied that to help business conditions as affecting his store more thought and greater effort is required. In a word, he believes that prevention is better than cure, and he is taking the necessary precautions against the business disease.

Gentlemen, we need more of that spirit. It is the only cure for the incipient business disease. I have not the words in my vocabulary to impress you with the necessity of activity during the next twelve months. We have only a short period to go through where this activity is really necessary, and if we have desire enough we will have courage enough to provide sufficient energy to carry us through that short period, and, by the momentum it will have gained, for several years after that.

The Law of Salesmanship

Much has already been written and spoken about the value of suggestion in selling and, while no retail merchant whom I have met has thought contrarily, yet there is a deplorable lack of appreciation of this valuable method of increasing sales—perhaps because of its simplicity, perhaps because the suggestion is not clothed in scientific, brainracking terms, which seem to appeal to human nature.

In my home a short time ago I had occasion to go to the flour bin, in which I found an old broken cup which, when I attempted to use, scattered the flour all over the kitchen. I inquired of the general manager of our culinary department (my wife) if that was the best utensil she had for the purpose and, upon being informed that it was, I immediately set out to buy a flour scoop. How many hardware stores I entered would be hard to say. Suffice it that I quit when I got tired and there was not one to be had in the whole neighborhood. Now I presume, reasonably, that there are hundreds of families in that vicinity who would be very glad to buy a small fifteen cent flour scoop if someone would ask them to—if someone would show one to the prospective customer—if someone would only suggest that it was so much more handy and inexpensive than a cup.

Times out of number Mrs. Penberthy has asked me to buy a flash light for the home. We haven't one yet. The reason is that on every occasion that I have visited a hardware store it has been for something of a totally different nature and I have never thought of a flash light. Probably all of you sell fuses. Did it ever occur to you how handy a flash light is when putting in a fuse? Had some one called my attention to flash lights when I was buying fuses he would have made a very easy sale.

So much for the part that suggestion plays in creating sales and as a cure for the business disease. Here are two instances of two transgressions of the laws of salesmanship.

Application of Effort

A short time ago an industrial institution in a small town in the vicinity of Toronto wrote to us asking if we would supply them with some of our goods to finish a job they had started. We referred them to our agent in their town and the industrial people wrote back stating that our agent did not carry Lowe Brothers' flat wall paint, he only carried varnish stain. We wrote again stating that we were sure our agent would order whatever they wanted, but, if he was not disposed to, the goods could be procured at a certain store on the outskirts of Toronto. This man drove eleven miles and placed an order for $50.00 worth of our material with a Toronto merchant, and the merchant in the smaller town wonders why business is so bad.

In the city a short time ago we had a call from a prospective purchaser of our products. We referred him to our agent who was less than fifteen minutes' distance from our factory. During the day there were three different people referred to that store, and were turned away because the merchant did not carry the products they wanted. In other words, he was not sufficiently interested in his business to go to the telephone and order his customers' requirement to be sent direct. He lost probably $15.00, possibly a $100.00, by his indifference, and he would consider us hard if we pressed him for his bill.

Manufacturers have spent thousands of dollars in organizing a service department, or, where there is not a service department, dealer helps, with the desire to co-operate with the dealers in increasing their sales. Our experience has been that only a small percentage of the dealers use the sales' helps at their disposal or even try to interest their clerks in the use of such assistance. It is significant, however, that those who do use it are usually the most progressive and prosperous merchants.

In the seeking of more sales, gentlemen, the application of every possible honest means to create sales is the answer to your problems, not only these particular months of uncertainty, but any others that might come within your future experience. It is the one dependable formula, the one antidote to all your business diseases. More thoroughness, more activity, more sales.

Activity Kills Atrophy

There is one more caution, gentlemen, that I would like to give that concerns collections. A letter came to my desk a few days ago from a small account in a small village. His account is long overdue and he has written us asking for an extension. The letter is a very fearful one. He is doubtful as to when he will be able to pay his account and it is evident, if you read between the lines, that he is much disturbed over his financial condition.

He mentions that he has outstanding several thousand dollars in a community of three or four hundred. Plainly, his store has been affected by the business disease. The man has been waiting for business to improve and he has become so used to waiting that the same inertia is applied to the collection of his accounts. His lack of foresight has placed him in a financial quicksand from which he is going to find it very difficult to extricate himself. Of this unfortunate individual we will say no more. You will draw your own conclusions. He is but representative of hundreds of retail merchants through the Dominion of Canada.

I do wish, however, to suggest a few thoughts that might be of immediate value to you. Indiscriminate credit is one of the most disastrous things a merchant can permit. It is human nature for the man who owes you to avoid you, even though he may be an honest man. It is human nature for the men to withhold payment longer, the greater the debt. If John Smith owes you $10.00 and has been your debtor for three months, John Smith knows that you expect the money. If he needs a wrench he will go to your competitor for he does not want to meet you.

Mrs. Smith owes you for a Casserole. That is nothing, she will pay you the next time she calls at your store. But, she does not call for a month or two, during which time she has bought on credit another $15.00 worth of merchandise—she now owes you $30.00. Thirty dollars is something and she is waiting for things to improve—for her husband to get a raise or for the chickens to multiply before you get yours. Waiting; waiting is synonymous with disintegration, with atrophy. If your customers all wait and you wait with them, and we wait with you, all three eventually are broken. If they cannot pay their bills you cannot run your business. If you cannot conduct your business we fail. If we fail, Mrs. Smith's husband is out of a job and we have a depression.

Gentlemen, activity applied to the collection of your outstanding accounts is as necessary, if not more necessary, than the consideration of activity as applied to your sales. Less waiting on the part of the individual and the community at large, collecting the money for what you do sell is the simple formula I have to suggest.

Curing Business Ills

Summarily, the progressive merchant has been startled into consciousness of the fact that stagnation is the worst enemy of business progress, and it is infinitely better to clear his shelves of slow moving or stagnant stock at cost, or less than cost if needs be, than to have his investment tied up and daily depreciating with the stock so represented.

This awakening, if it may be so termed, augurs well for the prosperity of the indivivdual and the community at large, since on business activity and the ability to keep in circulation the commodities of life virtually hangs the economic fate of the nation—not to speak of the individual.

The cure for an ailing business is not cheap goods which, being cheap, are undependable and calculated to impair your business progress. Cheap goods are a poor investment not only from the standpoint of future considerations but from the immediate standpoint of percentage of profit. I would be glad if I had time to prove this to you.

Cutting down your expenses by laying off hands or those agencies which are instrumental in the progress of selling is no better cure. Doing what the other fellow does, is worse. You need everybody who and everything which can assist you to the end in view—more sales. The more you enjoy, automatically, the less your overhead. The less your overhead compared with a satisfactory volume of sales the healthier your business. Let us rouse ourselves from the lethgary which has been responsible for a great deal of this business stagnation, this business depression, spend some analytic and constructive thought on our requirements, enlist the co-operation of all who can help us—particularly our clerks and our suppliers—and let us

Buy discriminately,
Sell enthusiastically,
Collect aggressively,

and prepare to ward off or cure the business disease and make 1922 our greatest selling year.

Setting an Objective for Paint Trade

Paint Trade Says "Increased Sales This Year"—Who Is Going To Get The Extra Business?—Early Preparations Suggested To "Cash In" On The Bigger Business—Unpacking New Stock, And Re-Arrangement of Old

IN DISCUSSING the possibilities for paint trade during the year, manufacturers are unanimous in their opinion that 1922 will show increased returns over the past year. After carefully going into the records of sales in 1921, the trend of the market during the past twelve months, the paint requirements in all sections of the country, their efforts insofar as advertising is concerned; in fact after a careful and conscientious survey of conditions, both past and present, they are convinced that paint sales will this year reach a new standard. They state they are going to sell paint and lots of it. Further, it is the dealer trade that is expected to bring the desired increase. These opinions are based, they state, from actual indications. There is no doubt of the painting needs of the country and with the lower prices now existing these are thought to be the two factors that offer encouragement to their predictions.

With such an encouraging outlook from the sources of supply comes the question, who is going to sell the paint? The agent for the Jones line or the Blank agency? It would seem to dwindle down to the individual merchant to ask himself the question, what is the objective for our paint department this year?

The records for this section of the retail store showed up very well during the past year. There was a good amount of painting in both the Spring and Fall seasons of 1921, and dealers were able to "cash in" on their turnover. At the same time they were placed in a position to reduce their stock considerably, thus placing them in a position to take care of their new supplies this season with more ease.

Early Preparations

True, the really active season in the paint department does not commence until March, and sales in earnest are not enjoyed until April, and perhaps May. Continuing then until the mid-summer weather of July and August, the true value of paint consumption is felt. However, does not the real season, insofar as the dealer is concerned, commence from the time the new season's stock arrives in the opening weeks of the year? It is generally admitted that January and February are quiet months in the hardware store, paint sales suffering with the turnover of other commodities, but with the Spring shipment of paint arriving at this time, unpacking and re-arrangement of stock on shelves, brings to the minds of merchants that another season will soon begin, and early preparations will have to be made in order to enjoy the full benefit of this department.

Let us assume then that the first duty is bringing in the new season's supply, and arranging the shelves in order that they may accommodate the heavier load. Placing new labelled cans at the front would certainly add to the appearance of the department but the clean appearance given would be more than entirely offset by the harm done in having the older stock remain in evidence while new goods are being sold. Therefore, although appearance must suffer for the time being, the method adopted by many dealers of always placing older labels at the front, can well be recommended.

Earlier preparations in the month of January or February also involve mailing lists and advertising matter both for circularizing and store or window use. Revising lists for mailing purposes is a task that requires a good amount of attention, eliminating "deadwood" and adding new prospects. The habit of submitting the previous year's lists may well be scored because it is detrimental both to the store and the supply house. Manufacturers advise, "the longer the better," when asking for the list of prospects for direct mailing purposes, but certainly not filled with names which represent poor prospects for paint.

Advertising matter is also freely supplied, and if there is not sufficient received with the Spring shipment, it is considered well to advise the paint firm at an early date because plenty of color cards, pamphlets, counter cards and other material, is almost essential in the campaign that is to follow. There are many methods that dealers in the different sections employ in distributing smaller advertising matter of this kind. Some wrap them in parcels, some use with a circular letter sent from the store itself, some send in the monthly accounts, while others again forward in a separate one-cent envelope. Any method might be recommended, all having been proven fruitful in extending the campaign.

Outside Missionary Work

With the work on the inside of the store finished in the opening months, many dealers report good results from early outside canvassing, or missionary work. In the months of October or November there may have been various residences or other out-buildings which the owner contemplated painting, but owing to the first snow flurries such was not commenced. These are classed as number one prospects for the following spring season, and very often an early personal call will bring the painter on the job as soon as weather permits. These are also customers who have always made a practice of painting their buildings every few years, and here too an early canvass often closes the order well before the season commences.

The painter is not overlooked, he having work on hand in the previous fall that could not be finished. By soliciting his patronage before his active work commences, the list of these jobs can be obtained and will assist both himself and the store. He is as anxious to re-commence his duties as the merchant is to sell the requirements.

Therefore, although the spring painting season is usually termed as from April to July, merchants have found through experience that it commences in January. Efforts both from the inside and outside are required in the early months of the year to assure bigger results when the material is actually sold at a later date. The call of the housewife for house-cleaning needs is probably the sign of approaching spring in the hardware store, but it is not necessary to wait for any such sign for the commencement of the paint season as far as the hardware store is concerned.

SERVICE

CONFIDENCE

FAIR DEALING

Ideas Practically Interpreted

"An idea is like a meteor; at the critical moment, the confused meditations which have preceded it open a way, and the spark flashes forth." (*Hugo*)

On another page of this issue is printed an address, delivered by our Vice-President before the Hardware Merchants of Ontario during their very recent Convention, entitled "The Business Disease." If you will read it you are sure to agree with the logic of his contentions and to profit by the few simple thoughts and methods he suggests for the stimulation of a dispirited retail business.

Too much cannot be said of the vital importance of *selling* or *turnover* as the corrective for most of the present day business ills, and any ideas that might suggest a cure are indeed invited by the earnest business man—but, read the address for yourself and draw your own conclusions.

What we particularly wish to say in this message is that the principle of *MORE SALES* was the main consideration in preparing a very effective day-in-and-day-out Dealers' Sales Service. In fact, this principle is the very backbone of our present Sales Promotion System. It is a service which at the present time under present day conditions, is seeking the prospective purchaser and creating more sales for our Dealers. You will better appreciate the possibilities of such a service after you have read the article referred to.

Ideas!—Who does not welcome them? We have some, and would appreciate the opportunity and the pleasure of discussing them with you.

The Brush Department

Plans For Early Spring Brush Business

Big Field of Business in Brushes Exists For Merchant Who Can Thoroughly Acquaint Housewives With Various Brushes Provided For Their Use

THE RESULTS which followed the "one cent" brush sale arranged by the Mills Hardware Co., Hamilton, Ont., as outlined fully in last week's issue of Hardware and Metal, indicate the possibilities which exist in the brush department for stimulating trade periodically in some such way. Another big advantage of such plans i that they introduce to the housewife many brushes particularly designed for some household use, with which she has not been acquainted. Once she has used a certain brush and found how much better it does its particular work than did the other brush which was improvised for the purpose, she will be a better brush customer in future and will do much to advertise among other housewives, the value of buying the brush which is made for a particular purpose. In this way the sale of household brushes can be greatly increased.

Practically every brush that is manufactured to-day is made to fill a particular need and both in point of material and design it is specially fitted to perform this particular function. The housewife who is unacquainted with these various types of brushes is missing something which will greatly facilitate her work. On this basis the hardware merchant has an effective appeal to launch through the ads and the window displays. A display in the window showing by actual demonstration the particular use for which certain brushes are designed would interest a great many housewives and bring in many sales.

Spring housecleaning and painting will be under way within the next month or so. It is a little early yet to plan on direct business from this source, but it is a splendid time to start a little educational work to show housewives how they may greatly lighten the burden of housework in the Spring of the year by selecting a range of brushes from the hardware merchant's stock. The suggestion to use housecleaning helps to lighten work is sure to appeal to the housewife. Brushes not only lighten work but they do it more quickly and thoroughly. Herein lie some of the strongest arguments for brush selling.

Paint Trade Emerging From Depression

Annual Meeting of Canadian Paint, Oil and Varnish Association Discuss Progress of Paint Industry During Past Twelve Months

THE NINTH annual meeting of the Canadian Paint, Oil and Varnish Association, held at Montreal, again discussed matters pertaining to the paint and varnish industry. After the minutes of the last annual meeting were taken as read, the president reviewed the salient incidents and characteristics of the year 1921. Mr. Henderson then pointed out the great value of the Association, and expressed the opinion that it was entirely due to the relationship of confidence and friendly feeling among members that the industry had in the past year emerged so well from a most trying period. Market stabilization, he considered together with the "Save the Surface" campaign had brought the industry through a year of great business depression. He was of the opinion that business with many industries would still be hard to get for some months to come, but he was certain that the paint and varnish industries would undoubtedly be better off than most others.

Report of Save the Surface Committee

As a fore-runner to the report of the Save the Surface Committee a moving picture was shown, this picture having been prepared by the American Save the Surface Campaign Committee. The full report of the committee which was then read by the chairman is contained elsewhere in this issue.

In response to the intimation that there was some lack of knowledge of the campaign in parts of the province of Quebec due in a measure to the lack of supplies of advertising matter written in the French language the meeting was informed that all advertising was now appearing in both French and English.

Freight Classification

It was arranged that the Transportation Committee would hold a meeting as early as possible and inform the Association members with respect to requirements under the new classification and suggestions offered by the Canadian Freight Association insofar as containers of all kinds were concerned. Also to inform of other changes which would become effective with the adoption of the new Freight Classification No. 17.

Price Readjustments

New lists on pure colors in oil and japan colors were adopted, also a slight modification in quotations on aluminum paint. On these products, however, the changes are of a very moderate nature, and deal principally with the differential between small and larger sized packages. Raw material and other productive costs were reviewed, and it was clearly shown that prevailing quotations on all lines were much firmer than at the time of the recession in prices last Fall.

Paint Trade Notes

Lindsay McL. Scott of Scott Paint-Varnish Co., London, Ont., is a visitor at the Martin Senour Co., Montreal.

* * * *

Among those from out of town attending the annual meeting of the Canadian Paint, Oil and Varnish Association in Montreal were:

J. J Riley, Flint Varnish and Color Co., Toronto; T. F. Moneypenny and H. E. Mihell, Imperial Varnish and Color Co., Toronto; F. J. Penberthy, Lowe Bros., Ltd., Toronto; Fred Moore, Benjamin Moore & Co. Toronto; Chas. Hichman and W. C. McLaren, Ottawa Paint Works, Ottawa; J. D. Craig, Sanderson Pearcy & Co., Toronto; L. C. Stephens, G. F. Stephens & Co., Winnipeg.

THE BANKER AND THE RETAILER

(Continued from page 92)

premium on New York funds at this time as compared with a year ago, may be accounted for first by the tremendous slackening in business here. We have very few commitments for raw materials or goods to pay for in the United States when business is dull in Canada. In the second place, money is getting cheap over there, and they are hungry for our first class bonds and debentures, and the continual floating of these has brought down the premium.

But I cannot see how we can hope to abolish, except temporarily, the premium existing on New York funds until we are in a position to resume the export of gold if need be, to pay for international trade balances, and that is a long way off when you consider our heavy debt and the potential conversion innate in our Victory Bonds and other securities.

We have our troubles here in Canada, but they are nothing like so severe as they are in other parts of the world. They are the lesser problems of growth resumed. We have no war currency to deflate, out budget is approaching a balance. In foreign trade, our cash position is stronger than ever. Our field crops show an increase, and we are producing and no other country in the world can point to a combination of all these factors in February, 1922.

Let us take heart, work hard, economize, and put the country in its rightful place, that is, on top.

BOECKH'S BRUSH NEWS

ALL BOECKH'S BRUSHES **ARE MADE IN CANADA**

That Great Teacher---Experience

WITH all the good intentions in the world, the lack of long experience often leads to many mistakes. This is true of every activity—brush manufacture included.

And this is still another reason for the great and uninterrupted satisfaction enjoyed by dealers who sell Boeckh's Brushes.

Ever since 1856 this company has devoted its energies to making good brushes—brushes of every kind for every purpose—brushes which have that winning combination of good material, good workmanship and good finish.

This company's experience is exceptional—unique. There is no problem in connection with brushes which we have not solved—and a large proportion of the new and improved methods of brush manufacture have been developed by Boeckh experts.

The result is a product that is absolutely dependable—a guarantee that we are not only willing, but able, to make good to the very uttermost.

An Invitation To You

We are here to give you service. We do not consider that our relations with our customers end with the sale of a bill of goods, but are prepared to help you out with your brush selling problems. If there is anything in connection with brushes about which you need experienced counsel, do not hesitate to write us. It is a pleasure and a privilege for us to place our brush experience at your disposal.

Developments in Paint Industry

Review of Recent Important Events Offers Encouragement for Future Efforts to Create New Records—Paint Industry in Better Position Than Others Due to Co-operation

Address of President George Henderson at Annual Meeting of Paint, Oil & Varnish Association

MINOR REVISIONS IN PAINT PRICES

Some minor revisions in certain paint prices were decided upon at the annual meeting of the P. O. & V. Ass'n., these changes indicating a stiffening in the market.

Aluminum paint is advanced 50 cents per gallon, thus bringing the base quotation to $5.50 per gallon.

Colors in Japan are slightly higher, while the differential on colors in oil also shows a small advance. This latter change will have no effect on the 1-lb. tins, but the 25-lb. sizes will now cost less.

Putty and white lead, in small tins, are increased, the differential between 25 lb. tins and 5-lb. tins being 4 cents per lb. and 1-lb. tin 6 cents in advance.

"IT BECOMES MY duty on a fifth occasion to review the activities of the Canadian Paint, Oil and Varnish Association, during the year immediately preceding. It is not my purpose to dwell at length on bygone events. As a young and vigorous organization, the present and particularly the future, are of greater moment than the past, but a brief resume of last year's salient incidents and characteristics will be helpful in guiding us during 1922, and therefore you must be patient with a few words of history.

"The first meeting of the year under review may perhaps be regarded as that one held in Toronto on December 1st, 1920. It dealt mainly with the price question. At that time house paints, marine paints and porch floor paints were reduced 50c a gallon, second quality house paints 25c per gal., inside floor paints 30c per gal., and flat wall paint 25c per gal. It was proposed that the new prices would remain fixed until July 1st, 1921.

"On the same occasion the tariff committee reported that the brief prepared by them had been forwarded to all members for their approval, and no fault had been found with it. A hearing with the Tariff Commission to submit the brief was arranged for Toronto on December 2nd, 1920, and a number of the Montreal and Toronto members attended the commission's meeting. Owing to the fact that other groups submitting evidence did not finish in time, our hearing was adjourned, and the Montreal members returned home leaving Mr. Moneypenny to look after the interest of the paint and varnish trade. He was given a hearing a day or two later, and submitted our case with his accustomed energy and ability.

"The annual Meeting was held in Montreal on February 3rd, 1921, and all officers were re-elected. The members discussed the price question at this meeting, and felt that prices should remain unchanged at the moment, but should be taken up again in the immediate future.

"The proposed new Freight Classification No. 17 was discussed and a committee appointed to look after the member's interests. The report of this committee will be submitted at this meeting.

"On February 8th, a few days after the annual meeting, a special meeting was called to again consider prices, and on this date the following reductions were declared: First quality house paint, white 60c per gal.; first quality house paints, colors, 70c per gal.; porch floor paints, 70c per gal.; second quality house and floor paints, 50c per gal.; first quality inside floor paints, 25c per gal.

"In June 1921, the question of varnish prices came up, and as no reductions had been made in these goods up to that time, it was felt, particularly essentially varnish concerns, that changes should be made. It was decided that the matter be left in the hands of the varnish committee, which held a meeting in Toronto on June 27th, when a general reduction of 15 per cent. was made.

"At a representative meeting of the association held September 13th in Montreal, it was arranged that the varnish committee be known in future as the varnish section, and that it should have power to decide upon varnish prices without the necessity for these being confirmed by a general meeting of the association. It was also agreed that all members should receive notices of varnish section meetings, and that all may attend same and have equal rights with the members of the section.

"At the September meeting of the association further reductions in nearly all lines except varnishes and enamels were arranged, and these prices are in effect at present.

"The question of prepaying freight by some of the members to very numerous points in Ontario, Quebec and the Maritime Provinces was taken up, and to prevent this practice becoming general, the chairman and the secretary were asked to arrange delivery points where goods to the store and jobbing trade might be delivered freight prepaid. To all points other than those determined upon, prepayment or allowance of freight is not permitted, except in the case of carload lots, where it may be allowed at the option of the member making the sale. The list of delivery points was given in the minutes of the September 13th meeting. On the unanimous recommendation of our Western members, a number of delivery points west of the Great Lakes were cancelled by notice issued September 27th, 1921.

RE-ELECT OFFICERS PAINT ASSOCIATION

At the recent annual meeting of the Canadian Paint, Oil and Varnish Association held at Montreal, officers were elected for 1922 as follows:

President, George Henderson, Brandram, Henderson, Limited. vice-presidents: Walter B. Ramsay, A. Ramsay & Son Company; L. C. Stephens, G. F. Stephens & Co., Ltd., Winnipeg; T. F. Monypenny, Imperial Varnish and Color Co., ..Ltd., Toronto.

"Save the Surface" committee: R. C. Mission, H. E. Mihell, John Irwin, George Henderson, Royal Cluxton, L. C. Stephens and J. C. Pendray.

"At the September meeting the Sales Tax matter was again discussed, and it was decided that the maximum a member of the association shall be obliged to charge a customer by way of sales tax, might be the 1½ per cent. required by law to appear on the invoice; in other words, he may at his own discretion, absorb up to 1½ per cent. of the Sales Tax.

"Apart from the progress of our financial affairs, which the secretary-treasurer will touch upon, in his report, I believe the foregoing is a rehearsal of the outstanding eventualities of the year 1921. It all sounds very simple and like a record of plain sailing. You all know, however, that this was far from the case, and that we have just emerged from one of the most trying, if not the most trying, year in the history of the industry in Canada.

"What the past of 1921 made evident, the future of 1922 will prove again. We are not out of the woods. Business is still hard to get, and must remain so with the great majority of industries, until at least the autumn of this year. Our industry will undoubtedly be better off than most. This, in my opinion

Weekly Paint Markets

Montreal

MONTREAL, February 16,—The decision reached at the annual meeting of the Canadian Paint, Oil and Varnish Association, held in Montreal, that quotations on prepared paints in general, varnishes and white lead in oil, should remain unchanged for the active spring season, is the feature of the paint markets this week. There were changes of a minor nature declared, such as on aluminum paint, japanned colors, colors in oil, putty and white lead in 5 lb. and 1 lb tins, outlined in the following reports.

Linseed oil and turpentine also again attract attention, both products being further advanced, the rise being very rapid in oil prices. The firmer tone, with increased quotations following, commencing over two weeks ago, has been well maintained, in fact the gain has been much more pronounced this week with quotations advancing 15 cents per gallon. Present quotations are $1.08 and $1.10 per gallon in one barrel lots for raw and boiled oil respectively. Although speculation is undoubtedly responsible for the oil situation to an extent, estimates of Argentine crop, which now bring American crushers to the Canadian market, is said to be the real reason for the present flurry.

FURTHER RAPID ADVANCE IN LINSEED OIL PRICES

Montreal.

Advanced quotations to the extent of 15 cents per gal., has been the development in linseed oil prices in the past week. The recent firmer tone, commencing two weeks ago, continues, but the gain in oil prices are simply following the flax market, these prices showing substantial gains, particularly in the last few days. One local crusher stated that over the week-end, from Saturday until Monday, these prices advanced 25 points, following which the market still continues very firm.

Speculation is undoubtedly responsible to an extent, but the fact that American crushers are now buying very heavily on the Canadian market, with practically no supplies in their own country, is said to be the real reason for the present flurry. Argentine crop estimates also are by no means favorable. Where last year there was a total yield of 50,000,000 bushels, it is estimated the yield will not total over 30,000,000 bushels this season. Prevailing quotations locally are as follows:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal	1 08	1 10
6, 3 to 5 barrel lots, per gal..	1 00	1 08

Less barrels, add 10 cents per gallon.

TURPENTINE QUOTATIONS AGAIN INCREASED

Montreal.

A further increase of 5 cents per gallon is recorded on the local turpentine market this week, bringing the quotations now up to $1.32 per gallon in one barrel lots. Quotations at primary distributing centres are still very firm although the rise in these markets has not been so rapid in the past few days.

However, as outlined in last week's issue, it was altogether probable that local quotations would still advance even if Southern prices remained steady, because of cheaper stocks on hand here being still available. New supplies have recently reached this market and quotations, therefore, have been necessarily increased. Reports from the South now indicate that much depends on European demand for the future of this product, although there is every indication of a firm tone continuing. Producers are still more or less in control of the situation and offer only ample supplies for existing demands, thus if English buyers enter the market to any extent, which is altogether probable because of the earlier opening of spring there, further advances may be expected. With these conditions prevailing local distributors look for little recession in prices, but point out the possibility of even high prices ruling for the next few weeks. Advance quotations are as follows:

TURPENTINE—	Imp. gal.
1 barrel lots	1 32
2 to 4 barrel lots, per gal.	1 30
Broken lots	1 42

WHITE LEAD SHOWS LITTLE VARIATION

Montreal.

White lead in oil will remain practically unchanged for the active spring months, this decision being reached at the meeting of manufacturers this week. There is a change, however, in smaller packages, 5 lb. and 1 lb. tins prices being advanced through increasing the differential in these quantities. After a thorough review and discussion of existing raw material costs, it was unanimously decided that present levels would remain as formerly although it is pointed out that productive costs are considerably higher now than at the time of the last revision. Pig lead is now higher in price and linseed oil has new higher levels at the present time. Unchanged quotations therefore, are as follows: $12.00 in 5 ton lots, $12.75 in 1 ton lots, and $13.10 in less quantities.

HIGHER PRICES ON PUTTY IN SMALL TINS

Montreal

Current quotations on putty in larger containers remain unchanged, while 5 lb. and 1 lb. tins are increased in price. Container costs are really responsible for this increase, the former differential not being sufficient to cover the extra cost of packages. Following are revised prices:

Standard, per 100 lbs.	5-ton lots	1-ton lots.	Less
Bulk drums, 100 lbs.....	5 00	5 50	5 75
Bulk drums, 100 lbs.	5 00	5 50	5 75
Do., or tins, loose, 25 lbs.	5 25	5 75	6 00
Drums or tins, cased, 25 lb.	6 00	6 50	6 75
5 lb. tins	9 25	9 75	10 00
1-lb. tins	11 25	11 75	12 00

Pure Linseed Oil Putty, $1.50 per 100 lbs. ad-

ALUMINUM PAINT ADVANCED 50 CTS. PER GALLON

Montreal

Aluminum paint in all sized tins is advanced 50 cents per gal. bringing the base price in one gallon cans to $5.50 per gallon.

DIFFERENTIAL INCREASED ON COLORS IN OIL

Montreal

One pound tins of colors in oil remain unchanged in price, but 25 lb. tins will now cost less owing to a change in the differential. Formerly, the difference in quotations between the two sizes was not sufficient for an active sale of the larger sized tins. It was found that consumers who use large quantities very often purchased the one pound tins because the advance prices did not cover the loss usually sustained in using the larger cans, as there was always a wastage owing to evaporation when the can had been opened. For this reason it was decided to advance larger sized packages.

Toronto

TORONTO, February 16.—Further rapid advances in linseed oil quotations, coupled with slight changes announced on paint products, supply the feature events in the current paint market reports. The revision in prices declared by paint manufacturers as a result of the recent annual meeting, includes an increase in aluminum paint, and changes in the differential on colors in oil, with a similar revision for putty and white lead in smaller packages.

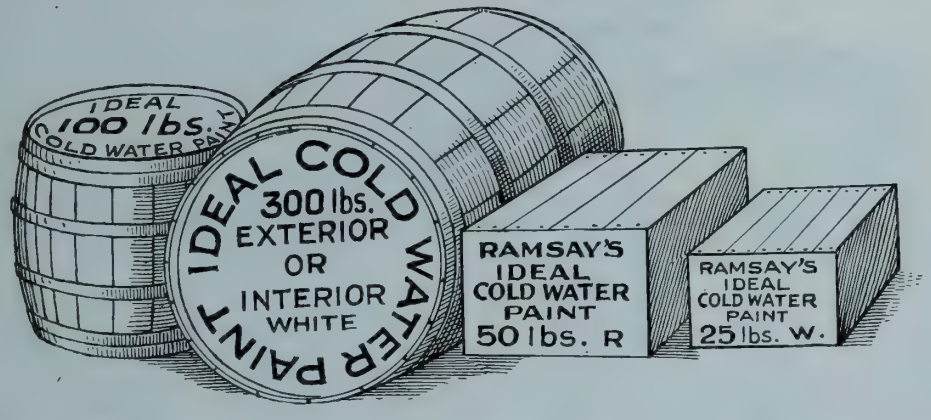
RAMSAY'S

Ideal Cold Water Paint

For Exterior and Interior Use



A Small Investment Large Return Proposition

RAMSAY'S IDEAL COLD WATER PAINT

Something new in a cold water paint that anyone can mix by just following a few simple instructions.

Ideal Cold Water Paint is a product of Canada created as a result of research work carried on during the war to develop Canadian products of every description. The outcome of this study was the discovery of the main ingredient entering into the manufacture of Ideal Cold Water Paint.

"Ideal" is a Fire Retardant. This effective cold water paint is made in a dry powder form only, requiring only the addition of water when it is ready for use. It will not deteriorate from standing. Supplied in white and six beautiful deep shades, from which any number of tints may be produced. We show in our color chart the six deep shades R, S, T, W, X and Y, and twenty-four beautiful tints which you can obtain by the addition of Ideal white and mixing with water.

Both deep colors and white are put up in the following size barrels and boxes, which are lined with dampproof paper:

25 and 50 lb. boxes
100 lb. kegs
300 lb. barrels

Send for color card, prices and information.

TORONTO PAINT MARKETS

(Continued from page 100)

Prepared paints such as house and floor paints, flat wall colors, barn, marine and all other products remain unchanged in price.

The sudden rise in values of linseed oil is attributed to the American crushers' interests coming into the Canadian flax seed markets, owing to reported shortages in Argentine centres. This situation has served to boost the domestic prices on seed, which coupled with an improved demand for o.. resulted in additional increases.

STRONG SPECULATIVE TONE IN TURPENTINE MARKET

Toronto.

Although turpentine quotations continue to show strength, the price of $1.40 per gallon in one barrel lots, represents the average of the quotations now appearing on the domestic markets. Certain distributors are offering turpentine at prices a few cents below this level, due to having some stocks on hand which were purchased prior to the rapid advance in southern prices. On the other hand, fresh supplies appearing locally, carry the higher cost. It is estimated that a uniform quotation will probably materialize in the near future, due to the continued firmness in the undertone at Savannah circles. While the speculative element remains in evidence at primary distributing points, future price levels are decidedly uncertain. Following are local quotations:

TURPENTINE—	Imp. gal.
1 barrel lots	1 40
2o to 4 barrel lots	1 39
5 gallon lots	1 55

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots—15 cents per gallon extra.

MINOR REVISIONS ON PAINT PRODUCT PRICES

Toronto.

Some revisions of a minor nature have been declared by paint manufacturers, these changes suggesting a firmer tendency in the markets. The principle advance is the increase of fifty cents per gallon in aluminum paint, this bringing the base quotation on this product to $5.50 per gallon. Colors in japan are also slightly higher, while the differential on colors in oil has been revised, this change resulting in easier prices on the 25-lb. tins, but leaving the cost of 1-lb tins unchanged. There has been another small change announced in the differential on white lead in oil, particularly as regards smaller packages. Base quotations remain steady at former levels. A similar revision has been made in putty prices, for while the current quotations on large containers are unchanged, the prices on 5 and 1-lb. tins are increased through this alteration in differential. It is claimed that the former levels failed to adequately provide for the additional cost of containers. The prevailing price levels on putty and white lead in oil are as follows:

PUTTY—

Standard, per 100 lbs.	5-ton-lots	1-ton lots.	Less
Bulk bbls	$ 4 45	$4 95	$5 25
100-lb. drums	5 45	5 95	6 20
25-lb. irons	5 70	6 20	6 45
Bladders in bbls.	6 70	7 20	7 45
Do., less quantities	6 95	7 45	7 70
1 lb. tins,	11 70	12 20	12 45

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices for similar quantities

WHITE LEAD IN OIL—

In 5-ton lots	12 45
In 1-ton lots	13 20
Less quantities	13 55

EXTENSIVE BOOST IN LINSEED OIL PRICES

Toronto

The sudden increase in the price of linseed oil provides the sensation of the current paint markets. This spurt is attributed to an improved demand for oil at this season of the year, coupled with a remarkable jump in flax seed prices. The latter feature is a result of the American crushers entering the Canadian seed markets, owing to estimates of Argentine flax seed having been lower than formerly expected. Additional increases amounting to 20 cents per gallon have been recorded on the domestic markets, thus bringing prices to $1.15 for raw and $1.18 fo boiled in barrel lots. An element of speculation is also noted in the current situation; with the revised price levels following:

LINSEED OIL—	Per Gallon.	
1 to 2 barrel lots	1 15	1 18
3 to 4 barrel lots	1 14	1 17
to 9 barrel lots	1 12	1 15

MAY REVISE BRUSH FREIGHT CLASSIFICATION

Toronto

Current interest in the brush industry is chiefly centered upon the suggestion to place brushes in general in a higher freight classification than at present prevails. This movement is receiving the close attention of brush manufacturers, any steps in this direction being of vital interest to the trade in general. It is stated that such a change would affect prices adversely, and even in view of looked for downward revisions in freight rates, the boosting of the prevailing classification would more than offset any advantage that might be contained in future rate declines. The bristle market is described as fairly steady although some price variations have been recorded. These however, while recording some slightly easier levels on certain grades, also reflect increased prices on others. Little change of a downward nature in brush prices is generally expected, according to L. W. Simms, President of T. S. Simms & Co., Ltd. In discussing this phase of the situation, Mr. Simms pointed out that bristle buying by the manufacturers was generally undertaken around the month of June, and the prices which governed these products, would naturally reflect in the finished articles. With higher prices evident in certain sections of the bristle market it was thought that some stiffening in quotations on some lines would probably be the outcome. Changes for future declines were described as remote, under the prevailing conditions. The demand for brushes at this season, is regarded as fairly good. Orders however, are of a small nature, although generally fairly numerous. An improvement in this direction is looked for with the advent of Spring weather, and the increased opportunities for outdoor painting activities.

DEVELOPMENTS IN PAINT INDUSTRY

(Continued from page 98)

is due entirely to the relationship of confidence and the friendly feeling that exists as between the different men to whom I speak this afternoon. Out of your friendship and confidence in one another sprang the possibility of reasonable price maintenance during a time of great business depression and of falling markets; out of that same friendship sprang too the co-operative advertising campaign now known all over the country as the 'Save the Surface' campaign, concerning the activities of which you will receive a full report later in the day; out of this friendship and confidence there should and will be maintained, under the auspices of your new officers and a continuation of that friendship and confidence, an opportunity of making 1922 the greatest paint and varnish year, subject only to certain reservations inherent in the situation, such as the very much lower selling prices compared to those which were in effect a few years ago.

"Let me take this opportunity of expressing my high appreciation of the support and backing I have received from officers and members of the association during my term of office, and let me close by stating, in bespeaking an equally loyal support for the new chairman, that there are difficulties attending the administration of this post which call for very sympathetic consideration on the part of members, and not infrequently, most marked unselfishness and even sacrifice."

WORKSHOP NEED NOT BE UNPROFITABLE

(Continued from page 64)

made, that the workshop is not a paying proposition.

Mr. McGregor, Oakville, stated that he had made more money pro rata in the last year in the tinshop than in the hardware store. He stated that there was more competition in hardware than in the tinshop.

The necessity for an adequate system in the tinshop was emphasized and many retailers testified to having found serious leaks in this department of their business.

Replying to a question from F. Smith as to the portion of overhead charged to the back shop, Mr. Christie stated that two-thirds was charged to the hardware and one-third to the shop.

John Millen, of Wilmette, Ill., a town of 6,000 population, finds Effecto more profitable each successive year.

"A remarkable thing about Effecto is the way it sells at all times of the year,"

says John Millen, of Wilmette, Ill. With other live P&L dealers, he says: "There isn't a really dull month on this line." Millen finds his Effecto stock turns over four or five times a year, netting an annual return as high as 140% on that part of his capital which is invested in Effecto.

Get some of this year-round Effecto business which sales-creating magazine advertisements and high-powered helps will bring you! Write *today* for particulars of this unusually attractive proposition on Effecto.

Birkett's for Quality

WHEN you unpack a shipment from Birkett's you can regard it as already partially sold.

We mean by that, that Birkett's offer you only tried and tested lines; lines with good, well-known names for which consumer acceptance has been established. Such lines need only the merchant's skill and salesmanship, reasonably applied, to turnover quickly and profitably.

Quality goes without saying in all lines Birkett's offer you. When you unpack goods from Birkett's you may feel that the whole Birkett organization backs and supports you. Quality comes to mind very readily, suggested by the name Birkett.

Art Shades

(The Can with the Maroon and Yellow Label)

The store-rooms and garrets of almost every home contain unlimited opportunities for the use of FLOGLAZE ART SHADES.

These beautiful, delicate shades find no end of uses for the finishing and decoration of practically all articles of interior use, such as furniture, baby buggies, bric-a-brac, woodwork, etc.

Floglaze Art Shades enjoy a lively and perpetual demand by the amateur finisher about the home. Eight delicate tints including gold and aluminum with flat and gloss white make up a very complete range.

Our dealers' booklet, "A Guide to Larger Profits," describes Floglaze Art Shades fully. Write us for this book.

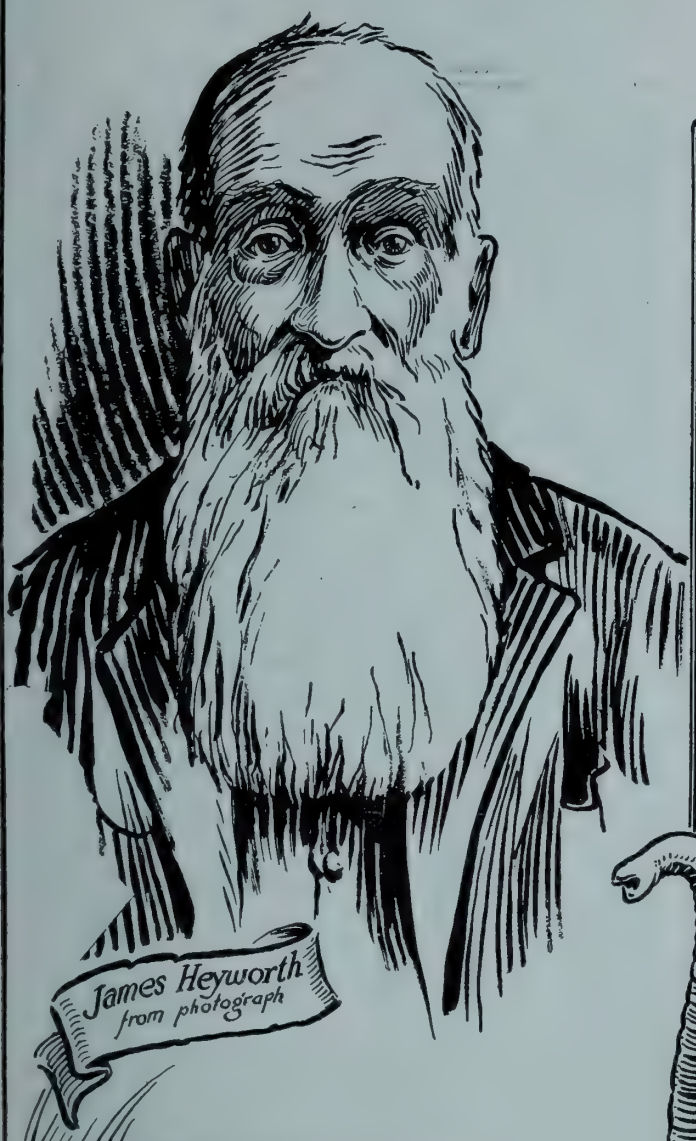
What a Veteran Painter Says —



James Heyworth
from photograph

I want to tell you one thing; you have the best White Lead manufactured today. I have used Genuine Elephant White Lead for over sixty years and when I do any work where I use Elephant White Lead I take great pride in my work. I cannot speak too highly of your Lead and will promise you that I will continue to use Elephant White Lead until I cast aside the brush for good

Yours truly
James Heyworth.

Satinette

ENAMEL

A DISTINCTIVE LEADER
For Your Paint and Varnish Department

SATINETTE ENAMEL is in demand by those who know real enamel value for all high-class finishing whether exterior or interior.

This already large demand will be materially increased by the extensive publicity campaign now being carried on among master painters and consumers. This campaign will bring forcibly to the attention of the buying public the superior quality of Satinette.

You will be called upon to furnish Satinette Enamel to your customers. No substitute will be acceptable.

The Satinette container as reproduced here if displayed on your shelves or counter will get sales making attention immediately.

Satinette Enamel is supplied in Gloss, Semi Gloss or Flat White, also in Ivy or Grey shades.

Satinette is only one of the many easy selling and profitable International Varnish Company's products. We manufacture a full and complete line of highest quality Varnishes, Stains, Paints and Enamels.

Order your supply of Satinette now. Write us for prices and full particulars on our complete line.

INSECTICIDES

COVER THE EARTH

Combatting The Insect Menace

TIMELY spraying with Insecticides of full strength and killing power is just as important as proper cultivation and fertilizing where a good yield of fruit and vegetables is looked for.

Spraying with S.W. Insecticides assures a heavy yield and a high grade crop because even under the most difficult conditions of season and climate they will effectively control the destructive insect pest.

A stock of S.W. Insecticides will enable you to supply the spraying requirements of farmer and fruit grower. For the line is complete—an insecticide for every purpose—including S.W. Dry Lime Sulfur for fruit, Dry Powdered Arsenate of Lead for all leaf eating insects. Bergers Standard Paris Green and Tuber Tonic for root plants.

AYLMER PUMP & SCALE CO.
AYLMER, ONTARIO

The outward mark or Stencil, of Fire Boiled

The Name

BADEN

Means Fire Boiled

This famous name was originated at Baden in 1864, before the days of Confederation.

From that day to this the name "Baden" has meant, to paint and oil merchants, the linseed oil by which all others are compared. It is the merchants' and the customers' guarantee that the oil is the best that can be produced

When you say "Baden" it conveys to the mind of paint and oil men something more than merely oil—it means oil "fire-boiled" or "kettle-boiled," — it means age, experience, prestige, quality, service,—so ask for "Baden."

The Premium on "Baden Boiled" Oil over Raw is three cents while the Premium on "Steam Boiled" is only one cent.

The Dominion Linseed Oil Company

Limited

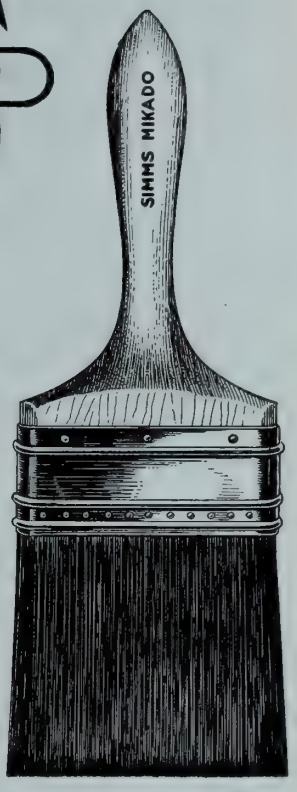
TRADE SIMMS SET IN RUBBER MARK

Paint This Sign In Your Window



It's a trademark that means there's a big institution standing behind every brush on which it is stamped, and that every one of those brushes will give satisfaction.

It's a trademark that's well-known to the paint and varnish trade. Painters have long since learned the worth-while quality of SIMMS Paint and Varnish Brushes and are asking for them by name.

Barrett Roofings, Cements Industrial Paints etc.

Powerful Advertising for Quality Products

THROUGH 1922—all over Canada—millions of advertisements will point out the economy, the reliability, the superiority of Barrett Roofings, Cements and Specialties.

Such a powerful sales-making force is bound to bring new customers to Barrett dealers everywhere.

But that's only half the story. Barrett Roofings and Specialties stand head and shoulders above any similar goods—once a man buys them he buys again and again. For Barrett customers are always satisfied customers.

The biggest profits are made by dealers who carry a complete stock of Barrett goods. *You* should have every one of these popular, fast-selling products on hand.

Everlastic "Rubber" Roofing
Everlastic Liquid Roofing Cement
Plastic Elastigum Patching Cement
Everjet Elastic Carbon Paint
Everlastic Multi-Shingles

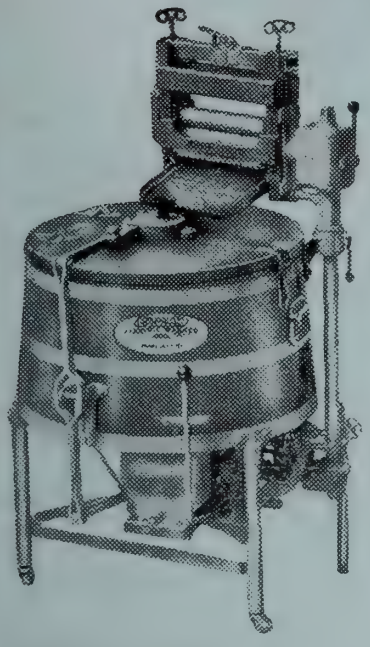
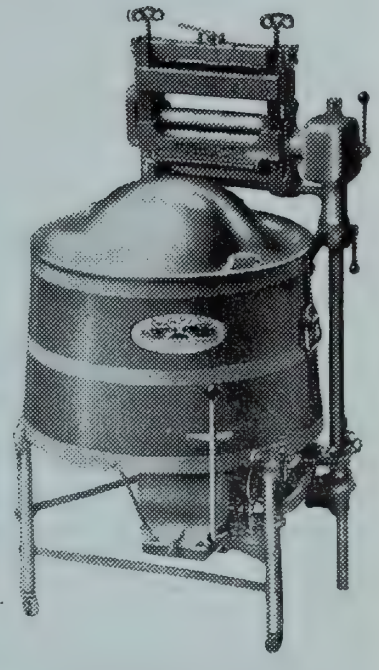
Maxwell Products meet present-day demand

for *Quality* at *Reasonable Cost*



THE Maxwell line of to-day is the result of many years' experience in developing and providing what the public needs and wants at a cost which only low overhead and efficient management can effect You have only to compare the value offered by these products to realize the reason for Maxwell's long-continued popularity. To-day, more than ever, the public is going to buy carefully—so must YOU—and Maxwell products sell themselves on this basis.



"MON O-VAC"

Electric Vacuum Washer

Has a special ¼ H.P. adjustable motor (below tub—aids stability) and capacity equalling 8 sheets. Carefully constructed; tub of cypress wood to retain heat.

Maxwell's H & P Washer

Combines all the good features of the Home Washer and in addition is adapted to either hand or power use.

"MINIMAX"

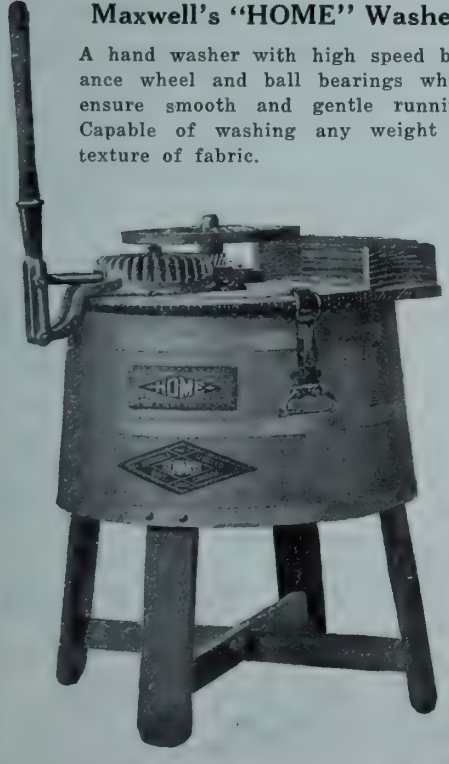
Dolly Type Electric Washer

"Wing" design, easily-operated, noiseless and with gears completely enclosed. Wringer is adjustable and may be used independent of washer.

Maxwell Products include Washing Machines, Churns, Food Choppers, Pumps, Lawn Mowers, and a complete line of Farm Implements.

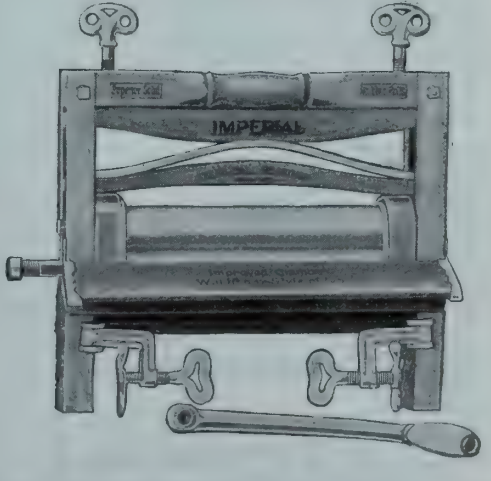
Maxwell's "HOME" Washer

A hand washer with high speed balance wheel and ball bearings which ensure smooth and gentle running. Capable of washing any weight or texture of fabric.



"IMPERIAL" Clothes Wringer

One of Maxwell's several excellent types. Has covered gears, ball bearings and improved clamp to fit any tub.



Maxwell Made-in-Canada Products stand out against a background of half a century of fine workmanship and reliability.

Gurney

A Complete Line

How often that expression has been misused — no doubt thoughtlessly; at times without realizing the full meaning of the words, and yet at others with no other intent than to mislead.

We honestly believe that our line is complete; that a Gurney dealer can give his customers real service if he will only let us know what they require.

Our cooking line is complete—coal, wood, gas. We make Warm Air, Hot Water and Steam Heating Equipment, and our Equipment for Institutions, Cafeterias and Lunches is second to none in Canada. That is what we call a "complete line."

TRADE MARK Red Devil Tools

"Red Devil" Corrugated Lock Washers Steady and Profitable Sellers

THE demand for "Red Devil" Corrugated Lock Washers has been so enormous that we are putting up an assortment of 530 washers in nine of the most practical sizes, in a tin box—for the convenience of the trade.

They are in steady demand by garage mechanics and individual owners of automobiles, tractors, motorboats, etc.—anywhere where bolts or nuts are used. Have six points of contact—hold like grim death. They have a ready sale and pay a handsome profit.

Send for schedule of sizes and trade discounts

Every Home has Leaky Utensils

There is a Constant Market

Mendets are a good thing to have in the store—because they don't stay long. It is a fact that they have sold by the millions of boxes; there is a constant, large demand for them. They cost little, take little space in your store, and do not use it long.

The profit is excellent.

A Business Building Service

Imperial Polarine Crank-Case Service is the shortest route to your full share of the lubricating business in your community. It will be appreciated by your old customers and it will bring you new ones.

Whether you operate a hardware store or a garage, it will be well worth while for you to establish yourself as Imperial Polarine Crank-Case Cleaning headquarters before the Spring motoring season starts.

Most motorists already recognize the importance of regular crank-case cleaning and they are relying more and more on dealers for this service. They will come to you if you establish an efficient Imperial Polarine Crank-Case Cleaning Service and make it known. Such a service will increase your motor-oil sales and every motorist who calls will likely be in the market for many other things as well as motor oils.

Dealers have learned the advantage of stocking the full line of Imperial Polarine Motor Oils and Transmission and Differential Lubricants. Add to these, Imperial Flushing Oil and Imperial Polarine Crank-Case Cleaning Service and be ready to take full advantage of your lubricating business possibilities.

The Imperial Oil salesman will be glad to give you full particulars about Imperial Flushing Oil and the business-building possibilities of Imperial Polarine Crank-Case Service.

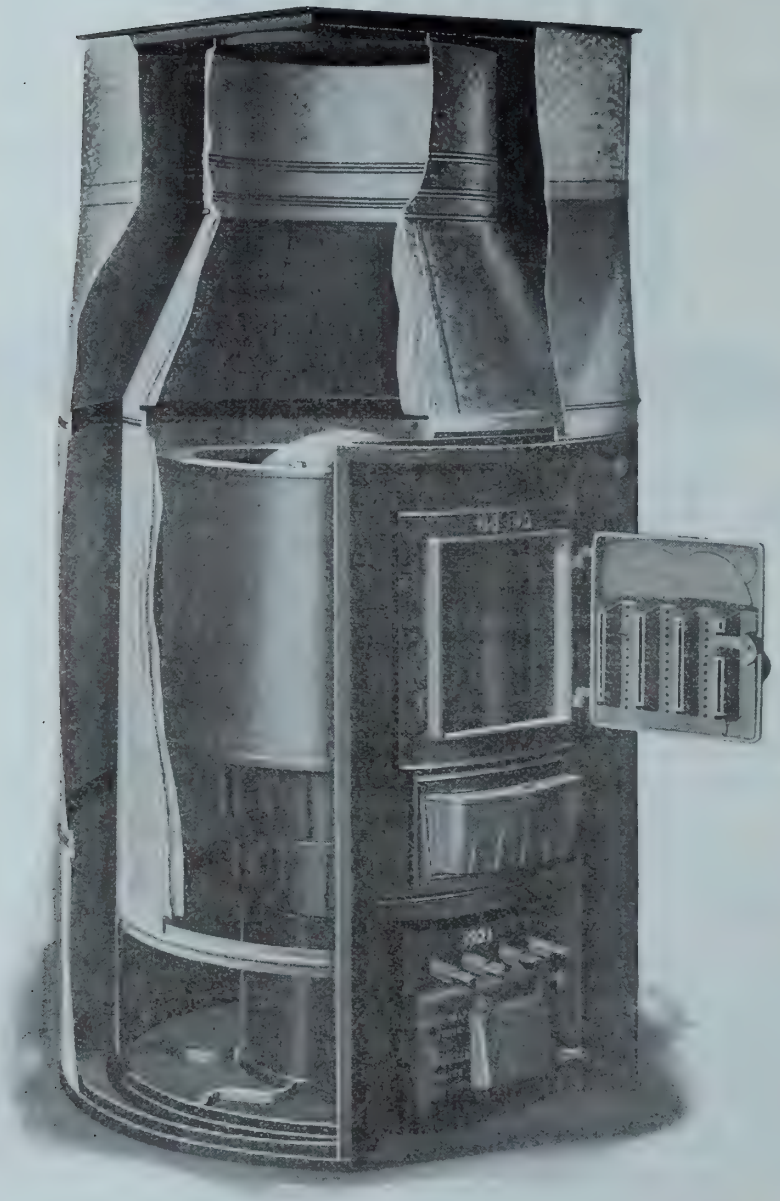
BANNER STOVES AND FURNACES

BANNER



The Banner Pipeless Furnace

The Banner Pipeless Furnace brings winter comfort to thousands of winter homes. As its name indicates, it is a furnace without pipes; a complete heating system installed in the basement like other furnaces, but requiring no pipes to convey the heat to the various rooms.

Heats the whole house—any number of rooms. The cold air is taken from the house through the outside portion of the register and the warm air rises naturally to fill the space vacated by the cold air.

The low cost and ease with which a Banner Pipeless can be installed in any building is causing home builders in all parts of the country to install this system.

The Galt Stove &

Galt,

BANNER

BANNER STOVES AND FURNACES

Impartial Evidence

Toronto, Ont., March 21, 1921.

The Galt Stove & Furnace Co.,
Galt, Ontario.

Gentlemen:—

In reply to your letter of March 18th, about success with your Banner Pipeless Furnace.

We have had the very best of success. We installed last fall about 20 of the three different sizes and some of them were installed in very poorly constructed buildings, but every one gave our customer the best of satisfaction. Every customer is a satisfied customer, and we are looking for a big year in pipeless furnaces for 1922. The firm that is handling your pipe and pipeless furnaces are handling one of the best furnaces that is manufactured in Canada.

Yours truly,
(Signed) GEO. MATTHEWSON, HARDWARE LIMITED,
734 Queen Street East.

Ingersoll, Ont., March 26, 1921.

The Galt Stove & Furnace Co., Limited,
Galt, Ontario.

Dear Sirs:—

In selling the Banner Pipeless furnaces last year, they have proven satisfactory in every way. All my customers, where I have installed Banner Pipeless furnaces, are well pleased and I can send a new customer anywhere and get a recommendation. I look for a big year in pipeless furnaces as my satisfied customers will sell furnaces for me.

I can recommend the Banner Pipeless to do all you say they will.

Yours truly,
(Signed) L. H. ECKHARDT.

Galt, Ontario.

The Galt Stove & Furnace Co. Ltd.,
Galt, Ontario.

Dear Sirs:—

Last December your Mr. J. A. Ray placed one of your Banner Pipeless furnaces in the First Presbyterian Church Manse, a large building and well exposed to the cold winds, and you will be interested to know how the furnace worked.

I am pleased to say, that it has more than fulfilled our expectations. We have had a comfortably heated house throughout, which was impossible with the old system, and besides we burned less coal to produce these results.

Yours Sincerely,
(Signed) K. J. MacDONALD,
Minister First Church.

St. Catharines, Ont., March 23, 1921.

The Galt Stove & Furnace Co., Ltd.,
Galt, Ontario.

Gentlemen:—

During the fall of 1920, we installed several Banner Pipeless Furnaces, each one under extremely different heating conditions and under unconditional guarantees, and for each installation we have one highly satisfied customer.

For economy and efficiency, we think the Banner has reached the highest point of present day furnace construction.

Yours truly,
(Signed) THE CHATFIELD PLUMBING & HEATING CO.

Hamilton, Ont., April 19, 1921.

Galt Stove & Furnace Co.,
Galt, Ontario.

Dear Sirs:—

The pipeless furnace you installed in the country house in Ancaster is all your engineering department said about it. Our house is about sixty-feet long and twenty-seven feet wide, two floors, a difficult proposition. Our caretaker informs us that it did the work satisfactorily. With a house built in the ordinary way, what is called a square plan, it would have no difficulty. It does not heat the cellar. a good draft is easily controlled. Your guarantee stands behind it and has made good.

(Signed) G. W. ROBINSON COMPANY, LIMITED,
Geo. W. Robinson, Pres.

Hamilton, Ont., March 31, 1921.

Galt Stove & Furnace Co.,
Galt, Ontario.

Dear Sirs:—

The Banner Pipeless Furnace that we had installed in our Oak Hall branch at Brantford, some months ago has proved a great surprise to us. This furnace has done all you claimed it would in heating the main and the second floor.

Our staff reports that they have been very comfortable in every section of the store all through the winter.

It has been economical as far as fuel is concerned and it takes up very little space; altogether we are very well pleased with it.

May say, the writer has been boosting it to anyone who has been building or who has been putting in a new heating system. We can heartily recommend this furnace to any one for store purposes.

Yours truly,
(Signed) W. E. SANFORD MANUFACTURING Co., Ltd.,
W. A. McCutcheon.

These letters are but a few from the many on file in our office. They serve to show you what the users of Banner Pipeless Furnaces think of them in use, and also give the opinions of practical men who have sold and installed them.

It is good for your business to be able to send a prospect to any customer and have the furnace recommended.

Write us to-day for further information regarding agency proposition.

A Counter Cabinet that *Sells* Silverware

This handsome cabinet of Rogers 1881 Silverware has been especially designed for effective Counter Display. It is beautifully made, approximately 18 inches square, covered with black imitation leather and lined with blue plush. When opened and placed on the counter, it presents a very attractive appearance, and displays the wide range of pieces with splendid effect. The tray in the Cabinet contains a set of lacquered samples which will not tarnish; and the compartment beneath the tray contains a stock of the staple and most popular pieces.

Inside the cover is a striking display card in colors which lists the pieces with the prices. The Cabinet is a complete silent salesman and it has proven to be a real business-getter in Hardware stores. As the silver is sold, you simply order a sufficient supply to restock the Cabinet.

This is a profitable investment for you to make. Write us for the price of the Cabinet complete with silver.

"KLONDIKE"

makes you think of Canada and
the glitter of gold. That
is why the

Canadian Polishes Limited
of Hamilton

have adopted the name

"KLONDIKE"

for their

Metal Polish

Because it is a Canadian product imparting the glitter of gold to brass and copper. A good running mate to this line is

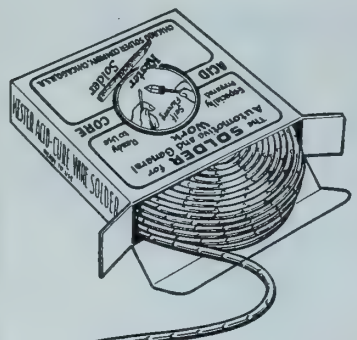
IDEAL SILVER CREAM
(*The Cream That Cleans Clean*)

It will pay the Hardware dealer to stock these lines along with any other polishes that they require.

"If it can polish we have an article that will do it."

Write for illustrated catalogue of our lines.

CANADIAN POLISHES LIMITED
HAMILTON CANADA



"I received your sample of Kester Acid Core Wire Solder and have tried it out and like it fine. Have bought a spool of it from my dealer and find that it saves a lot of trouble. All I have to do is to heat my soldering iron and the solder will do the rest.

"I am glad I found your advertisement and sure appreciate it very much."

—JOHN C. BUCK
Harrison, Neb.

APPLY the heat—and from the inside of the *hollow* Kester Acid Core Wire Solder, the acid will run on to the article you are soldering. After it—*always* after it—will come the solder, it's perfect flux formed. Remember, it's simply high grade flux and high grade solder—the same as you are using now, but far, far easier to apply. Fill out the coupon below and get a free sample to try for yourself.

In the illustration below the black spot indicates the flux that fills the inside of the hollow wire solder. Notice the crimps in the solder shown above. They keep the flux from running out except as you wish to use it, and keep the amounts of flux and solder always in proper proportion.

ORDERS

IS the machinery you have been using for the past 3 or 4 years to get orders—is it getting rusty?

Are you satisfied you have the harmony in your organization that you should have?

Do you feel that your salesmen are fighting every inch of the way for business and as happy in their work as you would like to see them?

Is there the proper co-operative fighting spirit?

The Fault May be Yours?

Your salesmen, and wholesalers who help sell your goods, have a right to expect co-operation. They have a right to expect that the house they are selling for really believes that good business is to be secured. They have a right to question if the whole responsibility of selling should be placed on them. Advertising is the strongest co-operation you can give them to show that you believe in your business. Powerful copy consistently running in your dealers' specialized business paper, will stimulate dealers' interest in your goods; will encourage the salesman in his work; will help to make him a fighter, —and to sell more goods. And you know when you can get the influence of the progressive dealer behind your goods you have the biggest merchandising force in the country working for you.

Let HARDWARE AND METAL help you get the fighting spirit in your sales organization and help you line up 4,000 progressive merchants behind your goods.

IVER JOHNSON
SAFETY AUTOMATIC REVOLVER

"I want a 'Hammer the Hammer' revolver"

The Iver Johnson is so well known as a safety revolver that customers frequently ask for the "Hammer the Hammer" revolver — the one that can't discharge accidentally.

This is the only automatically safe revolver. Knock it, thump it, jolt it or "Hammer the Hammer"—it cannot discharge accidentally. Only by intentional pull of the trigger can this revolver be discharged.

The true alignment of barrel and cylinder assures absolute accuracy and deep penetration.

Because of its piano wire, heat-treated springs—instead of ordinary flat springs which have a tendency to break — the Iver Johnson is always ready for instant use. Quick, sure, accurate.

Write for firearms catalog "A" and complete dealer information. If interested, also ask for literature on bicycles, "B"; and motorcycles, "C."

Stock the entire line so that you can supply the exact model to fit each individual preference.
22, 32, 32 Special and 38 Calibers, Hammer and Hammerless models. Regular, Perfect Rubber and Western Walnut Grips. Why not stock Iver Johnson Champion Single and Double Barrel Shotguns, too? They combine accuracy and dependability and are moderately priced.

Lancaster, Penna. U.S.A.

The Popular Demand is for a High Grade Electric Washer at a Moderate Price

Dealers are finding a Washing Machine that completely meets that demand in the

1900 Agitator Electric Washer

The wooden tub of the "1900 Agitator" Electric Washer is of fair capacity and made of the best grade of white cedar, which has gained a splendid reputation for durability.

The washing action is exceptionally good—the old-fashioned "dolly" has been discarded for a correctly designed swinging "agitator Board," a patented feature. Clothes are washed beautifully clean without the slighest injury to delicate fabrics. Quiet and smooth-running, this washer develops practically no vibration.

The Agitator Electric Wringer which works electrically and swings in any position is equipped with quick release safety device —these features appeal greatly to every woman.

Line up with the "1900" line of Washers. The "1900" dealer has not only the satisfaction of representing the leading Washer in the field—he has a type of machine to offer every class of customer—the "1900 Cataract Electric," "The 1900 Wood Tub Electric," the "1900 Water Power," as well as two types of hand machines.

Let us tell you about our attractive dealer proposition.

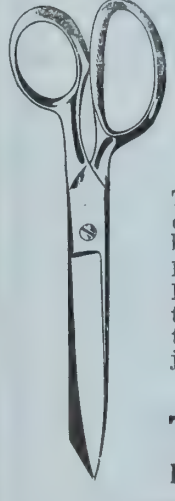
ACME SHEARS
Strong Keen Durable

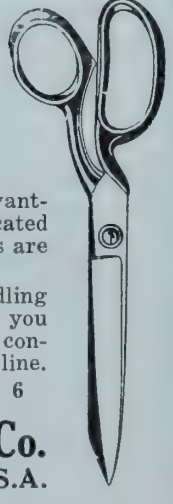
"Acme" Cast Shears and Scissors excel in quality and finish for low-priced cutlery. Acme blades are strong and durable, with keen sharp cutting edges, familiar to all who have sold or used them. There are good sales for hardware merchants on Acme



Shears

Scissors

Tinner's Snips



That "Acme" Shears are wanted, liked, and sold, is indicated by the fact that 35,000 pairs are produced daily.

If you are not already handling the "Acme" line it will pay you to do so, particularly in conjunction with a high-priced line.

Spramotor
It isn't a SPRAMOTOR unless we made it

Do the Farmers in Your District "Spray The Spramotor Way?"

If they don't you should see to it that they do. There is good agents' profit in handling the Spramotor—the sprayer that sprays everywhere a plant-destroying insect can get.

The farmer knows of the Spramotor—it has been advertised in his farm papers for years. Our advertising, and the good word of satisfied farm users, have done most of the selling for you. Putting the Spramotor before the farmer, and telling him you are our agent is your work.

JARDINE

Pedestal Blower

A new, simply designed blower with only two pairs of gears which, because of scientific designing, run practically silently, without friction. The gears are flooded in oil; the fan shaft runs in ball bearings. Superior design gives the Jardine No. 14 a superior blast pressure for the power applied, and straight into the air pipe without the loss, by faulty direction, as in many ordinary blowers.

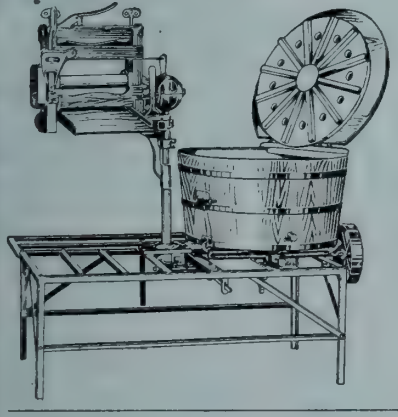
"A Little Pepper, Please"

That's what you say, when you want to put a little extra "snap" into the flavor of your food. You want a "little pepper" in your business too, just now, don't you? Don't go stale with old lines that have lost their "pep." Take hold of the LIBERTY WASHER. It sells at a low price which makes it easy to talk about, besides, it has every improvement and many that are exclusive. It works on the most popular and most widely accepted principle. It is driven by electric motor or gas engine. You can sell lots of Liberty Washers.

A LIBERTY WASHER Will Put "Pep" in Your Business



The LUNDY Engine

The Lundy Engine is built on the very latest models, embodying many improvements over former products. Made in sizes from 1¾ h.p. up to 12 h.p. The 1¾ h.p. size is suitable for driving washing machines, separators, churns, pumps, feed grinders, etc. Where there is no electricity in the home, the LUNDY ENGINE provides power economically and conveniently.

Hardware and Metal Circulation Dominates in Western Canada Because:—

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 33 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

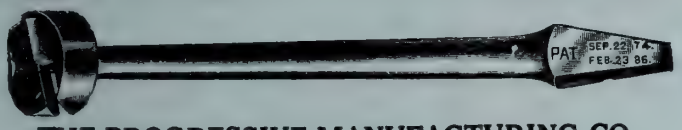
The merits of our Cash Carrier System should warrant your careful consideration. We know they will, and too, that you will agree with us after making an examination of them. As a beginning we would suggest that you send for our illustrated catalogue which shows all kinds of wire carriers for conveying cash, or cash and parcels. It will be better for you to be prepared at this time when the season is right, than it will to be sorry after the rush of Spring trade has set in. Then why not be prepared?



THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U. S. A.

FORSTNER BITS

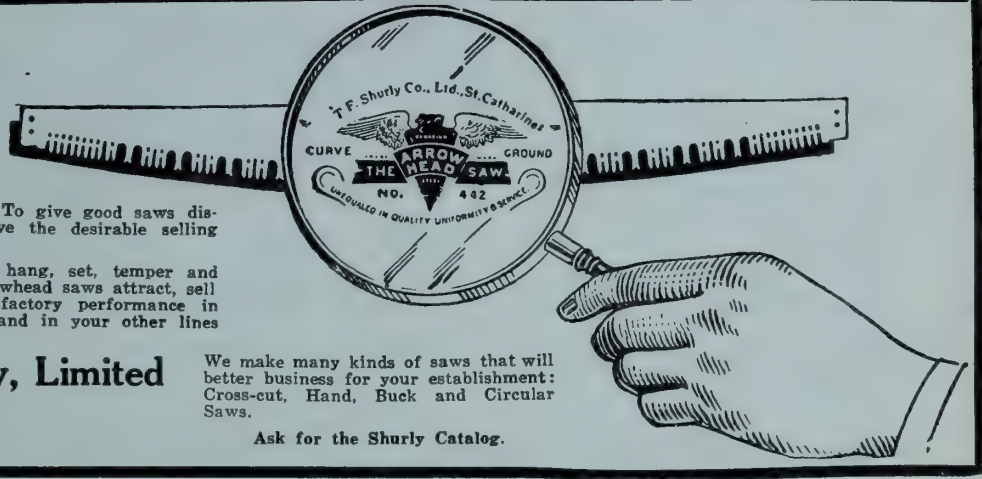
bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. **THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE.** That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.



T. F. Shurly Company, Limited

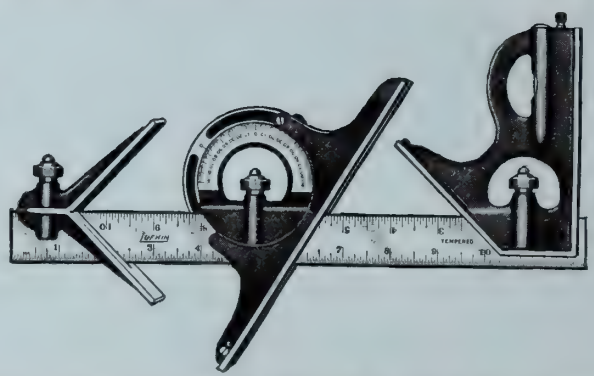
COMBINATION SQUARES



LUFKIN

BEVEL PROTRACTORS
COMBINATION SETS

JUST PUT THEM ON DISPLAY

At a glance every mechanic's eye will be caught by their nicety of design and finish, and their distinctive color.

On closer inspection he will see among other improvements that both legs of center head are exactly same length and ends formed, insuring accuracy on any circumference, large or small. That the double protractor is readily convertible into single protractor, serving perfectly for every sort of work.

CARBORUNDUM WATER-MIXED
VALVE GRINDING COMPOUND

IT'S SIMPLY A MATTER OF PREFERENCE

SOME mechanics prefer a greaseless, extremely fast-cutting valve grinding compound.

Others prefer to work with a grease-mixed compound.

So that's why we have given both to the trade—the new Carborundum Water-Mixed Compound and the long established Carborundum Grease-Mixed Compound. Each has its field.

For quick cutting—the Water-Mixed Compound.

But on jobs where a better, smoother finish is required—the Carborundum Grease-Mixed Compound.

They both cut fast—they both cut free—they both leave a uniform valve and seat without score marks or grooves.

It is simply a matter of which is preferred.

There is an ever-growing demand for each, so Accessory and Hardware Dealers should stock both.

Sold in handy combination cans or one and five pound tins.

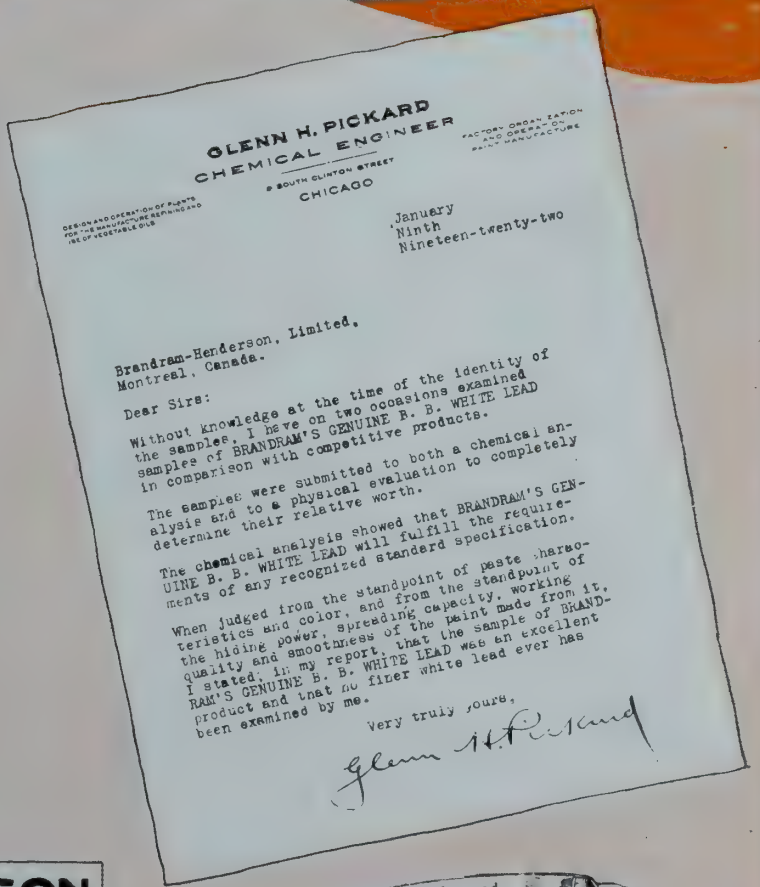
Brandram's Genuine B B White Lead

pronounced the best by an independent expert

When one of the foremost chemists on the continent states that he has never seen a finer White Lead than Brandram's Genuine B. B., it speaks volumes for the superiority of our Canadian product.

During ten generations Brandram's Genuine B. B. White Lead has maintained its world-wide reputation as the premier White Lead in oil, excelling as it does in spreading and covering qualities as well as in durability.



GLENN H. PICKARD
CHEMICAL ENGINEER
9 SOUTH CLINTON STREET
CHICAGO

DESIGN AND OPERATION OF PLANTS FOR THE MANUFACTURE, REFINING AND USE OF VEGETABLE OILS

FACTORY ORGANIZATION AND OPERATION IN PAINT MANUFACTURE

January
Ninth
Nineteen-twenty-two

Brandram-Henderson, Limited,
Montreal, Canada.

Dear Sirs:

Without knowledge at the time of the identity of the samples, I have on two occasions examined samples of BRANDRAM'S GENUINE B. B. WHITE LEAD in comparison with competitive products.

The samples were submitted to both a chemical analysis and to a physical evaluation to completely determine their relative worth.

The chemical analysis showed that BRANDRAM'S GENUINE B. B. WHITE LEAD will fulfill the requirements of any recognized standard specification.

When judged from the standpoint of paste characteristics and color, and from the standpoint of the hiding power, spreading capacity, working quality and smoothness of the paint made from it, I stated in my report, that the sample of BRANDRAM'S GENUINE B. B. WHITE LEAD was an excellent product and that no finer white lead ever has been examined by me.

Very truly yours,

Glenn H. Pickard

EVEREADY
Pocket Light

EVEREADY UNIT CELLS

The battery is the power house of the flashlight. It's easy to keep your flashlight always in working order with bright-burning, long-lived Eveready Unit Cells. They fit and improve all tubular flashlights.

Are You Getting Your Share of the Flashlight Business?

The increase in sales of Flashlights in the last few years is the best evidence that flashlights are a profitable line for the dealer to sell.

There are dealers in Canada, with comparatively small stores, who are turning over thousands of dollars in Flashlight and Flashlight Battery Sales every year. Why? Because Eveready Flashlights are the most convenient, dependable, and economical form of portable light made and the public—your customers—know it.

Eveready advertising has made every man, woman and child familiar with the Eveready Flashlight. The sturdy construction of Eveready Flashlights and the long life of Eveready Batteries bring safety and comfort wherever a light is needed for temporary use at night.

You should have a share of this profitable business. Write to us for details and prices—or ask your jobber's salesmen.

Mr. SMP *says*— "Shipments Made Promptly"

"When you want goods in a hurry shoot your order in to my headquarters. There'll be no delay. No fussing around and no back-chat. You'll get the goods as fast as speedy motor trucks and trains can carry them"!

"We've a reputation for fast shipping and you won't catch us falling down."

Business is rolling in. Indications for even better conditions are on every hand. But with our tremendous manufacturing facilities, and our six warehouses situated at such strategic points as Montreal, Toronto, Winnipeg, Edmonton, Calgary and Vancouver, we are in a position to live up to our contracts.

All orders received from our customers are treated as hurry-ups! Not a moment's time is lost in packing the goods and shipping.

The well-known SMP slogan "Shipments Made Promptly" really means something.

Order Diamond or Pearl Ware by mail to-day and be convinced.

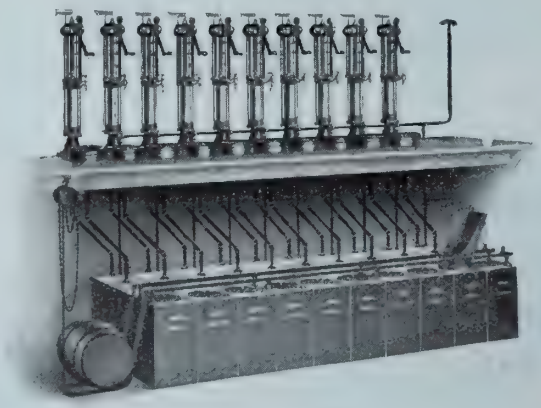
Bowser Oil Handling Equipment Pays Dividends

You are interested in eliminating waste and increasing your profit on paint and lubricating oil. Oils cannot be handled economically by the old fashioned methods.

Bowser Oil Storage and Handling Equipment is the remedy. The all-metal, evaporation-proof Bowser Tanks prevent leakage and gumming. The Piston-Type Measuring Pump delivers exactly the amount required, eliminating spillage. This absolute prevention of waste means worth-while savings.



And the same features which make Bowser Equipment economical also keep oils *clean*.

Let us show you how Bowser Equipment will put your oil business on a better profit making basis.

Better Business Is Coming

Be Wise In Time

LIGHTNING GEM BLIZZARD

Better business is coming to the merchant who has the goods on his shelves, ready to hand out to the customer when he (or she) is in a humor to buy.

Don't get caught, be wise in time. Avoid the painful necessity of passing up good business to your competitor.

The time to order our Freezers is NOW. They are always in demand. They sell on a reputation established by more than 30 years of high-class service, and their future performance keeps them sold. So there you are—quick sales and permanent net profits.

Hadn't you better get busy with your jobber at once? We are all ready to serve you. Let's get together.

NORTH BROS. MFG. CO.

PHILADELPHIA, PA., U.S.A.

STAR Hack Saws

People Are Buying More Carefully

There's plenty of buying going on, but it's very careful buying, compared with the way goods went over the counter a few years back. The customer wants 100 per cent. value for every dollar he spends.

It's up to the dealer to be equally careful in selecting his stock. It's no time to keep a long string of idle brands, with slim demand behind them, on your shelves.

When it comes to hack saws, you can play safe by pinning your faith on Star Blades. The leadership enjoyed by Star Saws for 38 years makes them the logical brand to push.

Star Saws are now sold direct from the factory at Middletown, New York, where they have always been manufactured.

Now Sold by

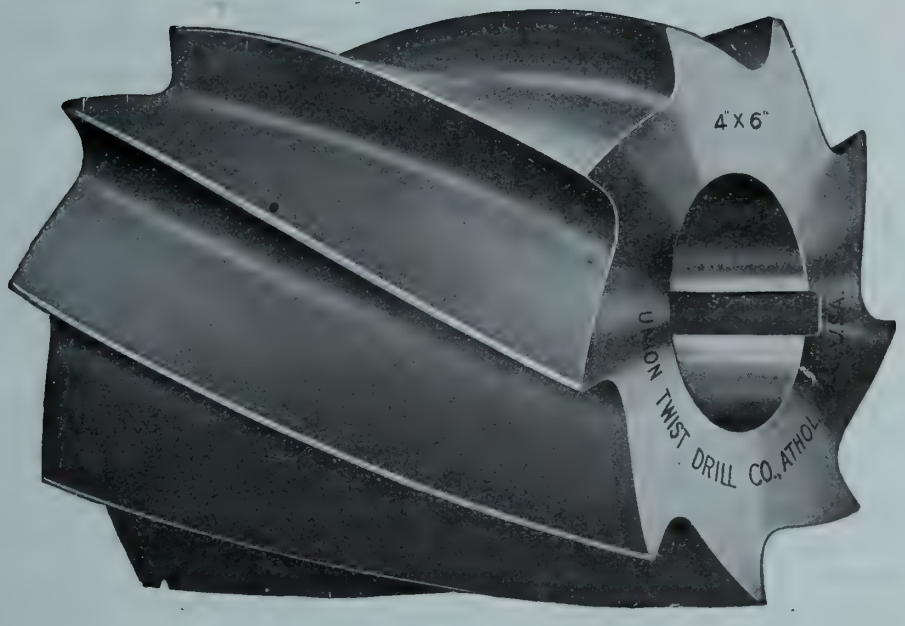
BUTTERFIELD



Tools That Reduce Selling Cost

Butterfield tools are time-tested and proved. They are an accepted standard which you can sell to mechanical men anywhere without losing time in argument. Time lost while persuading customers that a line of tools is as good as Butterfields' is costly for the merchant. The quick, clean-cut sales made when Butterfields are offered are a saving in the cost-per-minute of all your store expense—the rent, light, taxes, depreciation, clerk hire, etc. You are quickly freed to make other sales.

True Economy

Stack Heater

The Stack Gas Water Heater will heat water in one minute.

The almost perpendicular copper pipes in the Stack Heater offer no hindrance to the natural tendency of water to rise when heated.

Take notice of the small size and large number of coils; this means quick heat. The numerous small pipes will naturally heat water quicker than one big pipe because of the greater heating surface offered.

More hot water with smaller consumption of gas—that's true economy.

To Make More Sales

—with no more selling cost

You, like every other merchant, are constantly looking for ways to make more sales without increasing your selling cost. Here is one mighty good way to boost sales without adding to your overhead.

Install a Wayne Honest Measure Gasoline Pump at the curb in front of your store, and add gasoline to the line of merchandise which you sell.

The space for the pump is there on your sidewalk. You and your present salesmen can serve the automobile trade without a bit of trouble. Your sales increase by the volume of gasoline business you do; your selling cost remains the same.

But that is not all. A Wayne Pump in front of your store will sell other things besides gasoline for you. It will give you a chance to sell automobile accessories and hardware to motorists who stop for gasoline.

And consider this too....The man who drives up to your store for hardware can be sold gasoline. Either way around, a Wayne Honest Measure Curb Gasoline Pump will help you sell more goods.

Won't you let us tell you more about this way of increasing your business? Send us your name and let us give you full particulars. Ask for Bulletins 276-HM 280-HM and 302-HM.

U. F. O. Buy Binder Twine From Ireland

Binder Twine Requirements for 1922 Purchased From Belfast Firm—Prices Established After Canadian Producers Name Prices For This Year—To be Marketed Under Names of U.F.O. and Belfast Rope Works—In 550, 600 and 650 ft. Lengths

THE HARDWARE trade and other distributors of binder twine will have a slightly different condition to face this year, owing to the fact that the U.F.O. will supply Belfast binder twine to Canadian farmer members of the organization. The order, it is believed, has been placed on a rather unusual basis, whereby the Irish manufacturer will supply twine at a lower price (at present unnamed) than the prices to be named later by U. S. and Canadian producers.

2,000-Ton Order Said to be Placed

The United Farmers of Ontario have negotiated for this season's requirements of binder twine, with the Belfast Rope Works of Belfast, Ireland. This is not the first time that Irish binder twine has been secured by this organization for distribution among its farmer clientele throughout the province, for in 1914 and 1915 this product was on sale in this country through the U. F. O. Subsequently the requirements were met by U. S. and Canadian firms, but again this year this organization has turned to Ireland for its supply. Hardware and Metal understands that orders have been placed with the Belfast Rope Works for 2,000 tons of binder twine, of which about 500 tons are now said to be on the way to this country.

Discussing the subject with Messrs. Clemes and Saunders, general manager and buyer respectively of the U. F. O., Hardware and Metal was advised that this organization had no complaint to register against the quality or service of the Canadian firms which had supplied their requirements in recent years, and that the decision to return to the Irish source of supply was simply because of certain price advantages offered.

"It is purely a commercial proposition and a question of where one can buy best, having in mind both prices and quality," said Mr. Saunders. As to the quality of the Irish product, Mr. Saunders stated the makers guarantee this twine to be 100 per cent. pure manila.

On this subject Mr. Clemes, general manager, stated that the Irish twine was satisfactory in quality and that the reason for purchasing it this year was due to advantageous price considerations. Binder twine enters the country duty free, and there is some advantage in exchange between Canada and Ireland. The price of the Irish twine has not yet been established.

Price Not Yet Named

"Our prices will not be known until the American and Canadian producers have established their prices for this year, and then, of course, we are protected," said Mr. Clemes.

Hardware and Metal understands that this "protection" means a margin of anything up to one cent per pound as compared with Canadian prices. As yet neither the U. F. O. nor the Belfast Rope Works know what the price on this binder twine will be, and this condition will continue until American and Canadian producers have named prices for this season.

Three Grades

"The Irish twine will be marketed by the U. F. O. in Ontario this year in three grades, namely, 550 ft., 600 ft. and 650 ft. This is following out the same plan adopted some years ago in selling this product in Ontario," said Mr. Clemes, in response to an enquiry to settle a report to the effect that this twine would be sold only in the 600 ft. length during the forthcoming season.

Both Names on Label

"Will the twine be marketed under the brand name of the United Farmers of Ontario or under the name of the maker in Ireland?" asked Hardware and Metal.

"We will follow the same plan as formerly adopted and the likelihood is that the names of both the U.F.O. and the name of the Belfast Rope Works will appear on the labels," replied Mr. Clemes.

The question of marking the labels has not been definitely decided upon, but according to Mr. Clemes, the foregoing plan is the one most likely to be followed.

Can Sell Others

There have been reports to the effect that the United Farmers of Ontario endeavored to get their brothers in the Province of Quebec to join them in the purchase of this twine. Replying to an enquiry from Hardware and Metal on this point, Mr. Clemes stated:

"The U.F.O. has taken up pretty well the whole current output of the Belfast company and we are in position to supply others farmers' organizations who may desire to purchase this twine."

This is taken to mean that while other farmers' organizations in Canada have not joined in the purchasing of supplies direct from Ireland, the U.F.O. have contracted for sufficiently large quantities to be in position to re-sell to any similar organizations in other parts of the country which might be interested.

Value of Order

Last year's prices on binder twine in Canada were as follows: 550 ft., 18 3-4c.; 600 ft., 20 1-4c.; 650 ft. 21 1-4c. An allowance was made of 1-4c. on orders over 20,000 lbs. On this basis the average price of the three grades, as now purchased by the U.F.O. from Ireland, would be approximately 19 3-4c. per lb. If the same quantity of each of the three grades is purchased, the value of the 2,000 ton order, as reported, would be $790,000. The actual value will, of course, be governed by the amount of the various grades by the extent of the margin of protection given the U.F.O. as com-

(Continued on page 52)

Want Brushes as First Class Freight

Brush Manufacturers From Various Parts of Canada Object to Movement to Raise Brushes to First Class Freight Schedule—U. S. Railroads Differentiate Between Bristle and Fibre Brushes—Very Little Stock Carried Over

SOME additional attention has been attracted to the freight rate classification of brushes, in view of the movement now under way to elevate brushes in general to first-class freight. This suggested revision is based upon certain scales in operation on U. S. railroads, which differentiate between bristle and fibre brushes.

In discussing the proposed changes, E. C. Boeckh, President of the Boeckh Co., Toronto, stated that the matter was receiving the attention of brush manufacturers in Canada as a body, and action was being contemplated with the object of opposing such a revision. It was pointed out that brush manufacturers in shipping to various large distributing points throughout the country absorbed such freight charges in their costs, and any increase in this direction resulting through placing brushes in a higher freight classification, would merely be added to the distributors' expense.

Distinguish Between Bristle and Fibre

The suggested revision in brush transportation costs would place in effect a distinction between bristle and fibre types, which becomes a matter of direct importance when brush manufacturers in this country make both these lines. Were this phase of the industry carried on under different branches, the application of the suggested new freight rulings, according to Mr. Boeckh, would not be so complicated. Under present circumstances, however, it is hard to classify between shipments of bristle or fibre brushes for these products are frequently shipped out together.

The recent easier levels effective on the rate of brushes in car load lots has very little, if any bearing on the freight cost situation, as it was stated that brushes shipped in such quantities are not a very frequent occurrence.

Effect On Prices

Just how any revision in the freight classification would affect prices, is described as difficult to gauge at present, owing to the cost being borne by the manufacturers coupled with the fact that the increased ratio of cost on each particular brush or line of brushes would be of an infinitely small character. Just at present, the bristle market is stated to be firm, with production costs showing very little change from the levels in effect last summer when price reductions on brushes were announced.

"Wages for labor in the brush industry," stated E. C. Boeckh, "did not soar during recent years to the unreasonable levels which have been recorded in other phases of manufacture, and for that reason, reductions cannot be made to the same extent. In making the price lowerings announced in 1921, all cost factors were taken into consideration at replacement values. The various contributing elements in production have since shown no change, and it is therefore difficult to see how further price changes can be considered."

It was pointed out by Mr. Boeckh that existing circumstances placed the brush industry on a basis of primary market conditions plus the various additional costs. The raw material markets are maintaining moderate levels which became effective last year. Freight rates remain unchanged; labor is still, of course, a little higher than in pre-war days, while taxes and various other "overhead" costs are considerably higher.

Satisfactory Trade

"The volume of business in the brush trade, up to the present, has shown indications of a satisfactory season." Mr. Boeckh further stated that the size and number of orders compared very favorably with the amount of business done at this time last year. With improved prospects for painting of all kinds, coupled with the evident signs of renewed building activity on almost every hand, such factors indicated a brisk future in the brush industry in general.

Dealers' stocks throughout the country are mainly low, with very little carryover from last year's stock. This fact is further supported by the earlier demands for brush requirements this year, when compared with previous seasons. The increased interest on the part of the merchant towards stimulating brush sales in general, is considered another factor in restoring a better tone to existing trade conditions.

Tinsmiths Don't Need to Be Alarmed

Protection Will Continue to be Offered by Retail Merchants Ass'n of Canada—No Action Expected by Government Pending Appeal Case Before Supreme Court

By Special Ottawa Representative of Hardware and Metal

THERE will be no occasion for tinsmiths to become alarmed if the Government renews its attempts to place them in the category of manufacturers and insist on the payment of the three per cent. sales tax, as a result of the recent judgment handed down in Ottawa, in the case of the confectioners, which is believed to have placed various lines of trade at the mercy of the federal tax collectors.

Protection is being, and will continue to be offered by the Retail Merchants' Association of Canada, the executive officers of which are watching developments closely.

As a matter of fact, Hardware and Metal's Ottawa representative has it on pretty good authority that no action will be taken by the Government, pending the appeal of the confectioners' case, which is to be heard in the Supreme Court of Canada some time during March. While there is no definite understanding between the government and the R. M. A. as to the course to be followed by the government after a decision in this case has been handed down, officers of the association express themselves as confident that the ruling will be made to apply to all retail merchants, who are selling direct to the consumers.

R. M. A. Will Take Matter Up

Communications have been sent out from the head office of the Retail Merchants' Association in Ottawa to the various provincial secretaries advising them that if any actions are started by the government against any retail merchant, including tinsmiths, word is to be sent at once to the secretary of the Dominion Board who will proceed at once either to have the action delayed, or to fight it.

The confectioners' case referred to is one in which the government succeeded in establishing that an Ottawa dealer who manufactured candy for sale over the counter, was a manufacturer, and therefore came under the provisions of the Act which assesses a straight three per cent. tax on sales by manufacturers to retailers and consumers.

Justice Audette, who was the author of the judgment in the confectioners' case, not so very long ago rendered judgment in a similar action by the

Continued on page 30

Personal Touch Counts in Retailing

Bennet Brothers of Montreal Find Customers Should be Met Socially—Personal Interest in Customers Both Inside and Outside Store—Much Attention Paid to the Buying End—Trade Paper Information Very Valuable For Markets and Tendencies. Getting a Line on Articles Which Will Carry Greatest Appeal—Offers to Get Any Article Not in Stock "In Half an Hour."

Following out the belief that a wide range of goods attracts a greater number of prospects than one confined to a few lines, Bennet Bros., Montreal, arrange displays showing groups of articles. Thus it will be seen that in one of these windows there is a wide range of household goods including electrical heaters, lamps, irons, percolators, bread boxes, trays, cutlery, manicure sets, carpet sweepers. In the other window are grouped games, skates, sleighs and other sporting goods lines.

BENNET Brothers of 371 St. Antoine St., Montreal, have been happily located in a retail hardware store at the above address since 1913. Happily located because, as Mr. Bennet said to Hardware and Metal, "we have had the pleasure of seeing our business grow each year, with the exception of 1921, figures just now on hand showing 1921 about equal to 1920."

However, this firm is not very much concerned over the apparent falling off in business last year, according to the total cash turnover showing, because with decreased values they are convinced that a favorable amount of merchandise passed out and last year can therefore also go down on record as one of increase. It is felt that if methods which have been adopted in the past are continued, the firm will continue to enjoy an increasing trade, and a satisfied and growing list of customers."

Retailing is Buying as Well as Selling

The elements of success, as pronounced by Mr. Bennet, are contained in both the buying and selling, the former holding as much importance as the latter. Retail merchandising is purely buying and selling. The merchant may sell his wares, and plenty of them, but not to advantage if these same goods are not bought right. This end of the business requires attention to-day if it ever did, and about the best means of safeguarding, according to this merchant, is to become even better acquainted with the trade paper. Watching the actual price changes, and further, the market tendencies of the various lines or specified articles is all important, especially in times such as we are now passing through. Gleaning market information was also brought to advantage in the time of the rising market in the years just past, and actual money was made in their purchases.

Lines That Appeal Most

With the merchandise bought and placed on the shelves, the selling end of the business has different feature methods in the Bennet store. First, they plan, as much as possible, to buy hardware that is well advertised. These advertised goods have the strongest appeal, and by linking up with the national advertiser, considerable advantage is gained. The advertising done by the manufacturer may as well be taken advantage of, Mr. Bennet argues, and all the selling helps supplied to the retailer may as well be used to advantage.

Quality, too, must be in the article or goods that would be recommended or "pushed." To be specific; a carpenter asks for a pair of calipers at 75 cents a pair. The cheapest carried in stock is $1.25 per pair, made by a manufacturer who advertises in a national way, tools of highest quality. It is then pointed out that the value of the higher priced article is much greater, and with few exceptions the customer purchases.

"We buy hand saws of fine quality in 6 dozen lots, and in this way we get our name imprinted. There is no cost to us and we may as well enjoy the value of the advertising," said Mr. Bennet.

To get the goodwill of the people with whom you would do business, or rather whose trade you would develop and eventually secure, you must take a personal interest in just those people, according to Mr. Bennet. One illustration of this is that when a skilled mechanic comes to the store to buy, a real interest is not taken in the sale, but a closer contact is sought by asking him questions; getting to know his place of employment, how many other mechanics are employed at the same place, what they are doing, and so on. This is done in a way that will give no offence and through cultivating these fellows a real connecting link is forged, which holds or rather binds this customer to the store. By getting in touch with their customers, finding out the class of goods they prefer, gradually building up confidence, the turn comes to sell the needs of the community with goods that can be fully recommended, and on which a legitimate margin of profit can be secured. Of course this requires the attendance of both brothers in the store as much as possible, and Mr. Bennet stated that both he and his brother are behind the counter whenever possible.

Considering the personal touch in business about the most important in retailing, the idea is not terminated in the store. It must be carried further, and meeting their customers, or prospective customers, socially in the evenings or on other public occasions is done whenever convenient. As a result some of the large companies in the neighborhood are regular customers. "We make use of all acquaintances, from the child up, and from this we are convinced we have been able to secure a nice business from government offices, box manufacturers, makers of foodstuffs, and others," continued Mr. Bennet.

All this, therefore, to the credit of

the "get acquainted" plan which promises even better things in the days ahead.

"We'll Get It in Half an Hour"

It is an advantage, of course, to be located near the wholesale houses. Realizing this, this store aims to carry a variety that will afford their customers a good selection, but they safely guard against overstocking. A few of each line, is considered sufficient to carry in stock and so, with some items, the firm may be temporarily out of an article that is wanted. "We'll get it in half an hour," is a phrase that is used on such occasions. Then, sending the delivery rig for it at the wholesale, it may be delivered to the party, at the store, the house, or on a given job within the appointed time. This is prompt enough to satisfy most customers, and even if there is an isolated case of a lost sale, the same occasion might have to be met with a larger stock on the shelves.

Keeping Posted

As has been mentioned, successful selling is greatly assisted by a close survey of markets and market tendencies. The Bennets have profited through the application of this simple, but vitally important duty. Furthermore, while reading the trade paper for such information, there are many items of interest of real value, which, if not usable to-day, may be of value if used to-morrow or next month, or next summer perhaps. "We cut these out and paste in a book for ready reference," commented Mr. Bennet.

An instance was recalled last season, when white lead in oil was reduced in price. The store unfortunately had quite a large stock on hand when the trade papers in their editorials predicted lower lead prices. An effort was immediately put forth to unload, and both brothers made a personal call on their contractor and painter customers, selling the entire stock before the lower prices appeared. They made little or no money on the deal, but were prepared for the new supply that was bought after the reduction. A fair deal was also accorded the customers, as the price the lead was sold at was equally as low as they could afford to supply from the newer stock

Plan to Extend

A new store front was placed in the Bennet store a few years ago, this being of a rather unique nature. The main building is set a little back from the thoroughfare, thus the windows although quite visible to the passerby, did not compel the attention desired. By bringing the front to the sidewalk edge blocks on each side, because of its extension from the other buildings in the block. This also afforded more room on the inside, but it is again found that more room will have to be found to take care of the increasing business. Therefore expansion will be made through the back door—the back wall of the store to be more explicit. This will be taken down and advantage taken of the lot, which will soon be partly closed and added to the store.

The Broken Knife

The following poem, provided Hardware and Metal by Merchant's Hardware Specialties Ltd., Calgary, Alta., has been used by a number of retailers with good effect in dealing with customers who wish a knife replaced. The poem is displayed in the show cases and other prominent places closely associated with the knife display:—

I scented trouble from the way
Bill Jones stormed in the store that day.
The paint brush whiskers on his chin,
But half concealed a fiendish grin.
He had within his open hand
A pocket knife of our best brand,
And showed with a contemptuous snort,
Where both blades had been broken short.
"How did you do it, Bill?" said I:
He grinned but did not bat an eye
But was well primed and answered quick,
"Just cuttin' on a soft pine stick!"

I grinned myself, I did b'jing
To hear that old familiar thing
That I had heard in every hardware store
A hundred times a year or more.
I handed out another knife,
As you've done all your business life
To fellows who could tell a lie
And look you squarely in the eye.
Next day a buyer held me up,
A rich man, but an ornery pup,
With penknife gapped just like a saw—
And I was mad, but held my jaw.
I asked, "How did you gap it, Dick?"
He answered, "On a soft pine stick."

I cleared my throat, I choked, I spat
And said, "I'm sorry to hear that."
I was—but why he'll never know
Until he gets where all liars go,
And meets the million there with Dick,
Lost whittling on a soft pine stick.
One rainy, dismal, windy day,
When April gazed on nearing May,
I found the jewel of his race—
A boy with freckled, sun-kissed face
And honest eyes, but sheepish look,
Who grinned and from his pocket took
A broken, saw-toothed, once-was knife.
I groaned and joy went out of life.
"My boy," I said, "Now say it quick,
You broke this on a soft pine stick."

"No, sir," he said as my heart sank,
"I broke it prying on a plank."
With joy I threw my arms apart
And hugged the rascal to my heart.
"My boy," I cried, "you've saved my life.
Here take this pearl, four-bladed knife."
"But wait," I said, "just wait until
I wrap it in a twenty bill!"
Life had some wonders yet to show
And I'll confess I didn't know
A boy or man of any rank
Could break a knife upon a plank.
The only way to do the trick
I thought was on a soft pine stick.

WHAT BENNET BROS. SAY IN THEIR ADS.

"Keep cool. Buy an electric fan. We handle all lines of electrical goods and have competent men for all kinds of electrical wiring."

"Sugar may sweeten the family's disposition, but hardware holds the home together. We will be pleased to quote on your requirements for your home.

"Swing into line with the spirit of spring and do your painting and cleaning now. We have a full line of things you need: paints, wall finishes, brushes, and everything to make things look better and brighter.

"Brighten up. We can supply all your needs for Clean Up Week. Call up—for prompt delivery. A few lines you need this week--paints, varnishes, brushes, step ladders, garden tools, rubber hose, chicken netting, screens, etc."

TINSMITHS DON'T NEED TO BE ALARMED

Continued from page 28

government against a certain Ottawa tailor, who because of the fact that he assembled clothing for direct sale to the consumer, was looked upon by the customs and excise authorities as a manufacturer; but the decision was different in that case. And therein lies hope for the tinsmith, whose mode of doing business is almost identical with that of the tailor. Referring to the first case, Mr. Justice Audette, in his recent judgment said:

"As a prelude to the consideration of the present controversy it is well to state that the present case is distinguishable and must be distinguished from the Pedric case—a case recently recited by me and cited at bar—for the obvious reasons that the facts are materially different and further that the law has since been amended and changed."

In spite of the above, the members of the Dominion Board Retail Merchants' Association of Canada, are uneasy, and are anxious to secure a ruling that will settle once and for all the question as to who is and who is not a manufacturer. In the meantime, however, the merchants have been busy making representations to the government which may yet result in having the Act more clearly worded—worded in such a manner as to leave no room for dispute as to its exact intent and purpose.

Equipment Important in Tool Selling

Montreal Hardware Firms Prove Value of Special Store Equipment in Sale of Various Lines of Tools—Tools and Builders' Hardware Work in Well Together—Trade Multiplies From Year to Year

THE FIRM OF J. & P. Davignon, Montreal, the tool department of which is illustrated herewith, finds that a separate department for tools with special equipment provided, is an effective means of dealing with this line. The success which has attended the linking up of window displays of tools with the tool department itself in this store is probably due in large part to the fact that the management has worked to bring the tool department within easy reach of the customers passing the store. Special glass fronted compartments are provided for hatchets, hammers, saws, levels, etc. At the rear is a series of small drawers for various lines of tools—samples affixed to the front of each drawer. The arrangement enables the salesmen to constantly change displays thus maintaining the customers' interests.

There are 348 pockets for screws in this department. This plan has eliminated pilfering and places the stock within easy reach of the store salesmen.

The windows are also an important feature in this store in connection with tool selling. The store manager says that 50 per cent. of the sales of tools are directly responsible to the window displays. A definite increase in sales in the tool department is said to be at once noticed when a window display is devoted to this line.

This merchant, along with others, has found that the market for tools is ever widening. Educational work pointing out how much more effectively certain work around the home can be done with the employment of proper tools, has brought splendid results in this store. Housewives, property owners and others have joined the mechanic in demanding the right tool for the various needs which arise from time to time.

Located in an outlying district of the City of Montreal, the Madison Hardware Inc., has met with big results in their tools and builders' hardware department. This firm has a good opportunity of securing the hardware end of the industry because they are located near the scene of action, and are usually able to get in touch with the builder or contractor before the building is actually commenced.

The store display is prominently carried at the front, a silent salesman and a wall case being occupied by some lines, while the many small articles are boxed at the front of the boxed shelving, with a sample on the front. Builders' hardware occupies one side of the store and extends well over half way to the rear. When first opened this store did not feature this department, but it was more or less scattered among the other hardware. The possibilities of growth were soon realized, however, and a special effort was put forth in this direction. In the process the stock was placed in a separate department, always neatly arranged, and in full view on entering the front door.

Other stores throughout the province that work to extend trade from both ends of the building industry have been featured in Hardware and Metal from time to time, and the aforementioned are only a few that specialize in these departments. Tools and builders' hardware are undoubtedly two of the chief lines carried in any hardware store, but it would seem that where every effort is put forth to bring them to the forefront, increased sales are resulting from year to year.

Little Solace For Tinsmiths

TINSMITHS throughout Canada hardly know where they are at in regard to their status for taxation purposes, due to the many contradictory rulings and judgments handed out by those who should be authorities on the subject. Another turn has been taken in the case but the position of the tinsmith is not yet clearly stated. The Ottawa representative of Hardware and Metal reports that on good authority, no action will likely be taken by the government to force tinsmiths to collect and return three per cent. sales tax as manufacturers pending the appeal of the confectioners' case which will be heard in March in the Supreme Court. Naturally there are many technical differences between the business of the tinsmith and the tailor and confectioner, and it is surprising that it has only now been discovered that the decision in either one or the two latter classes of business, does not apply to tinsmiths.

Impeding Readjustment

WHILE MOST of us in various lines of business in Canada are beginning to imagine that liquidation has proceeded a considerable distance and conditions should be somewhere near a normal basis, it is quite evident that the readjustment process has not gone as far as it must in certain directions, and it is the branches of industry in which its progress has been blocked that are now holding up the whole program. The story is told of a miner who recently was paid $793 for a month's work in the U. S. coal mines. This was sufficient to enable him to purchase an automobile and despite the fact that there are only eight miles of good roadway in the district, he laid off work for the next month and spent his time traversing this limited road in the automobile.

Those same miners are the ones who are contemplating striking on April 1. With such conditions existing in an industry which is so important to every other branch of business, it is quite apparent that this is a severe impediment to lower operating costs on railways. It is figured approximately that coal costs the railways one quarter of what the labor costs. Labor costs are high, but coal has gone proportionately much higher and one has considerable bearing on the other. With high freight rates and a consequent shortage of tonnage, employes are on short time and it is hard to reduce the rate of pay to a man who may be getting only sufficient employment to provide him with a living wage. Lower freight rates can come only after a drop in operating costs including the two big items of labor and coal. If proper readjustment is carried out in the coal mining industry, freight rates may be lowered sufficiently to attract enough business to enable the railways to lower the proportionate labor cost.

There is no question of the need for lower freight rates to assist a return of normal business. A woodenware manufacturer states to Hardware and Metal that the freight on a carload of lumber from B. C. was within fifty dollars of the value of the shipment. Already there are signs at Ottawa of steps to go fully into the question of freight rates and nothing will give greater stimulus to business than a thorough airing of the situation and a revision on an equitable basis. Freight costs are an important factor in establishing prices on hardware lines.

A Creditable Stand

THE NEW president of the Ontario Retail Hardware Association, George E. May, of Toronto, is to be congratulated on the firm stand taken in his initial address (last week's issue) in the closing hours of the convention, on the question of disorderly conduct of certain members who attend the convention annually. Fortunately those members guilty of misdemeanor are very few and there should, therefore, be little difficulty stamping out that conduct which, the President states, brings disgrace upon the whole organization. Conventions are for educational purposes, and for the encouragement of a clean social intercourse. Conditions have changed greatly in the last few years, and increasing competition of highly efficient factors in business, make it necessary for the retailer to be a student of the science of business. With few exceptions the merchants realize this, and the interest taken in the convention of last week fully indicated the desire for improvement. There is no room at a convention of live hardware merchants for the ones who do not seek such improvement.

A NUMBER of hardware merchants who have taken it for granted that automobile accessories are not a line to be sold profitably through their trade, admitted that they were agreeably surprised with reports presented to the convention of the Ontario Retail Hardware Association, wherein it was shown that hardware merchants in many cases were outstripping the garage and other local competition in the sale of auto accessories and tires.

GROUP selling is one of the solutions of the retailers' problem of stimulating business. The merchant might well look over his stock with a view to grouping lines which will carry more or less of a combined appeal to customers, and to mention such lines when the customer asks for any one of the group. It is surprising the increase which can be made in the total volume of trade by making such timely suggestions, and the customer frequently will be pleased with the suggestion in saving return trips to the store.

THE RECENT higher prices on linseed oil are said to be due to two principal developments, firstly an increasing trade and secondly a considerable shortage in the Argentine crop of flax seed which has necessitated U. S. crushers to turn their attention toward Canada as a source of supply for seed. Canadian warehouses have already felt the effect of this call for seed and the reported arrangements for one million bushels of Canadian seed will mean a substantial drain on stocks held in Canada. The Fordney Emergency Tariff, applied by the U. S. recently as protection against Canadian agricultural products will now, in time of necessity, prove to be an unwelcome burden to the U. S. crusher.

Eighty Per Cent. of Gasoline Used in Canada Is Product of Canadian Refineries

Gravity Has Been Entirely Discarded in Measuring Efficiency of Gasoline—150 Million Gallons of Gasoline Consumed in Canada Last Year

Written for Hardware and Metal by R. H. SPURR, Ass't Manager Imperial Oil, Ltd., Toronto

THE GASOLINE situation is a subject that interests directly or indirectly nearly every person in Canada. The motor car is no longer a luxury, but has reached a point where it has become a common utility.

There is possibly no commodity which is so little understood as gasoline and its usage. During the war gasoline represented anything which could be burned in an internal combustion engine. From varying grades of straight run petroleum gasoline to a mixture of straight run with compressed gas, benzol or alcohol. Due to this condition arising during the war, the United States Government found it imperative to determine the most efficient and economical material to use in their various Departments, and after exhaustive tests by chemists and engineers, they finally agreed that the most efficient fuel was a straight distilled mineral gasoline, or what is known as a straight run gas with a low initial boiling or vaporization point, and a relatively low final or endpoint. This fuel was found, from practical experiment, to give a maximum of power with a minimum of mechanical trouble. Due to the ability of the fuel, because of its characteristics, to be applicable for the production of mechanical effect when the instantaneous explosion occurs on an internal combustion engine.

You will notice that the United States Government has entirely discarded gravity as a determining factor in arriving at a measure of efficiency of gasoline. Why? Because it means nothing—what we want to know to-day is at what temperature the product will begin to vaporize.

Between 80 and 85% of the gasoline used in Canada during 1921 was the product of Canadian refiners, following the specifications as set by the United States Government as a standard of quality. We, therefore, in Canada, are using a highly efficient gasoline, it having a low initial boiling point, making starting easy in cold weather, and with its consistent chain of boiling points gives quick but smooth acceleration and abundant power.

What this industry means to Canada and Canadian labor, you will immediately grasp when you take into consideration that last year about 150,000,000 gallons of gasoline were consumed in this country.

Increased Production of Iron and Steel

Necessity Buying Now Becoming Evident—Railroads Purchasing Cars and Track Material—Pig Iron Advance May Not Be Maintained

INCREASED pig iron and steel making is the outstanding factor of the week. It is response to necessity buying and the railroad purchases of cars and track material of the past month, says the Iron Age.

The Steel Corporation is operating at better than 50 per cent., but business accumulated by the independents has shortened the gap between their scale of operations and that of the corporation. The average of independent makers is over 40 per cent. and the February production rate promises to exceed measurably the January output, which in steel was 46½ per cent. of capacity.

An unexpected development was a well-defined effort to stabilize pig iron prices. Against doubts that advances can be held is the actual blowing in of at least five more blast furnaces, with two others scheduled to go on the active list before the end of the week.

It remains that rolling mills are yet unable to bring up order books to a point necessitating deferred shipments, and buyers, sure of deliveries, continue to cover merely for needs. Present activity represents orders taken at a sacrifice to establish backlogs and price weakness has not yet disappeared. A firmer attitude on new inquiries is, however, more general.

Railroad car business is still encouraging. The demand for bridge and building construction is indicated by fresh projects involving 22,000 tons and the awards aggregating 14,000 tons. January's business in fabricated structural steel, 72,100 tons, was at a rate of 40 per cent. of the country's capacity and is barely 13 per cent. under the January average for 10 years.

A few sales of various grades of pig iron have been made in the Chicago district on a basis of $20, an advance of $2 over recent quotations, but doubt is expressed that this advance can be maintained.

The broadening market has brought increasing business from the automobile and the agricultural implement trade. Better export trade is indicated by participation of private buyers as distinguished from the recent large part taken by Government agencies.

Twenty Years Ago

Following items are reproduced from Hardware and Metal of February 22, 1902:—

"The death is announced of James Ferrier who was born in Montreal in 1823 and was therefore over 78 years of age. He commenced business in partnership with the late Mr. Bryson as wholesale and retail hardware merchants under the name of Bryson & Ferrier on June 1, 1844. Many well known names in the hardware world received their business training in this firm. James Crathern entered their employ at this time and later commenced the business now so well known throughout Canada of Crathern & Caverhill. Mr. Ferrier was associated with Mr. Mooney in partnership in the business since incorporated under the name The Canada Horse Nail Co. He was also one of the original shareholders of the Hamilton Powder Co."

* * *

"John A. Pillow, president of the Pillow & Hersey Mfg. Co., Montreal, is dead. He was born in Montreal and thirty years ago succeeded to the rolling mills business of T. D. Bigelow & Co. and formed partnership with Randolph Hersey."

* * *

"H. R. Manders & Co., is the style of a new retail firm opening in Owen Sound. Mr. Manders has been in Winnipeg during the past five years prior to which he was with Butcher Bros., Owen Sound."

* * *

"Gurney-Tilden Co. of Hamilton are opening a western branch in British Columbia. J. H. Tilden has secured suitable premises in Vancouver. C. A. Godfrey will be placed in charge."

* * *

"Hamilton retail merchants held a meeting to perfect the organization of a Hamilton branch of the Retail Merchants Association of Canada. J. Kirkpatrick was chairman and about 175 were present. The first officers elected were as follows: President, A. Ballantyne; first vice-president, H. Arland; second vice-president, R. A. Robertson; secretary, G. S. Klein; treasurer, J. Ronan. A hardware section was formed."

* * *

"On the eve of his departure for a position with the China Mutual Insurance Co., Shanghai, China, W. P. Millar was visited by a delegation from the James Smart Mfg. Co., of Brockville, and presented with a complimentary address and a handsome cabinet of silver. Mr. Millar was for several years manager of the stove and furnace department. The address was read by J. H. A. Briggs, vice-president, and was signed by Mr. Briggs, Alex. Foxton, W. K. Nicholson, A. E. Foxton."

* * *

"Cyrus A. Birge, president of the Canada Screw Co., Hamilton, was married on Wednesday in Wingham to Miss Vanstone, the ceremony was performed by Rev. Dr. Perie."

* * *

"J. H. Ashdown Hardware Co., is preparing to enlarge the wholesale warehouse on Bannatyne Ave., Winnipeg."

News of Western Canada

For comment on Winnipeg hardware market tendencies see "WEEKLY HARDWARE MARKET REPORTS." For current prices see Winnipeg section of "CURRENT HARDWARE QUOTATIONS" in this issue.

Marshall Wells Co. Reported Negotiating For Wood, Vallance & Leggatt In B. C.

Important Addition to Marshall Wells Co. if Deal, Said to Be Pending, is Consummated—Hamilton Officials Say Change Will Not Affect Hamilton or Winnipeg Branches

VANCOUVER, B. C.—The reported negotiations and probable sale of the Wood, Vallance & Leggatt interests in Vancouver to the Marshall Wells, interests of Duluth, is the main item of interest in hardware circles on the coast this week. While no authoritative statement could be issued by the principals of either firm here, it is known that conferences have been held and officials say that the deal will probably go through. About a year ago when Marshall Wells Co. established their local distributing warehouse, the American firm made overtures to McLennan & Freely Co., but an agreement could not be reached on finances.

If the deal is consummated, the American firm will, it is stated, assume control of the big local plant at the end of the month. A stock of nearly a million dollars is involved in the deal and if real estate is included, this figure will probably reach $1,250,000.

About fifteen years ago Wood, Vallance Co. came to the coast from Hamilton and established a business here, which has steadily grown in volume. They started by buying out the retail business of Thomas Dunn & Co., later disposing of the retail end, confining their operations to the wholesale distributing trade. W. G. Mackenzie is the general manager and M. H. Leggatt, the secretary-treasurer.

G. Elson is the manager of Marshall, Wells Co. here.

Hardware Change Said To be Pending in B. C.

Hardware and Metal was in touch with Wood, Alexander & James, Hamilton, Ont., and while officials would not confirm the reported sale having been made, stated that any negotiations which might be going on would have no effect on the Hamilton or Winnipeg branches of the company and that a statement might be forthcoming in a few days.

Marshall Wells Co., Winnipeg, have been extending greatly during recent years and, as outlined in Hardware and Metal some time ago, bought out Merrick-Anderson Co., wholesale hardware firm of Winnipeg. Rumors have also been going around on a number of occasions that the Marshall Wells Co. were contemplating opening a branch in Ontario, but officials interviewed from time to time by Hardware and Metal have expressed the opinion that this was unlikely. It is known however, that at least one of the chief officials of the Marshall Wells Co. is interested in a number of manufacturing concerns in Ontario and that there would be possibilities of the Marshall Wells Co. extending operations into Eastern Canada at some later date.

WESTERN CANADA NOTES

Vernon, B. C.—At the annual meeting of the local branch of the Retail Merchants' Association last week, J. Vallance of the Vernon Hardware Co., was appointed president for 1922.

Vancouver, B. C.—T. H. Latimer, Main Street retail hardwareman, is around again after his recent encounter with thugs in his store. At a meeting of the Central Ratepayers' Executive of Point Grey, this week, he was appointed president for the coming year.

Kamloops, B. C.—T. J. Wilcox of the Wilcox-Hall Hardware Co. of this city, was a delegate to the conference of interior branches of the Retail Merchants' Association at Vernon last week, when it was decided to form a district taking in all branches in the Okanagan. Mr. Wilcox gave an interesting paper on "The Necessity for Better Regulation of Credits."

Vancouver, B. C.—Major J. C. Thorne, sales manager of the Canada Western Cordage Co., has just returned from a business trip to the prairies as far east as Regina. On his trip he reports considerable business in binder twine and other products of the factory at New Westminster, to be shipped to Edmonton, Calgary, Swift Current and Medicine Hat. This company is composed entirely of returned veterans and secured financial assistance to the extent of $100,000 from the provincial department of industries.

Cumberland, B. C.—The local hardware firm of Hargreaves & Smith is reported to be selling out to K. Nakanishi, a Japanese.

Vancouver, B. C.—R. A. Ogilvie, of 713 Dominion Bldg., has been appointed representative of E. T. Wright Co., Hamilton, Ont., for B. C. This also includes the Wentworth Mfg. Co., manufacturing "Wellworth" aluminum ware.

Edson, Alta.—The Edson Hardware has greatly enlarged their store. A large section of former living rooms, has been added to the store. This section, is to be used for wall paper and crockery.

C. C. Craig Co., Ltd., Winnipeg, have been appointed western representatives for the Pike Mfg. Co., of Pike, New Hampshire, manufacturers of Washita stones, bench stones, oil stones, razor strops and razor hones.

H. H. Pigott, credit manager of the J. H. Ashdown Hardware Co., Ltd., Winnipeg, sustained a fracture to his shoulder when he fell heavily on his left side, near the corner of Rorie and Bannatyne Sts. Latest information states that Mr. Pigott is doing well.

Vancouver, B. C.—J. Burnett, representing the Andrews Wire Co. of Watford, Cassidy-Fairbanks of Chicago and the Wire Goods Co. Worcester, Mass., made the rounds of the trade this week. He reports prairie conditions not as good as on his last trip, due to good stocks on hand, but says that he found business good under the existing conditions.

HARDWARE MERCHANTS VISIT AUTOMOTIVE SHOW

Winnipeg.—Among the hardware merchants visiting the Automotive Equipment Show, were the following:—Markett & Montgomery, Grenfell, Sask.; Bell & Clark, Weyburn, Sask.; Gilmore & Marsh, Fort Frances, Ont.; J. L. Les Clubine, Morden, Man.; J. B. Curran, (Brandon Hardware Co.), Brandon, Man.; George Whitfield, Morden, Man.; Stanley Coulter, Woodnorth, Man.; Hamilton & Warren, Crandall, Man.; R. L. Stevenson, Langruth, Man.; J. Kennedy, Langruth, Man.; E. Deaust, Gravelbourg, Sask.; Peter Williams, Gladstone, Man.; Ed. Grey, Aylesbury, Sask.; Alex. McDonaugh, Russell, Man.; J. R. Thompson, Wellwood, Man.; D. W. J. Hopper, Arcola, Sask.; W. Bowers, North Battleford, Sask.; E. Gray, Aylesbury, Sask.; E. Chesney, Qu'Appelle, Sask.; A. M. Nairn, Wapella, Sask.; J. Funk, Herbert, Sask.

Much Buying at Auto Equipment Show

Western Automotive Equipment Association to be Formed Among Those Handling Auto Accessories, etc., in Retail Way—Great Success Attends 2nd Annual Exhibit of Automotive Equipment in Winnipeg—Many Dealers Present

View of the second annual exhibit of automotive equipment in the Board of Trade Building, Winnipeg, under the auspices of the Western Canada Automotive Equipment Association. A large range of automobile accessories were displayed and evoked much interest from the 1,600 dealers who visited the show. Considerable buying was reported by many exhibitors.

WINNIPEG.—The second annual exhibit of automotive equipment was held in the Board of Trade Building, Winnipeg, Man., under the auspices of the Western Canada Automotive Equipment Association, of which E. W. Hamilton is the president. The show was formally opened by Alderman Douglas who represented the Mayor of Winnipeg. Continuous music was furnished afternoon and evening.

The Board of Trade Building was decorated in gold and purple and the decoration scheme was carried through the individual exhibits which numbered about 100. Many U. S. manufacturers of automotive equipment were represented.

It is estimated that about 1,600 dealers visited the show and many orders were left by them. One exhibitor reported 67 sales to dealers during the week.

Between 10.00 a. m. and 12.00 noon the show was closed to the public but was open to dealers. This gave the dealers in automotive equipment a chance to transact their business without being interrupted. The public were admitted from 12.00 noon to 10.00 p. m. daily.

Messrs. A. W. Sherman and N. H. Oliver representing the Automotive Equipment Association, addressed approximately 300 dealers in convention. 2000 feet of motion picture film was shown entitled "Ask 'em to buy," cards were distributed at the meeting to the dealers present asking for their opinion as regards the formation of an Automotive Equipment Association for those who handled goods of this kind in a retail way. The consensus of opinion registered was strongly in favor of such an association and it is the intention of those interested to get this matter under way at an early date.

On Thursday evening the Western Canada Automotive Equipment Association entertained the dealers at a modern mardi-gras, dance and supper, which was held at the Royal Alexandra Hotel. Approximately 2,200 people attended. That the entertainment was novel and interesting fact evinced by one dealer, who said that he "had the time of his life." The "Ask 'em to buy" band, composed of the executive members of the association was one of the features of the evening's entertainment.

It is the intention of the association to hold their third exhibition of automotive equipment during February of 1923, and from the experience gained during the past two years an even more splendid exhibition will be put on and it is hoped that every dealer in western Canada will attend.

FRANK MENZIES GETS THE CREDIT

Hardware and Metal is advised by T. S. Tait & Son, Campbellford, Ont., that to Frank Menzies, head of the retail staff of this firm, goes the credit in connection with the entry in the 1921 Christmas Window Contest, which won fourth prize in places under 5,000.

APPOINT REPRESENTATIVES

Campbell & Fowler, Ltd., St. John, N.B., announce they have appointed F. G. Maxwell & Co., Winnipeg, to represent them in the Western Provinces; T. Mortimer & Co., Toronto, for Ontario and Quebec, and James R. Harris in Halifax. This company manufacture Campbell edge tools and axes.

Events in the Trade

BUSINESS CHANGES

Terrebonne, Que.— Josephat Allaire, hardware, has sold to J. B. Gauthier.

FIRE LOSS

Owen Sound.—Empire Stove and Furnace Co., suffered fire loss.

NEW FIRMS

Newmarket, Ont.—N. F. Bennett has commenced business with an up-to-date store and stock at Newmarket, Ont.

Hamilton, Ont.—Thompson Hardware has commenced business with a first-class store and stock at 695 Barton St., E.

OBITUARY

The death is announced of John Stephens, at the age of 71, Superintendent of Works at the Swansea plant of the Steel Co., of Canada. He was a prominent figure in the production end of the bolt industry, and had been associated with the Steel Co., for some fifty years.

At Thetford Mines, Que., the death occurred of Hon. George Robert Smith, member of the Legislative Council, Victoria District. Mr. Smith was vice-president and general manager of Bell Asbestos Company at Thetford Mines and vice-president and general manager of the Asbestos Manufacturing Company of Montreal.

INCORPORATION

Moncton, N. S.—Home Mixed Fertilizers, Ltd., is the name of a company with head offices in Hartland, incorporated to manufacture compound and deal in all manner of fertilizers and their ingredients. The capital is $9,5000.

PERSONAL

Percy B. Chown, hardware merchant, Kingston, Ont., has been nominated for the Council of the Board of Trade.

A. J. Mann, Halifax, N. S., and J. H. Evans, Moncton, N.B., are attending a sales conference of the Glidden Co., in Montreal this week.

Frank Reardon, Jr., vice-president, F. Reardon, Ltd., Halifax, is visiting Montreal, Hamilton and Paris, Ont. calling on the manufacturers they represent in the Maritime Provinces.

A. F. Benford, Ontario representative Brandram-Henderson Ltd., desires to thank the trade for the many expressions of condolence which he has received since the recent sudden death of his wife.

W. S. McLennan, general sales-manager, Brandram-Henderson, Ltd., has returned to the office, after being confined to his home through illness for the past week.

W. Hanna Junr, of Hanna & Co., Port Carling; T. F. Donnell, Keswick; R. Hawkins, Smiths Falls; Mr. Flintoff, of Flintoff & Sons, Oshawa and Mr. Barton, of Barton and Fisher, Port Arthur, were among the Ontario merchants who visited Toronto, and called upon H. S. Howland & Sons Co., this week.

TO PURCHASE HARDWARE

Ottawa, Ont.—Ottawa Improvement Commission, Castle Bldg., plan purchase of hardware. Alex. Stuart, Engineer.

CONTRACTS SECURED

Windsor, Ont.—Baxter Hardware Co., Chatham St. E., have plumbing and heating contracts for residence costing $14,000 for Jno. J. and Robert G. Baxter, 844 Ouelette Avenue.

COMMENCE WHOLESALE ELECTRICAL SUPPLY BUSINESS

B. Caplan & Son, 220 Queen Street East Toronto, are commencing business as wholesale dealers in electrical supplies in connection with the retail hardware business now conducted. Business will be solicited with both hardware and electrical merchants.

NUMBER OF MOTORCYLES IN CANADA

The registration of motorcycles in various Provinces of Canada for 1921 reveals the fact that there are approximately 10,000 motorcycles in actual operation in the Dominion. Figures compiled from motor vehicle license statistics show that the official number of motorcycles registered at the end of the year totalled 9,902. This total compares very favorably with the total registration in Canada for previous years in spite of the fact that motorcycle sales were hindered to a great extent for two or three years previous to 1921 because of excessively high prices, the latter being due to exorbitant customs duty on machines imported from the United States, sales taxes, high transportation rates and other reasons apart from factory costs.

London, Ont.—J. M. Moore, architect, will prepare plans for hardware store to cost $100,000 for Cowan Hardware Co.

TORONTO HARDWAREMEN TO MEET

The Toronto Retail Hardware and Paint Club will meet for dinner and business in the Board of Trade Dining Hall, top floor Royal Bank Bldg., on Tuesday evening March 14 at 6.30 p.m. Officials of the Paint, Oil and Varnish Club of Toronto, who were largely responsible for bringing the retailers together in this association, will be the guests and an interesting meeting is anticipated. Progress will be made along the lines of organizing the city's retail hardware merchants.

BRITISH HARDWARE MANUFACTURER VISITING CANADA

Arthur L. Johnson, Chairman and Managing Director of Messrs Rd. Johnson, Clapham & Morris Ltd., 24 Lever St., Manchester, England, and 1 Basinghall St., London E. C. 2, hardware merchants, wire manufacturers, etc., is leaving England for the United States and Canada on March 22 accompanied by his personal assistant A. W. Shaw. Mr. Johnson states that he will be glad to communicate with manufacturers of all kinds of hardware and general ironmongery with a view to selling their products at the establishments of his company in the British Isles. Mail may be directed to Mr. Johnson in care of Hardware and Metal.

BRENNERS ISSUE WRIT AGAINST LIQUIDATOR

In connection with the trial of Nathan and Meyer Brenner, of the defunct metal firm of N. Brenner & Co., Toronto, who await sentence after being convicted of theft of $700,000 belonging to the Company, A. C. McMaster, K.C., has issued a writ for a declaration that Osler Wade be declared not the official assignee of the insolvent company, and that he has no right to interfere with its affairs. At the time the assignment was made, the document bore only the signature of Meyer Brenner, then president of the firm, and it was held during the trial that, since the document did not carry the authority of the board of directors, it was void, and that Mr. Wade acted irregularly in acting under it

The Brenner Company asks that all the assets held by Mr. Wade be returned, including those under his control, and an injunction is sought restraining him from any interference with the affairs of the company.

Hardware Merchant Again Mayor of Quebec

Joseph C. Samson, Popular Mayor of Quebec City, is Head of Samson & Filion Hardware Co. Ltd.— Re-elected by Acclamation for Second Period of Two Years

AN increasing number of hardware merchants throughout Canada are receiving municipal honors from year to year, the latest being the signal honor bestowed upon Joseph O. Samson, of the Samson & Filion Hardware Co. Ltd., Quebec City, who has been re-elected for another two year period as mayor of Quebec.

JOSEPH C. SAMSON

Of the hardware firm of Samson and Filion Hardware Co., Ltd., Quebec City, re-elected by acclamation as Mayor of Quebec for a second period of two years office 1922-24.

Mr. Samson is one of the active and prominent business men of Quebec.

Born in 1862, at St. Isidore, P. Q., he came early to this city, where he entered in business in 1879. With a very small income he was able, within a few years, to place his savings in hardware stock and was very successful. In 1885, he married Miss Emond, from Quebec. He is the father of 17 children of whom the great majority are living. In 1887 he became associated with Mr. Filion, thus creating the "Samson & Filion Hardware Co., Ltd." His partner died a few years later, but under the same name Mr. Samson continued alone his direction of the increasing business. He now ranks among the prominent wholesale hardware merchants of Quebec.

Besides his hardware business the present mayor is present of "La Compagnie Charles A. Julien" at Pont-Rouge, P. Q., vice-president of "The Standard Paper Box Co.," at Montreal, P. Q., director of "La Compagnie Desjardins" at St. Andrew of Kamouraska, P. Q., president of "La Gaspesienne" for fish trade and conservation, etc., director of the "Laval University," of "The Quebec Board of Trade," chairman of the "Quebec Exhibition Commission," member of the "Roman Catholic Board of Schools," etc., etc. He is a member of the Kiwanis, the Rotary and the Reform clubs, and a Knight of Columbus.

Elected as an alderman a few years ago, he subsequently was elected by a majority of over one thousand votes as mayor of Quebec for the years 1920-1922, his term of office beginning on March 1st, 1920. He was re-elected for a second term of two years (1922-1924) by acclamation on February 13th, 1922, which term will begin March 1st, 1922. Joseph Samson celebrated his 60th anniversary a few weeks ago and on the said occasion received petitions covered by many thousands of signatures asking that he run for a second term of office as mayor of Quebec.

$35,175,801 of Auto Tires Made In Canada

Record for Calendar Year of 1920 Just Issued Shows Production of Tires, Tubes, Packing, Belting, Hose, etc. in Rubber Industry of Canada— Also Exports and Imports

THE DOMINION Bureau of Statistics has prepared a report on the rubber industry of Canada for the calendar year 1920. This report shows the detailed production figures covering auto casings and tubes.

In the same year there were imported to Canada, pneumatic tires valued at $2,299,760 while exports amounted to $10,267,534. Imports of inner tubes amounted to $246,204 and exports were $775,721. Total imports were twenty million dollars compared with thirteen million dollars of exports.

	No.	Selling value at factory
Auto tires, casings	1,561,824	$35,175,801
Tubes	1,427,546	4,271,461
Motorcycle tires and tubes	.....	173,405
Bicycle tires and tubes	564,815	666,246
Rubber cement (gals.)	60,785	89,374
Rubber mats and matting	.....	111,755
Sheet packing	.....	246,085
Rubber belting	.....	3,101,412
Rubber hose .....feet	4,067,694	1,882,518

Hardware Merchants Eligible For C.B.D.A.

Bicycle Dealers' Association Planning to Help Members in Forthcoming Season—1922 Convention to be Held in London, Ont.

IN VIEW OF recent steps taken by the Canadian Bicycle Dealers' Ass'n, to assist members in the sale of bicycles, Hardware and Metal made some enquiries as to the eligibility of hardware merchants in this organization and the following letter has been received from Secretary N. N. Ferries, 176 James St., N. Hamilton.

The following is taken from the C. B. D. A. constitution. "Any person, or firm, or corporation, actually engaged in the retail cycle trade and having established business with a store front in which bicycles are displayed and for sale, shall be eligible to active membership." This does not necessarily mean exclusive bicycle dealers. As a matter of fact, a great many of the members are sporting goods dealers and hardware dealers.

"We believe that hardware dealers handling bicycles can receive just as much benefit through the Association as any exclusive bicycle dealer.

"The association is now entering its fifth year and has become strong enough to effectively assist its members. Several of the features now before the members are a standard lien lease form which has been thoroughly tested and which is supplied to members at cost; a real bicycle calendar for 1923, using a very fine Norman Rockwell picture for which the association has secured the Canadian rights and which is also being supplied to members at cost. The annual bicycle week is already a well known feature that has been adapted by many other trades. The Annual Bicycle Dealers' convention affords all bicycle dealers, large and small, an opportunity to mingle with each other and interchange ideas, as well as supplying an entertaining and instructive program. The 1922 Convention will be held in London, Ont., during the month of September.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

BAR iron, brass compression goods, solders, ingot tin and copper, scrap materials, galvanized sheets, leather tap soles, fuel oil, certain makes of coil door springs and narrow brass butts, alarm clocks and glass fruit jars, provide the price reductions on the current hardware markets.

Window glass registers an increase, the base price being fifty cents per case higher. This important revision results from the firm undertone to the glass markets, which has been referred to in previous reports.

Base quotations on iron and steel are lower to the extent where they now more generally conform with the basis recently prevailing in eastern markets. Through revised discounts, easier levels are recorded on standard compression work, compression bath cocks, brass steam cocks and basin cocks. Solders reflect the tendency of the primary metals, with reductions on practically all grades. Eastern markets record price lowering on galvanized sheets, but this change brings the average quotations to a more standardized level. Scrap materials continue with an easy tone, some further price concessions being noted. Ingot metals, especially tin and copper, also record an easier trend.

Other price changes this week relate more to general shelf hardware than to particular lines or specific staple goods. A gradual evening up process is evident among recent price changes, indicating the general readjustment of values. Reductions, however, are still noticeably in the majority.

Some price shading has been noted on certain wire products in southern centres. This indicates shading between the independent mills and the Steel Corporation, with plain wire and wire nails being the objects of competition. The changes, however, are described as slight, and not of sufficient extent to affect the domestic price levels. Better buying of steel products generally is being maintained, and the volume of present inquiry coupled with new business and mill operations, points to a reviving demand of a fairly wide character. Trade in general is described as seasonably moderate, but a more optimistic outlook now exists in both producing and distributing circles when estimating future business improvement. With the active Spring season fast approaching, a revival in trade is generally anticipated.

Montreal Markets

MONTREAL, February 23.—Price recessions, while not as numerous as in the past two weeks, are again recorded on several important lines. The new season's quotations on glass fruit jars are now announced, showing a reduction of approximately 15 per cent. from the opening prices of last year. Lead products are again featured by a reduction in the prices of solders, all grades being reduced one and one-half cents per pound. Tin on the primary markets has been recorded with a softer tone in the past few weeks, with the tendency more marked again this week, this said to be responsible for the lower solder prices. American galvanized sheets are again slightly reduced on all gauges, while waste material markets record easier quotations on practically all lines of scrap. This market is still very dull, with practically no export trade, and domestic consumers showing little or no interest. Tin and copper in the ingot markets attract attention, both metals showing a decidedly easier tone.

NEW PRICES ANNOUNCED ON FRUIT JARS

Montreal

Manufacturers of glass fruit jars now announce new season's prices, showing a reduction of approximately 15 per cent. from opening quotations of last year. Following are new prices;

FRUIT JARS—

Wine measure	Small	Medium	Large
		Per gross.	
Crown and Imperial Gem	$11.00	12.20	16.15
Perfect Seal	12.55	14.15	20.45
	Pints	Quarts	½ Gallon
Imperial Measure	12.55	15.30	20.45

(Crown style only).

Subject to further notice these prices are guaranteed on all orders received for shipment up to June 1st, 1922.

Net 30 days from June 1st.

ALARM CLOCKS HIGHER ON USUAL TERM BASIS

Montreal

A few weeks ago new lower prices were announced on alarm clocks, quotations appearing at that time being on a net cash basis. A further revision is now made for usual terms, 2 per cent. 30 days net, and following are quotations on that basis;

ALARM CLOCKS—

America	1 40
Lookout	1 90
Sleepmeter	2 10
Ironclad	2 50
Big Ben or Baby Ben	3 50
Big Ben luminous	4 90

Terms, 2%, 30 days net.

WASTE MATERIAL MARKETS ARE AGAIN EASIER

Montreal

An easier tendency has again entered into the market for waste materials, and both ferrous and non-ferrous metals are now quoted at lower figures. In sympathy with the rubber market, scrap is now reduced, automobile tires being quoted at 50 cents per 100 lbs. With the exception of malleable scrap and pipe scrap, all other iron and steel waste is reduced, while brass and copper in all weights have new lower prices. Dealers state that very little activity is yet apparent, and while a little encouragement was lent a few weeks ago with an improvement in the German market, this has again fallen off, leaving very little outlet now for materials. The domestic market has been quiet all during the late Fall and Winter months, and little improvement is looked for in this direction until the open weather of Spring. Following are revised quotations.

Automobile tires	0 50
Rubber shoes	0 03
Yellow brass	0 05
Red brass	0 08¼
Light brass	0 03
Scrap zinc	0 03
Lead, heavy	0 04
Lead, tea	0 02
Light copper	0 08
Heavy copper	0 10
Wrought iron, R. Rd., No. 1 per gr. ton	10 0
Malleable scrap (ton)	8 00
Pipe scrap (ton)	6 50
Heavy melting steel	6 50 7 00
No. 2 busheling	3 00
Boiler plate	6 50
No. 1 machinery cast	20 00

NEW LOWER PRICES RECORDED ON SOLDERS

Montreal

The easier tendency in the market for lead products, owing to the softer tone in metals on the primary markets, is now reflected on current quotations of solders in all grades. Guaranteed, strictly pure, commercial and wiping are all reduced one and one-half cents per pound. Wire solders also show easier prices to the same extent, but owing to the differential on quantity buying, following quotations are increased, former levels being for orders of considerable weight. Solders are the only line yet quoted at lower figures, the reason, according to the manufacturers, being because of the easier tone recently displayed in tin. Only this week this metal reached a new low point, the lowest that has been touched in the past ten years. Just to what proportions this downward tendency will reach before a recovery is made, is hard to determine, but it would seem likely that an improvement will shortly be forthcoming when the exceedingly low figures are taken into consideration. Revised quotations on the local market are as follows;

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3* lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½

Cut sheets ¼c lb. extra, and cut sheets to size, ½c lb. extra.

Solder, guaranteed, lb.	0 27
Do., strictly, lb.	0 25
Do., commercial, lb.	0 22
Do., wiping, lb.	0 23
Do., wire, lb.	0 35½
Zinc shets, casks	0 11
Do., broken lots	0 11½

BETTER FEELING NOW EVIDENT IN STEEL TRADE

Montreal

With the gradual approach of Spring, and the more active season, come reports of a better feeling in southern steel circles. Increased buying has not reached anything like favorable proportions as yet, but it is felt that the ice has been broken, and from now on a gradual improvement will be noticed. Inquiries are coming to hand, which are expected to develop into actual sales in the following months. Locally, business is still at a low ebb, orders continuing small and of only a sorting character. With a revival in building construction indicated, however, trade should show considerable improvement in the not far distant future. Following are unchanged prices on the local market:

Common bar iron, 100 lbs.	2 65
Refined iron	4 15
Irish finish machinery steel	2 70
Mild steel	2 65
Single reeled machinery steel	4 75
Band steel	2 65
Spring steel	4 25
Sleighshoe steel	2 65
Tire steel	2 85
Toe caulk steel	3 55
Harrow tooth steel, per lb.	2 80
Mining tool steel, per lb.	0 21½
Black Diamond tool and cast steel, per lb.	0 21½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owinz to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

SLIGHTLY EASIER PRICES ON AMERICAN GALVANIZED

Montreal

Local distributors have again slightly reduced their quotations on American galvanized sheets for the most part, although former higher prices are still given in some quarters. The reduction, as stated, is slight, only ten cents per 100 lbs. on all gauges, and not to the same proportion as other western markets have recently announced. Business in all lines continues quiet, but this condition is only seasonal at this time of year. There is still a certain amount of optimism expressed regarding future trade by dealers, and further encouragement is now given by the report that prospects appear brighter at primary centres. A better tone is evident in southern steel centres owing to more enquiries now coming to hand. Larger corporations and manufacturing consumers are a little more interested than for some time past, and this condition, with the anticipated increase in general dealer trade, affords a much brighter outlook for business commencing with earlier spring months. Distributors state that further slight reductions may develop, but the market in general will not show any marked price declines, present levels being well down when compared with productive costs. Following are revised quotations:

BLACK SHEETS

10 gauge	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 40	4 70
16 gauge	4 50	4 80
18-20 gauge	4 55	5 05
22-24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

GALVANIZED SHEETS.

U. S. Standard.

NEW RANGE BOILER LIST NOT YET GENERAL

Montreal

Although it is now four weeks ago since the new list prices and discounts were issued on range boilers, there are still some firms quoting net quotations. During the past week also, a slight recession has been made by these distributors in some of the larger sized boilers. This, however, may only be an extra effort to reduce stocks on hand, and it is generally felt that in the not far distant future the new list will be generally adopted. Following are list prices and discounts issued three weeks ago:

RANGE BOILERS—

Size	List Price
5 gallon	$13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 50 per cent.
Extra heavy, 40 per cent.

BOILER TUBE PRICES ONLY NOMINAL

Montreal

Local quotations on boiler tubes are nominally unchanged, with slightly lower prices offered for attractive inquiries. Business continues of fair volume although the lack of new work is still apparent. Nominal prices now quoted are the following:

BOILER TUBES—	Seamless	Lapweld
1 inch	24 70	.....
1¼ inch	24 50	.....
1½ inch	24 00	.....
1¾ inch	26 00	26 00
2 inch	24 50	20 50
2¼ inch	27 75	23 50
2½ inch	32 50	24 50
3 inch	40 00	34 75
3½ inch	52 50	34 75
4 inch	65 00	44 00

DEALERS IN CORRUGATED SHEETS ARE OPTIMISTIC

Montreal

There is little activity yet evident in the movement of corrugated sheets, but dealers state that a much better feeling now exists owing to indications of an improvement in the coming months. Building construction, with the exception perhaps of the industrial field is expected to be quite extensive this year, thus lending encouragement to dealers in corrugated sheets and allied products. No further change has been made in quotations since the revision earlier in the year, and following are prevailing levels:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 00

Less 10 per cent.

Lighter than 24 gauge and wider than 2½ ins., 75c a square extra.

ROOFINGS AND PAPERS ARE REPORTED FIRM

Montreal

With the active season gradually approaching for roofing and building papers, the market in general is described by manufacturers as decidedly firm, owing

Continued on page 42

Are YOU

WE WISH you to take particular notice of our new slogan, soon to become a household phrase as our advertising gradually makes it familiar to the people of Canada:

"Use it on your piano —with water"

Note that we emphasize the importance of using it **with water.** O-Cedar Polish is only successful when used with water according to the directions.

passing up 30% of your possible sales of

O-Cedar Polish

A RECENT investigation conducted by us among a thousand women, revealed the startling fact that although most of them use O-Cedar Polish, only 40% of those who knew its merits were actually using it on their *furniture.*

The other 60% said they had always regarded O-Cedar Polish as "merely a floor polish."

From this you can readily see that all the dealers are not getting nearly all the sales of O-Cedar that *can* be got.

O-Cedar can easily be increased 30% among those now using the Polish—by simply telling those women who do not really understand what O-Cedar is, that the results it gives on furniture are quite as wonderful as those it reveals when used for polishing floors.

Tell your customers to try it on the Piano, the Dining-room Table, the Buffet or Sideboard. Explain, every time you hand out a bottle or a can, that it is the supreme furniture polish—certain to give satisfactory results **if used with water, as directed,** on any painted, varnished, or stained surface.

Some now use O-Cedar on floors and for treating their O-Cedar Polish Mop. Others use it also on Linoleum or Oilcloth. In many homes it is found a wonderful brightener of woodwork. It is also excellent for polishing the motor car.

But the greatest of all O-Cedar uses is the one least known to women—its truly remarkable effect on fine furniture.

In Bottles 30c and 60c; in Tins, $1.50, $2.50 and $3.50

CHANNELL LIMITED - TORONTO

MONTREAL MARKETS

(Continued from page 39.)

to the increased cost of raw materials. Rags, which are one of the chief ingredients in the manufacture of ready roofings, are not only higher in price, but a shortage is not unlikely. Asphalt continues quite steady, while in the making of papers, practically all basic materials are at levels warranting higher quotations on the finished products. There is, however, according to the manufacturers, no present indication that a revision will be announced. Booked orders were placed with a guarantee of prices until May 1st., and it is probable that the situation will not be dealt with until nearer that date. Business remains seasonably quiet, but a gradual improvement is looked for from now on.

NO CHANGE RECORDED IN PIPE FITTINGS

Montreal

Prices on all lines of pipe fittings remain unchanged, with an average volume of sales recorded. While only moderate business, according to dealers in these products, is anticipated at this season, a gradual improvement is looked for in the near future, and with February now drawing to a close, the following month should bring about an improvement. Unchanged quotations are as follows:

FITTINGS—	
Cast iron fittings	30%
Bushings, cast	32%
Do., malleable	32%
Flanges	40%
Plugs	30%
Flange unions	30%

Class C	0 13	0 20

BRASS AND COPPER GOODS ARE AGAIN EASIER

Montreal.

Owing to the state of copper on primary markets, where this metal has displayed an easier tendency in recent weeks, finished products, including sheets, rods and tubing, now show an easier undertone. Local prices are as yet unchanged, but a revision in the near future would not be surprising. Prevailing quotations are as folows:

BRASS—	Base.
Sheets, base	0 25
Rods, base ½ to 1 in., round	0 23
Tubing, seamless, base	0 32
F. o. b. Montreal.	
COPPER—	
Rods, ½ to 2 in.	0 30
Soft sheets, plain, 16 oz. and heavier	0 34
Plain tinned, 16 oz. and heavier	0 39
Polished and tinned, 16 oz. and heavier, lb.	0 43
Tubing, lb.	0 34
Above prices are full sheets and bars. Cut-sheets and bars are 5c per lb. higher.	

ACTIVITY EXPECTED SOON IN TROUGH AND PIPE

Montreal

There is a better feeling among dealers in eavestrough and conductor pipe, although as yet there is little activity in forwarding dealer supplies. Booked orders have, to a great extent, been withheld over the winter months, but these are now coming to hand in satisfactory numbers. For the most part, however, orders are somewhat smaller than in past years, but dealers are confident that a gradual improvement will be felt, and anticipate sales will continue over a greater period than is usual at this season. Prices on both products continue unchanged since the revision early in the New Year.

EAVESTROUGH—

O. G. round and half-round, per 100 ft.

8 inch	10 inch	12 inch	15 inch	16 inch
$16 90	$18 70	$22 20	$29 80	$37 80

O. G. Square bead, per 100 ft.

8 inch	10 inch	12 inch	15 inch	18 inch
$15 90	$17 70	$21 20	28 80	$36 80

Discount 70/10 per cent.

2 inch	3 inch	4 inch	5 inch	6 inch
$18 40	$22 30	$29 60	$40 00	$49 00

Discount 70/10 per cent.

CONDUCTOR ELBOWS—

Plain or corrugated.	dozen
2 inch	$ 5 25
3 inch	6 00
4 inch	10 50
5 inch	24 00
6 inch	29 00

Discount 60 per cent.

TIN AND COPPER HAVE MUCH EASIER TENDENCY

Montreal

The metal markets generally have not shown any improvement, and certain lines, such as tin and copper have been decidedly weak. There is not much stability to the markets at present.

TIN.—The London market has been subjected to severe pressure owing to bear operations on the part of a Dutch syndicate, with the result that prices have touched a new low point in about ten years. At the moment it is impossible to say how far the decline will go, but at present the bears have it all their own way. Local market is naturally weaker with stock price at 35 cents.

COPPER.—London has again declined, and New York is also lower, owing to demand falling off, and forced sales by second hands. It is now possible to buy at 13 cents delivered for prompt, with a slight premium for forward. The local market is dull at 6¾ cts. for electro, and 16¼ cts. for casting.

LEAD.—The American market remains quiet at $4.40, East St. Louis, but London is again lower owing to large arivals of foreign lead. It is realized, however, that the price in London has been too high. Quotations are slightly easier at 6¾ cents.

Toronto Markets

TORONTO, February 23.—A further recession in base prices on bar iron and steel to the extent of ten cents per 100 lbs, provides the feature current market change. Other reductions include a fifteen per cent. decline in tap sole quotations, while easier prices are noted on solder in practically all grades. This latter revision reflects the tendency of primary metal markets. Another change has been announced in compression discounts, thus bringing lower prices on standard compression work, compression bath cocks, brass steam cocks and basin cocks. The easier trend in crude oil centres, has resulted in another reduction in fuel oil of one-half cent per gallon. Leather pump washers register an increase this week, while a slight revision has been recorded on southern wire markets, affecting plain wire and wire nails. This is described as being of a minor nature, and not sufficient to affect domestic prices on these products. The sheet trade at present is moderate, with a better outlook generally. An easy tone is still evident in scrap materials, with dullness and lower prices recorded on ingot metals.

ANOTHER DECLINE IN FUEL OIL QUOTATIONS

Toronto

A further reduction has been announced in the price of fuel oil, to the extent of half-cent per gallon. This change reflects the easier tone in primary crude oil markets, reference to which has been made in recent issues of Hardware and Metal. The revised quotations are as follows:

FUEL OIL

	Per Gal.
In barrels	0.90.90
In tank wagons	0.80.90
In tank cars	0.07.90

REVISIONS NOTED ON SOUTHERN WIRE MARKETS

Toronto

Some uncertainty regarding prices on wire and wire products, is recorded in recent reports noted in certain United States centres on plain wire, and also on wire nails. Whether this easier trend will be reflected in the domestic markets is generally considered problematical. Up to the present, no change is indicated, with the current demand for these products described as average for this time of the year.

REVISED PRICE LIST ON WOODENWARE PRODUCTS

Toronto

A revised price list covering various lines of woodenware manufacture has been issued by the Stratford Manufacturing Co. These new levels are guaranteed against further decline until July 31, 1922.

ANOTHER CHANGE IN COMPRESSION DISCOUNTS

Toronto

Another revision in the discounts on certain lines of compression goods has been recorded. This current change affects standard compression work, compression bath cocks, brass steam cocks, and basin cocks. The extent of the reduction varies between 5 to 10 per cent. on the different products, being greater on such lines as basin cocks than on standard compression work. In announcing the revision, manufacturers state that some easing in price on the primary raw material markets has been taken into consideration, together with the decision to reduce quotations to the lowest possible point for anticipated future business. Following are revised discount levels:

COMPRESSION GOODS—

Compression work, standard	45%
Fulier work, standard	30%
Bath cocks, compression	35%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Brass steam cocks, standard	43%
Globe, angle and check valves, standard	25%
J. M. T.	20-10%
J. M. T. C.	25-10%
J. M. T. Gate Valves	25-10%
Jenkins gate or straightway	25|10%
Jenkins Globe	19|10%
Radiator valves, standard	58%
do., removable disc	58%
Emco. check valves, standard	25%
Emco, J. D. rad. valves, screwed	33%
Emco, swing check, ⅜ in. and ½ in.	40%
Do., Do., Do., other sizes	33%
Webber gate valves	33%
Emco gate valves, standard	25%
Do., Do., J. D.	33%
Emco Globe valves, std.	25%

BASIN COCKS—

No. 0 and 1, Fuller pattern	30%
Quick opening No. 3633	50%
No. 3628, plain or index handle	34%

EASIER PRICE NOTED ON GUARANTEED SOLDER

Toronto

Some easier prices have now developed on guaranteed and other grades of solder, the extent of the reduction varying several cents per lb. This places the average local quotations at lower levels and reflects the recent trend in the raw material basic market conditions. Other lead and zinc product prices, however, remain unchanged, with little variation having been recorded in prevailing conditions. Business is of a moderate character, but described as fairly good for this time of the year. Following are the revised price levels:

LEAD AND ZINC GOODS—

Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subjected to a discount of	10%
Lead traps and bends	10%
Lead sheets 4 to 6 lbs. sq. ft in rolls, lb.	0 09
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 32½
Do., strictly, lb.	0 22½
Do., commercial, lb.	0 21
Do., guaranted, lb.	0 24
Do., wiping, lb.	0 21
Zinc sheets, per lb. 0 09	0 10

LEATHER PUMP WASHERS REGISTER INCREASE

Toronto

An advance of approximately fifteen per cent. has been recorded this week in the prices on leather pump washers.

SHEET TRADE MODERATE WITH BETTER OUTLOOK

Toronto

Trade in the domestic sheet markets continues to be of a moderate nature, and further price recessions are noticed in those centres where slightly higher levels have been prevailing. This change brings the average quotations on a more uniform level in keeping with the prices given below, which became effective locally following the recent announcement of these reduced levels. The outlook at primary steel centres in the south, is primed with optimism which is backed by an increase in the volume of inquiry and substantiated by keener buying interest. The sheet market generally, is therefore in a moderate position which is described as fairly satisfactory for this time of the year. The stimulation of activity in industrial fields is expected to reflect in future improved sheet business, while railroad, automobile and construction fields are already showing signs of betterment. The tin plate mills are reported operating at a high rate of output. Following are the current prices on the local markets:

BLUE ANNEALED—

10 gauge, base	3 75	4 50
12 gauge	3 80	4 55
14 gauge	3 85	4 60
16 gauge	3 90	4 65

BLACK—

18—20 gauge	4 30	5 05
22—24 gauge	4 35	5 10
26 gauge	4 40	5 15
28 gauge	4 50	5 25

Charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—

	Queen's Head	Fleur-de-lis.
28 gauge	7 00	7 50
26 gauge	7 75	7 25
24 gauge	7 35	6 85
22 gauge	6 90	6 40
18 and 20 gauge	6 75	6 25
Premier and Apollo.		
10¾ oz.	6 00	5 75
U. S. 28 base	5 60	6 35
22 and 24	5 15	5 90
18 and 20	5 00	5 75
16	4 85	5 60
12 and 14	4 70	5 45

An extra 40c per 100 lbs. is charged for Keystone and Premier brands copper-bearing sheets. An extra is now charged on galvanized sheets, 10 3-4 oz. and 28 ga., when shipped out in sheets 8 feet wide. The extra charged over prices shown above is 20c per 100 pounds.

PLATES, CANADA—

Dull 60 sheets	5 30
Ordinary, 52 sheets	5 25

PLATES, COKE TIN—

I.C., 20 x 28, 112 shets	13 50
IX, 20 x 28, 112 sheets	16 50
IX, 20 x 28, 56 shets	9 00

PLATES, CHARCOAL TIN—

1X, 20 x 28, 56 sheets	14 00
1XX, 20 x 28, 56 sheets	16 00

PLATES, TERNE—

1C, 14 x 20, 112 sheets	12 00

DECLINE OF FIFTEEN PER CENT IN TAP SOLE PRICES

Toronto

A revision in prices on leather tap soles in "X" and "C" grade qualities is announced this week. The extent of the decline is approximately fifteen per cent. A change has also been made in the number and sizes of men's soles, six pair each of sizes nine and eleven being supplied to the dozen, where formerly 7, 9, and 11 were included.

FURTHER RECESSION IN BAR IRON BASE PRICES

Toronto

Further price recessions are noted this week in the iron and steel market, the base price on bar iron having receded another ten cents per 100 lbs. This reduction is generally attributed to the current market situation where price shading to secure nominal business has resulted in this level having become more general.

Recent reports from the primary markets indicate that better buying in iron and steel is being sustained, with new business being recorded and the ratio of current mill operations both pointing to a reviving demand of a fairly general character. The local market is described as fair for this time of the year. Following are the average local quotations:

IRON AND STEEL—

Mild steel bars base	2 75
Mild steel bands, 3-16 in. base	3 25
Bar iron, base	2 75
Angle iron, base	2 85
Horseshoe iron	3 60
Tire steel	3 35
Spring steel	5 50
Sleigh shoe steel	2 85
Hoop steel	3 75
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	30 00
Mining drill steel	18 50
Cast tool steel, high grade	31 00
Cast tool steel, medium	18 00

EASIER TENDENCY IN PRIMARY COPPER STAGE

Toronto

The current market is described as quiet in copper and brass products, these metals in the primary stage having recently developed an easier tendency. Manufacturers of copper and brass sheets, tubing and rods, are credited with the expression that "there is nothing discouraging in the present situation." Although trade is of a quiet nature, expectations generally prevail as to an improved volume of business in the near future. Following are current prices:

BRASS—

Sheets, base, per lb.	$ 0 23
Tubing, base, per lb.	0 25
Rods, base, per lb.	0 20

COPPER—

Rods, base, per lb.	0 28
Soft sheets, plain, 16 oz. and heavier, lb.	0 30
Do., plain tinned 16 oz. and heavier, lb.	0 37
Do., polished and tinned 16 oz. and heavier, lb.	0 42
Tubing	0 29

EARLY ACTIVITY IN CEMENT REQUIREMENTS

Toronto.

The degree of construction work in general is being reflected in sales of cement. Early promises of an extensive building program for the Spring and Summer seasons, is indicated by prevailing activity in construction circles generally, and a brisk movement in both city and country districts is expected to develop. Prices remain at the following levels:

CEMENT—Car load lots.	Toronto.
Per barrel	$3 70
Per barrel, f.o.b. yard	4 30
Per barrel, delivered	4 50

Single bags, $1.15 each; 4 bags to barrel.
Extra charge of $1.50 per load on less than 24 bag lots.
Rebate of 20 cents for empty bags.

EASY TONE REMAINS IN SCRAP METALS

Toronto

Both large and small consumers are now purchasing very little scrap iron or steel. Quotations are marked by an easier undertone as noted in last week's report and an improvement in the prevailing demand is now generally awaited. Copper and brass scrap can record movement inside the range of prices quoted below but the markets are generally of a quiet nature. Following are the usual averages of dealers' nominal buying prices for fairly large quantities:

SCRAP METALS

Gross Tons—	Scrap Iron	
Heavy melting steel (Hamilton)	$11 50	$12 00
Borings and turnings	2 00	3 00
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	6 50	7 50
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	15 75	16 75
Stove plate	11 50	12 00
Grate bars	10 50	11 00
Standard car wheels	13 50	14 00
Scrap Metals.		
Heavy copper and wire	10 50	11 00
Light copper	8 00	9 00
No. 1 composition	9 00	10 00
No. 1 comp. turnings	6 00	7 00
Light brass	3 00	3 50
Heavy yellow brass	5 50	6 00
Heavy lead	4 50	4 75
Tea lead	2 00	2 50
Scrap zinc	4 00	4 25
Scrap Rubber		
Boots and shoes	2 25	2 75
Lumbermen's rubber boots	1 50	2 00
Auto tires	0 50	1 00
Solid tires	0 75	1 25

WROUGHT PIPE CONDITIONS RECORD IMPROVEMENT

Toronto

Present conditions in the pipe markets are described as distinctly stronger than those which prevailed in the piping industry in general during the month of January. With the open season, there has developed a fair amount of current business and manufacturers state that the general situation now looks much improved. Owing to the remarkable variance in primary market conditions since last year, many distributors have now ceased to compare either business or values with last year's figures, and are content to refer to the previous month's records as a basis for gauging progress. Prices are remaining unchanged at List No. 54.

MODERATE TRADE IN ROPE AND CORDAGE

Toronto

Business in rope and cordage is described as fairly satisfactory for this time of the year. Prices on the domestic markets have recorded no further change since the last revision. On southern primary centres, however reports indicate that there has been a slightly easier tone in manilla fibre. Mexican sisal is reported as holding steady with an improved inquiry. The volume of current trade in hemp is just moderate, with buying mostly in small quantities. Prices are holding at unchanged levels.

QUIET CONDITIONS EXIST IN RANGE BOILERS

Toronto

There have been few developments recorded in the range boiler market since the adoption of the new list prices and discounts. Although some distributors are stated as still maintaining the previous net prices on these products, yet it is noticeable that the quotation on the 30 gallon standard size is the same in each case. It is thought that the revised list will be uniformly accepted in the near future. Current trade is of a spotty character in this line, with dealers stating that price shading seems to have been overcome for the moment, there being no attractive business to shade prices for.

RANGE BOILERS—	
5-gallon	$ 13 50
12-gallon	14 00
18-gallon	15 00
25-gallon	16 50
30-gallon	17 50
35-gallon	20 50
40-gallon	22 75
52-gallon	38 00
66-gallon	60 75
82 gallon	74 00
100-gallon	103 00
120-gallon	117 00
144-gallon	164 00
168-gallon	187 00
192-gallon	210 00

Discounts, Standard weight, 50 per cent. Extra heavy, 40 per cent.

EASIER TONE AND LOWER PRICES FEATURE METALS

Toronto

General conditions in the ingot metal markets are of a quiet nature and uninteresting from the lack of new developments. Easier price levels are now more generally noted, especially in copper, tin, and antimony. The copper market is described as dull and hopeless, while other metals record very little variations, a lack of both interest and demand contributing to the prevailing easy tone.

COPPER.—Dull and hopeless are the current phrases covering the condition of the copper markets. Large supplies of copper are still available, while the demand remains of a very moderate character. Price shading among producers in the south has recently developed, this condition reflecting the easier tone in general. The local quotation remains at 17½ cents.

TIN.—Fluctuations in exchange, coupled with the waiting policy adopted by consumers have resulted in some easier price levels being announced on tin in the domestic markets. The average quotation is 35½ cents, and though some inquiries are evident, actual business is moderate.

LEAD.—The tone of the lead market is quiet at present, with little variation having been recorded. Prices remain fairly steady, while current buying is in small quantities. The local quotation is $6.75.

SPELTER.—Quiet conditions also prevail in spelter, with the consuming demand being very light, and few sales having been recorded. The local average price is a little easier, now being quoted at $7.00, a decline of 25 cents.

London Markets

LONDON, February 23.—Several price changes of importance are again evident this week including lower quotations on such lines as leather soles, coil door springs, narrow brass butts, wood screws, and the Gem line of food choppers. Notable price advances are recorded on window glass and linseed oil.

Hardware trade during the week was again reported as fair, with a continued steady but gradual improvement. Seasonable lines are in demand and merchants generally are now busy preparing stocks for Spring business.

HIGHER PRICE LIST ON WINDOW GLASS

London

Slightly higher prices are now recorded on window glass, due to the firm tendency in these markets recently noted in previous reports. The revision represents an advance of between 50 and 75 cents per case. A fair sale is recorded for this season of the year. Following are the new list prices:

WINDOW GLASS

	Single dia.	Double dia.
Up to 25"	6 00	9 80
	case of per 100 sq. ft.	
26 to 40"	7 45	12 20
41 to 50	8 10	13 30
51 to 60	8 45	13 80
61 to 70	8 80	14 40
71 to 80	9 30	15 15
81 to 85	10 85	17 56
86 to 90	11 40	18 50
91 to 95		20 65
96 to 100"		22 35

Cut lights unchanged at 75% off list.

STRONG SPECULATIVE TONE IN TURPENTINE MARKET

London, Ont.

Although turpentine quotations continue to show strength, the price of $1.40 per gallon in one barrel lots, represents the average of the quotations now appearing on the domestic markets.

TURPENTINE—	Imp. Gal.
1 bl. lots	1 40
2 to 4 bbl. lots	1 39
5 gal. lots	1 55

NEW PRICE LEVELS NOTED ON BRASS BUTTS

London, Ont.

Revised price levels which are approximately 10 per cent. lower than formerly are now quoted on narrow, middle and desk brass butts. New quotations are at list, plus 10 per cent.

LOWER PRICES ANNOUNCED ON LEATHER SOLES

London, Ont.

A reduction in prices on leather soles in "X" quality to the extent of approximately 15 per cent. has now been announced. Following are some of the revised quotations:

LEATHER SOLES

Assorted Sizes.	doz. Pair.
31½ Boys	2 20
37½ Ladies	1 75
43½ Misses	1 40
121 Men's	3 10
122 Men's	2 95
123 Men's	2 80
122 all size 11	3 25
121 all size 11	3 40

REVISED PRICES ON COIL DOOR SPRINGS

London

A reduction of approximately 10 per cent. has been announced in prices on the line of Perfect coil door springs. Revised prices follow:

DOOR SPRINGS

No. 2—55c. doz.; No. 3—60c. doz. No. 4—65c. doz.; No. 5—70c.

NEW DISCOUNTS RECORDED ON GILMORE AUGERS

London, Ont.

As covered by market reports contained in a previous issue of Hardware and Metal, revised quotations have been announced on the Gilmore line of bits. These are now quoted as follows:

GILMORE BITS

Special auger bits, List less 37½ per cent.
Gilmore auger bits, List less 20 per cent.
Gilmore car bits, list less 10 per cent.
Boring machine augers, net list.
Gilmore eye augers, net list.

TACK HAMMERS NOW REDUCED IN PRICE

London, Ont.

Tack hammers are also reduced in price, in conjunction with easier quotations recently announced on hammers and similar products. Revised levels on Sargent No. 9, are $3.00 per dozen, and on No. 12. $1.85 doz.

NET PRICES ON DOG AND HALTER CHAINS

London, Ont.

Recent new quotations on dog and halter chains show a reduction of practically ten per cent. from the former levels. Following are some of the revised net prices:

HALTER CHAINS

	Doz.
7 x 6 ft.	3 35
6 x 6 ft.	3 35
5 x 6 ft.	3 70
4 x 6 ft.	4 15
2 x 6 ft.	4 95
1 x 6 ft.	5 35
1-0 x 6	5 90
2-0 x 6	7 00
1 0 x 4½	4 80
2-0 x 4½	5 60
3-0 x 4½	5 95

REDUCED QUOTATIONS ON GEM LINE OF FOOD CHOPPERS

London, Ont.

Lower prices are now in effect on the Gem line of food choppers. These revised prices are given as follows:

GEM FOOD CHOPPERS

No. 20—$21.25 doz. No. 22—$25.35 doz. No. 24—$33.50 doz.

SUBSTANTIAL REDUCTIONS IN AXE QUOTATIONS

London, Ont.

A considerable reduction has been announced by the manufacturers in prices on axes of practically all kinds. Following are the new base prices on some of the standard sizes.

AXES

Cherokee	13 00 doz.
Welland Vale Special	12 50 doz.
Black Prince	13 00 doz.
Hand Made	13 00 doz.
Uncle Sam	11 50 doz.
Keystone	10 00 doz.

With usual extras for heavier axes.

EXTENSIVE BOOST IN LINSEED OIL PRICES

London, Ont.

The sudden increase of a further 10 per cent. per gallon in the price of linseed oil provides the sensation of the current markets. This spurt is attributed to an improved demand for oil at this season of the year, coupled with a remarkable jump in flax seed prices.

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls., per gal.	1 15	1 18
3 to 5 bbls., per gal.	1 14	1 17
6 to 9 bbls., per gal.	1 12	1 15

Less barrels, add 15 cents gal.

FURTHER REVISION IN WOOD SCREW DISCOUNTS

London, Ont.

Another reduction in wood screw quotations has been announced. This change entails increasing the discounts 2½ points on all styles, thus recording an average reduction of 10 per cent. Following are the revised discount levels:

WOOD SCREWS

	Per cent. off list.
Flat Head Bright	85
Oval Head Bright	82½
Round Head Bright	82½
Flat Head Brass	80
Oval Head Brass	77½
Round Head Brass	77½
Flat Head Bronze	75
Oval Head Bronze	72½
Round Head Bronze	72½

F. o. b. Hamilton, Toronto and Montreal with freight equalized thereon.

MODERATE SALES FOR SINGLE SHOT RIFLES

London, Ont.

There is considered to be a fair sale at present for single shot rifles. Following are the prevailing quotations on one line of these products:

SINGLE SHOT RIFLES—

Little Scout, No. 14½ x 22 cal., each	$6 20
Crack Shot, No. 26 x 22 cal.	7 90
Do., 32 cal.	7 90
Marksman, No. 12 x 22 cal.	10 00
Do., 25 cal.	10 00
Do., 32 cal.	10 00
Favorite, No. 17 x 22 cal.	11 80
Do., 25 cal.	11 30
Do., 32 cal.	11 30

FLOOR MOPS RECORD POPULAR DEMAND

London, Ont.

Dealers report that floor mops, both the Liquid Veneer and O-Cedar models, are included among the list of goods now selling well. Prices on these lines are as follows:

MOPS—

O-Cedar—No. 1, $16 doz.; 3, $16; 5, $16; 14, $16; 15, $10. Complete with handles.
Liquid Veneer—(Complete with handles) regular size, $16; junior, $14.

BRISK SALE REPORTED FOR LOADED SHELLS

London, Ont.

There is reported to be a good sale at present for loaded shells at the recent new lower prices. Following are net quotations on some of the popular lines:

DOMINION SHELLS:—Crown, 16 ga., $3.76 per 100; 12 ga. $3.83 per 100; Sovereign, 1 ga. $4.02; 12 ga., $4.68; Regal, 16 ga., $4.02; 12 ga. $4.68; Canuck, 12 ga., $4.97.

SEASONAL DEMAND FOR AUTO TIRE CHAINS

London, Ont.

Automobile tire chains are enjoying a moderately good sale at present. Unchanged prices prevail, the average quotation on these products being list less 25 per cent., and for lots of twelve pair in one shipment, a discount of 33 1/3 per cent. is quoted.

Winnipeg Markets

WINNIPEG, February 23.—Prices on hardware commodities continue on the downward grade. This tendency is evident in cotton products such as clothes lines, cotton rope and sash cord. Easier quotations have also been recorded on galvanized wire clothes lines, coal picks and halter chains. An additional advance is noted on linseed oil, with a firm tone in both seed and oil markets. Business is generally reported as a trifle better this week, with a more optimistic attitude now being adopted regarding the outlook for future trade expansion.

EASIER PRICE LEVELS APPEAR ON COAL PICKS

Winnipeg.

Among the reductions recorded this week are easier prices on coal picks. The revised quotations on these products are as follows.

COAL PICKS

2 lb.—$6.15 per doz.; 2* lb.—$6.75 per doz.; 3 lb.—$7.40 per doz.; 3½—$8.00 per doz.

PRICE DECLINE NOTED ON HALTER CHAINS

Winnipeg.

Electric weld galvanized halter chains are now quoted with revised easier price levels. The reduced quotations are as follows:

HALTER CHAINS

4½ feet. 3-0—$3.75 doz.; 2-0 $3.25 doz.; 1-0 $2.90 doz.; 1 $2.75 doz.; 2 $2.40 doz.
6 ft.—2-0—$4.20 doz.; 1-0 $3.75 doz. 1 $3.25 doz.; 2 $2.85 doz.

HIGH LEVELS MAINTAINED IN TURPENTINE PRICE

Winnipeg

Turpentine quotations still remain at the recently revised levels, with few developments having been recorded. The current price is $1.55 per gallon in barrel lots.

REDUCTION RECORDED IN SASH CORD PRICES

Winnipeg.

The easier tone in raw cotton markets has reflected on sash cord, and the various sizes are now quoted at lower prices. Following are the revised quotations:

SASH CORD

IN HANKS:—
No. 6—58c. per lb.; No. 7—57c. lb.; No. 8—5c. lb.; No. 9—56c. lb.
IN COILS:—
No. 8—56c. lb.; No. 10—56c. lb.; No. 12—56c. per lb.

LOWER QUOTATIONS ON WIRE CLOTHES LINE

Winnipeg.

A revision has been announced on galvanized wire clothes lines, and these products are now quoted at lower price levels. Following are the new quotations.

WIRE CLOTHES LINES

50 x 19—$3.70 doz.; 100 x 19—$.50 doz.; 150 x 19—$9.60 doz.

DOWNWARD REVISION IN COTTON CLOTHES LINE

Winnipeg

In keeping with the easier tone in the raw cotton markets, cotton clothes lines are quoted at lower prices. Following are the revised levels:

48 ft. .....$3.46 per dozen
60 ft. .....$4.32 per dozen

COTTON ROPE ALSO RECORDS LOWER PRICES

Winnipeg

The easier tone in the raw cotton markets has also affected cotton rope prices. Sizes 3-16 in. is now quoted at 48 cents per pound, and ¼ in. and upwards at 46 cents per pound.

ANOTHER ADVANCE IN LINSEED OIL PRICES

Winnipeg

Another substantial advance is made in the price of linseed oil, and a very firm tone is evident in both seed and oil markets. Revised quotations are $1.20 per gal. for raw and $1.23 for boiled in barrel lots.

LITTLE DEMAND NOTED IN SHEET MARKETS

Winnipeg.

Business in the sheet markets is still quiet, but there exists an optimistic feeling among jobbers regarding the future business. Stocks are fairly low but sufficient to take care of the small demand such as exists. Quotations are unchanged as follows:

STEEL SHEETS, BLACK—	
10 gauge	5 70
12 gauge	5 70
14 gauge	5 80
16 gauge	5 90
18-20 gauge	6 30

26 gauge	6 40
28 gauge	6 65
IRON GALVANIZED—	
Premier; Apollo and "Fleur de Lis"	
10¾ oz. or 28 Eng.	8 20
28 Am. or 26 Eng.	7 80
26 Am. or 24 Eng.	7 20
24	7 05
22	7 05
18 and 20	6 90
16	6 75

Hamilton Markets

HAMILTON, Ont. — A marked stimulation in the volume of inquiry has been one of the features of the recent business trend. In the steel industry, this additional interest is noticeably supported by an increase in orders for various products, which has in turn resulted in encouraging a more optimistic outlook. The general situation finds producers looking keenly forward to an early resumption of broader operation in both sales and shipping departments, coupled w a corresponding expansion in demand as the season progresses. One element in recent inquiries is the fact that certain manufacturing consumers are showing a marked interest in the raw material markets, and are therefore expected to contract for future supplies at a not far distant date.

Special attention is given this week to the more or less persistent reports from the United States of reductions on wire products, such as plain wire and wire nails. With reference to this situation, a prominent local manufacturer stated to Hardware and Metal that this condition is being watched very closely, but outside of some slight price shading between the Independent mills and the Steel Corporation, no further marked revisions have materialized. The changes which have been made, were mainly of a slight nature, not being of sufficient extent to affect the domestic quotations. It is further recorded that there has been some improvement in the domestic demand for wire products, which is generally attributed to better conditions which usually apply in the springtime.

Recent reports from American steel centres indicate a brisk ratio of output, especially for this period of the year, with several interests recording a production of approximately fifty per cent. of capacity. Domestic producers are more confined in this respect, a factor which is principally due to the more restricted field of operations.

The scrap material markets are on an easier tendency, with present trade described as extremely moderate.

Construction activity during 1922, is expected to reflect considerable amount of improvement in business along general lines. Materials used in building have recorded fairly substantial reductions from last season's price levels, thus placing this phase of the situation upon a more equitable basis in keeping with replacement values. This development has also been one of the factors contributing towards ambitious building programs in general, and has constituted an element of encouragement toward greater current construction activity in particular. Manufacturers and distributors of the numerous materials required in home erection, repairs and alterations, are adding incentive to this movement by brisk advertising campaigns coupled with renewed sales effort.

Spring trade is approaching with carefully measured progress. While current orders are small, yet they are almost uniformly reported to be more numerous during the last week or two. Merchants are now busy preparing for the spring season's requirements, and although the cautious attitude still governs the commitments of the buyer, a satisfactory volume of trade is confidently expected in general. The feeling also prevails that the carry-over from last year's stock is probably the smallest on record at least, of very moderate proportions. Fresh purchases are therefore required in order to replenish empty shelves and satisfy prevailing needs in seasonable lines. The minor quantities noted in current purchsing, therefore, are also considered as covering immediate or early requirements only, and further additional repeat orders are looked for in the future.

Pittsburg Markets

PITTSBURG.—Steel ingot production underwent a sharp increase last week, as it can be estimated on the basis of trustworthy reports that the rate was 28,000,000 gross tons a year. This is well above the highest rate attained last autumn and shows a sharper increase than occurred in the earlier weeks of last year. Our report a week ago pointed out that production increased during January at a greater rate than had been suggested in the statements made public by the mills as to the condition of the market.

Steel Production.—Part of the most recent increases in steel production is in railroad material, not against fresh purchases, but against orders or contracts placed late in the old year, specifications against which have only lately reached the mills. This includes some rail business, being filled at the Edgar Thomson works, in the Pittsburg district, and in the Chicago district, also car material, being produced in the Chicago district, against freight car orders placed in November. Apart from this railroad business, the production of ingots is for speedy rolling into finished products, against orders booked from day to day for prompt shipment, and thus on the whole the rate of steel ingot production reflects closely the state of buying.

A general survey is of interest, to show the swing. The slump in production last spring and summer, when stocks of steel and of manufactures of steel were being liquidated, brought the ingot production rate down to 11,000,000 tons a year, in July. Then production mounted, and the rate was 23,000,000 tons a year in October and November, measuring the size of the autumn con-

Developing Women Paint Customers

Women Are Apt Pupils in the Art of Painting and Under Encouragement Have Developed Into Splendid Paint Customers According to Vancouver Hardware Merchant—Much Neglect of Properties Yet Evident—Sells Brushes at Every Opportunity

This Vancouver hardware merchant seldom sold paint to women before the war, but realizing the possibilities involved and by educational effort he has built up a profitable trade with housewives. Read how he has done it.

"BEFORE THE WAR," said B. McKay, salesman of the Fairview Hardware Company, Granville Street, Vancouver, "it was very infrequently that I sold a can of paint to a woman customer. She would buy floor wax, or polishing oil, or maybe some kind of material for cleaning wall paper, but when it came to buying paints, varnishes, enamels, etc., I always figured that the man of the house would choose that. And in most cases he did.

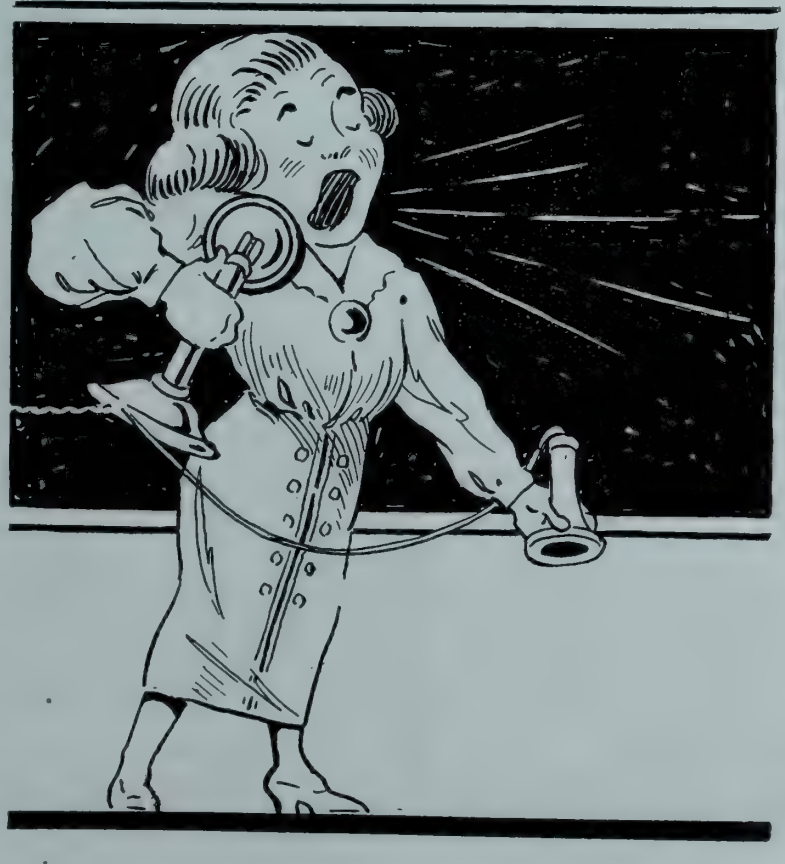
"The change now is remarkable. It is just as usual for a woman to buy paint now as it was unusual then. Seems like the women folks are left to do all that kind of thing now," said Mr. McKay.

"The women take a real intelligent interest in the paint, too," he continued. "They are interested in what is most suitable for the various purposes they have in mind. The knowledge that some women have of putting a finish on a floor, now, is quite remarkable. It is not at all unusual to have a young woman come in here and tell one of us that she is going to do the floor of her apartment over. She will scrape off all the old paint, dress down the wood till it's nice and smooth and proceed to put on the color she fancies. Then she will put on a couple of coats of varnish, and then wax and polish the floor and make a surprisingly good job of it.

Have Been Apt Pupils

"Much effort has been directed toward educating the women in the homes. It has been pictured to them the ease with which splendid jobs could be done and the women seem to have been apt pupils. We had a splendid paint business during 1921. I might say that we enjoyed the biggest paint business in our sixteen to seventeen years in this district. The fact that painting had been sadly neglected for four or five years, coupled with the fact that the paint manufacturers did helpful educational work with their Save the Surface campaign, made 1921 a good one for us. I fully expect that 1922 will be just as good if not better. There still remains a tremendous lot of painting to be done in and around Vancouver, and with aggressive work the hardwaremen should have another good year.

"We have sold a lot of enamels for renewing chairs, wickerwork, etc. This has started already for spring.



Always Sell a Brush Too

"When selling paints, enamels, and varnishes we always try to sell a good brush to apply it. It is always possible to volunteer a little information about how to apply the paint. We also tell each brush purchaser how to clean and care for the brush to get the longest service out of it. This does not apply to cheap brushes, of course, as there is not very long service in a cheap brush.

"One of the factors that has undoubtedly had something to do with the increased amount of interior painting done by both men and women is the fact that paints come ready mixed to do almost any kind of a job and do it well.

Buying Auto Enamels

"We have enjoyed splendid sales of auto enamel, too. One brand has gone particularly well. We were influenced in our choice by the preference of several of the garages which we serve who asked for ..... Brand. Many private car owners are buying these modern quick drying enamels. A car owner will start in on Saturday and give the old car a coat, when he is assured that it will be ready for use on Monday morning. Until these improved finishes were placed on the market, the car owner had to have an expert do it for him, as the number of operations necessary rather frightened them out of attempting to paint their own cars."

Being merely a district hardware business, the Fairview Hardware Company could not use the large city papers profitably. A local news sheet, covering the district quite thoroughly (free circulation) is used every week, and draws business.

Linseed Oil Price Attains New High Point

Health of Recent Rapid Rise at First Questionable, But Now Begins to Appear As a Natural Gain— Short Yield In Argentine and Growing Demand

MONTREAL.—An increase of 20 cents in the price of linseed oil during the past three weeks is sufficient development to cause all parties, from grower to consumer, to look with interest on this product. At this season of the year increasing demand would naturally assist toward a firm situation, but certainly not to the extent that has been displayed. For this reason the health of the rapid rise was questioned by those well informed, and speculation, not uncommon in the flax market, was criticized to no small extent. The advance has been in direct sympathy with the trend of seed quotations, which have shown a corresponding increase in the same number of weeks, and while certain manipulations of the market may still be responsible to a degree, there are certainly two strong factors upholding the present strength.

Short Argentine Yield and Growing Demand

The constantly advancing market in the past two weeks has made it exceedingly difficult to follow the trend with any degree of accuracy. This, the third week finds little or no abatement, prices fluctuating but still on the climb. Now covering a period of three weeks, the advance is looked upon by local crushers as more than a temporary spurt, or turn of a violent fluctuation. A growing demand plus the more general acceptance of the shortage in Argentine flaxseed as an actual fact, are factors that must be considered. The former might be termed a natural tendency during this month, and the months immediately following, but crop reports showing a short yield in the Argentine, which were passed with little concern at first, are now taken much more seriously. Yield estimates first reported 1,000,000 tons, then dropped to 700,000 and figures have been placed as low as 500,000 tons. It can readily be seen, then, that insofar as this field is concerned, a shortage will be felt.

Looking to Canada for Supplies

American crushers, immediately upon hearing of the Argentine shortage, began looking to the Canadian market for supplies, and it is recently reported that 1,000,000 bushels have been arranged for. This means a call of no mean proportions on the Canadian warehouses, leaving our domestic crushers with an outlook none too promising for future supplies.

While stocks locally are by no means heavy, there is sufficient seed on hand to take care of present demand, and enough to carry our home market into the active season. However, if an improvement is not in sight in outside markets before the season of heavy demands, fear may be well placed when looking to our home supplies.

Paint Trade Notes

BOOSTING FLOOR FINISH AND WAX

Kingston, Ont.—Lemon & Sons, hardware merchants, boosted their sale of floor finishes and wax this week, by having an expert give demonstrations at the store. Special advertising was carried in the local newspapers, and as a result a large number of interested citizens visited the store, got first-hand information and at the same time had the opportunity of seeing how to do the work. They secured some timely tips on how to finish floors, furniture, and woodwork.

OTTAWA REPRESENTATIVE McARTHUR-IRWIN CO.

T. A. Marier, for many years merchandising manager of Bryson-Graham Limited, departmental store, in Ottawa, has been appointed Ottawa representative of the McArthur-Irwin Co., of Montreal, manufacturers of paints, varnishes and chemical products, and has entered upon his new duties. Mr. Marier was recently tendered a hearty farewell by the heads and employees of the Bryson-Graham store, all of whom spoke in highest terms of his progressiveness and pleasing personality.

R. W. LINDSAY MADE SALES MANAGER OF PRATT & LAMBERT INC.

R. W. Lindsay, for the past four years manager of Industrial Sales, Pratt & Lambert, Inc., has been made sales manager. In the future, he will continue in charge of industrial sales and take on added duties in trade sales work, being located, as formerly, at Buffalo, headquarters of the company.

IMPERIAL VARNISH AND COLOR DISTRIBUTORS HOLD DINNER

Some members of the staff of the Imperial Varnish and Color Co., Toronto, along with certain of the city retail distributors of this company's products, gathered for dinner at the Carls Rite Hotel, on Wednesday evening to discuss future business and possibilities. About forty were in attendance, the number being fewer than were expected due to the bad storms prevailing which tied up street car traffic. The evening's program was both enjoyable and helpful.

C. C. Craig of the C. C. Craig Co., Ltd. hardware brokers, Winnipeg, is on an extended business trip calling on the jobbing centres in western Canada.

WORLD'S RECORD IN REVOLVER SHOOTING

A new World's Record in revolver shooting was recently made at Regina, when Inspector Sandys Wunch of the Royal Canadian Mounted Police made 198 out of a possible 200 at 20 yards with his .45 calibre service revolver. Wunch's record is perhaps all the more remarkable and interesting to shooters and those who handle arms and ammunition because of the fact that he was using a revolver equipped with service sights and lacking in that fine equipment so common among target shooters. Dominion .45 cartridges were used and the first 19 shots were bullseyes, the 20th slipping into the 8-ring. The shooting was for record and was done in the presence of the Commanding Officer and three witnesses and the four standard targets used are fully certified. The previous world's record for 20 shots at 20 yards was 191 out of 200.

During the past year several new records have been hung up by Canadian shooters. Among the most notable is that of H. W. Cooey, who, on all registered amateur trap shooting targets shot during 1921 led with a percentage of .9635. Mr. Cooey's shooting was all done with Canuck Shot Shells.

COMPETITION

By Fred Empringham, Ontario Traveller for The Canada Paint Co., Ltd.

Jack Jones was cutting prices,
With diligence and vim,
But just around the corner,
Tom Smith was cutting him.

An old plow pusher cautious
Would say to Jack, "Now boss
I want to get your bottom price
To shoe the big grey hoss.

So, to that wise loam shifter,
He quotes a price so low,
That the old one scents price cutting.
And his spirits sorta glow,
Ses he, "Your price is crazy,
To shoe my old mare boss.
I guess around the corner.
They shoe for 10c. less."

Poor Jack sees one dime drifting
From a life of sweat and flame
His soul aghast, he yells out,
"Come back I'll take the same."

That's the blacksmiths road to ruin
And a moral stands quite plain,
For a farmer round the corner
Had worked Tom just the same.

When a man cuts his price
He only cuts his throat,
He'll damage trade for a little while,
But the square deal Smith will only smile,
For the other Guy's the Goat.
—EMPIE.

CREDIT

By Fred Empringham, Traveller for The Canada Paint Co., Ltd.

Don't ask for Credit while in here,
I wish to have this fact made clear,
For "Credit" will not keep my stock
Nor pay my rent, or buy a block.

And after you've received my gold,
Your friendship turns from warmth to cold,
And one by one you stay away,
Because you have a Bill to pay.

Weekly Paint Markets

Montreal

MONTREAL, February 23.—Although quotations locally on linseed oil are unchanged at the time of going to press, the market is still in a strong position with revised prices not unlikely at any time. The market levels are exceedingly hard to follow, revisions being announced almost from day to day. Flax seed continues very firm, although the rise in the market is not as rapid as last week, and fluctuations are now apparent. The trend, however, is still in an upward direction owing to reports of estimates on Argentine crops, indicating a shortage of this yield. Figures, in fact, now place the total yield lower than at first reported. Turpentine prices are also unchanged on the local market this week, but the position of the product in Southern circles is still firm, with demand gradually improving. A price of 5 cents lower than given in report this week is quoted in some quarters, but it is pointed out that existing levels in the South do not warrant these lower quotations and a revision upwards is not unlikely when present stocks become exhausted.

Shellac prices record a slight reduction in some quarters, while other firms are maintaining former higher levels. The market is by no means easier, outside centres reporting a firmer tone recently with demand improving. White lead and oil and putty are unchanged and sales expected to show an improvement with the approach of the active spring season. The same can be said of paint, varnishes and allied products. With quotations on all lines now on a settled basis, the season will commence in earnest within the next few weeks.

LINSEED OIL MARKETS MAINTAIN HIGHER LEVELS

Montreal.

The following quotations on linseed oil can only be termed the average level on this product. The market is exceedingly difficult to follow with accuracy at present, and a variation of 7 cents per gallon exists among local distributors. Prices are again increased this week in some quarters, while other firms are quoting unchanged figures, which are slightly lower than those given below.

Daily fluctuations continue to feature the seed market, with the trend still in an upward direction. The rise, however, during the past week has not been of such a rapid nature as was evident in the week previous. It is for this reason that local crushers are now in the belief that the recent gain is more natural than was at first anticipated. Flax seed for some time past has shown fluctuations, and the first indication of an advancing market was then looked upon as another turn of a fluctuating market. However, it is now said to be past that stage, and two factors, a growing demand and short Argentine yield, are really behind the present upward movement. Speculation was also charged as being responsible in the earlier stages of the present advance, but it is now felt that something more substantial is backing the steady gain.

From recent reports there is little improvement in the Argentine situation. In fact, crop estimates now place the yield at lower figures than was at first reported. It is now generally accepted that the total crop will be very disappointing with every likelihood that a shortage, reaching considerable proportions, will be felt at a later date. Following are average quotations:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal	1 08	1 10
3 to 5 barrel lots, per gal...	1 06	1 08
Less barrels, add 10 cents per gallon.		

EASIER QUOTATIONS NOW APPEAR ON SHELLAC

Shellac prices locally record a slight reduction this week, orange shellac being reduced 15 cents per gallon in both barrels and one gallon jugs, while white shellac in 5 gallon jugs is reduced 40 cents per gallon and in one gallon jugs 20 cents per gallon. It might be well to point out, however, that the undertone of the market has not weakened and these reductions are only made by some firms, while others again are maintaining former higher quotations. Reports from outside primary markets indicate that from the present outlook, prices of shellac are on an upward turn because of the advance in Sterling and the firmer situation in Calcutta. Much of course depends on demand and this will likely increase in the months following.

SHELLAC—	
Orange shellac, in barrels	4 00
Do., in one gal. jugs	4 30
White, in 5 gal. jugs	4 50
Do., in one gal. jugs	4 80

TURPENTINE PRICE UNCHANGED MARKET CONTINUES FIRM

Montreal.

Average current quotations on turpentine are this week unchanged, although on this product also there is a price variation existing among the various distributors. The situation on turpentine seems to be that while Southern markets continue to display a firm situation, local dealers do not seem disposed to follow quotations at outside centres until their stocks become depleted necessitating further purchases. The present levels at Naval stores in the South warrant somewhat higher prices than are quoted locally in some quarters, and if the market remains firm, there is every likelihood of prices advancing with dealers who are now quoting from cheaper stocks still on hand.

Fluctuations now feature the markets at primary centres, and during the week easier quotations developed, followed, however, by an improved demand, when prices again recovered to former levels. Supplies are still none too ample, producers only offering what is required for present demands. It is pointed out by local distributors that until more supplies are available, which will in all likelihood be at time of new crops, prices will in all probability remain quite firm. Following are average local quotations:

TURPENTINE—	Imp. gal.
1 barrel lots	1 32
2 to 4 barrel lots, per gal.	1 30
Broken lots	1 42

STEADY MARKET ON WHITE LEAD AND PUTTY

Montreal.

No further change is recorded in the market for white lead in oil and putty since the revision in smaller cans announced last week. The undertone of the market remains fairly steady although raw materials, especially linseed oil, is now much stronger in tone, thus furnishing a firmer standing for both of the above products. Following are revised quotations on putty, while white lead and oil is still quoted at $12.00 in 5 ton lots, $12.75 in 1 ton lots, and $13.10 in less quantities.

Standard, per 100 lbs.	5-ton lots	1-ton lots.	Less
Bulk drums, 100 lbs.....	5 00	5 50	5 75
Bulk drums, 100 lbs.	5 00	5 50	5 75
Do., or tins, loose, 25 lbs.	5 25	5 75	6 00
Drums or tins, cased, 25 lb.	6 00	6 50	6 75
5 lb. tins	9 25	9 75	10 00
1-lb. tins	11 25	11 75	12 00

Pure Linseed Oil Putty, $1.50 per 100 lbs. ad-

Toronto

TORONTO, February 23.—Slightly easier tones in both the linseed oil and turpentine markets and an increase in window glass prices, provide the most notable features of the current paint market reports. Fluctuations in flax seed prices are given as the primary cause for the tendency to relax in the tone of the oil markets, but whether this development is of a

PAINT MARKETS

Continued from page 50

temporary nature only and future firmness will be recorded is indeed difficult to determine. Recent reports indicate that the yield per acre in Argentine flax seed is distinctly disappointing, and estimates covering the surplus available for export have shrunk several million bushels. This resulted in northwestern markets advancing seed prices rapidly, and the premium placed on Canadian flax seed has been primarily reflected in oil quotations during recent weeks. Some indications of speculation were considered as contributory factors in this movement when the upward trend commenced, but later developments have maintained the recent gains. Reports that English and Dutch linseed oil has been offered in southern centres at prices below the domestic product, have caused a number of market observers to look for a reaction in quotations during the near future. The general inquiry for forward delivery is stated to be a little better, with current business along conservative lines. Linoleum and paint manufacturers, as well as some other large consumers, are said to be waiting developments in this direction. Present stocks of linseed oil, however, are not large, and with the Spring paint season, now approaching, crushers anticipate heavier demands of a general nature.

QUIETNESS IN SHELLAC BRINGS UNSTEADY PRICE

Toronto

Prices on shellac remain nominally unchanged on the local markets, although some easier price levels are recorded in certain quarters. Gum shellac quotations are still firm, and the current situation indicates a moderate demand for this product, rather than a weakness in the primary tone. The Calcutta market is strong at present, and this factor is expected to enter into future prices. An improvement in the demand generally is also looked for in the near future. Following are the average local quotations:

	Pure White Per	Pure Orange Gal.
In bbls.	4 65	4 15
Gal. jugs	5 00	4 50

NEW HIGHER PRICE LIST ON WINDOW GLASS

Toronto.

A revised list price on window glass recording slightly higher levels has now appeared on the local markets. The new quotations show an advance of 50 cents per case, on the smaller lights of single diamond, and 75 cents per case on double diamond. In the larger sizes of the latter quality glass, however, quotations are nominally unchanged.

The reason for the increase is attributed to the continued firmness in the Belgian glass markets, which importers and distributors in domestic circles state has resulted in the margin between costs and selling prices gradually shrinking for some time past. The present increase is described as moderate in view of existing circumstances. The primary glass markets have recorded a firm tone for some weeks, as outlined in previous reports contained in Hardware and Metal. The volume of Spring booking for window glass is described as good, and current orders are fair for this season of the year. The fact that an extensive building program is anticipated throughout the country in general, is expected to be reflected in a brisk demand for window glass. The revised price list follows:

GLASS—Window.

	Star or Single Diamond 16 oz.	Double Diamond 24 oz.
CASE LOTS:—		
Up to 25 ins.	6 00	9 80
26 to 40 ins.	7 45	12 20
41 to 50 ins.	8 10	13 30
51 to 60 ins	8 45	13 80
61 to 70 ins. N	8 80	14 40
71 to 80 ins.	9 30	15 15
81 to 85 ins.	10 85	17 65
86 to 90 ins.	11 40	18 50
91 to 95 ins.		20 65
96 to 100 ins.		22 35
101 to 105 ins.		25 05
100 to 110 ins.		27 80

FLUCTUATIONS IN SEED PRICE RESULT IN OIL QUOTATIONS VARYING

Toronto.

Fluctuations on the flax seed markets render prices an erratic problem from day to day. Seed levels have now receded slightly from the higher mark recorded during the recent sudden spurt. Of what duration these easier flax seed prices will be, however, is practically impossible to determine owing to southern contributory causes. Another upward movement may be revived during the next few days. The current situation, therefore, provides a variety of prices on linseed oil. The levels noted last week of $1.15 for raw, and $1.18 for boiled in barrel lots have been shaded by approximate prices during the week owing to the prevailing seed market conditions. The firm undertone to linseed oil and the recent rise in quotations is attributed to the growing demand for both oil and flax seed, coupled with more recent reports covering the Argentine crops which place the southern yield on a lower basis than at first estimated. Following are domestic quotations on oil including the average spread noted in local reports.

LINSEED OIL—

	Per Gallon Raw		Boiled	
1 to 2 barrel lots	1 11	1 15	1 12	1 18
3 to 4 barrel lots	1 10	1 14	1 11	1 17
6 to 9 barrel lots	1 08	1 12	1 09	1 15

Less barrels, add 15 cents per gallon.

SLIGHTLY EASIER TONE NOTED IN TURPENTINE

Toronto

The turpentine markets record a slightly easier tone this week, but local quotations are again showing a range. Due to the lack of demand, prices at southern distributing centres eased slightly, but were again firming up a few days later as the current requirements of consumers became evident.

Foreign demand for turpentine is also very light, and large dealers at Savannah are reported to have shown a disposition to underbid the nominal prevailing market level. The fresh supplies are described as very meagre, with producers marketing from their stocks of tanked turpentine as the buying movement indicates. Conditions now seem to favor a fairly steady market tone, without any marked revisions in price, at least until the new crop appears in a couple of months.

Meanwhile, an interesting situation has developed as regards prices on the domestic markets. Distributors holding stocks of turpentine purchased at slightly easier levels are offering such supplies at around $1.34 per gallon. Between this price, and $1.40, represents the spread in quotations recorded locally this week.

U. F. O. BUYS BINDER TWINE FROM IRELAND

(Continued from page 27.)

pared with American prices, and by the quotations which will shortly be made by American producers, but the figures quoted will give some idea of the extent of the order which the U.F.O. have sent to Ireland for binder twine.

It is, therefore, obvious that the twine with which the hardware trade will have to compete this year is Belfast twine, thus creating a different situation from last year when both the dealer and the U.F.O. dealt in practically the same line of goods even though the tags may have shown different brand names. It is rumored that the order was placed on a basis whereby the U.F.O. will secure a price of ¾c. to 1c. lower than the prices named by the U.S. and Canadian makers. Whether or not the U.F.O. customers will buy their twine at a lower price than that of the distributors of U.S. and Canadian twine remains to be seen.

PITTSBURG MARKETS

Continued from page 46

sumption, as stocks were then fairly well liquidated. Early winter brought a recession, and the rate the last week in December was under 18,000,000 tons. Now the rate is up to 28,000,000 tons, showing a very sharp increase in seven weeks, and a 20 per cent. gain over the rate of last autumn.

The full force of the spring demand is of course not felt as yet, and thus the prospect is that production will reach still higher rates in the next couple of months. Presumably there will be a tapering off towards summer, but there is no reason apparent for demand not showing a still higher tide next autumn, for fundamental conditions are improving continually and perhaps no more slowly than one should expect.

Requirements Widespread.—Demand for steel is widespread, almost universal. No consuming line is conspicuous for the size of its demand, and no line is conspicuous by its absence from the market, excepting alone the agricultural implement trade.

The outward mark, or stencil, of Fire Boiled

"Guaranteed Fire Boiled Linseed Oil"

—You don't need to say all that

—just say

Baden Boiled

When you say that word, Baden-Boiled, it indicates, to men familiar with linseed oil, that you want Fire-boiled or kettle-boiled oil. They know that in saying Baden-boiled you are merely saving words. They know that Baden-boiled is merely the short way of saying, "the best of fire-boiled or kettle-boiled linseed oil, the oil that has been the standard of comparison since 1864."

The Premium on "Baden Boiled" over Raw is three cents while the Premium on "Steam-Boiled" is only one cent.

The Dominion Linseed Oil Company

Baden Toronto Montreal Winnipeg

PILKINGTON
BROTHERS LIMITED

We manufacture GLASS for all purposes, including:—

Polished Plate—For store fronts, high-class buildings and homes, automobile windshields, wind deflectors and visors, show cases, shelves, bureau and table tops, etc.

Polished Wired—A transparent fire retardent, for elevator doors, light wells, and all places where fire-resisting qualities with a high percentage of light and transparency are required.

Mirrors—Plain and bevelled—for furniture, store fixtures, etc.

Window Glass—Manufactured at our factory, Thorold, Ont., for all general purposes where a good clear glass is required at low price.

Wired Rolled and Cast—¼ inch thick. A highly efficient fire-resisting glass for factory windows, skylights, etc.

Rolled and Cast—⅛ inch to ⅜ inch. A substitute for Wired Rolled and Cast, but without the fire-resisting qualities of the latter.

Prismatic—For transmitting light into dark interiors. Particularly suitable for store front transoms, the rays of natural light being diverted to the inner parts of store.

Cathedral—White and tinted, for leaded lights, church windows, etc. Clear white Cathedral is also an artistic semi-opaque glass for doors, screens, etc.

Figured—White and tinted and of various patterns, for screens, partitions and doors in office and other buildings, bathroom windows, vestibule doors, etc., or wherever an opaque glass with good lighting qualities is desired.

Muffled, Fluted, Enameled—Used for the same purposes as Figured Rolled Glass, but in cases where a prominent raised pattern is not desired.

Washboard Glass—For making washboards. Highly regarded for cleanliness, and, of course, rust proof.

Patent Corrugated—For working in with standard corrugated iron in walls and roofs of buildings.

Glass Battery Cells—For storage batteries. Glass is immutable and therefore does not deteriorate, so that with ordinary usage a glass cell will last forever. Also with glass cells the elements can be seen without removing the lid, thus saving a lot of labor and eliminating an important cause of breakage. These cells are now being used by many railroad companies in Europe for train lighting systems.

CHURCH'S COLD WATER
Alabastine

1922 ADVERTISING

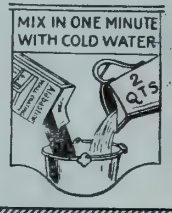
During this year the Alabastine Co. Paris Limited have planned, prepared and are just about to start one of the most comprehensive advertising campaigns in the history of this company. Attractive advertisements with strong selling copy have been prepared and scheduled to appear consistently throughout the year in the leading papers in Canada. These advertisements tie up strongly with our window displays and sign posters and as well with magazine advertising appearing in the big American publications.

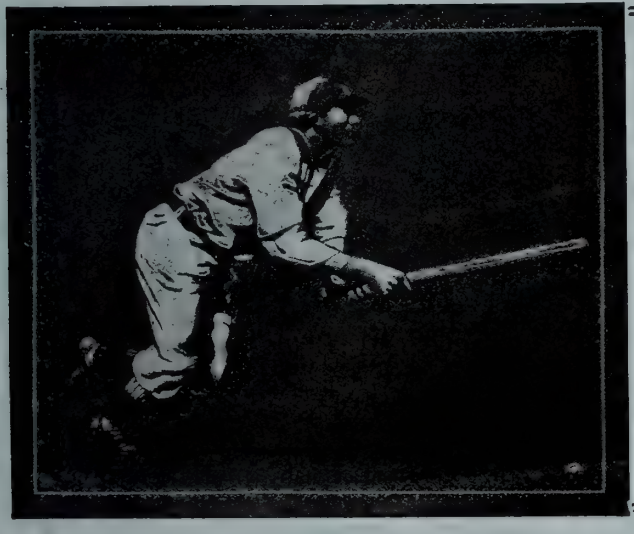
The retail price is

Full size packages 75 cents
Half size packages 40 cents

The Alabastine Company, Paris, Limited

Paris, Ont. Winnipeg, Man.



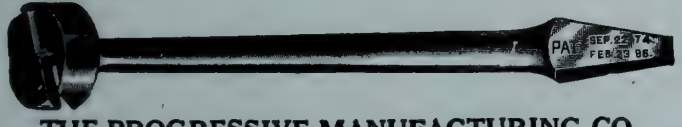


---and made a hit!

Merchants find these excellent bats make a hit with their baseball customers and sell out early in the season. These bats are made from clear, straight-grained ash. They are shaped and finished to suit the most critical "fan" that ever came to bat.

Send for new price list just issued.

St. Marys Wood Specialty Co.,
Limited
St. Marys Ontario



THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U. S. A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. **THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE.** That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Subscription price of HARDWARE and METAL is $4.00 per year or less than eight cents per issue.

CURRENT MARKET QUOTATIONS

These prices are for such quantities as are usually ordered by retail dealers. Large buyers can frequently make purchases at better prices.

Barrett Roofings, Cements Industrial Paints etc.

THIS will be a big year for Barrett Roof-Repair Specialties. For most people are trying to save money. They're not going to buy new roofing if they can patch the old roofs and make them last another year.

That's one reason why the two Barrett products described below are going to be such fast sellers—they're the greatest materials on the market for making old roofs last longer.

Another reason they're going to sell fast is because our advertising campaign will remind them of Barrett products when they are thinking of repairing their roofs.

Everlastic Liquid Roofing Cement

One coat of Everlastic Liquid Roofing Cement makes old prepared and "rubber" roofings almost as good as new. It forms a smooth, tough, durable surface that adds years of extra service.

Mention this to your customers. They'll thank you for the money-saving suggestion. Everlastic Liquid Roofing Cement is easy to apply and comes all ready for use in packages ranging from 1-pint tins to 40-gallon barrels and steel drums containing 43 gallons.

Anyone can apply it

Plastic Elastigum Patching Cement

No wonder this famous Barrett product is called "the plastic cement of a thousand uses!" Patching leaks and holes in all kinds of roofs, repairing flashings, relining gutters and cisterns—these are a few of the uses for which it is unequalled. It's easy to apply and sticks to either a wet or dry surface. Don't be without a stock.

Relining a gutter with Plastic Elastigum

Sold in 1 lb. tins (24 to the case), 5-lb. packages (12 to the case), 25-lb. and 100-lb. packages, half barrels (about 300 lbs.) and barrels (about 600 lbs.)

Why "Owl" Roofing Dealers Make Big Profits

Because—

—Easy to Sell
—Widely Advertised
—Quality Proved
—Unusually Generous Margin of Profit

Owl Brand Roofing is a tremendous success because every roll fully substantiates its guarantee—no effort or expense is spared to give the soundest quality throughout. To handle Owl Roofing means "more profit," "more enthusiasm" and "more business." We make a good proposition to "Owl" dealers because we want the best—and we want their best **energy** and **push** behind "Owl" Roofing, so that this splendid product will be quickly made known at the time the public need it most. Owl Roofing is made from an all-rag felt, coated on both sides with pure asphalt stock—either side can be laid to the weather—Owl Roofing is fire resisting and free from taint in rain water—Owl Roofing is made 32 inches wide—108 sq. feet, nails, cement for seams, and instructions for laying with each roll.

TINKER TOM'S TALKS.

Talk No. 347

THE 7TH TIME

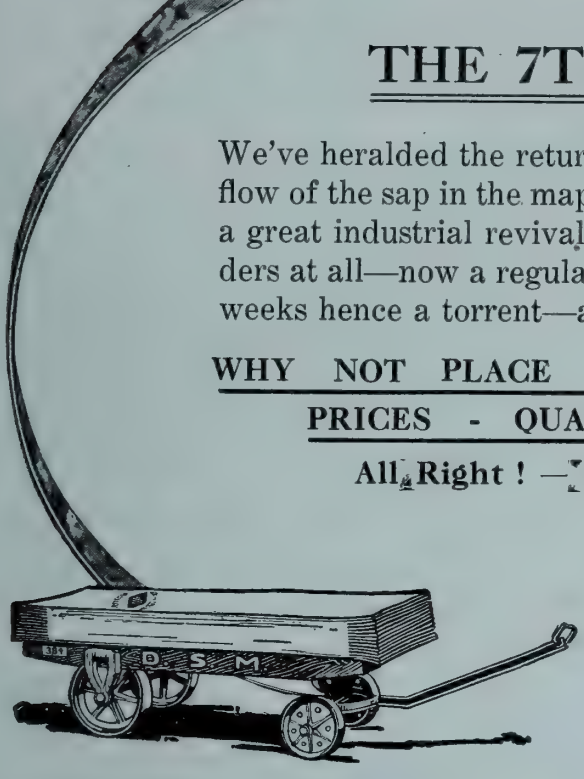
We've heralded the return of Robin Redbreast—the flow of the sap in the maples—and the awakening of a great industrial revival. A few weeks ago no orders at all—now a regular little stream daily—a few weeks hence a torrent—all wanting deliveries.

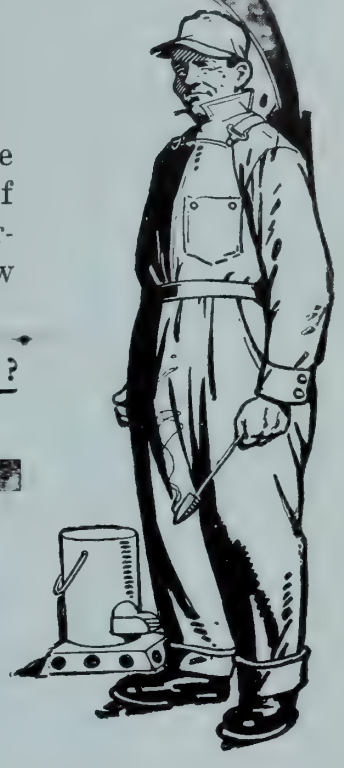
WHY NOT PLACE YOUR ORDER NOW ?

PRICES - QUALITY - SERVICE

All Right ! — Ask Your Jobber

TINKER TOM.



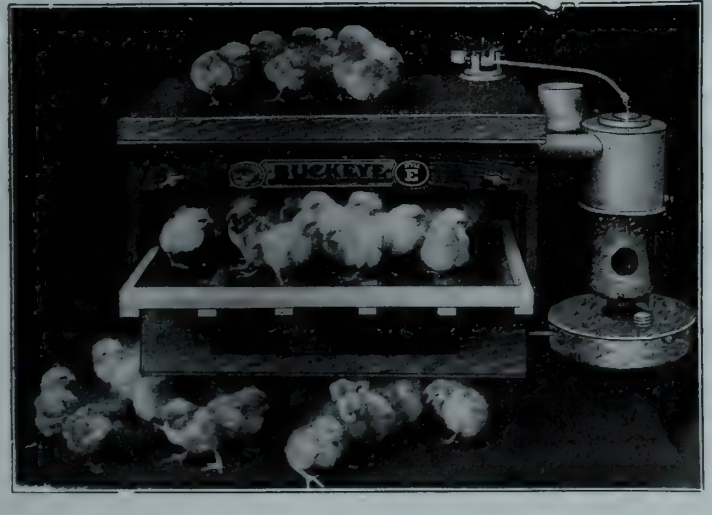


MADE IN PREMIER CANADA

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada



BUCKEYE Incubators and Brooders

are

Profitable lines for dealers to handle. Make them both friends and money.

Buckeye Incubators

Built to hatch the most chicks and the best chicks and sold at prices that are consistent with the cost of building.

Buckeye Brooders

Will raise three chicks where one grew before and raise them better. Simple and easy to operate. Just need attention once or twice a day.

A Post Card will bring You Catalog and Prices.

Why Hardware Mailing Lists Are Not Complete

WE ARE frequently asked why many of the so-called complete hardware mailing lists are incomplete and miss many hundreds of the best hardware stores in Canada. There is a reason.

If you take a complete list of the hardware firms rated in Dun's and Bradstreet's as hardware firms, you will be short upwards of 900 of the best hardware firms in Canada. This is due to the fact that upwards of 900 of the leading hardware stores in Canada, are the hardware sections of department or general stores. There is nothing in the commercial rating books to indicate which of the many thousands of department or general stores have hardware sections. For instance, in one Western Canada city there are four general stores and one exclusive hardware store. One of the general stores has a strictly modern hardware section. The only way in which you can find out which one of the four stores has this department, is to visit the town and call on all stores. The same condition exists in hundreds of other places in Canada. The cost of doing this for one mailing list or one publication would be absolutely prohibitive. The MacLean Publishing Company, however, have sixteen publications, and send crews of salaried circulation men into every city, town and hamlet in the Dominion from Coast to Coast. Representing sixteen publications these men call on practically every business man in a town or city. The MacLean Publishing Company has been working on this plan for upwards of 30 years. The result is that to-day HARDWARE AND METAL has as paid subscribers, in addition to exclusive hardware stores, upwards of 900 of these strictly modern, up-to-date hardware sections and very few of these names are on mailing lists, with the exception of the list used to mail out our paper.

Another important point is that on our mailing list several hundred copies go addressed personally to the men in charge of the buying. Circulars sent from the average mailing lists merely go to a firm name along with a large quantity of other circular matter and is somewhat of a hit or miss proposition. With HARDWARE AND METAL there are hundreds of cases where the name of the buyer also appears along with the company address.

Subscribers to HARDWARE AND METAL buy our paper because they

need it in their business and because they study it each week for news of the trade, new goods, market information and for additional information rgarding goods which the merchants are carrying in stock. Several hundred merchants prepare their advertising in their local papers, from information which they take out of the advertisements in HARDWARE AND METAL. Window trimmers in hardware stores study HARDWARE AND METAL for ideas on seasonable goods which they can display in the show windows. The men behind the counter are among the closest readers of HARDWARE AND METAL because in it they find a vast amount of information regarding goods which they are called upon to sell each day. Dozens of leading jobbers' salesmen carry copies of the current issue of HARDWARE AND METAL along with their catalogs and go through these issues with their customers. One of the leading wholesale buyers, (name on request), stated that he "much preferred to buy lines advertised in HARDWARE AND METAL because he found that these lines were the quickest sellers and were the lines in which the travellers took the greatest interest."

It is therefore of the utmost importance that any advertising matter you wish to place before the trade, should reach as many of these hardware men as possible. It is an easy matter to claim that you cover the whole hardware trade but HARDWARE AND METAL knows from thirty-three years' experience that it takes many years of honest, intelligent effort to get a complete list of the hardware buyers in Canada. A large staff is also required to keep lists up to date, record business changes, new firms, etc. We offer you the most complete list through the advertising pages of HARDWARE AND METAL.

The Thirty-fourth Annual Spring Buying and Directory Number will carry your message to the most complete hardware list in Canada. Date of issue March 18. Several forms are already complete. This has been an annual feature in the Canadian hardware trade for thirty-four years. Owing to the fact that a great deal of buying will take place in the next two months this Buying and Directory Number will fill an important need this year. Many of the present low stocks will be replenished with the goods advertised in the Thirty-fourth Annual Spring Buying and Directory Number. If you wish to share in this business, write us for further details without delay.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

BROWN & SHARPE MACHINISTS' TOOLS

Their superiority is known by mechanics the world over—that's why they mean prestige, profit and satisfied customers to the dealer.

B·S
TRADE MARK

THE old timer, the mechanic with knowledge gained through the years, places his confidence only on the best — he uses Brown & Sharpe Tools. And he recommends these Tools to the apprentices of to-day who become the mechanics of to-morrow. That's why Brown & Sharpe Machinists' Tools are a source of profit to the dealer who sells them. And the dealer benefits not only from their sales, but from the sales of other goods as well. The confidence inspired by these fine tools causes the user to return for his other requirements to this same dealer.

Hardware Scale

Thousands of Satisfied Users Find That This Scale—

Protects their profits.

Insures full profits on all articles sold by weight.

Pays for itself out of a part of the savings it effects.

It Will Do the Same for You

INTERNATIONAL BUSINESS MACHINES Co.
LIMITED
FRANK E. MUTTON,
Vice-President and General Manager
300 Campbell Avenue - TORONTO

What Dayton Users Say:

Minnedosa, Man.
We are pleased to say that the scale we bought from you last September is in our opinion without a fault. We thought the price pretty high but would not wish to have our money refunded and give up the scale.
Black Bros.

St. John, N.B.
On October 20th, I purchased a Hardware Scale from you. At first it was rather hard to convince me to buy but this scale has paid for itself and $50 could not take it from my counter.
George W. Morrell.

Toronto, Ont.
We like the Automatic Hardware Scale purchased from you because it saves our clerks' time and our goods, which both cost us money. It obviates the tendency of giving underweight and overweight, in addition to being an indication to the public of up-to-dateness.
Frank J. B. Russill.

Carman, Man.
I am pleased to say that the Dayton Hardware Scale appears to be a perfect machine. I would not be without it now that I know its value.
Frank Bridge.

Moosejaw, Sask.
We have used your Scale for some time and have reached the conclusion that we should have had it years ago. We don't know how we ever put up with the old even-balanced scale and do not hesitate to recommend yours to Hardware Dealers.
A. Latham.

The outward mark of Inward Quality

BADEN

THIS is the name of an ideal. In 1864 the founder of this organization conceived this ideal. Conceived the idea of making a linseed oil so perfect that it would become a synonym for excellence in oil. He set out, before the days of the Confederation to make this perfect oil that would be the standard of comparison for oils.

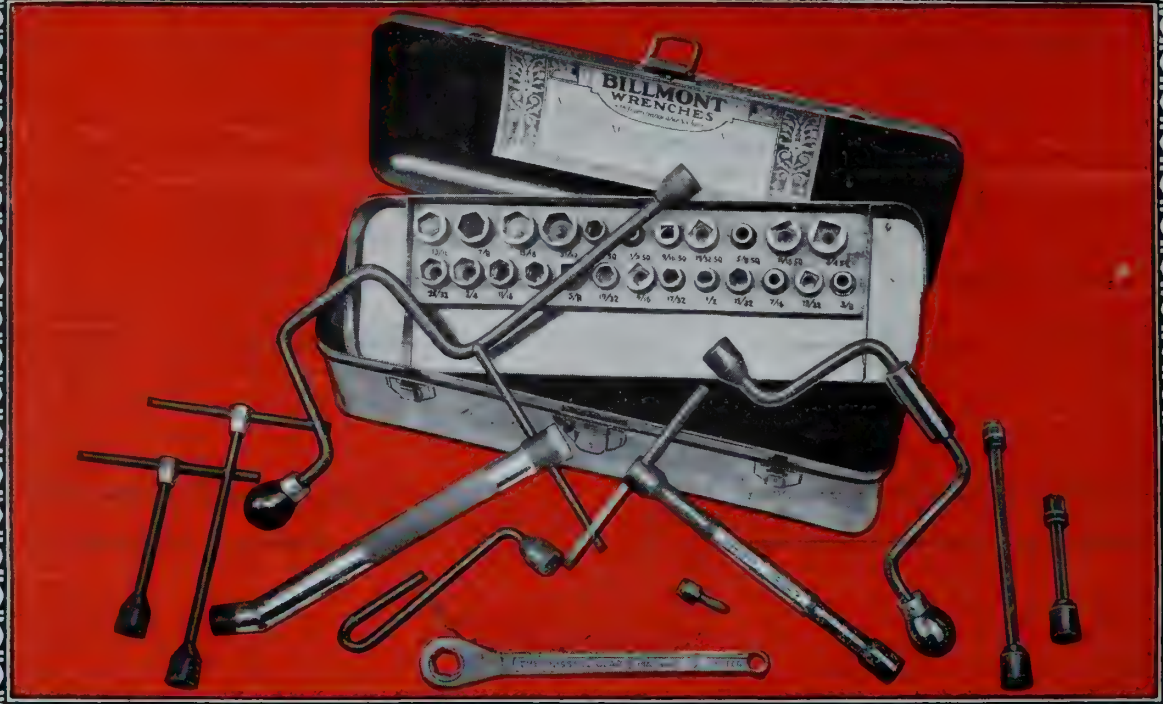
Now, today, the idea has been perfected. Buyers say, "Baden," knowing that they are perfectly understood as wanting this incomparable brand of Linseed Oil.

When you want the best—say Baden.

The Dominion Linseed Oil Company

Limited

Baden Toronto Montreal Winnipeg



BILLMONT

ALL the wrench equipment you'll ever need with but a few wrenches, for each wrench takes the entire set of Billmont sockets. Makes 24 different wrenches by merely changing the sockets.

Eight wrenches and 24 sockets will operate to the same extent as 192 wrenches.

This Billmont wrench set lessens the number of wrenches but increases their uses.

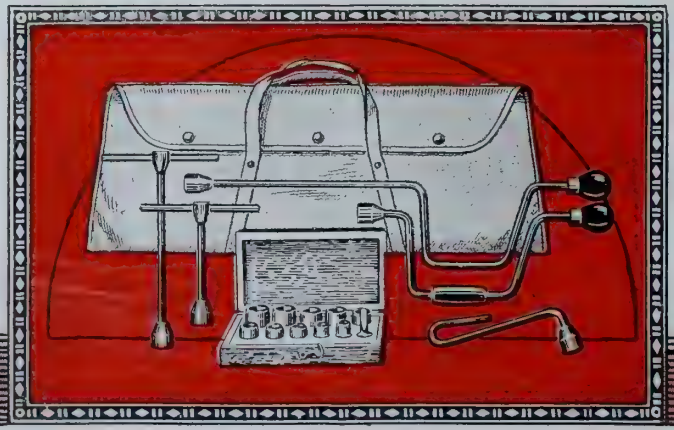
There's the **Master** with its hooked nose and seven other wrenches with 24 interchangeable sockets (hexagonal and square). All handy and compact in a 22-gauge metal kit box ready for use.

Every dealer should carry sample kit in stock. Ask your jobber, or write us for complete catalogue.

The Russell Gear & Machine Co.,
LIMITED
Toronto . . Canada

WRENCHES
with Interchangeable Sockets

Nose piece takes all sizes in Billmont sockets.



Sockets are finely machined, broached and hardened.

'RICE LEWIS' NEWS

"Old Sol" is again on the war path

He is gradually gaining ground and will soon have Old Man Winter on the run.

Then out comes the wheelbarrow, the lawn mower, the lawn sprinkler, grass clippers, the garden tools, the farm machinery—all ready for spring farm and garden cultivation.

We carry full stocks of garden and lawn tools, farm tools, sheep and horse hand and power clippers etc.

We are ready to serve you. Let us know your requirements. Be ready for Spring.

Mr. S M P

Is Driving Women to your Store

Mr. SMP is down to work in earnest. Through his big advertisements in a long list of over 700 of Canada's best newspapers, magazines and journals, he is doing some highly effective talking for Diamond and Pearl Ware.

Your customers are reading these advertisements. What are you doing to cash in on them?

A few suggestions

(1) Use our free cuts in your local advertising.

(2) Put good displays of Diamond or Pearl Ware frequently in your windows with a fair price on each article.

(3) Show the wares well up in the front of your store where they can be seen.

(4) Get a supply of our free window cards.

(5) Order a supply of our free price tags.

If you co-operate and tie up with the splendid efforts of cheery Mr. SMP you will get to know real business and realize good profits on SMP enameled ware sales.

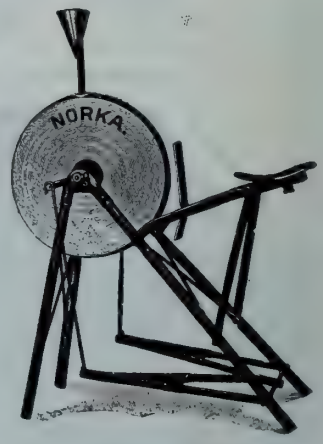
What This Year Means In Selling Grindstones

Activity means business and there is plenty of activity now. There is as great a need for grindstones this year as any year before—there is a greater demand this year because grindstones that would have been replaced last year but for the slump will be bought this year.

The dealer who most actively displays his grindstones will profit greatest by this demand. Move your grindstones up near the front of the store during March, April and May and when your customers from the country come in they will see them and be more likely to buy than if the grindstones were hidden in the basement.

Better still, arrange a window display for a few days or a week or so. The extra grindstone sales will more than repay you for the effort. In the meantime be sure that you have a complete stock on hand. Prices are sufficiently stabilized to permit having a little more than usual.

And if you stock Cleveland grindstones you can be sure of the lasting qualities of every stone you sell—of the lasting satisfaction they will give your customers. Norka BB and Sterling described at the right of the page are being stocked by most dealers. Your jobber has them.



NORKA BB

Easy running and practically indestructible. Heavy tubular steel frame. Cold rolled steel shaft which turns in a splendid ball bearing device. Genuine Berea or Lake Huron Grit, 19 to 22 inches in diameter, 1¾ to 2¼ inches thick.

STERLING

Substantial, light running. Mounted with a "Cleveland grindstone," genuine Berea or Lake Huron grit, which we alone manufacture, 19 to 22 inches in diameter, 1¾ to 2¼ inches thick. Frame can be set up in a jiffy—**merely by manipulating one bolt.** Shipped knocked down and crated.

MARBLE'S

Outing Equipment

1922 Helps and Hints

We've arranged to give you lots of help in 1922. The advertising this year is our greatest effort—outdoor men will be brought to you for Marble's Axes, knives, gun sights, cleaners, compasses, etc. In addition you will receive other sales aids.

Leading jobbers sell Marble's goods—order direct if your jobber can't supply you. Prices quoted are list—liberal dealer discounts.

Field Cleaner—Softest Brass gauze washers clean thoroughly—won't injure finest gun. List price $1.

Nitro-Solvent Oil—Keeps all equipment free from rust—dissolves residue of any powder. List price.—2 oz. bottle 35c., 6 oz. can 65c.

Pocket Rod—Handle fits any section—swivel permits turning—brass or steel, in cloth case, 26, 30, 36, in. long. List price $1.75.

Safety Folding Fish Knife--Shown below, sharp at back of point for ripping—back of blade is dandy fish scaler. List price, $1.50.

Woodcraft Knife—Shown above, all-round knife for outdoor men—4¼ in. blade, finest steel, 3¾ in. handle. List price, including leather sheath.—No. 49, leather, handle, $2,25; No. 50, stag handle, $3.00. Add 10% war tax.

Safety Pocket Axe—With folding nail claw, handiest tool made. 2⅜ x 4 in. blade of finest steel, 11 in. steel handle. List price, $3.50.

Clincher Gaff—Holds any fish up to 20 lbs. Can be locked with points together. List price, $1.25.

Trout Knife—Designed especially for trout—great for cleaning all fish. Finest steel—in leather sheath. List price, 75c.

Flexible Rear Sight—For game or target—perfect rear sight. Fits all standard American Rifles. List price—2 discs, $4.00.

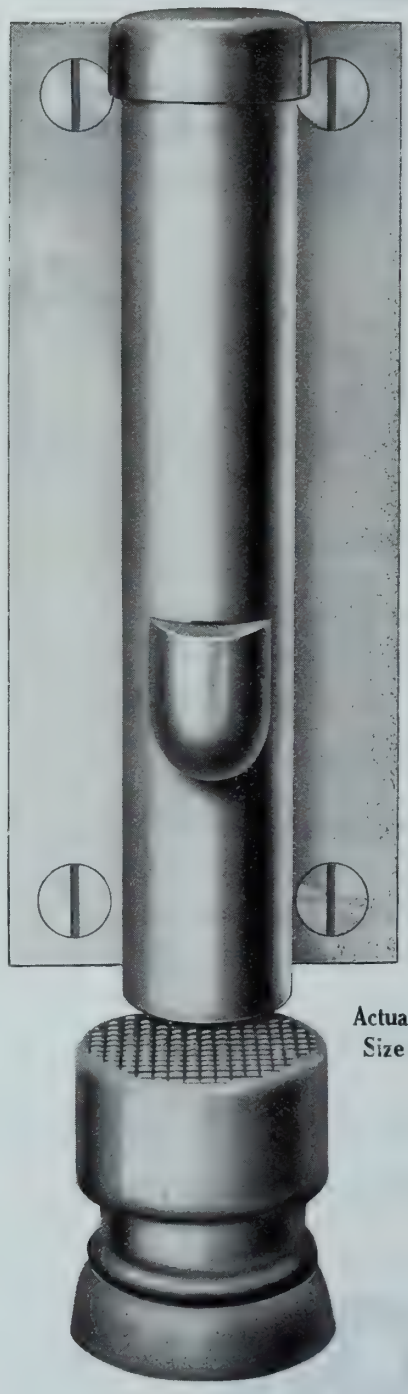
STANLEY

Wrought Steel DOOR HOLDER



Actual Size

NO. 456

For doors equipped with checks or double-acting hinges. Fastened to door near the floor, this holder allows easy operation and gives a firm purchase on the floor.

Equipped with composition rubber tip, and self adjusting to overcome unevenness of the floor by means of a heavy spring inside base.

Proximity of foot plate to floor makes holder easy to operate. Slight pressure on trip knob releases holder, permitting door to swing free.

Made of wrought cold-rolled steel.

Plates 5 in. long, 2 in. wide
Diameter 3/4 in.
Throw (extra long), 1¼ in.

Packed one in a box, with ¾ in. x 7 in. screws. 10 dozen in a case.

Note: See Page 224 in our new catalogue of Wrought Hardware.

"You Couldn't Budge Me an Inch"

That's a strong statement. It is the attitude of a successful Hardwareman who has been handling "Gutta Percha" Tires for two years, exclusively, and who is so well pleased with the way his customers are satisfied, he will not allow any salesman to lead him astray after other tires.

When You Get a Good Line, Like

"Gutta Percha"

CORD Tires FABRIC

Stick to Them—Tight—It Pays

It is as necessary for the Dealer to sell tires that give big value and satisfaction to his customers as it is for the manufacturer to make tires that give wear and endurance.
Prices for "Gutta Percha" Tires are Standardized —Same to All.

FOLDING FURNITURE

Buy Profits This Year

Profits depend on turnover and turnover depends on sales. No matter how great the percentage of "paper profits" may be you make no actual profit until the merchandise is sold. "Bargain goods" that do not sell are never profitable. A large and continuous number of small profits is better than one big profit and the amount of capital tied up is less.

"Gold Medal" Folding Furniture, because of its established reputation, backed by a national advertising campaign, is easy to sell wherever it is displayed.

Buy profits this year. Get the folding furniture business in your territory by concentrating on the known quality of "Gold Medal."

All inquiries from national advertising are referred to dealers. Send us your jobber's name and get your name on our list for complete dealer co-operation.

DUNLOP TIRES

Ensure

HIGH-MILEAGE—DOUBLE-LIFE

¶ Dunlop leadership in Tiredom is most manifest. Mileage records almost unbelievable are piling up all over Canada.

¶ The Special Mileage-Making Process, which is the basis of our Fabric Tires, has worked wonders.

¶ Perfect shape and balance, stronger side walls to resist curb and rut abuse, special wear-resisting anti-skid tread, etc., add the last touch to popularizing to the full a tire that has long stood in high favor.

¶ Dunlop "Cords" made good from their inception.

¶ These tires taught motorists to expect more resiliency, greater air space, larger amount of material, better carrying capacity—in short, bigger mileage; and that is the standard by which all Cord Tires are judged to-day.

Toronto

Durable Three-ply Veneer Seats

These splendid, three-ply veneer seats are made in a pleasing variety of patterns, carefully shaped, corners rounded, edges smoothed and sand papered, and fastened with genuine water-proof cement. They will not warp, curl, crack or come apart. Even the severest weather will not cause these excellent seats to come apart.

There is no better line that you can handle than these Perforated Three-Ply Veneer Chair Seats. The extraordinary care and attention we give to their manufacture is producing results in increased sales for Dealers everywhere. They are a continual source of revenue in money, good-will and business held and gained.

Canadian Veneering Company, Incorporated

ACTON VALE, QUE.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

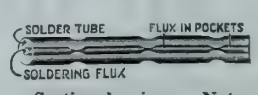
KESTER ACID CORE WIRE SOLDER

FLUX IN POCKETS

— a self-fluxing solder for automotive and general work. Flux and solder are applied in one operation, because the flux is contained inside the hollow wire of genuine tin-and-lead solder. In great demand by all solder users because it saves two-thirds of the workman's time and gives a strong bond the first time. Comes in convenient packages and spools that are easily stocked. Write for free sample—investigate this easy-to-sell, easy-to-use, easy-to-stock solder.

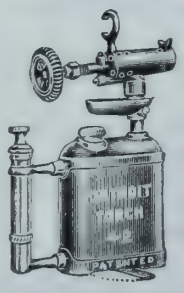


Sectional view. Note flux in pockets.

Kester Rosin-Core Wire Solder is also manufactured for delicate electrical work.

Chicago Solder Co.

4225 Wrightwood Ave., Chicago, U.S.A.



In design and construction it is the best torch of this type on the market to-day.

Detroit Torch

Takes Little Space

Our No. 42 Auto or Electricians' Torch has oblong tank and is very popular with mechanics desiring a tool that will take up little space in a kit.

Tank is made of heavy brass throughout. Supports on bottom of tank prevent torch from tipping over when placed on bench—not in the way when torch is not in use. Fitted with patented tapered burner, with hook and support for soldering coppers. Valve wheel is of wire and always cool, giving operator full control of flame at all times. Automatic pump of simple construction forms the handle.

Empty Shelves— and a Prediction

WITH inventories completed, retail hardware merchants find their stocks smaller now than at any time in recent years. Merchants have held back on spring bookings and freely admit that present stocks are totally inadequate for "Spring and Summer" trade.

Reports from retailers in all parts of Canada are such that we predict a pronounced buying movement within the next six weeks. We are entering a period of improved but cautious buying activity. Purchases will be considered more carefully, comparisons will be made more freely than heretofore. Merchants are adopting a "convince me" attitude. Unknown houses and unknown products are going by the boards these days. Merchants are not taking chances on buying any lines where there is an element of doubt as to the standing or reliability of the manufacturer or the product.

Merchants are the "choosers" to-day. The question is not one of where can I secure goods? It is a question of "whose line will I stock?" At the moment of decision, the line consistently advertised in Hardware and Metal—all other things being equal—is the one that stands the best chance of acceptance by the merchant. The 34th Annual Spring Buying and Directory Issue of Hardware and Metal, reaching the trade on March 18th, will be studied closely by over 95% of the most important wholesale and retail hardware buyers across Canada from coast to coast. Thousands of feet of empty shelving will be filled up with lines advertised in the 34th Annual Spring Buying and Directory Number. Reservation should be made immediately.

Hardware and Suggested Reciprocity

Reciprocal Arrangement Suggested in 1911 Between United States and Canada Again Being Sought By Canada's Finance Minister—Where Hardware Lines Would Figure in Such an Agreement

THE BELIEF seems to be growing that the recent visits to Washington of Hon. W. S. Fielding, Canada's Minister of Finance, have something to do with the question of trade agreements between these two countries. Certain advices are to the effect that the question of a reciprocal trade agreement between Canada and the United States has been taken up with authorities of the latter country. In this connection the Reciprocity legislation enacted by the United States in 1911 again becomes of interest for it is said to be probable that that enactment is still on the Statute Books of the United States and would be used as the basis for any new agreement. As this plan included a wide range of hardware and allied lines, the hardware trade of Canada will be interested in knowing just what that legislation proposed.

Discussing the subject with J. R. K. Bristol, Manager Tariff Department, Canadian Manufacturers' Association, Hardware and Metal was advised that it would be necessary for a special ruling to be made to ascertain whether or not the enactment made by the U. S. in 1911 was still effective and only requiring the introduction of a reciprocal arrangement by Canada to make it effective. No definite step had been taken by the U. S. Government to have the proposal repealed, but it was a question whether or not subsequent tariff legislation such as the Fordney Bill had automatically repealed the reciprocal arrangement. If not it was possible that this agreement would form the basis of future negotiations. It is thought likely that Mr. Fielding will bring with him on his return from Washington, a definite ruling on this point.

Favors Reciprocal Arrangement

It is known that for some time sentiment in certain circles in the U. S. has been in favor of some reciprocal agreement with Canada, based on the feeling of protectionists of that country that such protection is more desired against European rather than Canadian products. It is known that Mr. Fielding favors such an agreement and in an address delivered last April he stated that the government should bring in an amendment to ratify the agreement respecting reciprocal trade between the U. S. and Canada as signed at Washington on January 21, 1911.

The reciprocity agreement of 1911 consisted of four schedules of tariff rates to be enacted by concurrent legislation in each country. The agreement provided for a free list, schedule A, to be adopted by both countries; another list of articles schedule B, to be admitted by both countries at identical rates; and two shorter lists of reductions, schedules C and D for enactment, one by the United States and the other by Canada.

The free list, schedule A, consisted primarily of natural products, also including the following lines of interest to the hardware trade:

Flaxseed or Linseed; Cottonseed and other oil seeds and other seeds in packages weighing over 1 lb. each; Mica, unmanufactured or rough trimmed and Mica ground or bolted; Felspar, crude, powdered or ground; Asbestos, ground; Fluorspar, crude, not ground; Glycerin, crude, not purified; Brass in bars and rods in coil or otherwise, not less than 6 ft. long or, Brass in strips, sheets or plates, not polished, planished or coated; Cream Separators of every description and parts thereof; Rolled Iron or Steel Sheets or Plates, No. 14 gauge or thinner, galvanized or coated with zinc, tin or other metal, or not; Crucible Cast-Steel Wire; Galvanized Iron or Steel Wire, curved or not, Nos. 9, 12 and 13 wire gauge; Barbed Fencing Wire of iron or steel, galvanized or not; Coke; Rolled Round Wire Rods in the coil, of iron or steel, not over three-eighths of an inch in diameter, and not smaller than No. 6 wire gauge.

Manufactured Articles on Free List

It is evident there were some manufactured articles on the free list, but they were chiefly articles which had formerly entered free into Canada and which were not likely to be imported in large quantities into the U. S. The only manufactured goods of much importance then dutiable in both countries and placed upon the free list by the agreement, were iron and steel sheets.

Schedule B contained a list of commodities to be admitted by both countries at identical rates of duty, lower for the most part than those then prevailing in either country. Many of the items in this list were secondary products or manufactures of products made free in schedule A. Items in this section of interest to the hardware trade with the suggested rate of duty to apply on shipments in either direction, included the following:

Asbestos, further manufactured than ground 27½ per cent.; Cutlery, plated or not, viz., pocket knives, pen knives, scissors and shears, knives and forks for household purposes, and table steels, ad. val. 27½ per cent; Bells and Gongs, 27½ per cent.; Basins, Urinals and other plumbing fixtures for bathrooms and lavatories; Bath-Tubs, Sinks and Laundry Tubs of earthenware, stone, cement or clay, or of other material, ad. valorem, 32½ per cent.; Clocks, Watches, Movements, ad. valorem, 27½ per cent.; Canoes and Small Boats of wood, not power boats, ad. val. 22½ per cent.; Plate Glass, not beveled, in sheets or panes, exceeding 7 sq. ft. each and not exceeding 25 sq. ft., ad. valorem, 25 per cent.; Motor Vehicles, not including rubber tires, 30 per cent.

Schedule C was a shorter list of reductions in tariff. It affected U. S. imports of iron ore and aluminum, setting the rate of duty at 5 cents on aluminum in crude form, per pound; 8 cents per pound on aluminum in plates, sheets, bars and rods, 10 cents per ton on iron ore.

(Continued on page 56.)

Says Canadian and U. S. Firms had Chance on U.F.O. Binder Twine Trade

General Manager Clemes of U.F.O. Co-operative Company Answers Statements of Canadian and U.S. Firms Objecting to Policy of Buying Abroad on Basis Which Gave no Chance for Competition

PRICES on binder twine for the current season having been named this week by Canadian producers, Hardware and Metal interviewed Mr. Clemes, general manager of the United Farmers of Ontario, with a view to establishing the price at which the binder twine purchased by this organization from Belfast, as outlined in last week's issue of Hardware and Metal, will be marketed.

In this connection Mr. Clemes stated that it was the intention to name a price direct to the farmer, which would be approximately equal to the domestic jobber's quotation.

The actual prices on the Irish twine to be marketed by this organization have not yet been decided upon but are expected to be named within a few days, now that Canadian prices have been published.

Canadian and American producers have drawn attention to an alleged breach of principle on the part of the U. F. O. Co-operative Company in purchasing binder twine abroad while the U. F. O. organization sponsors the "Buy Made in Canada Goods" movement. Particular attention was drawn to the basis on which the twine was purchased from the Belfast Rope Works, it being claimed that the basis of giving a margin of protection below any price named by Canadian makers gave no opportunity for them to quote a price at which they could secure the business.

In this connection Mr. Clemes stated that Canadian and American firms had an opportunity to get this business, negotiations having been carried on with them personally and by letter prior to placing the order abroad. This, he stated, was particularly the case with the three largest producers, certain other smaller Canadian firms having been able to supply but a maximum of 300 tons which would be far short of the required amount in view of the order for approximately 2,000 tons which has been placed abroad.

The crux of the situation appears to be that the U. F. O. have always purchased binder twine on a basis of an agreed commission representing a margin on prices as named for domestic trade, and before closing negotiations with the Belfast firm for this season's requirements, U. F. O. officials state an opportunity was given Canadian and American firms to submit offers. Instead of granting the commissions formerly allowed, Mr. Clemes states that these firms wanted to curtail the margin, and it obviously would have been poor business on the part of the U. F. O. to place the order with them in face of the proposition offered by the Belfast Rope Works.

Want to Eliminate Co-operatives

Mr. Clemes interprets the stand of the American and Canadian firms as an endeavor to eliminate the co-operative organization from selling binder twine, and hints that this might be due to opposition from hardware and other distributors.

The plan of buying on a marginal basis is defended by Mr. Clemes on the ground that the extent of the business done in binder twine by this organization makes it necessary to have some such protection so as not to be subject to loss due to price reductions during the season.

It was pointed out to Hardware and Metal that the negotiations completed at a time when the pound sterling was quoted at $4.00. This is now $4.55. It is apparent that the saving which has been effected in exchange is a considerable item, worth, according to Mr. Clemes, an additional 10 per cent. discount. It is also evident that the low level of British money at the time the order was placed helped the Belfast firm to make an attractive price payable in Canadian funds.

The present arrangement for marketing this twine, according to Mr. Clemes allows the U. F. O. to quote a price to the farmer which will be equivalent to the price at which the domestic jobber purchases his twine, taking into consideration all discounts for quantity, cash, etc. This margin is generally from 1 to 1½ cents per lb. This protective margin will be given the U. F. O. throughout the season no matter how much domestic prices fluctuate, and it is said customers will be protected by a system of rebates on twine purchased.

"Canadian and American firms cannot say they did not have a fair chance to secure this business," said Mr. Clemes, pointing out that the policy had been one of buying where they could buy best and everyone had been given a chance to submit prices.

DOMINION MOTOR SHOW AT MONTREAL

Montreal.—Increased attendance and interest on part of prospective buyers each day was the feature of Dominion Motor Show held in Montreal this week. Business preceeded along satisfactory lines, those holding display space reporting that many inquiries were received which were expected to yield results at a later date. Actual sales were also made during the week in encouraging numbers.

The Motordrome on Sherbrooke Street again housed the displays this season, and Canadian manufacturers formed no small part of the many fine showings of automobiles, motor trucks and motor cycles.

Comparative statement of the tariffs of Canada and the U. S. as affecting various hardware lines, showing the extent of the changes suggested in the Reciprocity arrangement of 1911 both at that time and in 1921.

Using A Recapitulation Sheet

Comparative Items of Present and Past Business Entered on Recapitulation Sheet as a Business Barometer—Salesmen's Work Checked Daily and General Sales Sheet Made Up Monthly—Hardware and Furniture Combine to Advantage

The furniture display room of Brace, McKay & Co., Ltd., Summerside, P. E. I., carries a homelike atmosphere with the various articles suitably grouped and generous use made of rugs and pictures. Furniture and hardware combine well, though not shown together. It is found that customers in this department are often good prospects for hardware and vice versa.

EACH AND every member of the enterprising firm of Brace, McKay & Co., Summerside, P. E. I., is in his or her place each day at a set time and under the supervision of the heads of the various departments; the prime object of each and every member being to pile up a bigger day's sales today than yesterday; and not only to sell, but also to make what is sold stay sold. Along the whole line of counters is a scene of activity, no customers have to stand and wait—that principle is "taboo"—during the rush hours of course things are different inasmuch as each salesman is generally waiting on one or more customers at a time and talking to a couple of others to keep them interested.

General Sales Sheet Monthly

Each salesman keeps a daily record of his sales, cash, charged and returned, the totals of which are checked up at the end of the day with the totals obtained from the general sales book, each and every sale being thus accounted for and duplicated. At the end of each month a general sales sheet is made out giving the totals of each clerk and showing his standing with reference to the other salesmen, also with the same month of the previous year. This method has been found of very great importance because the individual salesman then knows just how he ranks with the others and his pet ambition is to get at the head of the list next time.

Nothing Left to Chance

In the office everything is checked—charged bills, cash bills, freight bills, freight rates, everything; nothing is left to chance here. Again at the end of the month a recapitulation sheet is filled in. It consists of comparative items of the present and past year by months; for example, the total monthly sales for November 1920 and 1921 are shown, also the total importations, the total goods on hand, the total of unsettled invoices, and the total insurance carried. With these figures one has a business barometer which shows conditions as they actually are; for example, to establish the goods on hand in relation to insurance, a glance will suffice to tell whether adjustment is necessary or not.

The buying is done with a view to the present prices, present stock, the present demand, and an eye to the carload lot for the obtaining of best freight rates.

From the foregoing it can be seen that it pays to systematize not too much, but just enough to keep everything at a rising level. The end of the year makes everybody happy—dividends for the shareholders, bonuses for the employees.

Furniture and Hardware

A considerable trade has been worked up in furniture by this firm as indicated by the comprehensive display room illustrated herewith. Hardware and furniture have been found to go well together, not that the two departments

(Continued on Page 54)

Patterns for Long Radius Elbow

Written and Illustrated for Hardware and Metal by O. W. Kothe, Principal, St. Louis Technical Institute, St. Louis.

IN DESIGNING piping systems, the radius of the elbow should preferably be in most cases made equal to 2 times the diameter as the radius in the throat.

This makes a good curve and it offers the least resistance or friction to flowing material.

Most workmen design elbows by guess work, making this kind of a sweep or that kind of a sweep whatever fancy may dictate.

In altogether too many instances the square 2 piece elbows are used, especially in smoke pipe work, which is very unsatisfactory for the efficiency of the draft of the furnace.

Of course, for smoke pipe long radius elbows as we show here, are not so common, but they should be preferred where they can be used.

In our case, long radius elbows are especially used where a fan is attached, thus making a forced flow or suction of air and substance.

So in our elevation, the distance X-I is made equal to 2 diameters, or the space X-7 is made equal to 3 diameters, when considering the heel of elbow.

From this vertex, describe the arcs of the heel and throat and divide the heel in 12 equal parts.

Observe this allows 2 spaces for each middle piece and one space for each end-piece.

By drawing a 45 degree line as X-e, we only need to divide half the arc in 6 spaces, which saves a little time.

The first space as 7 ft. will enable drawing the miter line to X. The other spaces are not necessary to draw since they can be picked from the first gore.

Now describe the semi-circle and the half section and divide in any number of equal parts.

From each of these points, square up lines to intersect the first miter line.

Particular attention should also be given to erect lines from points 1 and 7, because many workmen somehow have not figured out the reason for this.

On elbows having a few pieces there is quite a difference made in this arc and the heel line, which will require some trimming if not done properly. In setting out the patterns it is often convenient when working direct on the sheet iron to pick the girth spaces from the semi-circle and set them on lines on the upper and lower edge of the sheet. This enables drawing the parallel lines without squares, straight edges, etc.

Where seams are desired on the sides as is generally done in large radius elbows, we start transferring the lines from the side or line 4 ft in elevation using the base 1-7 to pick the length of line. Observe the lines in the half section are not used since these are only used for squaring up lines into the elevation. In this way the lines of gore pieces are picked and set in pattern as 4-4 ft., 5-5 ft., 6-6 ft., 7-7 ft., etc., which enables placing the miter cut.

On this miter cut a lap edge should be allowed as shown by the dotted line and then this pattern is cut out on the dotted line and reversed, thereby making all the other patterns shown. It should be stated that seams should always be made on the side since that is the most serviceable and makes a stronger joint look better and saves considerable worry in assembling.

Observe where the seams are placed in the heel and throat, especially the

Patterns for Long Radius Elbow.

Featuring Winter Sport Goods, Auto Accessories and Other Seasonable Lines in the Local Ads

SOME SAMPLES of recent advertising of a wide range of seasonable hardware lines are shown herewith in an effective manner.

Creeper & Griffin, Ltd., Owen Sound, advertise spring traps, snowshoes, equipment for fox hunting, snow shovels, electric portable lamps, floor stain, automobile rugs and auto heaters, electric light bulbs, alarm clocks, etc. Each line is illustrated and described in a brief selling talk. At the head of the ad is an announcement concerning the decline of enamelware. This space is reserved for notes indicating the downward trend of hardware prices, under the heading "Hardware Prices are getting back to normal." Care is taken by this firm in selecting the lines most suitable for advertising.

Portable Heaters Give Cheer

Allins, Ltd., Lindsay, Ont., advertise hockey sticks and skates for the boys, electric lamps, portable electric heaters to "give the cheer of a fireplace on these cold winter days," aluminum and other kitchen ware, electric vacuum cleaners, etc. This ad is attractively laid out with illustrations of each line.

During the indoor season children must have toys to keep their time occupied, and an indication of how hardware merchants are selling toys is found in the ad by Wm. Gurd & Co., London, Ont. This firm is featuring a large variety of mechanical and electrical toys. The ad presents an assortment of toys which would take the attention of every child and many parents. Prices are quoted on each line.

Portable electric heaters, cake sets, kettles, washboards, toys, axes, roofing, combination storm and screen doors, weather stripping, are but some of the lines dealt with effectively in the advertising of Ingram & Davey Ltd., St. Thomas, Ont.

A special "Ash Sifter Week" was a feature introduced with good effect by Mills Hardware Co., a little earlier in the season. Note that the ad in connection with the sale left space for a daily talk on the progress being made, and the various lines were well illustrated and priced. It is surprising what a wide range of lines can be worked in on a sale of this kind, and there are other groups of lines in the hardware store which will combine equally well.

Give A Toboggan Party

With the suggestion to "Give a toboggan party," a Maritime hardware merchant says in his ad, "the keen excitement and healthful pleasure of tobogganing makes it an ideal winter sport and provides an excellent method of entertainment." The ad then deals with toboggans and tobogganing accessories.

Moore's Hardware Ltd., Eston, Sask., advertise the importance of having skates properly ground by experts, as

Canada's National Hardware Weekly

Members Audit Bureau of Circulations Member Associated Business Papers

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO Winnipeg

TORONTO, SATURDAY, MARCH 4, 1922

IT IS IMPOSSIBLE for the hardware merchant of today, to have too much detailed information concerning the progress of his business, and some business barometer, representing the true state of affairs in the business, should be readily available to every retailer. The use of special monthly sheets and a general "recapitulation sheet" summarizing information so that the relation of stock to insurance, turnover comparisons, etc., might be seen at a glance, is outlined elsewhere in this issue. Such records are very valuable and necessary to the successful conduct of business under present conditions.

ONE OF THE barometers of conditions in general is the question of employment. In this connection it is significant that employment during January represented a marked increase compared with a year ago. Returns from 5,800 firms in Canada with a total payroll of 641,146 persons show that increases in staff gave employment to approximately 19,000 more workers. The gains represented approximately 7,000 workers in Quebec, 5,000 in the prairie provinces and 4,600 in Ontario. The nature of the employment represented indicates partial recovery in the textile and iron and steel industries.

Not Meeting the Difficulty

FIGURES given elsewhere in this issue indicate the extent of Canada's trade with the various countries of the world, indicating a more even relation between exports and imports, but indicating a considerable falling off from the same period a year ago in the value of trade. Curtailed production and lower prices have been responsible in some measure for this condition, but the emergency tariff legislation enacted by the United States, has also affected trade conditions between these two countries. It is significant that the decrease in U. S. exports to Canada was twice the extent of the decrease in Canada's exports to the U. S.

The 60 per cent. reduction in the value of both Canadian exports to the U. S. and U. S. exports to Canada in 1921 was partly attributable to an average drop in price of about 27 per cent. Taking this into account it is evident that the trade of the two countries with each other was reduced in volume approximately 45 per cent. as compared with 1920.

In 1921 Canada had a favorable balance of trade of $17,000,000 whereas in 1920 there was an unfavorable balance of $34,000,000. This is an important contribution to the reduced premiums on Canadian funds in New York, as noted this week.

The foregoing outlines one advantage to Canada of the recent tariff legislation enacted by the U. S., and another important advantage was outlined this week by J. S. McKinnon, president of the Canadian Manufacturers' Ass'n., who pointed out that the emergency tariff of the U.S. has made it necessary for larger quantities of Canadian produce to find a market at home, with consequent lower prices due to the increase of supply over demand. This in turn has lowered living costs in Canada and a number of U. S. industries are showing an increasing desire to locate in Canada to take advantage of the lower labor costs which result from this condition.

Tariffs are peculiar things. Oftentimes they react to the disadvantage of the country which enforces them, and frequently all aspects of the situation are not considered. Where this is the case the elimination of one evil frequently brings on numerous others.

Improvement in Iron and Steel

THE IRON and steel market, generally an authoritative barometer of general industrial conditions, is showing some tendency toward improvement. Orders and enquiries are still for small quantities, but the number of them is steadily increasing. Manufacturers are showing no disposition to accumulate large stocks, and the business is therefore for immediate delivery in quantities as required for immediate use. This steady improvement indicates that more activity is being experienced among industrial firms and that a broadening market is apparent for their products. The wide range of iron and steel products being sought by present buyers is an indication that recovery is fairly general. Spring is the active time in the year for the producers of iron and steel. If that season passes without much business it is a bad omen for the rest of the year. Indications are that while no boom is to be experienced, that a gradually improving trend will take place. The needs of the country for iron and steel are extensive, and with the change of the seasons some stimulation is expected from the anticipated desire to meet needs of a pressing nature. Buying will probably continue on a cautious basis, however, and stocks kept well in hand.

West Has Greatest Growth

THE CANADIAN Census returns which have just been completed, give an opportunity for some interesting comparisons. Our present total population of 8,769,489 persons represents an increase of 21.5 per cent. during the past ten years, and an increase from a population of 3,689,257 fifty years ago. The increase in population in the last ten years amounts to 1,475,988, which is very small compared with the advances which the country has made in other directions. The debts which Canada carries representing development of the country, and the natural resources which exist in the Dominion make advisable the securing of more population of a selected nature to help develop our resources and carry the load of taxation.

Immigration in the past eight years has been greatly interrupted by the war. It is but a few years ago that under the stimulus of a tide of immigration the West was asking for a census every five years instead of ten.

A peculiarity of this unevenly settled country is that Nova Scotia with an area of 21,068 sq. miles, has a population equal to that of British Columbia with an area of 353,416 sq. miles. Ontario with 2,929,054 is the home of almost exactly one-third of the people of the Dominion. Ten years ago Ontario boasted 35 per cent. of the population of the Dominion, thus its proportion has decreased. Quebec's share has also declined from 28 to 27 per cent. of the total for Canada, in the ten years. All provinces except Prince Edward Island have shown steady growth. The weight of population has moved westward, the West showing an increase from 24 per cent. of the population of Canada in 1911 to 28 per cent. in 1921.

News of Western Canada

For comment on Winnipeg hardware market tendencies see "WEEKLY HARDWARE MARKET REPORTS."
For current prices see Winnipeg section of "CURRENT HARDWARE QUOTATIONS" in this issue.

Optimistic Tone in B. C. Hardware Circles

Marked Reductions in Building costs Stimulating Construction—Metal Trades Representative Expects Big Progress This Year in Various Industries —Numerous Hardware Price Changes

VANCOUVER, B. C.—Owing to an unusually severe cold snap for the time of the year on the lower mainland, conditions in the hardware trade are quiet this week. There being a lack of snow, there is little demand for snow cleaning utensils or other hardware lines which are associated therewith. This is the time of year on the coast that spring usually shows distinct signs of opening up, but this year, following a hard winter, the higher temperatures are slow in coming.

Some distributors this week report an easier condition in the money market and that collections are showing a decided improvement, but other concerns say that collections are not good and if anything, worse than usual.

However, there is a distinctly optimistic tone for the coming spring. It is believed that building will go ahead with a considerable spurt. For the past three or four years building extensions have been held up on account of construction costs, but with the lower costs now existent, it is to be believed that work will proceed. Discussing the point with Hardware & Metal, Col. E. J. Ryan, chairman of the Master Builders and Contractors' Association here, said: "It may not be generally known, but marked reductions have taken place recently in many lines of building materials. Labor charges have also come down and it is safe to say that there never was a better time to build than at the present." To stimulate the movement, the association is holding a Building Exhibition, which will last for two weeks, starting on March 11.

In this connection, it may be interesting to note that during January, new building was undertaken in Vancouver to the value of $112,000 and in the first three weeks of this month, a total of $78,000 has been reported. This building is largely of houses chiefly in the city and Point Grey. With the opening of moderate weather, it is expected that increased demands will be made upon the hardware trade.

In a statement issued this week President D. A. McIntosh of the Metal Trades Employers' Association, intimates that from an industrial standpoint, progress this year will be very marked. He referred specifically to copper mining operations, lumber exports, pulp and paper activities and also to many important undertakings which will soon be under way in and adjacent to Vancouver.

In jobbing circles several reductions have been made effective during the week, including fifteen per cent. on Yale night latches, twenty per cent. on Penberthy brass valves, two cents a pound on glaziers' points, twenty-five cents a keg on wire nails, ten to fifteen per cent. on Dominion cartridges and shells, ten per cent. on scissors and trimmers and ten to fifteen per cent. on tree pruners and shears. Turpentine is up ten cents a gallon.

FEATURING WINTER SPORT GOODS

(Continued from page 39)

well as exercising great care in selecting a good pair of skates when buying them. Special prices are quoted on skate grinding, and skates, as carried in stock, are illustrated.

Fireplace Furnishings

"Make the Fireplace cosy and cheerful," says an ad by a Maritime merchant continuing, "On gracefully designed, nicely furnished fireplace furnishings depends that air of cheery, cosy, homelike comfort one so naturally associates with the fireside. And you'll find a wide variety of just such furnishings in our comprehensive display which embraces andirons, fireirons, wire spark guards, fenders in black and brass finishes, coal scuttles, wood boxes and baskets, hearth brushes, etc."

"When you buy a stove," says an ad by Turnbull & Cutliffe, Ltd., Brantford, Ont., "you don't make up your mind in five minutes, do you? Buying a stove requires thought as to the price—what model is best suited to your needs. Here you will get the benefit of years of experience and sincere, conscientious effort to please you."

"Let's all have a good winter at sports," says an ad by Erickson Hardware Co., Biggar, Sask., continuing, "Hockey, curling, skating, snowshoeing. This wonderful western country gives everyone, old or young, a splendid opportunity to breathe fuel into the lungs, the most healthful air in the world. Realize this by getting active in your favorite sport. Drop the shackles of time and laziness and regain the healthful sparkle in your eye and vim in your step."

WESTERN CANADA NOTES

Trochu, Alta.—Damage estimated at $90,000 was caused by fire which threatened the whole business section of the town. The Trochu Valley general store, D. D. Farmer Hardware and Danforth tinshop were destroyed.

The hardware firm of Wagstaff & Vestrup of Trail, B.C., has been dissolved. Wagstaff continues the business at Trail and Vestrup at Nakusp.

Winnipeg.—James Bending, Western manager of "Ideal" Aluminum Products Ltd., was re-elected to that position at the directors' meeting recently held in Toronto, and British Columbia was added to his territory. Mr. Bending's jurisdiction now extends from Fort William to Victoria, B. C.

At the annual meeting of the New Westminster, B. C., board of trade, T. D. Trapp of the hardware firm of T. J. Trapp & Co., was elected vice-president.

The Electric Club of Vancouver, had as its special speaker this week, H. H. Stevens, M. P., who dealt with the subject of Oriental immigration. After stating that he was wholly opposed to any scheme of indentured labor, he said that one of the chief difficulties connected with the problem, was educating Eastern Canada to the seriousness of the situation with regard to British Columbia.

WANT DUTY ON METALS

Nelson, B. C.—Resolutions calling for duties on base metals, on copper rods and various other forms of copper and also on scrap copper, lead and zinc, were adopted at the Associated Board of Trade of Eastern British Columbia Convention here. The meeting also requested an ore test plant for the Kootenay, protested against any change being made in the anti-dumping clause, and advocated lower freight rates.

STEAL OIL AND PAINT WHOLESALE AT INGERSOLL

Ingersoll, Ont.—Entering the warehouse of the Imperial Oil Company here, theives got away with two barrels of tractor oil, five gallons of paint and five gallons of auto oil.

Events in the Trade

BUSINESS CHANGES

Milverton, Ont.:—Schrenk & Orr have sold hardware business to G. Guenther.

FIRE LOSS

Brampton, Ont.—With power off and hydrants frozen and almost useless, local firemen were practically helpless to fight the flames which destroyed a great portion of the Pease Foundry here. The damage is reported by officials of the company to be approximately $150,000. The machine shop and store-room were practically destroyed. A number of furnaces in the store-room are a complete loss. The section destroyed is the oldest portion of the foundry and was erected about 12 years ago. During the war it was used for the manufacture of munitions.

PERSONAL

Arthur Payne, for many years connected with Aikenhead Hardware, Toronto, has joined Metropolitan Motors Ltd., Toronto.

OBITUARY

The sympathy of the trade is extended to Charles Wright, manager for the Maritime Provinces of the Canadian General Electric Co., in the death of his father, Aaron Abel Wright, ex-M.P. for South Renfrew, Ont.

James Adam Laidlaw, formerly office manager for the British Aluminum Company, died in Toronto this week. Born at Hamilton in 1860, the son of Adam Laidlaw, of the Laidlaw-Bowes Foundry Company, the deceased spent the early years of his life working in that establishment.

ONTARIO INCORPORATIONS

Wanless Hardware Ltd., head office Chatham, capital $100,000 to conduct retail hardware stores and manufacturing and wholesale establishments dealing in hardware, plumbing, sheet metal, etc.

Vacuettes Ltd., head office Toronto, capital $500,000 to carry on business as pattern makers, founders, metal workers, etc.

Canadian Aluminum and Brass Co., Ltd., head office Walkerville, capital $250,000 to do business as manufacturers and dealers in metals, etc.

Innes, Lumsden Industries Ltd., head office Hamilton, capital $75,000 to manufacture and deal in hardware, auto accessories, etc.

The Dryo Cabinet Co. Ltd., head office Toronto, capital $40,000 to manufacture kitchen and other utensils.

The Scott Paint-Varnish Co. Ltd., head office London, capital $10,000 to deal in paints, varnishes, oils, etc.

Rudd Brush and Lettering Co. Ltd., head office Hamilton, capital $40,000 to manufacture and deal in paint brushes, sweeping brushes and brooms, etc.

The Dill Mfg. Co. of Canada Ltd., head office Toronto, capital $40,000 to manufacture hardware, machinery, valves, tire testers, lock nuts, dust caps and other auto and tire accessories.

HARDWARE MEN IN BOWLING LEAGUE

Cobalt.—Taylor Hardware bowlers dropped two games to the Miners in the last rounds. No big totals were made, but the average of both teams was fairly well maintained all through. Daley of the Hardware Crew was high for the evening with a 510 count, and a single of 216.

The hardware team was composed of Messrs. Daley, Gilmour, Matheson, Neil, Harris. Team average, 142.

BOTHERED WITH SHOPLIFTERS

Kingston, Ont.—Local merchants have for some weeks been suffering from shoplifters, but good work on the part of the local police rounded up the offenders, who turned out to be two sixteen-year-old boys.

$100,000,000 OF ELECTRICAL BUSINESS TO BE HAD

On the basis of recent developments and the more general acceptation of electrical appliances for facilitating housework and industrial operations, it has been figured by authorities that Canada will in the next three years consume electrical appliances such as heaters, table appliances, washing machines, vacuum cleaners, etc., to the value of $100,000,000. The actual number of probable purchasers of the various articles has also been estimated after a good deal of investigation. Read this article in the coming Annual Spring Number of Hardware and Metal, (March 18) and you will then be in better position to size up the possibilities of your local trade.

E. T. FRAIM LOCK CO., APPOINT CANADIAN REPRESENTATIVES

E. T. Fraim Lock Co., Lancaster, Pa., have appointed the following representatives in Canada;—G. L. Cohoon, Montreal, representative in Ontario and Quebec, and A. E. Hanna, Winnipeg, representative in the prairie provinces. A. W. Clark, General Sales Manager of the company, was formerly associated with the Canadian Yale & Towne, Ltd., St. Catharines, as salesman and later as general manager.

U. S. CAPITALISTS BUY SHARE IN TORONTO PLANT

Announcement is made that a syndicate of Binghampton, N. Y., capitalists have purchased a controlling interest in the 1900 Washer Company which has a large plant in Binghampton, and another in Toronto, for approximately $700,000. The controlling interest was obtained, it is stated, from the estate of the late Thomas B. Grary.

PILKINGTON BROS., ENLARGING GLASS PLANT

St. Catharines. Ont.—Rebuilding of furnaces and extensive additions to the plant of the Pilkington Bros., Glass Works at Thorold are responsible for a temporary close down of the plant, according to a statement by James E. Harrison, Canadian general manager of the company. Coupled with that statement, Mr. Harrison declared that he was looking forward to a revival of the building trade that would control to an extent the speed with which the alterations would be accomplished.

"We have already carried out extensive additions to the furnace and buildings, and now the old furnace is being reconstructed," he stated. "Much of the necessary material had to be secured from England, but it is now all on the ground. It is doubtful how long the rebuilding will take, owing to its very delicate and special kind of construction. As a result of the reconstruction the capacity of the plant will be materially increased, as we are looking forward to a revival of the building trade. We are keeping all our glass-making staff on employment during the alterations."

HAS HARDWARE CONTRACT

W. H. Cockburn, was awarded the contract for hardware supplies for the year at the meeting of the city council. Other contracts were awarded.

STIFF SENTENCES GIVEN PROMOTERS

P. W. McCaffery and J. C. Ryan, promoters of the Ryan Anti-Glare Light Co., Toronto, convicted of issuing false prospectuses to defraud the public, were sentenced to five and three years respectively in Kingston Penitentiary, by Judge Coatsworth. Judge Coatsworth said he could not deal lightly with the prisoners and he wished to emphasize the fact that promoters must deal honestly with the money entrusted to them.

HENRY FORD MAY MAKE STEEL FOR HIS MOTORS

Sudbury, Ont.—Rumors are in circulation to the effect that Henry Ford had bought a large tract of land situated between Sudbury and Copper Cliff. There was no indication as to what the automobile manufacturer intended to do with the newly acquired land, but the supposition is that, as this is one of the principal iron ore areas in the province, it may be his intention to go into the refining of metal to be used in the process of motor manufacture.

GASOLINE TAX DEFERRED IN ONTARIO

It is learned that there is little likelihood of the proposed new travel or gasoline tax being covered by legislation at this session of the Ontario Government. While the announcement that Hon. Mr. Biggs was considering such a tax brought him many approving comments, there was sufficient opposition to the proposal to suggest the advisability of deferring action for a year at least. One strong argument against such a tax now, is that it is imposing on motorists everywhere a "travel" tax burden in advance of the completion of the highway system and it should await the time when the roads are far enough advanced to give motorists "the worth of their money."

HARDWARE TRAVELERS REPORT IMPROVEMENT

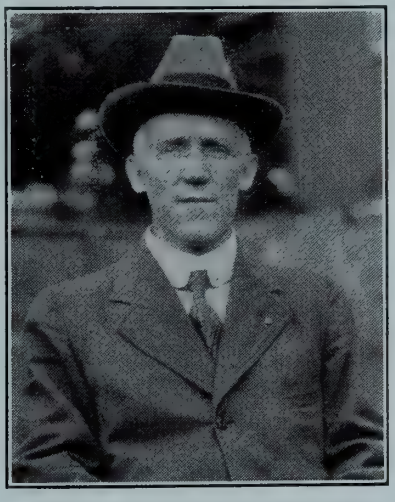
London, Ont.—An interesting feature to the hardware trade, of the meeting of the Board of Directors of the Ontario Commercial Travelers' Association here on Saturday, were the reports on business improvement. Substantial improvement in the hardware trade was reported by travelers representing all parts of the Dominion. A general improvement in buying is noticeable, Secretary George Hair stated to Hardware and Metal, but especially noticeable is the gain in hardware business.

There is every indication locally that the spring building season is going to break all records. Not in many years has so much work been under way so early in the season and every day sees new propositions developing. A large program of house building is developing and hardware merchants are looking for splendid business in all lines of builders' hardware.

SAY COAL MINERS' STRIKE NOW SURE

Last hopes of averting a strike of coal miners in the U. S. Eastern and Midwestern fields is said to have vanished when John L. Lewis, president of the United Mine Workers, called off the peace conference which had been scheduled for March 2 at Cleveland. Failure of operators to respond to the invitations sent out for the Cleveland meeting was given as the reason.

With only a month remaining before the expiration of the present agreements, this blow-up of the latest attempt to get the operators and union officials together has left small possibility that any agreement averting the strike can be reached before the date set for the walkout on April 1.



W. H. BARTLETT

St. Mary's Hardware Ltd., St. Mary's, Ont., who was elected a member of the executive committee of the Ontario Retail Hardware Association for 1922 at the recent convention, as previously outlined in Hardware and Metal.

BARS TRANSPORT OF GOODS THROUGH CANADIAN PORTS

The U. S. Merchant Marine Act of 1920, known as the Jones Law, prohibits transportation of merchandise between Alaskan ports and continental United States by Canadian rail and water lines, the Supreme Court announced in a case brought by the Territory of Alaska and the Juneau Hardware Company against the Collector of Customs for Alaska.

WOULD CONTROL EXPLOSIVES

Ald Luxton asked the Civic Legislation Committee to recommend an application for legislation to empower the city to control the use of explosives in the city.

The city solicitor was instructed to write to the Minister of Militia citing the complaints and asking what was being done to enforce the act.

BRENNERS SENTENCED

As we go to press word is received that Meyer and Nathan Brenner, officials of the defunct metal firm of N. Brenner & Co., Toronto, have been sentenced in connection with the charge of conspiracy to defraud, theft of $700,000 and tampering with the books of the firm. Nathan Brenner, the father, was sentenced to two years less one day for conspiracy and theft. Meyer Brenner the son, was sentenced to seven years in Kingston penitentiary on each of the six counts, the terms to run concurrently. In passing sentence the judge stated:—

"There is nothing new in your crime. It is as old as joint stock companies themselves. The familiar process of taking the assets of the company when in good standing and leaving it destitute of resources to meet the claims of creditors was followed in this case with the usual concomitant of defective and doctored bookkeeping. I had hoped to see ample restitution. My hope has not been fulfilled."

AFTERMATH OF COWAN HARDWADE FIRE

London, Ont.—Work is proceeding on the clearing out of the ruins of the Cowan Hardware which was recently destroyed by fire. A most successful fire sale is continuously in progress and is proving a center of attraction for thousands of people every day, not only from London but from the entire district. Many real bargains are being offered in slightly damaged goods. It was stated to Hardware and Metal that the firm expects to commence work before very long on a splendid new building which it is planned to make one of the most modern and up-to-date hardware stores in the province.

In another window a glass shelf was suspended from the ceiling and on it were laid in attractive arrangement, strops, blades, straight and safety razors, and brushes. No prices were shown in this display. All the window displays mentioned were good pullers of business it was stated to Hardware and Metal.

MODIFY HEIGHT OF AWNINGS

A large deputation of Toronto retail merchants appeared before the Civic Works Committee to request a modification of the by-law regulating the height of awnings. They contended the present standard of 8 ft. 3 in. was unsatisfactory and unworkable. It was decided to reduce the standard of height for the frame work to 7 ft. 3 in., and to allow the use of a 12-inch curtain or drop on the understanding that the new standard would have to be complied with both in spirit and letter. The merchants admitted that a few individuals had been negligent in the past and allowed their awnings to cause an obstruction.

Is This a Breach of Principle?

AS HARDWARE AND METAL goes to press the following letter has been received from Jas. N. McGregor, Hardware merchant of Oakville, Ont.

Editor, Hardware and Metal:

Was sitting reading your article on U.F.O having purchased their binder twine in Ireland, when a representative from the U.F.O. Government dropped in with a nice card, beautifully printed, which he requested us to put in the window and which read as follows:

> "Prosperity for all. We are co-operating with the Ontario Government by reducing prices in an honest effort to provide a job for every man. You can help. Buy. Build. Work."

He also left the enclosed letter, signed by our worthy Provincial Premier. One seemed so absolutely contradictory of the other, and both virtually emanating from the same source, because the purchasers of the binder twine are those who have put and retained our present government in office.

(Signed) J. N. McGregor

Letter Left By U.F.O Government Representative

Dear Sir:

As you are no doubt aware, the Government of the Province has had its attention directed to the question of Unemployment. It was decided to secure the aid and co-operation of representatives of the various commercial and industrial interests, and an Advisory Committee on Unemployment was formed to advise and assist the Government in dealing with abnormal unemployment conditions throughout the Province.

The Committee, on which the Retail Merchants are represented, has given the whole question serious consideration. A conclusion has been reached that there is only one practical way of attempting to remedy the present situation, and that is to have our factories and workshops running again at full speed, thus creating employment through normal and proper channels.

The members of various trade organizations are being requested, to commit themselves to the broad principle of selling their goods at replacement costs or prices and on as close a margin of profit as possible until normal conditions are finally reached. Many have done so already but unless everyone co-operates the best result will not be achieved.

The merchandise in your store is only worth what the consumer can afford to pay for it, and before the Retail Merchant can place new orders he must first of all dispose of the stock on hand.

The purchasing power of a large number of consumers has been reduced by various causes, and if there is to be a normal movement of merchandise, prices must be reduced to a corresponding level.

It is quite obvious, therefore, that some great effort should be made to bring about the desired end. The Retailers occupy a very important position, coming as they do in direct and final contract with the consumers.

The Government has endorsed the recommendation of the Committee for an advertising campaign which commenced on Thursday, December 8, 1921, appealing to Manufacturers, Wholesalers and Retailers and other important branches of trade and industry to co-operate in a great campaign to stimulate production and to get prices down immediately to replacement cost or less. If you will do your part the Public will buy and your stocks will be depleted, thereby making it necessary for you to be in the market for new goods. The Wholesaler will have to reorder from the Manufacturer, who in turn will be impelled to keep the wheels of industry moving at full speed in all lines. Workmen will have employment, their purchasing power will be increased, and they will come to you for more goods. Thus your action will not only help to relieve the unemployment situation, but will in the end better your own business.

Your co-operation in achieving the objective of the Advisory Committee on Unemployment is particularly desired.

Everyone must do his part! Will you do yours?

(Signed) E. C. Drury
Chairman

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

PRIMING CUPS

Geo. B. Haynes, Gananoque, Ont.—Kindly inform me who are the manufacturers of Needle Point Priming Cups.

Answer—Canadian Detroit Lubricator Co., Walkerville, Ont.

SAUSAGE MACHINES

Messrs. Spadoni Bros., Box 89, White River, Ont.—Please let us know where we can obtain Sausage Machines.

Answer—We would refer you to the following manufacturers of machines: Canada Scale & Slicer Co., Brantford, Ont.; Brantford Computing Scale Co., Brantford, Ont.

"CANADA PRIDE" RANGE

F. W. Inman, General Hardware, Dundas, Ont.—Could you please advise where we can purchase repair parts for the "Canada Pride Range?"

Answer.—The McClary Manufacturing Company, Hamilton, Ontario, advise that they have the patterns for the Canada Pride Range, and can supply repairs.

Repair parts for the fire box can also be secured from Messrs. McIntyre & Taylor, Limited, Queen Street West, Toronto.

WELDING COMPOUND

The Rogers Hardware Company, Charlottetown, P.E.I.—We would thank you to let us know who are the manufacturers of welding compound in Canada.

Answer.—In this connection we would refer you to any of the following firms:

1. The Anti-Borax Compound Company, Windsor, Ontario.

2. The Canadian Compound Company, Windsor Ontario.

3. The Goldschmidt Thermit Company, Toronto, Ontario.

TANNERS' KNIVES

The Nellis Hardware Company, Vermilion, Alta.—Kindly let us know where we can procure Tanners' Knives and other tools.

Answer.—The Beardmore Belting Company, Limited, No. 37 Front Street East, Toronto, Ontario.

"1000-MILE" AXLE GREASE

The Toronto Hardware Company, 402 Dufferin Street, Toronto.—Can you tell us who are the makers of the Thousand Mile Axle Grease?

Answer.—The Leechburg Oil & Koline Company, Leechburg, Pa., U.S.A.

ARSENATE OF LEAD

F. C. McMaster, Brighton, Ont.—Kindly advise who makes Arsenate of Lead in Canada.

Answer.—The Canada Paint Company, Montreal, Quebec, and the Sherwin-Williams Company, of Canada, Limited, Montreal, Quebec.

"DOMESTIC JEWEL" RANGE

Messrs. E. O. Lindeblom & Company, hardware merchants, Scotsguard, Saskatchewan.—Can you tell us who are the makers of the Domestic Jewel Range?

Answer.—The Burrow, Stewart and Milne Company, Limited, Hamilton, Ontario, advise that they used to manufacture the Domestic Jewel Range, but they have ceased to make the stove, a long time ago. They further advise that all their patterns were destroyed by fire. They have only a few repairs available, which are for the front of the firebox and the bottom.

Effective Windows of Shaving Accessories

Effective Windows of Shaving Accessories—Some Attractive and Helpful Displays in London, Ont..

LONDON, Ont.—Some unusually fine window displays of safety razors, shaving brushes, strops and shaving soaps have been shown here this week and many of the arrangements might offer suggestions helpful to hardware merchants in arranging "pulling" windows. In one window the plan followed was to build in the center from unopened packages of razors an octagonal column about 18 inches high. This was hollow in the center and at the top in the open space was placed a large display card calling attention to "Shavers' Needs" and listing razors, blades, brushes, strops and shaving soap. The lettering was done in red and stood out well. On each side of the column were shown various priced razors in cases. The arrangement was a razor, then a brush, another razor, a brush in a box, a razor and another brush and so on across to the end of the window. Behind this was a similar arrangement only on a sheet of glass raised by placing under it at each corner a couple of closed razor cases. The general effect was a massed one which not only attracted attention but held it and brought in many customers.

Another display consisted also of a massed effect but without the big column in the center. The first row was made entirely of safety razors, variety being obtained by having one case open and another closed. The second row was raised on a sheet of glass supported by tins of shaving soap. On this row there were alternately a razor, then a brush and then a tin of shaving soap all the way across. A third row was raised behind the second and variety was obtained by setting individual brushes between two razors in cases. In the fourth row the arrangement was to set a razor between two brushes in cases. The background was composed of advertising helps and neatly lettered moderate sized display cards.

May Be "A Wolf in Sheep's Clothing"

Unscrupulous Leaders of Soviet Russia Abandoning Murder-Rape Policy in Attempt to Win Sympathetic Co-operation of the World in the "Save the Children Famine Fund"

A large proportion of the contributions toward relief work in Russia, in connection with campaigns now under way, will undoubtedly be expected from business men. For the information and protection of these business men Hardware and Metal reproduces herewith an article, to be followed next week with another, outlining some data on the subject.

We have been under the impression that Lenine and Trotsky were a couple of extremely clever, unscrupulous hypocrites for whom the world was handpicked by the Germans and certain allies, which they officially admit, and sent to head a movement for which plans had been carefully made, to take Russia out of the war and to place that country's wealth and resources in the hands of the promotion syndicate. By slogans and popular theories of handing the properties of the classes to the masses they made a great hit. They themselves, of course, never believed in any such ideals. They got their rivals and opponents out of the way by a gigantic system of organized murder. They prolonged the war and in that way were responsible for the killing and maiming of thousands of Canadian boys. Since the war they have carried on a persistent campaign for creating discontent in Canada—particularly among the wage earners to prevent their working.

Having looted Russia to the limit they are throwing down their dupes, the Bolshevists, blaming them for the wrecking. They are just like groups of financial highwaymen with which trusting investors here are too familiar. They are asking the world to come in and assist them to re-organize the company, buy more bonds. The first offerings did not meet with success. The public was suspicious of the looters. They called back the proposals and proceeded to sugar-coat them; to put the public in a friendly frame of mind for their reception. Their new propaganda was designed to show that the looters were really very great, kindly, in fact, saintly, men; public benefactors who had suffered from the actions of unscrupulous employees. It is true, Lenine and Trotsky admit, thousands of good Russian men were murdered and many more thousands of gentlewomen and girls raped but that was an error of judgement. They are repentant. They are sorry. They are changing the system. The murder-rape policy is being gradually abandoned. The sugar-coating is the linking up of "Save the Children Famine Fund," with the whitewashing of Lenine-Trotsky. A big-hearted genial Canadian, Colonel Mackie, rancher, contractor, promotor, recently made a flying visit to Russia and has come back full of the saintliness of the reformed Lenine-Trotsky crew of murderous highwaymen and the good things they have done and are going to do for Russia—and the old story of prospects of big buying orders for Canada and Russian concessions for Canadians. Under the auspices of the "Save the Children Fund," the gallant Colonel has set himself the task of correcting Canadian beliefs in the unsavory characters of these men.

We would be sorry to misjudge Colonel Mackie, but the fact is that so far all his utterances in interviews are about one-tenth famine relief and nine-tenths rehabilitation of Lenine-Trotsky. It is rather a coincidence that over two months ago a propaganda sheet issued by the Berlin Bolshevik agency told of this plan—boasted of its success in developing the appeal for famine relief into a big campaign for the financing of Soviet Russia by western capital. Now they will boast the Canadian Parliament is giving them moral recognition. Is this fair to Canadians?

Twenty Years Ago

Following items are reproduced from Hardware and Metal of March 1, 1902:

Brousseau and Frere, tinsmiths, etc., Quebec City, have registered partnership.

The old established business of John Lysaught Ltd., of Bristol, Eng., has recently been reorganized under the same name and management with increased capitalization amounting now to $5,000,000. This change does not affect their arrangement in Canada, A. C. Leslie & Co., of Montreal, continuing to act as managers of the Canadian branch.

Amiot, Lecours & Lariviere (incorporated) wholesale hardware merchants, etc., Montreal, have applied for a charter.

Alterations being made in Lewis Bros. warehouse, Montreal, are nearing completion. All the offices have been brought together now and the whole second floor will be used for them. The sample room when completed, it is claimed, will be one of the finest in Canada.

At the annual meeting of the Kamloops, B.C., Board of Trade, a letter to Andrew Carnegie was read and adopted, asking him for assistance towards the erection of a sanatorium somewhere in the dry belt of British Columbia.

The Canada Hardware Co. Ltd., of Montreal, have been forced to make changes in the arrangement of the departments to make more room. The private offices are being removed to the ground floor and the general offices in future will be on the first floor.

It has now been learned that the late Marcellus Hartley left a will. The estate had previously been estimated to be about $4,000,000, but it is thought that it will now amount to upward of $60,000,000. Mr. Hartley was head of M. Hartley & Co., New York, and president of the Remington Arms Co., The Union Metallic Cartridge Co., Bridgeport Gun Implement, etc. He died very suddenly about a month ago while attending a meeting of directors.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

VISES AND BAR CLAMPS

The Rae Machine Tool Works, of Hamilton, Ont., have marketed a new line of vises and clamp bars. These include woodworkers' vises, amateur and household type, machinist vises with stationary and swivel base, oval slide vises and self-locking pipe vises. They also have several sizes of bar clamps; the makers claiming that only the best material is used in their product. The parts of the pipe vises and bar clamps are made of malleable iron, and in the latter case all parts are interchangeable.

KITCHEN CUTLERY SETS

Landers, Frary and Clark, of New Britain, Conn., U.S.A., announce that they have recently made up various combinations of kitchen sets. These are mounted on cardboard for counter or display purposes. The nine piece set is called the Handy Andy No. 349, and consists of two kitchen knives and forks, a pallet-knife, a cake turner, slicer, bread knife and carver. Set No. 346 consists of six pieces, while another combination of four pieces is No. 344.

NON-SCALD SAUCE PAN

A Non-scald, Lock-lid, sauce pan has been placed on the market by the Aluminum Specialty Co. of Canada, 60 John Street, Toronto, Ont. The special features of this product pointed out by the manufacturers are that only one hand is required to drain the contents, as a coarse strainer is fitted in the cover for this purpose. It also has a fine strainer for liquids. This pan is claimed as specially adaptable for draining vegetables. The cover locks on the sauce pan, and is removed by pressing the special attachment on the handle.

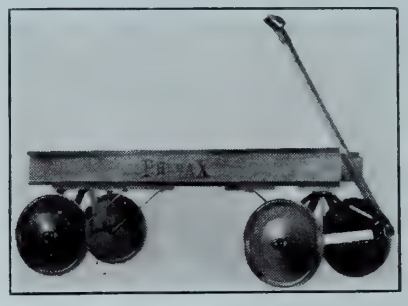
"ABRAZO" CLEANSER

The American Steel Wool Manufacturing Co., of New York City., announce that they have recently placed on the markets another aluminum cleanser named Abrazo. This product consists of six rolls of steel wool and also a cake of aluminum soap. The Abrazo soap is described by the makers as the feature of this new line. In addition to being primarily intended as an aluminum cleanser, the manufacturers claim that it is adaptable for cleaning and polishing many other classes of kitchen ware.

"PREMAX" COASTER WAGON

The Niagara Metal Stamping Co., Niagara Falls N.Y., U.S.A., recently announced the introduction of the "Premax" Road-Tested Coaster Wagon.

The manufacturers' explanation of the term "Road-Tested", is that this coaster wagon was subjected to a severe road test, before being placed on the market. They also claim a number of special improvements in design, particularly as regards the bolsters, roller-bearings, axles and general finish. This new wagon is made in the standard sizes of wooden box, and also is equipped with the new design of double disc steel wheels.



"Premax" Coaster.

TOOL ASSORTMENTS

Assortments of tools in cabinets, boxes and sets have been placed on the market by the Stanley Rule and Level plant of the Stanley Works, New Britain, Conn., U.S.A. The Stanley tool combinations have three different quantities offered in cabinets as follows: No. 850, and No. 852. These comprise 50, 35 and 20 tools respectively. The Box assortments are No 800 and No. 801, comprising 25 and 15 tools. There are also three different assortments of tools in sets, in quantities of 13, 12 and 6 tools these being numbered 850, 851 and 852. Full descriptions of these assortments will be sent upon request to the Stanley Works.

WOOD MARKING GAUGE

Messrs. E. Stearns & Company, hardware manufacturers, Syracuse, N.Y., U.S.A., advise that they have just placed on the market their No. 29 Wood Marking Gauge. The manufacturers claim that this is a new line in this class of products, the No. 29 Gauge, being made of polished beech beam, with japanned metal head.

WINDOW DISPLAY CONTEST

The American Steel Wool Manufacturing Co., New York City, have announced a prize window display contest, which commenced March 1. The regulations covering the contest provide that windows must feature steel wool products. Various trimmings and embellishments to assist the displays will be forwarded by the American Steel Wool Co., upon request. Cash prizes of $25, $15, and $5, are offered.

FAUCET KETTLE HOLDER

The faucet kettle holder, is a product designed to fit on any faucet, and hold the kettle or other utensil, while being filled with water. It is being placed on the hardware markets by Chas. E. Ellis, of Newark, New Jersey, and is described by the manufacturers as the "missing link in kitchen equipment."

The extent of usefulness of this new device is covered by the following claims submitted by the makers; (1) Saves time and strength. (2) Prevents burns from steaming kettle. (3) Protects and keeps clean the enamel in sinks. (4) Keeps bottom of the vessel dry. By means of a small clamp, it can be fastened securely on any sized faucet, and can be attached or removed with ease. It will also hold a bucket or other vessel having a handle.

"FIVE-BURNER" OIL STOVE

Two new models in Five-Burner Oil Cook Stoves, has been announced by the Perfection Stove Company, Limited, of Sarnia, Ontario. These are listed respectively as No. 35 and No. 39D. The manufacturers announce that the reason for introducing these new models is to meet the demand for a larger stove than the No. 34 Four-Burner model. The No. 35 stove is supplied with or without cabinet, and has a length over all of 64½ in. The No. 39D Model follows the same line with the exception of the built-in oven. This stove gives three independent cooking burners when the oven is in use. The makers further claim that the production of this new five burner range meets the general requirements of kitchen use all the year round, and not merely for one season There is a special re-inforcing pan connecting the legs on both of these models this additional bracing making them rigid. These stoves, and all burner combustion dia's, are identical with other models of Perfection Oil Stoves.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

PRICE developments on the current hardware markets include lower quotations on binder twine, wire nails, bright and annealed wire, galvanized and barbed wire, coiled spring and plain twist wire, fence staples, wood handles, horse shoes, the Enterprise line of food choppers, skate screws in cartons, chain pipe wrenches and whip lashes.

The new season's prices on binder twine attract special attention with a reduction of approximately 35 per cent. from last year's quotations. The discounts on hickory, ash, oak and maple handles are revised, but other products such as hay fork, hoe, rake and shovel handles, with whiffletrees, and doubletrees, at present remain unchanged in price. The easier price levels on various wire products reflects the recent trend of primary wire markets. A similar development has been recorded in ingot copper, with consequent lower prices on semi-finished copper and brass products in eastern quarters. Uncertain quotations are now evident on the heavier gauges of corrugated iron, the nominal prices now being shaded according to specifications and delivery required.

A brighter tone is generally apparent in the sheet markets, with a slight improvement in current activity noted in bar iron and steel. Dullness again rules in the scrap material markets, while ingot metals continue very irregular and although domestic prices are practically unchanged this week, varying fluctuations have been apparent in primary centres.

Montreal Markets

MONTREAL, March 2.—The announcement of the new season's binder twine prices is a feature of the hardware markets this week. These quotations show a substantial reduction from the opening prices of last year, the decline averaging 6 cents per lb. on the different qualities and lengths. Another feature of the markets is the further reduction in galvanized wires and barbed wire. Plain galvanized, coil spring and plain twist is reduced from 15 to 30 cents per 100 lbs., while barbed wire shows a reduction of approximately 30 cents per 100 lbs. Discounts on hickory, ash, oak and maple handles are revised, although up to the present such lines as hay fork, hoe, rake and shovel handles are unchanged, also whiffletrees, doubletrees and horse pokes. Solid sash weights are reduced to $2.65 per 100 lbs., and plumbers' oakum has a new lower price of $7.00 per 100 lbs. in 50 lb. bales. The easier tendency in copper on primary markets is now reflected on sheets, rods and tubing, these having been reduced in the past week. Standard compression work is reduced through changing the discount from 43 to 45 per cent., while bath cocks and standard gate valves also show a revision in prices. Tap soles and heels have new lower prices, also chain pipe wrenches. Ingot metals are still very dull, but the steady decline, evident in the past few weeks, is seemingly over, for the present at least.

LOWER PRICES ON PLAIN GALVANIZED WIRE

Montreal.

The recent easier tendency displayed in outside markets has now been reflected locally on wire and wire products, and plain galvanized wire is reduced from 15 to 25 cents per 100 lbs. New local quotations are the following:

PLAIN GALVANIZED WIRE:—Per 100 lbs.—8 to 8, $4.55; 9, $3.90; 10, $4.65; 11, $4.70; 12, $4.10; 13, $4.20; 14, $5.05; 15, $5.65; 16, $5.80.

FURTHER REDUCTION ON BARBED WIRE PRICES

Montreal.

A further reduction of approximately 25 cents per 80 rod reel, and 30 cents per 100 lbs. in catch weight reels, is now announced on barbed wire, this being the second price decline since the first of the year. Following are the new quotations;

BARBED WIRE:—Catch weights $4.30 per 100 lbs. In 80 rod reels, per reel, 2 x 5, $3.45; 4 x 6, $3.65; 4 x 4, $4.00.

BINDER TWINE PRICES CONSIDERABLY LOWER

Montreal

The new season's prices are now announced on binder twine. These quotations show a substantial reduction from the opening prices of last year, ranging from 5¾ cents to 7¼ cents per lb on the different qualities and lengths. Following are quotations now given; 650 ft. to the pound, 14 cts.; 600 ft. 13½ cts.; 550 ft. 12½ cts.; 500 ft. 11½ cts per lb. Terms; 5 per cent. spot cash, net October 1st; 1/8 cent off on orders of five tons and over, ¼ cent on orders of ten tons and over. Freight prepaid to nearest station in lots of 300 lbs. and over.

COMPRESSION DISCOUNTS SHOW REVISION

Montreal.

Discounts on certain lines of compression goods now show a revision, bringing quotations on these lines slightly lower. Standard compression work is now quoted at less 45 per cent., former discount being 43 per cent. Bath cocks are reduced through the discount being changed from 30 to 35 per cent., while the gate or straight way are now less 25 per cent. There has been an easier tendency in certain raw material markets, now reflecting on the finished products. There is said to be only a moderate trade in these lines, but an improvement is looked for with the promising indications of more extensive building operations in the spring months. Following are revised quotations;

Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	35%
Basin cocks, Fuller No. 0	30%
Do., Nos. 1 and 2	30%
Flatway stop and waste cocks, std	54%
Roundway stop and waste cocks, std.	46%
Brass steam cocks, standard	40%
Do., removable disc	58%
Globe, angle and check valves, standard	25%
Gate or straightway	25%
Emco Globe valves	33%
Emco check valves	33%
Jenkins Globe, angle, check and swing check	19%
Jenkins Iron body gate	33%
Jenkins gate or straight way	25%
Jenkins iron body, globe and angle	15%

GALVANIZED PLAIN TWIST WIRE $5.20 PER 100 LBS.

Montreal

Galvanized plain twist wire shows a further reduction of 30 cents per 100 lbs., and is now quoted locally at $5.20.

EASIER PRICES ON COIL SPRING WIRE

Montreal.

Current quotations on galvanized coil spring wire are reduced 15 cents per 100 lbs., and No. 9 is now quoted at $3.95, No. 12, $4.15 per 100 lbs.

LOWER PRICES ANNOUNCED ON PLUMBERS' OAKUM

Montreal

Plumbers' oakum again shows a reduction of 35 cents per 100 lbs., and is now quoted at $7.00 per 100 lbs. in 50 pound bales.

GRADUAL IMPROVEMENT IN PIPE MARKETS

Montreal

The anticipated improvement in sales of wrought iron and steel and steel piping would seem to have set in, at least inquiries are now allowing dealers to expect increased trade in the near future. For some time past, current business has been described as very seasonal, only small sorting orders forming the movement. However with the season now advancing, and indications that more interest is now being taken, the gradual betterment should continue. Quotations remain with list No. 54 the selling basis, with conditions again somewhat unsettled owing to certain price-shading, notwithstanding prevailing low levels.

FURTHER REDUCTION IN SOLID SASH WEIGHTS

Montreal

Solid sash weights are further reduced 35 cents per 100 lbs., bringing the quotation on these locally down to $2.65. Sections remain unchanged at $3.25 in one lb., and $3.50 in one-half pounds.

EASIER PRICES ON LEATHER SOLES AND HEELS

Montreal

A revision in prices on tap soles and heels is made, showing a reduction of approximately 12 per cent. Following are new quotations;

LEATHER SOLES—

No. 36, $3.80; No. 37, $3.50; No. 37½, $1.75; No. 10, $6.20; No. 11, $4.90; No. 14, $2.85; No. 15, $2.25; No. 121, $3.10; No 123, $2.80, doz.

Heels—Nos. 50, $1.40; No. 141, .90c.; No. 81, $1.00 doz.

CHAIN PIPE WRENCHES HAVE REDUCED PRICES

Montreal

Quotations on chain pipe wrenches show a reduction, with the following prices now quoted;

CHAIN PIPE WRENCHES

No. 31, $3.10; No. 32, $4.30; No. 33, $6.00; No. 33½ $7.75; No. 34, $9.50 each.

CERTAIN HANDLES HAVE REVISED DISCOUNTS

Montreal

Reductions in prices are made in some lines of wood handles, while others remain unchanged. Discounts are revised on hickory, oak, ash and maple handles, while hay fork, hoe, rake, shovel and manure fork handles have unchanged quotations. Whiffletrees, doubletrees, neckyokes, wood rakes and horse pokes also remain as formerly. Following are prevailing discounts:

WOOD HANDLES

All hickory handles	10%
All oak, ash and maple handles	Net list
Hay fork hoe, rake, shovel and manure fork	Net list
Whiffletrees, doubletrees and neckyokes	plus 20%
Wood rakes	plus 10%
Horse pokes	plus 10%

NO CHANGE RECORDED IN RANGE BOILERS

Montreal

There have been few developments on the local market for range boilers since the adoption of the new list some few weeks ago. While most distributors at that time adopted the new selling basis, there are a few wholesalers who are still selling at net prices. It was thought that this condition would be remedied before this date, and the new list prices and discounts adopted by all concerned. Current trading in these lines is still quiet, this undoubtedly being the chief reason for the present unsettled condition. It is pointed out that there is little variation between the new list prices with the discount, and the older net quotations, especially on the standard size boilers, and the general adoption of the new prices would mean little or no difference to the distributor, but would have a settling effect on the trade in general.

RANGE BOILERS—

Size	List Price
5 gallon	$13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

LITTLE VARIATION IN SHEET MARKETS

Montreal

Quotations on the various lines in the local sheet markets are this week unchanged, following the easier price levels announced in the previous two issues. The lower levels would tend to show that the trend of the sheet markets is, in general, still in the downward direction, although local distributors seem satisfied that prices will not record further reductions of a marked nature. Minor recessions may develop, they state, but certainly prevailing quotations are now well down to bottom when compared with replacement costs. Locally, the volume of trade is still limited, but with the month of February now at a close, a gradual, but healthy improvement, should be noted. At primary sheet centres, the improved condition continues, further inquiries developing and actual demands gradually increasing. Unchanged local quotations are the following:

BLACK SHEETS

10 gauge	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 40	4 70
16 gauge	4 50	4 80

AVERAGE VOLUME OF PIPE FITTING SALES

Montreal

Current quotations on the various lines of pipe fittings are unchanged since the revision of a few weeks ago. The volume of business is said to be of average proportions, but principally of small sorting orders. A steady improvement is now anticipated, dealer stocks being undoubtedly low and consuming demand should increase in the following weeks. Unchanged prices and discounts are as follows:

FITTINGS—

Cast iron fittings	30%
Bushings, cast	32%
Do., malleable	32%
Flanges	40%
Plugs	30%
Flange unions	30%

Class A	0 54	0 67
Class B	0 20	0 28
Class C	0 18	0 20

BOILER TUBE PRICES STILL COMPARATIVELY HIGH

Montreal

Current quotations on boiler tubes remain unchanged, with trade described as seasonably dull. In the earlier weeks of the year, business experienced a slight revival owing to repair work under way for spring activities, but in the past

weeks this has fallen off to an extent. While quotations are for the present holding unchanged, it is felt in some quarters that prices are not yet down to a corresponding level with replacement costs. Prevailing quotations on raw products are now within reasonable reach of pre-war levels, while boiler tubes are still at least 100 per cent. in advance. Therefore further recessions in prices would not be surprising. It is further pointed out that lower prices at the present time would undoubtedly assist trade, especially in the direction of repair work.

BOILER TUBES—	Seamless	Lapweld
1 inch	24 70	.....
1¼ inch	24 50	.....
1½ inch	24 00	.....
1¾ inch	26 00	26 00
2 inch	24 50	20 50
2¼ inch	27 75	23 50
2½ inch	32 50	24 50
3 inch	40 00	34 75
3½ inch	52 50	34 75
4 inch	65 00	44 00

IMPROVEMENT EXPECTED IN CORRUGATED SHEETS

Montreal

There is little or no change on the current market for corrugated sheets, with business described by local distributors as still quiet. With the month of February now passed, the present month is looked upon as the period when a gradual improvement will be felt. A slightly easier tendency is now noted in some quarters, owing to the easier levels appearing on flat sheets in recent weeks, but with the present quiet condition of trade, dealers look for little recession in prices in the immediate future. Following are list prices and discounts:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 00

Less 10 per cent.

Lighter than 24 gauge and wider than 2¼ ins. 75c a square extra.

SEASONABLE MOVEMENT IN SOIL PIPE AND FITTINGS

Montreal

There have been few developments recorded in the market for soil pipe in recent weeks. In the closing months of last year a reduction of quite substantial proportions was announced on these lines, bringing prevailing prices to a reasonably low level. Competition was at that time declared a deciding factor in reducing quotations, and during the following quiet months this has not played such a prominent part in the market. Distributors state that business is now quiet with little improvement looked for until the open weather in the following months a little later on. Following are unchanged discounts:

SOIL PIPE—	
2 and 3 inch	47½%
4 inch	50%

ONLY MODERATE MOVEMENT OF IRON AND STEEL

Montreal

With a noticeable improvement at primary steel centres, there is said to be little or no increased activity locally up to the present. In the opening weeks of February, there was a turn for the better, when inquiries were slightly more numerous, but these have again fallen off. There is, however, no reason for discouragement, according to local distributors, and the month of March is looked upon as the period when a gradual but healthy improvement will be felt. In primary markets, there is still a better feeling, the commencement of which developed a few weeks ago. Recent reports indicate that the turn has been reached, and operations should continue to increase from now on.

Quotations remain at revised levels of a few weeks ago, when prices on the local market showed a recession of 25 cents per 100 lbs. on the various lines of bar iron and steel.

Common bar iron, 100 lbs.	2 65
Refined iron	4 15
Irish finish machinery steel	2 70
Mild steel	2 65
Single reeled machinery steel	4 75
Band steel	2 65
Spring steel	4 25
Sleighshoe steel	2 65
Tire steel	2 85
Toe caulk steel	3 55
Harrow tooth steel, per lb.	2 80
Mining tool steel, per lb.	0 21½
Black Diamond tool and cast steel, per lb.	0 21½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

EASIER PRICES ON BRASS AND COPPER GOODS

Montreal

The trend of copper in the past few weeks on primary markets has now reflected in such products as brass and copper sheets, rods and tubing. Sheets in both metals are reduced 2 cents per lb., rods one cent and tubing 2 cents per lb. Lower quotations on these products are not surprising as the ingot metal has been decidedly easier recently, although this week an improvement is in sight. Following are revised quotations;

BRASS—	Base.
Sheets, base	0 24
Rods, base ½ to 1 in., round	0 22
Tubing, seamless, base	0 30

F. o. b. Montreal.

COPPER—	
Rods, ½ to 2 in.	0 29
Soft sheets, plain, 16 oz., and heavier	0 32
Plain tinned, 16 oz. and heavier	z0 36
Polished, and tinned, 16 oz. and heavier, lb.	0 41
Tubing, lb.	0 32

Above prices are full sheets and bars. Cut sheets and bars are 5c. per lb. higher.

INGOT METALS STILL VERY IRREGULAR

Montreal

Markets for ingot metals continue somewhat irregular, although during the past week there has been little change in prices, witth certain indications that the recent decline is almost at an end, for the present at least. The immediate outlook is somewhat uncertain, but the probabilities are that there will be a quiet period for a time.

TIN.—This has been fluctuating considerably, with a movement of from £4 to £5 per ton on a single day. In view of the heavy stocks available, it is difficult to see how there can be much advance. Local market is dull at 34½ cents.

COPPER.—London has been irregular, with standard showing some slight improvement, but this is probably due to short coverings. New York is slightly firmer, although it is too early to prophesy any definite advance. Quotations are unchanged, electro quoted at unchanged, but London has improved somewhat during the week. It is not likely that there will be any particular change in the near future. Local market is quiet at 6¾ cents.

SPELTER.—The London market remains steady at around £24-10s, but East St. Louis, after being quoted at $4.50 for some weeks, now shows signs of some improvement. Demand, however, still continues from hand to mouth. Quotation slightly easier at 7 cents.

ANTIMONY.—Despite the low level of prices, there is no indication of any improvement as yet, and apparently available stocks are still ample. Chinese is quoted at 6¾ cents, high grade English at 7¾ cents.

ALUMINUM.—This metal continues in an almost listless state on the market and prices are again easier at 24 cents.

Toronto Markets

TORONTO, March 2.—This week's price developments include reductions on binder twine, horse shoes, the Enterprise line of meat choppers, skate screws in cartons, and egg crates. The new season's quotations on binder twine supply the feature change with a reduction averaging thirty-five per cent. from last year's prices.

Various wire products, including wire nails, galvanized and barbed wire, plain and annealed wire, coiled spring wire, and fence staples in both black and galvanized now record varying reductions.

There is a brighter tone recorded in the sheet markets generally, with a similar improvement in bar iron and steel. Uncertain prices are now evident on the heavier gauges of corrugated iron, these now being quoted according to specifications and delivery required. An easier primary tone is noted in copper and brass products, with current levels on sheets, rods and tubing at present remaining unchanged. Dullness again rules in the scrap material markets, while the tone of ingot metals has recorded very little variation from the recent quiet plane.

REDUCED PRICES NOTED ON HORSE SHOES

Toronto

Lower quotations are now in effect on horse shoes. The revised prices on these products are as follows:

HORSESHOES—		Price per keg.	
		Sizse made larger less 20c.	No. 1 smaller
Patterns			
Light iron	0-7	6 90	7 15
Long-heel light iron	3-7	6 90	....
Medium iron	1-8	6 90	7 15
Heavy iron	6-8	6 90	....
Snow	1-6	7 15	7 40
New-light "XL" steel	1-6	7 35	7 60
Special-countersunk	0-4	8 75	....

Packing—Up to 3 sizes in one keg, 10c. per 100 lbs. extra. More than 3 sizes, 25c. per 100 lbs. extra.

F.o.b. Montreal and Belleville.

EASIER PRICE LEVELS ON MEAT CHOPPERS

Toronto

A reduction has been announced this week on the Enterprise line of meat choppers. The revised quotations on these products are as follows:

	Per Dozen
Size, No. 5	$27 00
Size, No. 10	47 00
Size No. 12	40 80

EGG CRATE PRICES NOW SHOW REVISION

Toronto

A revision has been announced on the Humpty-Dumpty line of egg crates, which brings prices on these products slightly higher than previously. The new quotation is $7.00 per dozen.

SLIGHTLY BETTER TONE IN GASOLINE DEMAND

Toronto

A slightly firmer tone has recently developed in the gasoline market, and prices have remained stable for a number of weeks. The easier trend which was noticeable during the winter months has now strengthened under the improved demand, coupled with the prospects for greater consumption with the advent of spring weather.

LOWER QUOTATIONS APPEAR ON SKATE SCREWS

Toronto

Another reduction has been announced in skate screws. The price for cartons of 12 boxes each is now 32 cents per carton. These quotations cover oval head bright, ⅜ x 6 and ⅝ x 6; also round head bright 7/16 x 6 and ⅝ x 6.

UNCERTAIN PRICES ON HEAVY CORRUGATED

Toronto

The situation in corrugated sheets is worthy of special attention. The quiet trade conditions have resulted in an easier market tone being recently apparent in these products, and while quotations and discounts nominally remain unchanged, yet it is noticeable that prices on heavier gauges are now practically open. The base price of $6.50 on the 28 gauge, with a discount of 10 per cent., is still in effect. The U. S. 26 gauge has been added to the list with a quotation of $8.00 per 100 square feet. Owing to competition, prices on 24 gauge and heavier, have been withdrawn in some quarters, while an open market is recorded in others.

Corrugated iron in heavier gauges than 26, is now being quoted according to specifications and delivery required. For smaller purchases, the following nominal price list generally prevails. Large shipments, however, will now be governed by the above revised conditions.

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No., 26 U. S., gauge	8 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins., 75 cents per sq. extra.

BRIGHTER TONE NOTED IN THE SHEET MARKETS

Toronto

The base quotations on black, blue annealed and galvanized sheets, respectively, are generally being maintained on current new business. It was reported at one time that some slight concessions were being made in certain quarters, but other reports have since indicated that where such conditions prevailed, the material was not up to standard. The domestic markets record a distinctly brighter outlook, and the expectations regarding improvement with the advent of spring are gradually nearing fulfilment. The demand for sheets and plates in southern primary centres is reported to be increasing steadily in volume each week. Mill operations, especially in tin plate, continue at a very satisfactory ratio for this period of the yar. Following are the current local quotations:

BLUE ANNEALED—		
10 gauge, base	3 75	4 50
12 gauge	3 80	4 55
14 gauge	3 85	4 60
16 gauge	3 90	4 65

BLACK—		
18—20 gauge	4 30	5 05
22—24 gauge	4 35	5 10
26 gauge	4 40	5 15
28 gauge	4 50	5 25

Charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	Queen's Head	Fleur-de-lis
28 gauge	8 00	7 00
26 gauge	7 75	7 25
24 gauge	7 35	6 85
22 gauge	6 90	6 40
18 and 20 gauge	6 75	6 25
Premier and Apollo.		
10¾ oz.	6 00	6 75
U. S. 28 base	5 60	6 35
U. S., 26 gauge	5 30	6 05
22 and 24	5 15	5 90
18 and 20	5 00	5 75
16	4 85	5 60
12 and 14	4 70	5 45

An extra 40c per 100 lbs. is charged for Keystone and Premier brands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10 3-4 oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds.

PLATES, CANADA—	
Dull 60 sheets	5 30
Ordinary, 52 sheets	5 25

PLATES, COKE TIN—	
IC, 20 x 28, 112 sheets	13 50
IX, 20 x 28, 112 sheets	16 50
IX, 20 x 28, 56 sheets	9 00

PLATES, CHARCOAL TIN—	
IX, 20 x 28, 56 sheets	14 00
IXX, 20 x 28, 56 sheets	16 00

PLATES, TERNE—	
IC, 14 x 20, 112 sheets	12 00

EASIER PRICES ON WIRE NAILS AND SIMILAR GOODS

Toronto.

The recent uncertainty noted in primary wire markets, has resulted in easier prices on various wire products. These changes include a recession of 25 cents per keg on wire nails, a similar reduction on fence staples, both black and galvanized, while the base price on bright wire is lowered 40 cents. Coiled spring wire, barbed wire, and the base price on galvanized wire, are other lines recording easier levels this week.

NOTABLE REDUCTION IN BINDER TWINE PRICES

Toronto

In announcing the prices for the season of 1922 on binder twine, manufacturers refer to the fact that certain competitive elements in the market have resulted in quotations showing such a remarkable drop from last year's level. The extent of the decline, averages around seven cents per lb., and thus represents a reduction of approximately 35 per cent. The new quotations not only reflect the trend of current primary movements, but are stated by the producers to result from the general determination to reach a substantial price basis for the season's trade, and one which would most likely prevail for the entire period without variance. Following are the revised levels:

TWINE BINDER	Per ft.
500 feet	0 11½
550 feet	0 12½
600 feet	0 13½
650 feet	0 14

Freight prepaid to nearest station in lots of 300 lbs. and over. (This applies to Eastern Canada only). Rebate of ⅛ cent. lb. on 10,000 lbs. and ¼ cent lb. on 20.000 lb.

Terms: 5 per cent. cash, net, Oct. 1st.

BETTER FEELING NOTED IN IRON AND STEEL

Toronto

There is a better feeling now generally reported in the iron and steel markets. Current local business is reported to have been fairly brisk in certain quarters, while the general undertone has registered improvement. Orders are not of a large character, but dealers report purchases on the domestic centres as noticeably more numerous. Inquiries also feature the prevailing attitude in larger volume. The prices recently in effect are being maintained, with some doubt being expressed in certain quarters as to what ultimate effect a coal strike in southern fields would have upon the primary market quotations. The following price levels, however, represent the average now appearing on the local markets:

IRON AND STEEL—	
Mild steel bars base	2 75
Mild steel bands, 3-16 in. base	3 25
Bar iron, base	2 75
Angle iron, base	2 85
Horseshoe iron	3 60
Tire steel	3 35
Spring steel	5 50
Sleigh shoe steel	2 85
Hoop steel	3 75
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	30 00
Mining drill steel	18 50
Cast tool steel, high grade	31 00
Cast tool steel, medium	18 00

PREPARE FOR BETTER TRADE IN ROOFINGS

Toronto

While improved sales for various roofing products are confidently expected in the near future, especially with the enlarged building programs under contemplation in general, yet the volume of business during the month just closed, is described as just holding its own with that recorded in January. As soon as spring weather arrives, better conditions in the roofing industry are anticipated. One distributor stated that they are preparing for a very good year, especially during the summer and fall months when many buildings will be reaching the stage of completion and requiring roofing.

EASIER PRIMARY TONE IN COPPER MARKETS

Toronto

Current prices on copper and brass sheets, rods and tubing, at present remain unchanged. While it is stated that the weaker tone in the primary copper markets may affect semi-finished products, the market tendency is described as having been anticipated to some extent by manufacturers and distributors, when announcing prevailing quotations. Prices on certain finished copper goods have recently recorded slight recessions. The following are the average quotations on the local markets:

BRASS—	
Sheets, base, per lb.	$ 0 23
Tubing, base, per lb.	0 25
Rods, base, per lb.	0 20
COPPER—	
Rods, base, per lb.	0 28
Soft sheets, plain, 16 oz. and heavier, lb.	0 30
Do., plain tinned 16 oz. and heavier, lb.	0 37
Do., polished and tinned 16 oz. and heavier, lb.	0 42
Tubing	0 29

ANTICIPATE IMPROVEMENT IN SOIL PIPE TRADE

Toronto

Conditions in the soil pipe market are nominally unchanged, with discounts on both soil pipe and fittings remaining at the revised levels quoted at the commencement of the year. Weather conditions are at present confining the market for these products, but anticipations of a good season in the building industry, is expected to be generally reflected in an improvement in the future tone. Following are local current discounts:

SOIL PIPE—	
2 inch	40%
3 inch	40%
4-inch	40 and 5%
5 and 6 inch	40%
8 inch.	net
FITTINGS—	
2 to 6 inch fittings	50 and 5%
8 inch fittings	net

DULLNESS AGAIN RULES IN SCRAP MARKETS

Toronto

The general tone of the scrap markets is described as weak and unsatisfactory. There does not appear to be much life in either the ferrous or non-ferrous industries. Copper scrap grades are remaining dull, with little interest being manifested on the part of consumers. In fact, one dealer stated that an air of depression is again prevailing throughout the entire trade. Iron and steel foundries are running at something lower than 50 per cent. of capacity, and this is another factor adding to the gloom surrounding existing conditions. It is expected that purchases will be small for some time. The scrap rubber market is still stagnant. The following are the usual dealer's buying averages for fairly large quantities:

Gross Tons— Scrap Iron		
Heavy melting steel (Hamilton)	$11 50	$12 00
Borings and turnings	2 00	3 00
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	6 50	7 50
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	15 75	16 75
Stove plate	11 50	12 00
Grate bars	10 50	11 00
Standard car wheels	13 50	14 00
Scrap Metals.		
Heavy copper and wire	10 50	11 00
Light copper	8 00	9 00
No. 1 composition	9 00	10 00
No. 1 comp. turnings	6 00	7 00
Light brass	3 00	3 50
Heavy yellow brass	5 50	6 00
Heavy lead	4 50	4 75
Tea lead	2 00	2 50
Scrap zinc	4 00	4 25
Scrap Rubber		
Boots and shoes	2 50	3 00
Lumbermen's rubber boots	1 50	2 00
Auto tires	0 50	1 00
Solid tires	0 75	1 25

SAGGING TONE NOTED IN METAL MARKETS

Toronto.

Developments in the ingot markets are chiefly confined to fluctuations in tin, and further recessions in the quotations on copper. With a rush to sell present holdings, prices on copper dropped down considerably on the primary markets. Lead is holding up fairly well, but the other metals continue to reflect the dullness which has been recently apparent.

COPPER.—A marked recession in prices on copper at primary markets featured the recent week's developments in this metal. Foreign demand has been practically nil, and with a rush to sell present holdings, noticeable on practically all sides, producers' quotations, both for prompt and futures, are now considerably lower. The market remains dull, with quotations at 17½ cents.

TIN.—The recent breaks in the London tin market produced quite a flurry among both buyers and sellers. The marke s, however, closed quiet at moderate levels, with primary quotations evidently awaiting future developments. The local prices continue around 35½ cents, with current trade quiet.

LEAD.—Consuming demand is stated to have been a little better in this metal, and the undertone is noticeably a little firmer. The local quotation is $6.75, with buying in small quantities.

SPELTER.—This metal has been very dull, with an easy tone noted in primary centres. The local prices remains at the lower level of 7.00 recently recorded.

ANTIMONY.—Antimony refuses to show any activity, remaining dull with very little demand. Quotations remain unchanged, Chinese being quoted at 6¾ cents, high grade English at 7¾ cents.

ALUMINUM.—This metal continues in an almost listless state on the market, it still being the dullest of metals. Quotations are unchanged at 25 cents.

London Markets

LONDON, March 2.—Among the price reductions recorded on the local hardware markets this week are such products as brass compression work, square head stop cocks, rubber belting, shaft repairs with nickel-plated tips, whip lashes, barrel churns and shelf-lock step ladders.

There is stated to be an improved demand for Spring lines, with current business in this district recording a general increase. The optimistic outlook previously reported, has been substantiated by a better tone in trade conditions, coupled with an improvement in current activity.

NEW REVISED PRICES ON BARREL CHURNS

London

A readjustment has recently been made in the prices on barrel churns. These are now quoted at the following levels:

BARREL CHURNS	Hand	Power
No. 0	9 75	....
No. 1	10 05	13 05
No. 2	10 65	13 65
No. 3	11 40	14 40
No. 4	13 80	16 80
No. 5	14 55	18 10

REDUCED PRICES GIVEN ON STEP LADDERS

London, Ont.

Quotations on certain makes and styles of step ladders have also been revised. The price of the shelf-lock ladder has been reduced to the level of 28 cents per foot.

LOWER QUOTATIONS ON COMPRESSION GOODS

London, Ont.

Through revised discounts being quoted on brass compression goods some easier prices are now recorded in these lines. Standard compression work is now quoted at 45 per cent. off, compared with the previous figure of 43 per cent.; while square head brass stop cocks now have a discount quotation of 43 per cent.

MODERATE SALE FOR SHOVELS AND SCOOPS

London, Ont.

Quotations on spades, shovels and scoops, remain unchanged at the discount level of 55 per cent. There is stated to be a moderate sale for these products during recent weeks.

EASIER PRICE LEVELS ON SHAFT REPAIRS

London

Shaft repairs, with nickel-plated tips are now priced at $4.50 per dozen, this representing a reduction on these products.

REVISION IN DISCOUNT ON RUBBER BELTING

London, Ont.

A reduction has been put into effect this week in the quotation on reliable rubber belting. This is now priced at 60 per cent. off.

LOWER PRICES NOTED ON PUSHLESS HANGERS

London, Ont.

Easier prices are recorded this week on the Moore line of pushless hangers and push pins. These are now priced at $1.20 per dozen packages.

REDUCTIONS APPEAR ON WHIP LASHES

London, Ont.

A reduction has been made in prices on whip lashes. These are now quoted at the following levels:

WHIP LASHES

3½ feet—$1.90; 4 ft.—$2.20; 4½ feet—$2.40; 5 ft.—$2.70.

LITTLE VARIATION IN TURPENTINE PRICE

London, Ont.

Although turpentine in some quarters is reported with a slightly easier tone this week, quotations on the local market generally remain unchanged. A fairly good demand is recorded at the following levels:

TURPENTINE—	Imp. Gal.
1 bl. lots	1 40
2 to 4 bbl. lots	1 39
5 gal. lots	1 55

HIGHER PRICES REMAIN ON LINSEED OIL

London, Ont.

The recent higher prices on linseed oil remain in effect this week, but it is noticeable that some fluctuations have been recorded in flax seed markets. How these changes will affect linseed oil is hard to determine until the real strength of the current movement is accurately gauged. Following are prices generally prevailing:

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls., per gal.	1 15	1 18
3 to 5 bbls., per gal.	1 14	1 17
6 to 9 bbls., per gal.	1 12	1 15

Less barrels, add 15 cents gal.

RECORD FAIR DEMAND FOR SKATE SUPPLIES

London, Ont.

A good sale for hockey and skating supplies is still reported in certain quarters. This demand covers such lines as skates, hockey pucks, leather skate straps, canvas skate straps, steel ankle supports, hockey sticks and gloves.

IMPROVED DEMAND FOR ALARM CLOCKS

London, Ont.

A good sale is also reported for alarm clocks since the recent revision in prices. Current quotations will be found on the prevailing market price pages.

ACTIVITY NOTED IN SYRUP SUPPLIES

London, Ont.

Syrup supplies such as sap pails, and syrup cans, are now reported to be registering fair activity. The following prices are in effect on these products:

SAP PAILS

Per 100: 2 gal. I. C. Straight, 18.00. 10 qt. Flaring, $18.00.

SAP SPILES

Per 1000: Eureka, $15.00; Per 100: S. M. P., $3.80.

SYRUP CANS

Per 100: ½ gal. I. C. $13.25. 1 gal., I. C., $15.25.

CROSS CUT SAWS IN SEASONABLE SALE

London, Ont.

Cross cut saws are among the various products at present recording a fair seasonable sale. The demand is stated as moderately good. There has been no change in prices.

POPULAR CALL FOR GLASS OVENWARE

London, Ont.

A good seasonable sale is now recorded for glass ovenware. The prevailing quotations remain unchanged, the Pyrex line being quoted at list less 33-1/3 per cent discount.

BETTER DEMAND FOR NAILS NOW REPORTED

London, Ont.

A more active demand for nails is now reported. This is expected to increase as the season progresses. Prices remain unchanged at the following levels:

Wire, $3.90 base.
Cut, 4.35 base.

FAIR REQUIREMENTS FOR WHITE LEAD IN OIL

London, Ont.

Booked spring orders for white lead in oil are now going forward. The current requirements are stated at fair for this season of the year. Base prices are unchanged at the following quotations:

WHITE LEAD IN OIL—	Tons.	Less Tons.
Pure, Per 100 lbs.	13 30	13 65
Elephant, per 100 lbs.	13 80	14 15

BOOKINGS OF POULTRY NETTING UNDERWAY

London, Ont.

Poultry netting orders are now being shipped. These products show no recent revision in prices, the following discount levels prevailing on both the 1 and 2 inch mesh, list less 12½ per cent.

SCREEN WIRE CLOTH ORDERS BEING SHIPPED

London, Ont.

Booked orders for screen wire cloth are now going forward. Prices remain unchanged at the following levels:

Painted black, $3.00 per 100 square feet.

Galvanized, $3.60 per 100 square feet.

ACTIVITY IN GARDEN AND HARVEST TOOLS

London, Ont.

Wholesalers are now delivering their Spring bookings for garden and harvest tools. These products remain at the quotation of list less 60 per cent.

NOTE SPRING ACTIVITY IN HORSE CLIPPERS

London, Ont.

The usual Spring sale for horse clippers and plates has now commenced. Following are the list quotations and discount on the Stewart make:

HORSE CLIPPERS

	List Less 25%
Horse Clippers No. 1	14 00 ea.
Top Plates for No. 1	1 00 "
Bottom do do	1 50 "
Heads complete for No. 1	3 50 "

REPORT FAIR SALE PREVAILING IN PUTTY

London, Ont.

A fair seasonable sale is reported for putty, with the prices remaining unchanged at the following levels:

PUTTY—	Per 100 lbs.
Standard, 100 lb. drums	6 30
Do., 25 lb. drums	6 65
Pure, 100 lb. drums	7 80
Do., 25 lb. drums	8 05

STILL REPORT FAIR SALES FOR FLASHLIGHTS

London, Ont.

A fairly brisk sale is reported as continuing for flashlights and batteries. Quotations are unchanged, with the Ever-ready Daylo line priced at list less 33 1/3 per cent.

EXPECT GOOD SEASON FOR WINDOW GLASS

London, Ont.

With the recent new higher prices now in effect on window glass, the current sales are described as moderate. New stocks are arriving, and a good season for glass is generally anticipated. The following quotations on single and double diamond glass apply to the revised list:

Single Diamond, net list
Double Diamond, net list.
Cut Lights, 75 per cent. off light list.

Winnipeg Markets

WINNIPEG, March 2.—A number of additional price reductions have been recorded on various hardware lines this week, including wood screws, sand paper, tire steel, brass safety chain, and the Universal line of food choppers. Trade conditions in general are reported as registering a slight but gradual improvement, and greater encouragement is being given to Spring optimism.

REVISED DISCOUNT NOTED ON WOOD SCREWS

Winnipeg.

The discount on wood screws has been changed whereby the net prices are lower. Following are the new discounts:

WOOD SCREWS

Flat Head, bright	82½%
Round Head, bright	80 %
Oval Head bright	80 %
Flat Head, brass	77½%
Round Head, brass	72½ & 5%

LOWER PRICES RECORDED ON SAND PAPER

Winnipeg.

A reduction in price is recorded this week on sand paper. Following are the latest prices:

FLINT PAPER (In Sheets)

	Ream	Quire
00	7 12	.37½
0	7 12	.37½
½	7 55	.40
1	8 45	.45
1½	9 98	.52½
2	11 55	.61
2½	13 25	.70
3	15 10	.80

REDUCED QUOTATIONS ON BRASS SAFETY CHAIN

Winnipeg.

Lower prices are quoted this week on brass safety chain and the following prices are now in effect:

SAFETY CHAIN

Per doz yards:—
00—85c. 0—$1.05. 1—$1.30. 2—$1.70.

DECLINE APPEARS IN TIRE STEEL QUTATION

Winnipeg

A drop in the base price of tire steel has been recorded this week. The new base quotation on tire steel is, therefore, $5.50.

REDUCTIONS ALSO APPEAR ON FOOD CHOPPERS

Winnipeg

New reduced prices are announced on universal food choppers. Following are revised quotations.

FOOD CHOPPERS

Each:—
0—$1.55. 1—$1.88. 2—$2.25. 3—$3.00.

SLIGHT REDUCTION IN RANGE BOILER PRICE

Winnipeg

A slight revision has been made in prices on the 30-gallon standard size of range boilers. Other quotations as yet, remain unchanged. Following are the prevailing list prices on these products:

RANGE BOILERS

Each:—

QUIET CONDITIONS NOTED IN SHEET MARKETS

Winnipeg

Business is very quiet in sheets and plates and there does not seem to be any movement toward declining prices. The unchanged prices are as follows:

STEEL SHEETS, BLACK—	
10 gauge	5 70
12 gauge	5 70
14 gauge	5 60
16 gauge	5 90
18-20 gauge	6 30
22-24 gauge	6 35
26 gauge	6 40
28 gauge	6 65
IRON GALVANIZED—	
Premier; Apollo and "Fleur de Lis"	
10¾ oz. or 28 Eng.	8 20
28 Am. or 26 Eng.	7 80
26 Am. or 24 Eng.	7 20
24	7 05
22	7 05
18 and 20	6 90
16	6 75

EASIER PRICE LEVELS GILLETE'S LYE

Winnipeg.

A new lower price is quoted this week on Gillette's lye. The new price is $7.-50 per case.

Hamilton Markets

HAMILTON, Ont., March 2.—With the completion of February as another monthly trade period, many comparisons are being made regarding the volume of business with the corresponding month last year and also the previous month of January. The result of such comparisons generally indicates that the many recent expressions of optimism and better outlook are now being substantiated by a gradual, yet noticeable improvement. A number of manufacturers and distributors state that business during February was ahead of last year. In some quarters, however, such a statement really means very little as certain industries experienced a depressing period in the early months of 1921. However, the tone towards improvement is more pronounced when comparisons are made with the initial month of the current year, and reviews of this nature generally show a greater degree of activity in both producing and distributing channels.

The prevailing keynote is centred around the remarkable increase in the volume of inquiry, coupled with the arrival of numerous small orders which general'y tend to keep both office, and shipping departments busy, but are disappointing in the total aggregate. Signs are prevalent that the anticipated Spring betterment is now approaching, but on the average, it is a moderate expansion which is looked for. It is recognized that there can be no rapidly extensive boom in primary trade conditions, but a conservative expectation of broader operations in the near future, offers encouragement to practically all phases of the hardware industry.

Conditions in the steel industry are maintaining the ratio noted in recent reports, while the immediate outlook in the sheet market particularly marks an occasion for renewed activity. Current stocks are generally admitted to be low, a development which has naturally resulted from the cautious attitude of buyers in recent months. One manufacturer pointed out that any expansion in demand would quickly deplete stocks, and with a marked increase in consumer requirements expected to become evident during the ensuing months, producers look for this improvement to be reflected in all branches of the trade.

The various building programs now under consideration reflect the future trend of construction activities, while increased operations in this direction will directly affect many hardware markets. Builders' hardware is naturally expected o experience a brisk season and many other lines receive indirect stimulatio through this seasonal activity.

One saw manufacturer pointed out that with a general building movement practically assured, the demand for small goods line, and other saw products, will naturally be increased. Manufacturers of household furniture are also more active, and improvement in these circles should result in stimu'ating trade among lumber dealers and similar branches of industry.

The fact that many price reductions have already taken place, gives rise to confidence in the stability of primary markets for the ensuing season. The additional element of low stocks is expected to produce a more accurate indication of the buying ability of the consumer, especially considering its application to more frequent turnover of retail stocks. Producers of kitchen utensils and kindred lines anticipate the arrival of a stimulation in demand for these products with the progress of the Spring and Summer seasons.

Current price revisions are noticeably less numerous than the proportion of changes evident during previous months. While reductions of both slight and moderate extent continue in the majority, yet some revisions to higher levels have been noted, a condition which is taken to indicate that prices in general are now reaching a more stable basis, although the ultimate duration of such a movement may only prove of temporary duration pertaining to the current seasons.

Pittsburg Markets

PITTSBURGH.—In most branches of finished steel trade a further increase in demand is observed this week. As practically all buying is for very prompt shipment, buyers having no occasion to anticipate their wants, the actual production of steel is the best measure of demand, and production has become still heavier, being estimated at 29,000,000 gross tons a year in steel ingots. The rate at the end of December was under 18,000,000 tons, so that the rate has gained by an average of more than a million tons a week since the end of the old year. The rate at the height of last autumn's demand was 23,000,000 tons, in October and November, so that already there is a gain of 25 per cent. yet it cannot be thought that the full force of the spring demand is as yet being felt in actual production.

Steel Production.—Instead of there being compaint about the volume of business, the steel makers regard the improvement as being easily the greatest that could possibly be expected, and in some quarters there is a little note of warning suggesting the possibility that things may be moving a trifle too fast. Some steel producers remark that they "only hope it will keep up" There is room for suspicion that perhaps the condition at the moment is the reverse of the position that plainly existed last summer, when production of steel was

(Continued on page 60)

Saving Effected by Adequate Painting

Despite Big Returns From Active Paint and Varnish Campaigns, This Industry Holds Small Place From Standpoint of Turnover—Good Prospects for This Year if Educational Effort is Applied.

DESPITE the results which have been secured by the use of special campaigns and other efforts on the part of both dealers and manufacturers, to increase the sale of paints, varnish, etc., the paint and varnish trade of Canada to-day occupies a position among the industries of the Dominion that is by no means where it should be. The paint trade is ranked, as far as volume of business is concerned, among such industries as the sale of five cent soft drinks, ice cream cones and other "small stuff" which is certainly not a position to be envied, neither is it a place warranted by the economies derived by the use of paint and varnish.

Co-operative effort among all branches of the trade is gradually improving the position of the paint trade from the standpoint of turnover, but there is a great potential business in paint and varnish in this country, and more aggressive methods will continue for a long time to bring forth encouraging results. An intelligent solicitation of property owners in the district served by the hardware merchant will very often bring forth surprising results. A great deal of money and energy has been spent on educational work as to the protective value of paint, but there are a great many people who can only be stirred to final action by personal effort. They have probably learned a good deal of the value of paint as a protective element but they hesitate to put this knowledge into effect in their own particular cases. A personal call from the district hardware merchant who can point out where paints and varnishes can be used to advantage, and who can provide estimates of the cost of the work, will frequently make a real customer out of such a vacillating prospect.

One Man in Charge

In putting into effect some of the plans which will help stimulate business in the paint department this year, one salesman or group of salesmen should be allotted the paint department and made responsible for it. This is especially the case in towns and cities of 1,000 to 10,000 population.

Dealing with the responsibility for the present unsatisfactory condition prevailing in many places, a paint manufacturer says manufacturers are more to blame for existing conditions than are the dealers, for the following reasons:—

First—Through insufficient education by the manufacturers of their own representatives, the majority of whom know little more about paint and varnish and their uses than the dealer they are attempting to sell.

Second—By having their salesmen cover too much territory, instead of allowing them to spend more time with each dealer.

Third—By making no attempt to teach their dealers how to make their paint and varnish departments pay.

Fourth—By wasteful methods of using, or rather misusing, and supplying advertising matter.

Fifth—By not making their dealers realize that their interests, aims and ambitions are the same as the manufacturers'. By neglecting the element of closer understanding and failing to make their dealers feel that their manufacturer is their best friend and partner.

Have Wider Vision

A Canadian paint manufacturer referring to the foregoing, states that four years ago very few manufacturers of paints and varnishes had the vision of the possibilities of the industry that they have to-day. Explaining what has brought about this change, this manufacturer stated:—

"Some years ago one or two or a few men, I don't know who or how many, could see a little farther into the future than some of the rest of us. They were seized with the idea that as an industry the day of individualism should end and the new vision of co-operation and education that they were possessed with, was preached by them in and out of season. During each succeeding year these men with hundreds of converts have been growing broader in their views until now we can look back and see our past mistakes and where we have failed in comparison to what we might have done."

This manufacturer pointed out that the same process of co-operation and education will eventually make its influence felt and be the means of bringing into being a co-operative family of manufacturers, salesmen, distributors and dealers, all working together with the one end in view of each doing his part intelligently to present the claims of our products to the consumer who in turn will be brought to a better appreciation of what an industry properly organized can do for him.

The Final Link

The possibilities for the sale of paint and varnish have only been scratched and intensive effort early in 1922 will, it is expected, bring forth a volume of business heretofore unknown. Little however, can be accomplished unless the retailer, who is the final link in the chain, realizes the possibilities involved and applies some effort along this line. The retailer is the man who can either apathetically hand over the counter a can of paint, ring up the change and go back to his cigar, or he can be exactly the opposite and hand over the counter with the customer's purchase some valuable information concerning the application of the paint, some suggestions of other lines which may be needed to make a good job, and probably the offer to personally examine the customer's property and make any recommendations necessary for renewal of paint.

The dealer's local advertising can be used to advantage in furthering the interests of painting and might be based on some of the following points.

Less cost of protection. Declines in paint prices have greatly decreased the cost of this form of protection. The premium on the insurance policy has declined to the extent where it is more than ever before worth while to apply paint for protection of property. Property values have not declined appreciably and the need for protecting the investment continues as necessary as ever.

Some ads might be along the line of protecting the millions of dollars' worth of farm property including buildings, implements and machinery, showing how paint prevents rot in wood and rust in metals. Barns, silos, fences and houses deteriorate rapidly if not painted.

PAINT CUTS RATE OF DEPRECIATION 5% to 10%

In the case of farm implements where reasonable care is not given, where repairs are delayed and repainting and revarnishing are omitted, implements depreciate an average rate of 15% to 20% a year and their real life is more than cut in half. Good care cuts the rate of depreciation on farm implements to less than 10% a year, according to authoritative records. Do your farmer customers appreciate this?

USING A RECAPITULATION SHEET

Continued from page 37

are actually combined, but that customers in one department are frequently good prospects for the other department and a mere suggestion is all that is necessary to greatly increase the extent of the customer's purchase in the store.

Here a homelike atmosphere prevails due to the suitable placing of the furniture, use of rugs, pictures, etc., and it is found that this atmosphere greatly helps to sell furniture.

SERVICE

CONFIDENCE

FAIR DEALING

Who Else Challenges?

SOME ONE who likes our way of doing business said: "You *sold me* on your straightforwardness, and your consummate faith in your ability *to do* what you claimed. After hearing and seeing your proposition I had but one choice and that was to challenge the broad statement you made. You won! I'm a booster."

This in substance was the statement:—

Without fear of contradiction we boldly state that, viewed from the individual case and circumstance, *no paint proposition in the Dominion of Canada offers greater possibilities for success than Lowe Brothers' "High Standard" Agency.*

Lowe Brothers cannot without a degree of co-operation from you, your clerks and your windows, have crowds flocking to your store—it is ridiculous to think otherwise.

By merely putting in a paint stock, we can not make you successful and rich overnight—such a suggestion is not only foolish but insulting.

We cannot even guarantee unconditionally to increase your sales to a point greater than you have ever enjoyed before—and *nobody else* can do this.

BUT—*we can, conditional upon a degree of co-operation and favorable store circumstances, guarantee increased business.*

A very bold statement, truly! Who will challenge it? If we can prove our statement—you need our agency. If we cannot, it is your prerogative to send our man about his business. The cost is ours in either case.

The Brush Department

Group Selling as Applied to Brushes

Sales of Paint, Varnish, Enamel, Etc., Suggest Broad Range of Suitable Brushes—Selling Brush Samples Keeps Stock in Good Shape.

First of a series of articles on brush selling, written exclusively for Hardware and Metal by an experienced Winnipeg hardware merchant

AN IDEAL plan for displaying brushes is to have a framed board covered with green or deep blue felt. On this board a sample of each style and size of brushes carried in stock. A board of this description makes a handy, practical, and striking display for window dressing and store use. Hang or place in a prominent position during the active season.

Some manufacturers will furnish a board of this style free, charging only for the brush samples accounted.

All types of brushes and brooms should be given prominent display in windows and front of store during the spring cleaning period.

Arrangement of Stock

The cheaper lines of varnish, paint, and kalsomine brushes can be placed in trays on a table or on the counter, prominently, where they act as a suggestion to customers, and can be examined freely.

Better brushes, such as those that come individually wrapped from the factory should be handled with more care. The manufacturer takes considerable pains to have these delivered in ideal condition. Nothing is more annoying than to buy a good brush and find by care'essness it has become shaggy, pulled or unshapen. Of these better types of brushes a sample can be wrapped and shown in a glass case. These are real tools and make a fine display. The stock should be left wrapped and handily but carefully stored. A good idea is to sell the sample when possible and put out a new sample to replace one sold. Change the location of your stock and displays repeatedly. If you do not, customers get the idea they know your stock and easily one third of it may never have been seen. They are also inclined to get the idea that it is the same goods they saw six months before whereas it may not have been in your store twenty-four hours.

Sales of Suggestion

A paint sale should suggest a paint brush, a painter's duster and possibly a steel wire painter's brush for removing old loose paint.

A floor-paint sale suggests a paint brush, broom, and scrubbing brushes. Possibly a finishing coat of good floor varnish and a varnish brush.

Aluminum paint sale suggests a bronzing brush and possibly a radiator cleaning brush.

A floor or linoleum varnish sale suggests a good varnish brush of fair size, and a hair push broom.

An enamel sale should suggest a fine varnish or enamel brush of suitable size for customer's job. It may also suggest closet bowl brush for toilet, bath tub scrub, and banister brush. (If white enamel, sale should never be made without enquiry if under-coatings desired. Invariab'y it should be recommended).

On auto enamel sale should also suggest enamelling brush, spoke cleaning brush, chamois, sponge and a good type type of shoe brush for dusting off the clothes and out the car.

A kalsomine sale should suggest kalsomine brush, varnish brush, enamel brush, and possibly paper layers brush. Invariably if people are kalsomining they are also varnishing or ename'ling and may be paper hanging.

A razor sale should suggest a shaving brush, a razor strop, and possibly other toilet brushes.

A separator oil sale suggests a good prospect for separator brushes. Most brush manufacturers show an ideal counter display assortment. Dairy districts should have this assortment on display at all times.

A retail hardware merchant, the writer knows quite well, made a card and on this he displayed a feeding bottle brush with the title of brush and price (which by the way was over 100 per cent. gross profit) and he has sold grosses.

Timely, helpful suggestions increase the volume of business and please customers. With every artic'e sold should go a knowledge of the article: its uses, application, and peculiarities. Pleased, satisfied customers count.

CORRECTION

In reproducing letter from the Blairmore Hardware Co., Blairmore, Alta., in the Feb. 11 issue of Hardware and Metal, a typographical error was made. It was stated in the letter that there were in stock 20 pairs of butts 241 D 23½ bought at .14 per pair. This erroneously appeared as 20 pairs at .40 per pair.

Paint Trade Notes

TO EUROPE FOR P & L

J. A. Nand, resident representative in Montreal for Pratt & Lambert, Inc., sailed on March 4 from New York for Paris and other continental points where he is going to look after Pratt & Lambert interests in Europe.

GET TOGETHER CLUB Y. M. C. A. NIGHT HELD BY SHERWIN-WILLIAMS CO.

Montreal.— Another brilliant affair was given by the Sherwin-Williams' section of the Get Together Club at the Ceneral Y. M. C. A., Montreal, P. Q. Several hundred "Get Togetherites" were there, all ready to participate with much enthusiasm in the "indoor sports" on programme. There were billiards, bowling, (for both boys and girls), free style swimming races, canoe races, water polo, an indoor curling bonspiel and a ladies' basketball game. An added attraction came in the form of continuous cabaret. The big feature of the evening, was the presentation of prizes by W. S. Fallis, vice-president and managing director of the Sherwin-Williams Co. There were about fifty prizes presented, ranging from sterling silver loving cups to tin bath tubs, rubber balls and other clever novelty toys.

HARDWARE AND SUGGESTED RECIPROCITY

(Continued from page 35)

Lower Rate on Coal

Schedule D lowered rates for Canadian imports of bituminous coal and for a few other articles, including a rate of 11 cents per 100 lbs. on Portland cement and hydraulic or water lime in barrels, bags or casks; 45 cents per ton on bituminous coal.

The extent of the suggested changes, both as compared with the tariff in effect in 1911 and certain subsequent amendments which bring this fairly well up to date, are given in a table shown elsewhere.

It is evident from a survey of this table that considerable revision will have to be made in the actual figures, as present tariff rates are in some cases lower than the reciprocity rate suggested in 1911.

Latest figures of Canadian and U. S. trade, necessary to establish a correct idea of the result of applying such an arrangement, are as follows:

For the calendar year, 1921, Canadian exports to the United States were valued at $338,000,000, while imports from the United States were valued at $555,000,000.

Boeckh's Brush News

PAINT AND ITS EFFECT

A Leading Magazine published the following article, the truth of which is daily becoming more apparent.

"What a power paint has to brighten, cheer and comfort our lives.

"Have we ever considered its transforming influence: Streets, where formerly the houses were dull, dark and uninteresting, are rendered bright, light and cheerful by its use. Gay, gladsome and comfortable looking are now the places, radiant in the sunlight, where there was a settled gloom and unattractiveness, before the painter's hand transformed it, walls, window cases, porticoes and verandahs. The humble cottage, as well as the pretentious mansion, is endowed with new life, beauty and dignity.

"The man who neglects the embellishment of his premises, and does not present an attractive exterior, will find that his merchandise looks unalluring, however good the quality may be. In reality, habiliments have much to do with success. Policemen, judges, and clergymen gain respect when clothed in their uniform or robes of office, say what we like. So we respect and frequent the shop where all is bright and clean. It may be but a coat of paint, but we, perhaps unthinkingly, pay respect to the "cloth" artificial though it may be."

But is paint alone the consideration? To be sure good paint is essential—likewise the Brush is of equal importance. Most people know this—but a reminder will not be amiss.

Below are a few of the ways to get people to buy.

Weekly Paint Markets

Montreal

MONTREAL, March 2.—Both linseed oil and turpentine quotations are unchanged on the local market this week, the higher levels on the former product being fully maintained, while turpentine also continues fairly steady. The flaxseed market continued its fluctuations practically the whole of the week, but at the close there was no weakness in evidence. With demands now increasing, and a shortage of the Argentine yield, Canadian and American seed supplies being formally recognized as none too ample, there would seem to be every likelihood of a firm market continuing. There are reports of European oil being offered on Southern markets, but according to those well informed, these offerings will not likely be sufficient to materially change the situation. Turpentine prices locally remain at $1.32 per gallon in most quarters, with some firms continuing to quote a few cents less. The market at primary centres was slightly easier during the week, but not to the extent to cause any recession locally. This easier tendency was reported to be due to unloading of supplies intended for shipment abroad, because of European demand not being quite so active in recent weeks. Receipts continue comparatively light and local distributors look for a steady market until the new crop in April and May at least.

There has been no increase in local quotations on window glass, notwithstanding higher prices appearing in other markets. While a general advance was anticipated by some, it would now seem that much will depend on local conditions, whether a revision will be announced in the near future.

LINSEED OIL MARKET STEADY TO FIRM

Montreal.

During the week little further change has developed in the local linseed oil market, recent higher prices being well maintained, and the undertone of the market continuing firm. Quotations given below are most general, although there are a few firms quoting a few cents per gallon less. This is due to the fluctuating condition of the seed market, each day bringing a variance of prices. In the past week, however, these fluctuations are not as violent as formerly and usually to the extent of only a few cents, with little or no strength being lost.

According to local crushers, there is still little relief found in the question of available seed for the future. With a comparatively small amount of Canadian and American seed this season, and the shortage of the Argentine crop, leaves little hope of other than a firm situation on the oil market for some time, at least well into the active season in the following months. Unchanged quotations for the week follow:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal	1 08	1 10
3 to 5 barrel lots, per gal...	1 06	1 08

Less barrels, add 10 cents per gallon.

LITTLE CHANGE RECORDED IN TURPENTINE

Montreal.

Local quotations on turpentine remain unchanged for the week, with $1.32 most generally quoted although some firms have a quotation of a few cents less. There is a gradual improvement in demand, but sales for the most part are still for small quantities. The situation of this product in Southern markets is slightly easier this week with quotations a few cents less. This, however, is only considered a slight fluctuation due to a slight temporary falling off in demand, principally European. Domestic consumption in the South also gradually increases and the future is more optimistic from week to week. The active season usually commences towards the latter end of this month, and while home consumption could not be favorably compared with demand from abroad during the past few months, there is every likelihood of this side being able to take care of all receipts in the very near future. There is, according to local distributors, every likelihood of this product remaining quite firm during the following weeks, and in all probability until the new crop in April and May. Receipts at primary centres continue light, and there is no indication of any great surplus for the remaining weeks from now until the active season. Following are unchanged quotations:

TURPENTINE—	Imp. gal.
1 barrel lots	1 32
2 to 4 barrel lots, per gal.	1 30
Broken lots	1 42

NO CHANGE IN WINDOW GLASS QUOTATIONS

Montreal

Although a new list, quoting higher prices on window glass is recorded on either market this week, there is no change in prices locally, up to the present. During the past few weeks a firmer tone has crept into the market, and it was thought by some distributors, that the new higher prices would be in effect before this date. However, notwithstanding higher prevailing costs, there is no definite move at present towards increasing local quotations.

During recent months there has been a certain amount of unsettlement locally in the window glass market. Although net list prices have been the selling basis, there have been concessions made, especially for attractive inquiries, and it is felt that this condition will have to be remedied before higher staple quotations are reached. For the present, then, Montreal quotations are at former net list prices, showing the first cut at $5.50 base.

PAINT SALES INDICATE ACTIVE SEASON AHEAD

Montreal.

Reports from manufacturers of paints, varnishes and allied products, still indicate an active season in the trade during the coming months. Orders are now coming to hand quite satisfactorily, and dealers in practically all sections have anticipated their requirements and ordered supplies. There was a little reluctance on the part of buyers to place orders until after the winter months, but there are now few cases where spring shipments have not been taken care of. Returns of earlier business with the paint houses are particularly encouraging when compared with last year, the increase being more noticeable in recent weeks. Quotations on all lines are remaining steady, with the undertone fairly firm owing to present levels of raw materials. It was pointed out by one local manufacturer this week that some lines are particularly firm in price, although there will, in all probability, be little change in the immediate future, owing to the advancing busy season.

Toronto

TORONTO, March 2.—Developments in the weekly paint markets revolve around the window glass and turpentine situations. An easier tone has become apparent in southern turpentine centres, which is attributed to the moderate demand, coupled with offerings from stocks being greater than the current requirements. In window glass some irregularity in quotations is noted, with some distributors in certain quarters still maintaining the previous lower price list.

Linseed oil quotations are primarily unchanged, the range in local prices still being evident. Fluctuations have occurred in the flax seed markets, but not of sufficient extent to affect oil

(Continued on page 60)

Beauty—that will not fade

—And Decotint Beauty is So Easily Secured

No intricate measuring or mixing of materials. Deco-tint merely requires the addition of cold water and it's ready for use.

Easy to apply, sanitary and durable, it is the most satisfactory and economical medium for the permanent decoration of all interior walls and ceilings.

It furnishes your customers with the answer to the home beautifying problem. And the range of Decotint colors is so wide—twenty-two delicate tints—that it is an easy matter for every customer to select the right combination for the job he has in view.

Let your customers know you handle DECOTINT. Order your supply now and include a stock of the other Deco-tint Blue Labeled Products listed here.

(Continued from page 58)

prices, as yet. The demand for Canadian flax seed continues, as a result of the moderate proportions of the Argentine crop.

FIRMNESS MAINTAINED IN LINSEED OIL

Toronto.

While some fluctuations are occurring on the flax seed markets, yet the primary strength in linseed oil is being generally maintained, and current prices show very little change. In fact, the range noted in domestic centres in last week's report remains in effect and covers the average quotations available. While the demand for oil has been of average proportions, yet the fact that the higher price levels are being maintained for several weeks, directly reflects the seed market conditions, and while the shortage of Argentine crops is apparent, an improved call for Canadian flax seed is naturally anticipated. The commencement of such a movement has already been featured in current market developments, but the duration or strength of the tendency is stated as depending entirely upon the current requirements for both seed and oil.

While some offerings of English oil have been noted on southern markets, yet this condition has not been sufficient to affect the domestic trend. Following is therefore, the list of local quotations, showing the range in prices noted:

LINSEED OIL—

	Per Gallon	
	Raw	Boiled
1 to 2 barrel lots	1 15-1 15	1 12-1 18
3 to 4 barrel lots	1 10-1 14	1 11-1 17
6 to 9 barrel lots	1 08-1 12	1 09-1 15

Less barrels, add 15 cents per gallon.

SLIGHTLY EASIER TONE IN TURPENTINE PRICE

Toronto

The speculative condition of the primary turpentine markets is illustrated by prevailing conditions in southern producing centres. With the prospects of the new crops gradually drawing nearer each week, holders of tanked turpentine are evincing some signs of anxiety regarding the possibilities of disposing of their present stocks at the current high price levels. During recent weeks, producers have been in the habit of marketing sufficient turpentine to care for the immediate demand, and as the quantity of new receipts diminished, so the call from stocks to satisfy current requirements became heavier. Thus prices were forced up to the recent higher levels. But the consuming demand for turpentine has not been of sufficient extent to enable all producers to dispose of their holdings, and with offerings now being made more frequently, some slight price recessions are noticeable in Savannah markets. The foreign demand is described as distinctly disappointing, while consumers generally are apparently adopting a waiting policy and merely purchasing for immediate needs. Similar conditions prevail on the domestic markets. Stocks are described as only moderate and while the demand has been of a quiet nature, yet current prices have reflected the primary market conditions. Some easier prices are likewise noticeable, the quotation of $1.34 per Imperial gallon in one barrel lots having appeared, while other prices are a few cents higher. The average quotation however, has now receded to the following levels:

TURPENTINE—	Imp. gal.
1 barrel lots	$1 35
2 to 4 barrel lots	1 34
5 gallon lots	1 50

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots—15 cents per gallon extra.

IMPROVEMENT NOTED IN CURRENT PAINT SALES

Toronto.

Keen interest is being given in many quarters to the current volume of sales for paint and varnishes. This is described as showing a gradual improvement, which is confidently expected to become more pronounced, with the advent of spring weather. Trade in varnishes and the various allied paint products, is described by manufacturers and distributors as as good for this season of the year, with the number and size of orders being satisfactory. Prices are steady, with the general undertone of a moderately firm nature.

PRICES ON WINDOW GLASS NOT UNIFORM

Toronto

Some irregularity has developed regarding prices on domestic glass markets. The new price list on window glass, showing an advance in the base on single diamond of 50 cents per case, has not yet been generally adopted on eastern markets. This condition is ascribed to local developments, and while the opinion has been expressed that the revised list will become general in the near future, the prevailing quotations are not uniform, as some distributors of glass are maintaining the previous lower list prices. The outcome of this situation is being keenly awaited by the trade, in view of the strengthening Belgian market, coupled with the anticipations for extensive building activity during the coming summer and fall seasons. Such elements are expected to be primary considerations in effecting a settlement.

FIRMER TONE RECORDED IN SHELLAC GUM

Toronto.

The firmness in shellac gum, which has been referred to in recent paint market reports, is now reflected in current quotations on shellac. The recent easier prices have now generally firmed up, and while the prevailing demand is described as being of a quiet nature, any improvement in this direction is expected to reflect in the future strengthening.

PITTSBURG MARKETS

(Continued from page 53)

far below a rate that would be in keeping with the volume of general business then being done. At that time stocks in the hands of jobbers and manufacturing consumers were being drawn upon. Steel production is now nearly three times the rate of last July, while of course general business is not three times as active. It has merely improved by a moderate amount. Thus it seems barely possible the buyers are now stocking up to a limited extent. In the trade one does not find any statements that this is being done, the common report being that all buying is from hand to mouth and that buyers will not replenish their stocks at all.

Bars, Plates and Shapes.—All finished steel products are not necessarily at bottom as to price, but whatever may be the case with some products, it is quite certain that bars, shapes and plates are very cheap, being quotable now at 1.40c, with a very occasional concession and with some small orders going at 1.45c or 1.50c. It is much more likely that two months hence bars, shapes and plates will be at 1.50c than at 1.30c, and thus there would be good reason for replenishing stocks in a conservative way. The market is at a lower level than buyers themselves expected it to reach, provided there were no reductions in freight rates and no further reductions in wages. While there continues to be much talk about freight rates there is really no definite prospect of their coming down in the discernible future, at least by enough to make much difference in the cost of producing steel, while as to wages there is no talk of reductions.

Tubes and Pipe.—No changes in list prices on tubular goods have been made since the reduction of December 15, but shading by independents in standard steel pipe has increased. More often than not in past years the independents have been giving an extra 2½ per cent. in addition to the usual trimmings of the leading interest, and of late there has usually been 2½ and 2½, while in the past week or ten days 2½ and 5 has been given not infrequently. Even this, however, is not sufficient to cause the leading interest to revise its discount card. It is running approximately as well as the independents, about 60 per cent.

PATTERNS FOR LONG RADIUS ELBOW

Continued from page 38

throat, considerable difficulty is always met with and owing to the narrow width of the throat line this is always a source of bother, unless a person makes quite a few elbows right along to keep his hand in practice.

Where elbows are laid out with seams on the throat and heel, the same procedure would be practised, only starting with the throat or heel line as shown in the pattern to the left. Otherwise the treatment would be identically the same.

Ramsay's Perfecto Cold Water Finish

A superior product especially adapted for use on interior walls and ceilings in schools, theatres, churches, public buildings and beautiful homes.

"PERFECTO" is noted for its beauty, harmony, adaptability, durability, sanitation and economy, besides having wonderful covering qualities.

Sold by all good hardware and paint merchants throughout the Dominion of Canada.

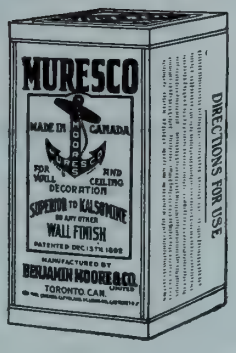
"Save the surface and you save all" *Paint & Varnish*



Good For Paint Departments

A complete line of more than satisfactory paints and finishes that build business in hardware paint departments by completely satisfying customers. Moore's House Colors, Morelustre Enamel, Moore's Automobile Finish, Sani-Flat, Mooramel, Moore's Shingle Stain, Impervo Deck and Porch Paint, Moore's Roof and Barn Paint, Moore's Floor Paint, Moore's High Gloss Enamel Paint, are some of the members of this popular paint family that are most familiar in over-the-counter sales. Take Moore's Roof and Barn Paint as an example. Farmers are constantly using paint around and about the farm and are good prospects for Moore's Quality-Made Barn Paint. It is a very elastic and durable paint, works easily, covers well, retains its color, will not peel or blister, and is waterproof. It is composed largely of oxides ground finely and thoroughly incorporated with our processed oil. This reliable paint is especially adapted for Barns, Stables, Sheds, Fences, Bridges, Roofs; in short, it is a preservative for all wood and structural iron work. Order now for Spring.

Sign and Send It *Now!*

Just a penny postcard requesting us to send you particulars of the Elastica Agency proposition. The work of a moment but a moment well spent. By return mail we will send you detailed information about

TRADE ELASTICA MARK.

The Complete Line of Paints and Varnishes

and will show you the many and varied advantages that will accrue to you through the exclusive agency for these widely known and popular Paint and Varnish Products.

Some of Canada's most successful paint dealers have found the Elastica Agency the straight road to bigger and better paint and varnish sales. The very fact that it offers a complete line—a paint, varnish, stain or enamel for every customer's requirements—is a point worth remembering.

Bear in mind that your post card enquiry involves no obligation at all. We just think you'll be interested and will be glad of the opportunity to place our proposals before you.

TINKER TOM'S TALKS.

No. 348

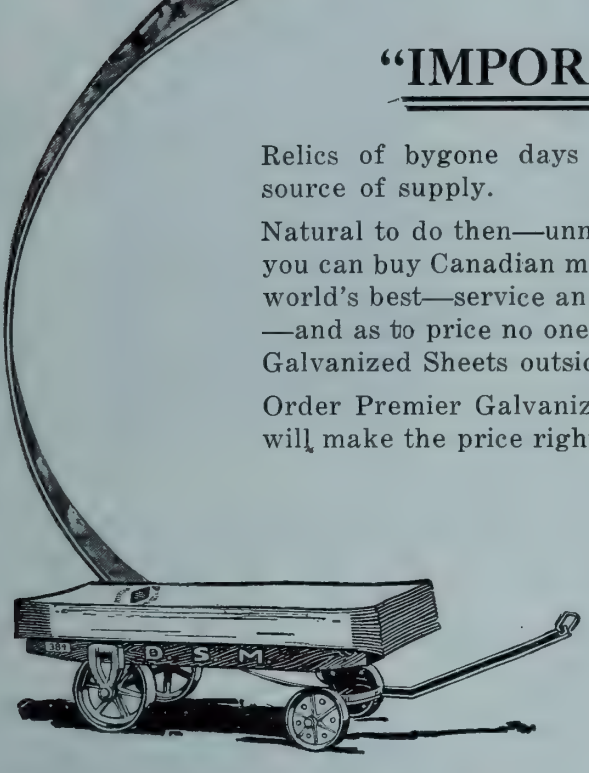
"IMPORT SHEETS"

Relics of bygone days when there was no Canadian source of supply.

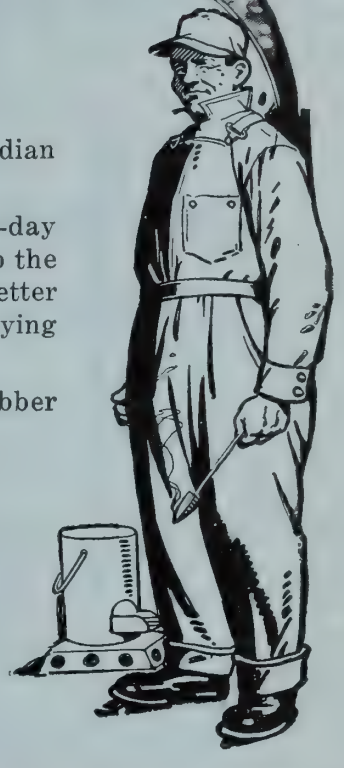
Natural to do then—unnatural and unwise now—To-day you can buy Canadian made sheets equal in quality to the world's best—service and deliveries, of course, far better—and as to price no one has yet saved a red cent buying Galvanized Sheets outside of Canada since 1918.

Order Premier Galvanized Sheets now and your jobber will make the price right.

TINKER TOM.



MADE IN PREMIER CANADA



CARTER'S

Look After Your Customers and the Sales will Look after Themselves

Every customer of your store is affected by your skill in buying and your knowledge of your goods. He wants the benefit of low prices, and he wants quality paints and varnishes, too.

And yet, paints, varnishes and enamels all look alike in the can. You are obliged to buy on faith.

Your answer is O. P. W.

The goods are right and the price is right. A generous margin of profit is left for you on a retail price that you can popularize.

Displays and Selling Helps

Real Ones and Lots of Them

For over seventy years Meakins & Sons have led the way in co-operative helps to the merchant through displays and selling helps.

This card of brushes on your counter or in your window attracts the attention that leads to business. Once they get attention Meakins brushes do all the interesting and convincing necessary to close sales. When backed by the merchants' skill and salesmanship, there is no let up to the continuous sales for which Meakins brushes have been famous nearly three-quarters of a century. Get the new 1922 catalogue.

John Millen, of Wilmette, Ill., a town of 6,000 population, finds Effecto more profitable each successive year.

"A remarkable thing about Effecto is the way it sells at all times of the year,"

says John Millen, of Wilmette, Ill. With other live P&L dealers, he says: "There isn't a really dull month on this line." Millen finds his Effecto stock turns over four or five times a year, netting an annual return as high as 140% on that part of his capital which is invested in Effecto.

Get some of this year-round Effecto business which sales-creating magazine advertisements and high-powered helps will bring you! Write *today* for particulars of this unusually attractive proposition on Effecto.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

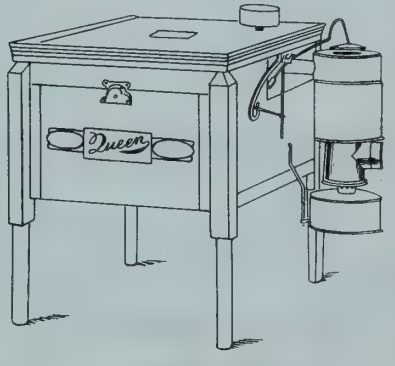
MILLIONS IN POULTRY

Year by year Canadians are learning that a steady dependable Revenue may be had from raising poultry, by the incubator method. Crops may fail, but chickens and eggs always have a market.

THE QUEEN INCUBATOR

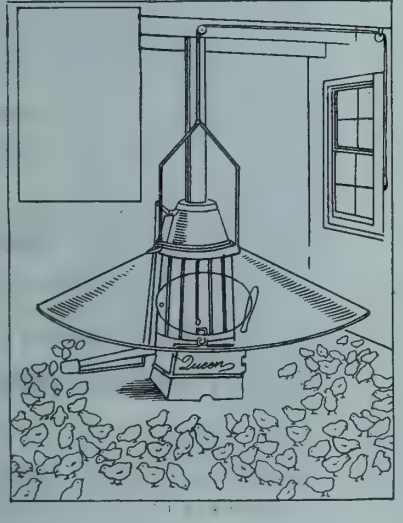
is famous for big hatches of strong healthy Chicks that live and grow. They are built of California Red Wood, with double insulation, copper heater and coils giving steady heat through a hot water system, Automatic heat regulator, easy to handle.

No. 1	2	3	5
Capacity 85	135	180	400 eggs



Style "K" lower in price than Regular Queen

No. 20	21	22	
Capacity 70	130	220	eggs



Every Incubator Owner Needs a Brooder Stove

THE QUEEN BROODER

is a new and improved design of Colony Stove that mothers the chicks, automatically controlled by thermostat like the incubator.

Full stock of these goods on hand ready for immediate shipment. Do not buy imitations until you investigate the merits of the Queen. Write for catalogue and information. Use long distance phone for urgent orders.

Building Prospects Look Bright

NEVER before have prospects for building looked brighter than they do at the present time and this means of course that furnaces will be in great demand this coming season.

Are you handling the right kind of furnaces to enable you to meet the public demand? If not, link up with us and get the lion's share of the furnace business in your town.

New Idea and Souvenir furnaces in both pipe and pipeless styles are made in sizes to suit practically every type of house, which enables our agents to meet every requirement without having to carry other makes of furnaces.

Our agency is still open in some towns and villages and your inquiry regarding same will have our prompt attention.

Link up with us and let us show you how profitable our agency will be for you. We will cheerfully supply you with circulars which fully describe our various styles and which will aid you in selling. Write for these today and also ask for price list.

Resolve to make this year your biggest furnace year. Link up with New Idea and Souvenir.

Barrett Roofings, Cements Industrial Paints etc.

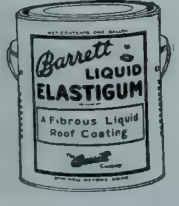
Sales-Pulling Advertisements All Over Canada

Advertising on Barrett Specialties will continue through 1922 to tell people why Barrett Products are better—why they are more economical—why they never fail to give satisfaction.

This advertising is certain to make new customers for Barrett dealers—and hold the old ones. Demand will be particularly heavy for the four popular products described below:

Everlastic Liquid Roofing Cement

Makes old "rubber" and other prepared roofs like new. Seals up the holes, gives a new surface, and adds years of extra service. Easy to apply and quick-drying. Comes ready for use in packages ranging from 1-pint tins to 40-gallon barrels and steel drums containing 43 gallons. Don't be without a stock.



Barrett Liquid Elastigum

One of the most popular products in the Dominion for keeping roofs of all kinds watertight under all conditions. Waterproof, durable and easy to apply. Even after years of service it is still tough and elastic. Put up in various size containers from 1-gallon cans to 40-gallon barrels.

Plastic Elastigum Patching Cement

Unequalled for repairing leaks in roofs, for re-lining gutters, stuffing cornices. Can be applied to wet or dry surfaces, and holds its waterproof qualities through all kinds of weather. Put up, ready for use, in packages of various sizes, from 1-lb. tins to barrels of about 600 lbs.

Everjet Elastic Carbon Paint

A proved protective paint of known reputation. Prevents metal from rusting. It dries quickly, forming a smooth, glossy surface, proof against acids, alkalis, and fumes. Put up in 1-gallon cans, lithographed (cases of one doz.), 5-gallon cans, ½ barrels (about 20 gallons), barrels (about 40 gallons) and steel drums (43 gallons).

Be sure to have sufficient stock of these fast selling products to supply the demand. If you have not already received your copy of our latest Price List—write for it today.

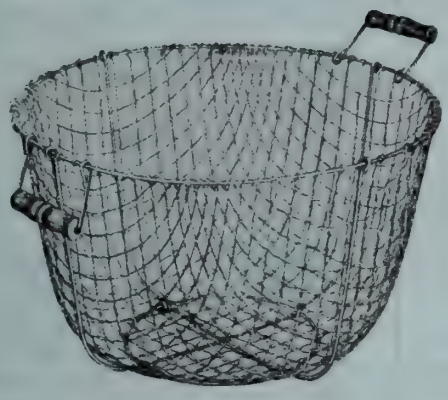
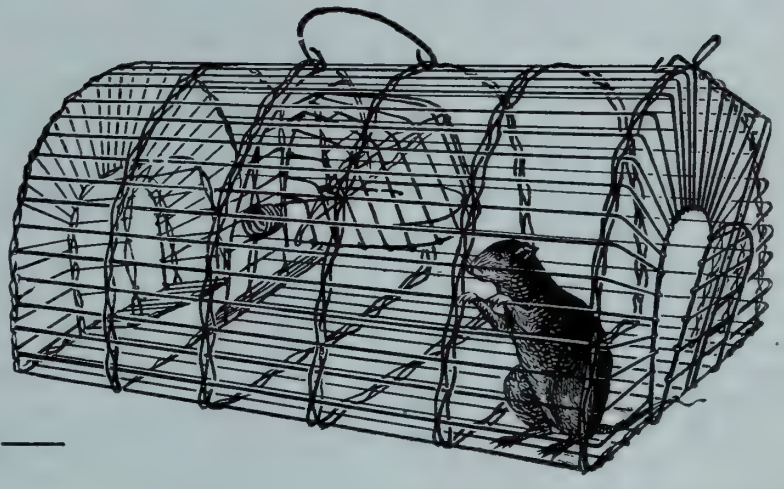
MACDONALD





Wire Goods—

This staunch, reliable Root or Fish Basket is made in three sizes: No. 60, approximately ½ bushel, with drop bail and wood grip; No. 61, approximately 1 bushel, drop side-handles with wood grips; No. 62, approximately 1½ bushels, drop side handles with wood grips.

Made with one-inch mesh of steel wire, heavily coated by the hot dip process, after making, which renders it rust-proof and solders every joint; well braced, smoothly finished. Fitted with one-inch band steel reinforcing around top, for hoisting on boats, at small extra charge.

Extensively used in harvesting root crops and indispensable on the farm. Extremely popular with fishermen in all fishing districts.

The effective, "sure-thing" Rat Trap, the Root Basket, our Wire Baskets and other products, are useful, handy products that sell briskly.

MACDONALD

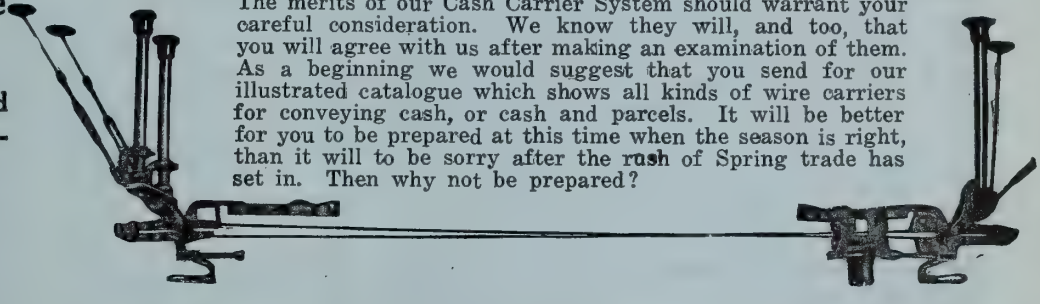
Why Not Have a Double Check on all Sales?

All kinds of Wire Cash and Parcel Carriers and Pneumatic Tubes.
Gipe-Hazard Store Service Co., Limited
113 SUMACH ST., TORONTO, ONT.



The merits of our Cash Carrier System should warrant your careful consideration. We know they will, and too, that you will agree with us after making an examination of them. As a beginning we would suggest that you send for our illustrated catalogue which shows all kinds of wire carriers for conveying cash, or cash and parcels. It will be better for you to be prepared at this time when the season is right, than it will to be sorry after the rush of Spring trade has set in. Then why not be prepared?

HARDWARE & METAL'S

unique circulation as proven by the A.B.C. Audit is due to 34 years of honest effort to give the retail trade the best possible service.

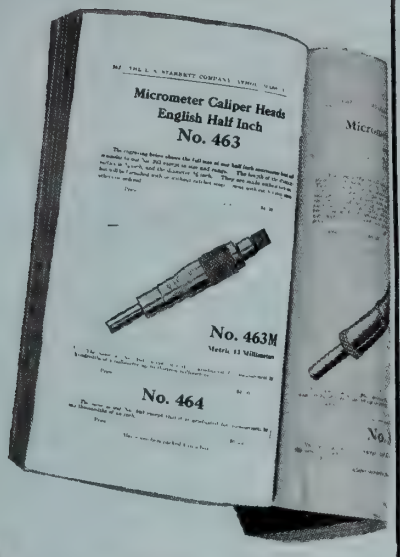
New Tools You Should Know



MICROMETER CALIPER HEADS

Nos. 463 and 464

Starrett Micrometer Caliper Heads are designed to facilitate the taking of fine measurements in connection with tools or machines to which they are attachable. Recent additions to the Starrett line of these micrometer heads are No. 463, a half inch micrometer head graduated to thousandths of an inch, and No. 464 which is similar to No. 463 except that it is graduated for measurement by ten-thousandths of an inch. Both No. 463 and No. 464 Starrett micrometer caliper heads are furnished with or without the Starrett ratchet stop. Consult your copy of the new Starrett catalog No. 22 "MA", page 162, for full description and illustration of these new tools. If you haven't a copy of this catalog handy, write for it—and also ask for the Starrett booklet— "The Tools Mechanics Buy." Both books will be sent promptly on request.
